Section 2, which is at point right now, is only the authority for the Federal Reserve to invest in housing paper. That is already in the authority that the Federal Reserve has. There is no need to put it into this bill, because when we do, we tie it in with the next amendment, section 3, which is the amendment that requires the Federal Reserve to buy $6 billion worth of paper.

The original bill in 1967, which gave flexible rates authority to the agencies of the Government, was my bill. Mr. PATMAN in his bill that year added things that changed the Federal Reserve Board. The House did not accept those. The next year the chairman introduced my bill, and we passed it without any argument whatsoever about those flexible rates.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. STEPHENS. I have only 5 minutes, but I will be glad to yield to you.

Mr. BARRETT. The gentleman knows that we need housing and it has to be low-cost housing in the farm areas, and we have supported the gentleman so that we could have low-cost housing in the farm areas. We are asking you here today to help us to get housing in the urban areas, where we have a great need because we have so much substandard housing.

Mr. STEPHENS. I would like to answer the gentleman. I have supported him. I know that the gentleman has supported me and the Farmers Home Administration, too. I am glad to say that I have had some hand in those proposals. I appreciate his action, letting me sponsor rural housing legislation. But I also have supported his housing proposals 100 percent, which help the urban communities. My district is half and half, half urban and half rural, and there is no difference between urban and rural housing. We have 50 percent more slums in rural housing than we have in cities, but I am as much for one as I am for the other. If you look at my record, you will find that what you say now is a red herring to divert attention from my objective in my amendment because I have supported both.

Mr. BROWN of Michigan. Will the gentleman yield?

Mr. STEPHENS. Let me finish this one point, and then I will yield.

The two amendments that I have, knock out the requirement that the Federal Reserve Board mandatorily buy $6 billion worth of paper in housing. It is for the purpose of preserving the duty that the Federal Reserve Board has to advise upon and to guide our monetary policy. If we are going to tell the Federal Reserve Board how they must do it, then we are setting a precedent. The next thing you know there will be someone who will say that we ought to make the Federal Reserve Board invest in highway paper. When we do that and tell the Federal Reserve Board what to do, then we are taking away their advisory authority. So I ask you sincerely to vote to support the committee amendments to delete section 2 and the subsequent amendment, section 3. I ask that it be done on both sides of the aisle for the purpose of protecting the Federal Reserve Board.

Mr. BROWN of Michigan. Will the gentleman yield?

Mr. STEPHENS. I yield to the gentleman.

Mr. BROWN of Michigan. I thank the gentleman for yielding.

I appreciate the recitation of the activities of the committee. Of course, the committee adopted the gentleman's amendment that is presently before us. I think the gentleman said that by the adoption of his amendment the bill became palatable. I can assume that he would consider the bill unpalatable without his amendment?

Mr. STEPHENS. That is correct.

Mr. BROWN of Michigan. Therefore I would ask the gentleman, if the committee amendment is not adopted, then I assume he intends to oppose the bill?

Mr. STEPHENS. I would have to find out what the alternatives are as to whether I vote for anything.

Mr. BROWN of Michigan. I thank the gentleman.

Mr. STEPHENS. Let me conclude by saying this, Mr. Chairman: When I say that this is no time to legislate, I feel like I ought to be home already. I have gotten to the point like a little boy in school when the teacher was asking him about the Shakespeare play "Macbeth." The teacher was trying to find out whether the little boy had read the assignment regarding the play. She asked him what it was that Macbeth said to Macduff, thinking that she would get the response in which Macbeth said:

> Lay on, Macduff, and damn'd be him that first cries "Hold, Enough!"

The little boy got up and replied: "I think he said, 'Hold on, Macduff. Damned if I don't believe I have had enough.' "

Mr. BARRETT. Mr. Chairman, I move to strike the requisite number of words.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. BARRETT. I am glad to yield to the chairman of the committee.

Mr. PATMAN. Mr. Chairman, I would like to call attention to the fact that this provision, section B in title II, is a very important provision. If the gentleman's motion prevails, it will also strike it out. I believe we will agree, when I read, that it is very important:

> It is the sense of the Congress that the authority conferred by section 14(b)(2) of the Federal Reserve Act be used to assist the Nation in meeting the housing goals contained in the Housing and Urban Development Act of 1968.

That is the action that provides for 2.6 million units a year. We have only about one-half of them now. If you strike this out, you are striking out a very valuable provision, one where we are saying it is the sense of Congress that the Federal Reserve shall support housing to the extent of providing the housing that the

Congress has already said is absolutely necessary for the people of this country; that is, 26 million units over 10 years time or 2.6 million units a year.

All we are saying is that it is the sense of Congress that the Federal Reserve cooperate and help us in doing that. I just wonder if you want to strike that out. I think it would be a bad mistake.

Mr. GROSS. Mr. Chairman, I move to strike the last two words.

Mr. Chairman, the consideration of this bill now becomes quite interesting. I notice that this bill was introduced by Mr. PATMAN for himself, Mr. BARRETT, Mr. REUSS, Mr. STEPHENS, and others. I believe we have heard from three of them. Mr. STEPHENS on one side and Mr. BARRETT and Mr. PATMAN on the other. However, they now seem to differ upon important provisions of the bill as introduced.

I do not see how, having introduced a bill carrying $6 billion—and that always interests me when I look at $6 billion in one place—it seems to me that it is rather important to inquire of these gentlemen as to what they were thinking about when they teamed up to put this bill together. Why are you now divided on this issue?

Mr. STEPHENS. Mr. Chairman, will the gentleman yield?

Mr. GROSS. Yes, I yield to the gentleman from Georgia.

Mr. STEPHENS. At the time I put my name on the bill it was with the distinct understanding, and so stated, that I would be at liberty to offer any amendment to any part of the bill. That is why I put my name on the bill.

Mr. GROSS. Apparently it was not the kind of bill you wanted to introduce at the time you introduced it.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Texas, briefly.

Mr. PATMAN. The bill was introduced by 20 Members. Mr. STEPHENS is one of them. He is correct in saying that he reserved the right to oppose certain provisions and, of course, had the liberty to do that.

Mr. GROSS. Of course.

Mr. PATMAN. And, when the bill came up these two items were the only ones stricken out that were meaningful. Mr. STEPHENS and four other Members voted against them. Of course, we are glad to have his support of the rest of the bill and they are all supporting the rest of the bill although the gentleman from Georgia is not supporting these two provisions.

Mr. GROSS. The gentleman is not saying there is a little trading going on here now?

Mr. PATMAN. No. This is a very important part of the bill because it rolls back interest rates to 6 percent on housing and provides $6 billion immediately.

Mr. GROSS. I did not want to sit here and think that there was something going on that did not meet the eye.

Now, as to title II, which is the authority for credit control and the unholy delegation of power which it contains.

Mr. Chairman, I have sat in this House and listened to the gentleman from Texas a good many times during the years I have been here. I have heard him stand here and castigate the Federal Reserve Board up one side and down the other. He spilled blood all over the carpet. Sometimes it was so red you could not distinguish the pattern in the carpet down here in the well of the House. He gave the Federal Reserve Board unshirted hell. Now he wants to delegate in this bill unconscionable power to the same Federal Reserve Board. Will the gentleman please explain that?

Mr. PATMAN. I would be very delighted to do so.

Mr. GROSS. I do not suppose you would want me to take a special order during which you could castigate the Federal Reserve Board?

Mr. PATMAN. No; I do not want you to yield me that much time. I have not been against the Federal Reserve Board on everything. On some things I have. I was for them on the consumer rules and regulations on credit and on the Holding Company Act. The administration took the position that it wanted the Federal Reserve Board to control the Holding Company Act.

I took the position that only the Federal Reserve could, because they have been doing a good job under the Holding Company Act, and I voted for it, and my views were sustained on that. So I am not against them all the time, but I am against them some of the time. I am for them when they are right and against them when they are wrong. They are wrong this time.

Mr. GROSS. I am going to await the next appearance of the gentleman in the well of the House on the subject of the Federal Reserve Board to see how he performs after giving that group almost untrammeled power.

This marriage of the gentleman with the Federal Reserve Board on this bill today is—I would not say it is a shotgun marriage—but it is unholy to say the least.

Mrs. HECKLER of Massachusetts. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, it is with some reluctance that I speak out on this bill because no bill could have a more persuasive title—"To lower interest rates and fight inflation, to help housing, small business, and employment, and for other purposes."

These indeed are desirable goals, and goals that I seek as a Member of this body. However, I feel compelled to speak today in favor of the committee amendment.

No one could be more concerned about the needs of housing than I as the wife of a gentleman who spent many years as a homebuilder and as one who spent many hours doing the legal work, searching the titles, preparing for and handling the paper passings.

I am aware of the needs in the homebuilding field, and the great need for housing throughout this country.

However, as a Member of this body I feel a responsibility also to question whether or not the mechanisms proposed will actually achieve the goals which we so desire. Unfortunately, I feel as a new member of the Committee on Banking and Currency, that I was not given the benefit of expert witnesses on this subject since no hearings were ever held on this bill. No witnesses came before our committee on this conglomerate bill who were able to guide a new member, or an old member, for that matter. Testimony has been mentioned which relates back to 1966 hearings on other bills prior to my great privilege of serving in this body, and so that also was not of any help to me.

Subsequently, even as late as this afternoon, I sought some illumination on the wisdom of the provisions which have been mentioned in the section before us now, and I called the Federal Reserve—and I should like to report back to the Members the information which I have received.

It seems that the operation of having the Federal Open Market Committee get into the housing market for the direct purchase of obligations is not a new idea. As a matter of fact, it has been debated, discussed, and also rejected by the Senate just as recently as last June. And in a letter from Secretary Fowler to Senator SPARKMAN dated June 18, 1968, right on this subject, the Secretary then said:

> This proposal would be extremely dangerous, unwise and counterproductive. It would provide a major break with regard to the traditional role of the Federal Reserve in our economy, and that the overwhelming bulk of informed financial opinion recognizes the dangers involved in such a course.

I was also informed this afternoon that this concept has been debated and discussed by as prestigious a group as the Bipartisan Mortgage and Interest Rate Commission, quite recently by the Dusenberry Commission which on two separate occasions rejected this concept.

I would just like to say at this point that I do not feel sufficiently knowledgeable to say that this concept is unwise. But what is patently obvious to me is that without in depth testimony and careful consideration by the committee, a precipitous move of this nature would be calamitous.

Mr. PATMAN. Mr. Chairman, will the gentlewoman yield?

Mrs. HECKLER of Massachusetts. I am very happy to yield to the gentleman.

Mr. PATMAN. The gentlewoman, I am sure, would not object to my pointing out that when this lost in the Senate, it was by one vote only.

Mrs. HECKLER of Massachusetts. It is the wisdom of the argument which I prefer to refer to, Mr. Chairman.

The CHAIRMAN. The question is on the committee amendment.

The question was taken; and on a division (demanded by Mr. WILLIAMS) there were—ayes 37, noes 31.

So the committee amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

> SEC. 3. During the twelve month period which begins on the date of enactment of this Act, the authority conferred by section 14(b)(2) of the Federal Reserve Act shall be exercised in the direct purchase of obligations of the Federal home loan banks, the Farmers Home Administration, and the Federal National Mortgage Association in the

aggregate amount of $6,000,000,000 bearing interest at the lowest discount rate in effect at the Federal Reserve Bank of New York at the time of purchase. This subsection does not limit the power or discretion of the Federal Open Market Committee as to other or additional purchases from the same or other issuers, or in the open market.

COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: On page 2, line 16, strike out all of section 3.

Mr. PATMAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, may I say we must evaluate this situation very carefully. We do not want the lack of housing money and the lack of adequate housing to continue in our country when there is a way of providing for the money. You have to have money. You might just as well talk about nothing else except the money when you talk about housing. This is talking about the money.

If you have the $6 billion, which this provides, and I hope you will listen to this because this is very important—this $6 billion will be provided for housing instead of providing it for speculation and for gambling and for many other different purposes—exactly the same kind of money. All we are doing is forcing the allocation of at least $6 billion of Federal Reserve credit for housing.

Now listen to this language—bearing interest at the lowest discount rate in effect that the Federal Reserve Bank of New York at the time of purchase—and that means 6 percent today.

There is no question but that rate will remain in the foreseeable future at 6 percent under this amendment. This is definitely $6 billion for low-income housing—for the people who cannot buy a house now. There are more irate citizens in America today because there is no opportunity for them to buy a house and that is the most important, other than any other question except high interest rates.

Those are two subjects that dominate every meeting where economic questions are discussed in America today. They have a right to be irate about the interest rates of 8½ percent and more. They have a right to be disturbed because there is plenty of money for everything else—for speculation and for gambling and for mergers and for conglomerates and creating money for every purpose except for housing.

How can you say that it is not right to use the same kind of money that has the same backing as all other money for the use of something that is very necessary in the lives of 55 million families in this country? They cannot properly rear and educate their children unless they have an environment that is satisfactory, and shelter, housing, is one of the requisites and necessary aspects of environment. And so this is the only vote that you will be able to cast before you go home for Christmas in favor of housing. Are you going to tell your constituents that you had an opportunity to act and failed to do so, or voted against the measure? Or are you going to tell them, "I had an opportunity to reduce housing interest rates over 8½ percent to 6 percent, but the bill was not brought up the right way. There was objection. Members talked too long. They did not give right consideration."

What do you care about consideration if it gets homes for your people at reasonable rates of interest? You have it here. This is the question: Are you going to vote for housing money at a reasonable rate of interest, 2½ percent less than what it is now, to reduce the rates on all housing loans? Do you want to do that, or do you want to say, "Oh, that is unorthodox. I do not believe in it. The bankers tell me it is unorthodox. Besides, it is unparliamentary. I am not going to vote for it"?

I feel so desperate about this thing that I would take a little unorthodox doctrine in a strained way, and I would take the parliamentary question and I would evaluate it carefully as against human needs. I would evaluate both, the question of being unorthodox and parliamentary. I would evaluate those elements with the human needs of this Nation. If you do that, my friends, you will not vote to strike out this provision. You will vote to leave it in there, because that is a definite vote. Nobody can say to you that you are against housing.

You can say, "Why, here is a vote—I voted for that $6 billion." If they say that you are for high-interst rates, you might say, "No, here is a bill for which I voted that provides for lower interest rates. It will lower the interest rate." I do not think Members will take that responsibility. I hope you do not. Let us give it a trial. Let us send the bill to the other body, and if they have another method that is better, they can put it on the bill, and when it comes back here we will accept it. But do not hit the poor people of this Nation on the nose, knock them out, and say, "I am against you. I had the privilege of voting on a $6 billion program."

I know housing is on dead center.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BROCK. Mr. Chairman, I move to strike the requisite number of words.

To clarify exactly how Members would like to vote on this measure, I think what the chairman was saying, if I may have the attention of the chairman, is that to sustain his position, Members should vote "no." Is that correct?

Mr. PATMAN. I think Members should vote against the Senate amendment, which would be "no" on the committee amendment. It would be "no."

Mr. BROCK. That is correct. If you are opposed to the $6 billion mandatory feature, your vote would be a "yea" vote.

Mr. PATMAN. That is correct.

Mr. REES. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this one section, section 3, which you will find on page 2 of the bill, deals with the Federal Open Market Committee. The Federal Open Market Committee buys and sells short- and medium-term Government securities. I think their portfolio is something like $54 billion. The Federal Open Market Committee is the day-to-day regulator of monetary affairs in the United States.

They can affect the interest rate, they can affect the amount of money in the economy by buying or selling these short-term and medium-term Government securities they have in their portfolio. The only type securities they do have are straight Treasury notes. They do not have any securities from the many Government agencies that issue securities, such as the Home Loan Bank Board that issues securities to put more money into the mortgage market, or the FNMA that issues securities for secondary mortgage market.

I feel it would be a mistake in the monetary policy of this country to give two or three different duties to the Open Market Committee. The Federal Open Market Committee should be a strict monetary regulation committee and should not have to deal with other types of preferred paper which at any one time is considered to be priority paper.

If this amendment passes, I do not believe it will put one nickle into the housing market. The reason I do not is that both FNMA and the Home Loan Bank Board are under the jurisdiction of the administration, and those who are running these two agencies are appointed by the administration.

If this amendment passes, it will merely mean these agencies will not sell $6 billion worth of money in their regular markets, but would go to the open market as they would be mandated to do.

This would not create new money. It merely means we use one method instead of another to sell Government securities.

Does it save money? I do not think it does. I checked in the market today in medium-term obligations and on the FNMA and the Home Loan Bank Board debentures and I found interest rates about the same. The Home Loan Bank Board and the FNMA can go to the open market today, and they will sell those securities at about the same price, give or take a quarter of a point, as the open market is buying and selling Treasury notes. I do not think this amendment really accomplishes anything.

If we pass this amendment, $6 billion will go into the market, but if we do not pass it, those same $6 billion will go into the market, as they do now under current FNMA and the Home Loan Bank Board practices.

I think this amendment is tinsel, and it is a very dangerous precedent to mix up a policy on the types of specified government securities we should sell through the Open Market Committee. I think we should sell Treasury notes and not mix up specific securities which represent a crisis now and what might be a crisis tomorrow. I think the amendment is tinsel, and I think it is dangerous. I ask for an aye vote on the committee amendment.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. REES. I yield to the gentleman from Texas.

Mr. PATMAN. Mr. Chairman, I tell the gentleman he is in error about the open market purchase. The gentleman did not mention the long-term housing problem. When we had this before our committee

a few years ago, we advocated the Federal Open Market Committee buy housing paper, and the Chairman of the Federal Reserve Board said if we would put that sense of Congress in, they would buy the housing paper. We put it in, and a year later, before the Joint Economic Committee, I was interrogating the gentleman from the Federal Reserve. They bought some housing paper on a repurchase basis, but only a very small amount. So they had the power to do it, but just quit buying it at all.

For that reason, after telling us they would buy it, we are now trying to make this mandatory. Does the gentleman not think that is fair, when they told us they would do it, and then when we put it in the law, they would not help us at all? That is the only way we can do it.

Mr. REES. There have been sales of FNMA and sales of Home Loan Bank Board paper and debentures in the market all along. There has not been any cessation of sales, and the interest rate on the medium- and long-term securities, I think, represents just about the interest rate that the Open Market Committee buys and sells securities for.

Mr. PATMAN. This is different. This is more of a negotiated deal by Congress. This is a limit of 6 percent. The gentleman is talking about sales where it would be bid up to 9 percent or 10 percent. The limit here is 6 percent.

Mr. REES. If the limit is 6 percent, they will not be able to sell them.

Mr. STEPHENS. Mr. Chairman, I rise in support of the committee amendment.

I will not take the full 5 minutes because the argument I used on section 2, the first amendment, applies here. I tried to cover both of them at the same time.

The amendment on which we have already supported the committee is not the important amendment. This amendment upon which we are now called to vote is the most important part of the two amendments we have been discussing. I say that we do need to do more in the field of housing. We do need to reduce interest rates. I agree wholeheartedly with that.

However, the proper way to do that is through appropriations, through fighting for more approriations for housing and for other agencies that will help on housing, and also insisting upon budgetary recommendations which will provide an orderly and higher amount of funds that will go into housing and in support of the housing market.

In conclusion of my statement I say this: if Members want to help destroy the effectiveness of the Federal Reserve, then they should vote "no" and against the majority of the committee. If they want to have an effective Federal Reserve to continue to operate, then they should vote "aye" with the majority of the committee.

Mr. Chairman, I yield back the remainder of my time.

The CHAIRMAN. The question is on the committee amendment.

The question was taken; and on a division (demanded by Mr. PATMAN) there were—ayes 30, noes 29.

So the committee amendment was agreed to.

The CHAIRMAN. The Clerk will read.

Mr. PATMAN. Mr. Chairman, in order to save time, I ask unanimous consent that the remainder of the bill be considered as read, printed in the RECORD, and open to amendment at any point. I assume that we would take up the committee amendments first, or as we get to them.

The CHAIRMAN. The Chair will state to the gentleman that the committee amendments will be taken up first if the request is granted.

Is there objection to the request of the gentleman from Texas?

There was no objection.

The remainder of the bill is as follows:

SEC. 4. The Federal Home Loan Bank Act is amended by adding at the end thereof the following:

"SEC. 26. (a) The purpose of this section is to improve the depth and liquidity of the secondary home mortgage market.

"(b) To carry out the purpose of this section, the several Federal Home Loan Banks, under the direction of the Board and acting through such agencies and instrumentalities as the Board may deem appropriate, are authorized, pursuant to commitments or otherwise, to purchase, service, sell, or otherwise deal in mortgages which are—

"(1) originated by members or by any institutions whose accounts or deposits are insured by the Federal Savings and Loan Insurance Corporation or the Federal Deposit Insurance Corporation, or

"(2) approved by the Board for the purposes of this section."

(d) Section 11(h) of the Federal Home Loan Bank Act (12 U.S.C. 1431(h)) is amended (A) by inserting "(1) pursuant to section 26 of this Act, (2)" immediately before "in obligations of the United States,", (B) by inserting "(3)" immediately before "in obligations, participations,", and (C) by inserting "(4)" immediately before "in such securities".

(e) Section 16 of the Federal Home Loan Bank Act (12 U.S.C. 1436) is amended (A) by inserting "(1) pursuant to section 31 of this Act, (2)" immediately before "in direct obligations", (B) by inserting "(3)" immediately before "in obligations, participations,", and (C) by inserting "(4)" immediately before "in such securities".

SEC. 5. (a) Effective as of the close of December 31, 1969, section 404 of the National Housing Act is amended

(1) by striking out "plus any creditor obligations of such institution" in subsection (b)(1), and the amendment made by this subdivision (1) shall be applicable also to any then unexpired portion of any then current premium year under subsection (b)(1).

(2) by striking out "and creditor obligations" in subsection (b)(2).

(3) by striking out "and its creditor obligations" in subsection (c).

(4) by striking out "and creditor obligations" each place it appears in subsection (g). The condition in the first sentence of that subsection shall be deemed to be met as of the close of December 31, 1969. The words "such year" in that sentence shall be deemed to include also the year beginning January 1, 1970.

(b) The Federal Savings and Loan Insurance Corporation is authorized by regulation or otherwise

(1) to make such provisions as it may deem advisable with respect to the order in which and the extent to which the components of a pro rata share of its secondary reserve shall be applied or be deemed to have been applied in the case of a reduction of such share through a use under the second sentence of section 404(e) of the National Housing Act or the first sentence of section 404(g), a transfer of part of such share under the third sentence of section 404(e), or otherwise.

(2) to take such action, including without limitation such adjustments and refunds and such deferrals of premium payments and other payments, as it may determine to be necessary or appropriate for or in connection with the implementation of this section or other legislation amending or supplementing said section 404.

SEC. 6. (a) Section 19(a) of the Federal Reserve Act (12 U.S.C. 461) is amended by inserting after the word "interest," the following: "to determine what types of obligations, whether issued directly by a member bank or indirectly by an affiliate of a member bank or by other means, shall be deemed a deposit for the purposes of this section,".

(b)(1) The fourth sentence of section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) is amended to read as follows: "The Board of Directors is authorized for the purposes of this subsection to define the terms 'time deposits' and 'savings deposits', to determine what shall be deemed a payment of interest, and to prescribe such regulations as it may deem necessary to effectuate the purposes of this subsection and to prevent evasions thereof."

(2) Section 18(g) of such Act is further amended by inserting after the fifth sentence the following: "The provisions of this subsection and of regulations issued thereunder shall also apply, in the discretion of the Board of Directors, to obligations other than deposits that are undertaken by insured nonmember banks or their affiliates for the purpose of obtaining funds to be used in the banking business. As used in this subsection, the term 'affiliate' has the same meaning as when used in section 2(b) of the Banking Act of 1933, as amended (12 U.S.C. 221a(b)), except that the term 'member bank', as used in such section 2(b), shall be deemed to refer to an insured nonmember bank."

(c) The first sentence of section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) is amended by inserting "or dividends" after "interest".

SEC. 7. Section 19(b) of the Federal Reserve Act (12 U.S.C. 461) is amended by adding at the end thereof a new sentence as follows: "The Board may, however, prescribe any reserve ratio, not more than 22 per centum, with respect to any indebtedness of a member bank that arises out of a transaction in the ordinary course of its banking at the end of thereof a new sentence as received or credit extended by such bank to a bank organized under the law of a foreign country or a dependency or insular possession of the United States.".

SEC. 8. Effective for the period beginning on the date of enactment of this Act and ending March 22, 1971, section 24 of the Federal Reserve Act (12 U.S.C. 371) is amended

(1) by changing, in clause (3) of the third sentence of the first paragraph, "80" to read "90" and "twenty-five" to read "thirty", and

(2) by striking in the first sentence of the third paragraph the comma before "shall" and inserting in lieu thereof "or, to the extent authorized by regulations issued by the Comptroller of the Currency, in the case of a large construction project not to exceed 5 years,".

SEC. 9. (a) The following provisions of the Federal Deposit Insurance Act are amended by changing "$15,000", each place it appears therein, to read "$20,000":

(1) The first sentence of section 3(m) (12 U.S.C. 1813(m)).

(2) The first sentence of section 7(i) (12 U.S.C. 1817(i)).

(3) The last sentence of section 11(a) (12 U.S.C. 1821(a)).

(4) The fifth sentence of section 11(i) (12 U.S.C. 1821(i)).

(b) The amendments made by this section

are not applicable to any claim arising out of the closing of a bank prior to the date of enactment of this Act.

SEC. 10. (a) The following provisions of title IV of the National Housing Act are amended by changing "$15,000", each place it appears therein, to read "$20,000":

(1) Section 401(b) (12 U.S.C. 1724(b)).

(2) Section 405(a) (12 U.S.C. 1728(a)).

(b) The amendments made by this section are not applicable to any claim arising out of a default, as defined in section 401(d) of the National Housing Act, where the appointment of a conservator, receiver, or other legal custodian as set forth in that section becomes effective prior to the date of enactment of this Act.

TITLE II—AUTHORITY FOR CREDIT CONTROL

Sec. 201. Short title

This title may be cited as the Credit Control Act.

Sec. 202. Definitions and rules of construction

(a) The definitions and rules of construction set forth in this section apply to the provisions of this title.

(b) The term "Board" refers to the Board of Governors of the Federal Reserve System.

(c) The term "organization" means a corporation, government or governmental subdivision or agency, trust, estate, partnership, cooperative or association.

(d) The term "person" means a natural person or an organization.

(e) The term "credit" means the right granted by a creditor to a debtor to defer payment of debt or to incur debt and defer its payment.

(f) The term "creditor" refers to any person who extends, or arranges for the extension of, credit, whether in connection with a loan, a sale of property or services, or otherwise.

(g) The term "credit sale" refers to any sale with respect to which credit is extended or arranged by the seller. The term includes any contract in the form of a bailment or lease if the bailee or lessee contracts to pay as compensation for use a sum substantially equivalent to or in excess of the aggregate value of the property and services involved and it is agreed that the bailee or lessee will become, or for no other or a nominal consideration has the option to become, the owner of the property upon full compliance with his obligations under the contract.

(h) The terms "extension of credit" and "credit transaction" include both loans and credit sales.

(i) The term "State" refers to any State, the Commonwealth of Puerto Rico, the District of Columbia, and any territory or possession of the United States.

(j) Any reference to any requirement imposed under this title of any provision thereof includes reference to the regulations of the Board under this title or the provision thereof in question.

Sec. 203. Regulations

The Board shall prescribe regulations to carry out the purposes of this title. These regulations may contain such classifications, differentiations, or other provisions, and may provide for such adjustments and exceptions for any class of transactions, as in the judgment of the Board are necessary or proper to effectuate the purposes of this title, to prevent circumvention or evasion thereof, or to facilitate compliance therewith.

Sec. 204. Determination of interest charge

Except as otherwise provided by the Board, the amount of the interest charge in connection with any credit transaction shall be determined under the regulations of the Board as the sum of all charges payable directly or indirectly to the person by whom the credit is extended in consideration of the extension of credit.

Sec. 205. Authority for institution of credit controls

(a) Whenever the President determines that such action is necessary or appropriate for the purpose of preventing or controlling inflation generated by the extension of credit in an excessive volume, the President may authorize the Board to regulate and control any or all extensions of credit.

(b) The Board may, in administering this Act, utilize the services of the Federal Reserve banks and any other agencies, Federal or State, which are available and appropriate.

Sec. 206. Extent of control

The Board, upon being authorized by the President under section 205 and for such period of time as he may determine, may by regulation

(1) require transactions or persons or classes of either to be registered or licensed.

(2) prescribe appropriate limitations, terms, and conditions for any such registration or license.

(3) provide for suspension of any such registration or license for violation of any provision thereof or of any regulation, rule, or order prescribed under this Act.

(4) prescribe appropriate requirements as to the keeping of records, and as to the form, contents, or substantive provisions of contracts, liens, or any relevant documents.

(5) prohibit solicitations by creditors which would encourage evasion or avoidance of the requirements of any regulation, license, or registration under this Act.

(6) prescribe the maximum amount of credit which may be extended on, or in connection with, any loan, purchase, or other extension of credit.

(7) prescribe the maximum rate of interest, maximum maturity, minimum periodic payment, maximum period between payments, and any other specification or limitation of the terms and conditions of any extension of credit.

(8) prescribe the methods of determining purchase prices or market values or other bases for computing permissible extensions of credit or required downpayment.

(9) prescribe special or different terms, conditions, or exemptions with respect to new or used goods, minimum original cash payments, temporary credits which are merely incidental to cash purchases, payment or deposits usable to liquidate credits, and other adjustments or special situations.

Sec. 207. Reports

Reports concerning the kinds, amounts, and characteristics of any extensions of credit subject to this title, or concerning circumstances related to such extensions of credit, shall be filed on such forms, under oath or otherwise, at such times and from time to time, and by such persons, as the Board may prescribe by regulation or order as necessary or appropriate for enabling the Board to perform its functions under this title. The Board may require any person to furnish, under oath or otherwise, complete information relative to any transaction within the scope of this title including the production of any books of account, contracts, letters, or other papers, in connection therewith in the custody or control of such person.

Sec. 208. Injunctions

Whenever it appears to the Board that any person has engaged, is engaged, or is about to engage in any acts or practices constituting a violation of any regulation under this title, it may in its discretion bring an action, in the proper district court of the United States or the proper United States court of any territory or other place subject to the jurisdiction of the United States, to enjoin such acts or practices, and upon a proper showing a permanent or temporary injunction or restraining order shall be granted without bond. Upon application of the Board, any such court may also issue mandatory injunctions commanding any person to comply with any regulation of the Board under this title.

Sec. 209. Civil penalties

(a) For each willful violation of any regulation under this title, the Board may assess upon any person to which the regulation applies, and upon any partner, director, officer, or employee thereof who willfully participates in the violation, a civil penalty not exceeding $1,000.

(b) In the event of the failure of any person to pay any penalty assessed under this section, a civil action for the recovery thereof may, in the discretion of the Board, be brought in the name of the United States.

Sec. 210. Criminal penalty

Whoever willfully violates any regulation under this title shall be fined not more than $1,000 or imprisoned not more than one year, or both.

TITLE III—SMALL BUSINESS ADMINSTRATION ACTIVITY

SEC. 301. The Small Business Administration shall promptly increase the level of its financing functions utilizing the business loan and investment fund established under section 4(c)(1)(B) of the Small Business Act (15 U.S.C. 633(c)(1)(B)) by $70,000,000 above the level prevailing at the time of enactment of this Act. A substantial proportion of this increase shall be applied to loans and investments to foster the growth of small business investment companies which service businesses owned and operated by persons in economically disadvantaged segments of the population. In the event that insufficient appropriated funds are available to carry out the provisions of this section, request for the necessary funds shall be promptly made by the Small Business Administration and cleared by all components of the executive branch having any functions with respect to such requests. The Small Business Administration shall submit to Congress a monthly report of its implementation of this section.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 3, after line 2, insert the following:

"SEC. 2. The authority conferred by section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g) shall also apply with respect to noninsured banks in any State if (1) the total amount of time and savings deposits held in all such banks in the State, plus the total amount of deposits, shares, and withdrawable accounts held in all building and loan, savings and loan, and homestead associations (including cooperative banks) in the State which are not members of a Federal home loan bank, is more than 20 per centum of the total amount of such deposits, shares, and withdrawable accounts held in all banks, and building and loan, savings and loan, and homestead associations (including cooperative banks) in the State, and (2) there does not exist under the laws of that State a bank supervisory agency with authority comparable to that conferred by this section, including specifically the authority to regulate the rates of interest and dividends paid by noninsured banks on time and savings deposits, or if such an agency exists it has not issued regulations in the exercise of that authority. The authority conferred by section 18(g) may not be exercised with respect to noninsured banks after July 31, 1970, and may only be exercised to limit the rates of interest or dividends which those banks may pay on time and savings deposits to maximum rates not lower than 5½ per centum per annum. Whenever it appears to

the Board of Directors that any noninsured bank or any affiliate thereof is engaged or has engaged or is about to engage in any acts or practices which constitute or will constitute a violation of the provisions of that section or of any regulations thereunder, the Board of Directors may, in its discretion, bring an action in the United States district court for the judicial district in which the principal office of the noninsured bank or affiliate thereof is located to enjoin such acts or practices, to enforce compliance with this section or any regulations thereunder, or for a combination of the foregoing, and such courts shall have jurisdiction of such actions, and, upon a proper showing, an injunction, restraining order, or other appropriate order may be granted without bond."

Mr. PATMAN (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment, which is printed in the bill and goes to line 15 on page 4, be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. PATMAN. Mr. Chairman, this amendment is the so-called Massachusetts amendment. This includes the mutual savings and loan associations of Massachusetts. They have a unique situation there. This will take care of them. The State worked with the Federal authorities in getting this amendment into the proper form. Every faction was consulted, and they agreed to it. Mr. HARRINGTON and Mrs. HECHLER sponsored the amendment, and there was no objection to it. I hope it is agreed to, because it is very much in the public interest.

Mr. STANTON. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman.

Mr. STANTON. This is the amendment that was offered by Mrs. HECHLER in the committee?

Mr. PATMAN. Yes. And by Mr. HARRINGTON.

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment. Page 4, after line 15, insert the following:

"SEC. 3. (a) The authority conferred by section 5B of the Federal Home Loan Bank Act (12 U.S.C. 1425b) shall also apply with respect to nonmember building and loan, savings and loan, and homestead associations, and cooperative banks in any State if (1) the total amount of deposits, shares, and withdrawable accounts held in all such nonmember associations and banks in the State, plus the total amount of time and savings deposits held in all banks in the State which are not insured by the Federal Deposit Insurance Corporation, is more than 20 per centum of the total amount of such deposits, shares, and withdrawable accounts held in all banks.

"(b) In addition to any other penalty provided by the Federal Home Loan Bank Act or any other law, any institution subject to this section, which violates a rule promulgated pursuant to this section and section 5B of the Federal Home Loan Bank Act shall be subject to such civil penalties, which shall not exceed $100 for each violation, as may be prescribed by the Federal Home Loan Bank Board by rule. Any such rule may provide with respect to any or all such violations that each day on which the violation continues shall constitute a separate violation. The Board may recover any such civil penalty for its own use, through action or otherwise, including recovery thereof in any other action or proceeding under this section. The Board may, at any time before collection of any such penalty, whether before or after the bringing of an action or other legal proceeding, the obtaining of any judgment or other recovery, or the issuance or levy of any execution or other legal process therefor, and with or without consideration, compromise, remit, or mitigate in whole or in part any such penalty or any such recovery.

"(c) Whenever it appears to the Board that any nonmember institution is engaged or has engaged or is about to engage in any acts or practices which constitute or will constitute a violation of the provisions of this section and section 5B of the Federal Home Loan Bank Act or of any regulations thereunder, the Board may, in its discretion, bring an action in the United States district court for the judicial district in which the principal office of the institution is located to enjoin such acts or practices, to enforce, compliance with these sections or any regulations thereunder, or for a combination of the foregoing, and such courts shall have jurisdiction of such actions, and, upon a proper showing, an injunction, restraining order, or other appropriate order may be granted without bond.

"(d) All expenses of the Board under this section shall be considered as nonadministrative expenses."

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 7, line 1, after "SEC. 4." insert "(a))".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 7, line 3, strike "26" and insert "31".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 7, line 11, insert after "are" the following: "originated by members or by any institutions whose accounts or deposits are insured by the Federal Savings and Loan Insurance Corporation or the Federal Deposit Insurance Corporation."

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 7, strike lines 15 through 20.

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 7, line 21, strike "(d)" and insert "(b)".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 7, line 23, strike "26" and insert "31".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 8, line 3, strike "(e)" and insert "(c)".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 8, line 5, strike "26" and insert "31".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 9, line 23, strike "for the purposes of this section".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 11, line 20, strike "$20,000" and insert "$25,000".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 12, line 10, strike "$20,000" and insert "$25,000".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 18, line 18, after the period strike the remainder of the line down through and including "tion." on line 23.

The committee amendment was agreed to.

Mr. WIDNALL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise at this time to explain the motion to recommit which I will offer at the appropriate time.

What it substantially will be is the Senate bill which has been approved by the Senate and which was sent over to our committee but never considered before our committee, with two changes.

The Senate bill extends until September 22, 1970, the authority and my motion to recommit would extend it to March 22, 1971, in accordance with the original bill.

It also would eliminate sections 6 and 7 of the bill as passed by the Senate. Let me point this out to Members of the House. Section 1 of the Senate bill extends the authority, as I just said, to March 22, 1971. That is the flexible authority to regulate the rates of interest paid by financial institutions on time and savings deposits. Failure to extend that authority could precipitate another rate

war between banks and savings and loan institutions such as we had in 1966.

Section 2 extends limited rate control authority over non-federally-insured financial institutions. In those States where uninsured deposits are greater than 20 percent of the total deposits and the State banking commissioner lacks comparable authority, this is a very important section.

Section 3 increases from $1 to $4 billion the authority of the Home Loan Bank System to borrow from the Treasury. In addition the section indicates it is the sense of Congress that the authority be used to help stabilize the mortgage market during periods of tight money.

Section 4 permits the Federal Reserve Board to limit the rates paid on commercial paper obligations issued by the holding company affiliates of commercial banks. Through this device large commercial banks have been able to raise funds by offering rates higher than rates permitted under the Board's regulation.

Section 5 gives the Federal Reserve Board authority to establish reserve requirements for Eurodollars produced from foreign-owned banks. Heretofore commercial banks had been able to evade the regulations of the Federal Reserve Board by borrowing from the Euro market. This would stop back-gap operations.

Mr. Chairman, I believe this is a creative and a strong bill. It was passed substantially by the Senate in order to allow us to meet obligations of continuing the regulation Q authority which has to be done unless we are going to have a shambles in the economy.

Mr. PATMAN. Mr. Chairman, will the gentleman yield for a question?

Mr. WIDNALL. I yield to the gentleman from Texas.

Mr. PATMAN. Now, you stated $4 billion here that they can borrow from the Treasury. But, there is no requirement that the Treasury will have to furnish it?

Mr. WIDNALL. That is correct.

Mr. PATMAN. That is right. In other words, you are saying if they do not have it they cannot borrow it.

Mr. WIDNALL. That is more than you have in your bill now.

Mr. PATMAN. Oh, no. We have the $6 billion and lower interest rates.

Mr. WIDNALL. You do not have the $6 billion in the bill. The $6 billion has been removed from the bill.

Mr. PATMAN. We will have it on a record vote.

Mr. BLACKBURN. Mr. Chairman, will the gentleman yield?

Mr. WIDNALL. I yield to the gentleman from Georgia.

Mr. BLACKBURN. Is it not true that we should adopt the motion to recommit because it is substantially the Senate version and there would be very little to be resolved in conference. Therefore, we could better assure ourselves of terminating this session of Congress at an earlier time; whereas, if we adopt the bill now before the House we may be here for some time while the conferees are trying to resolve the differences.

Mr. WIDNALL. The gentleman is correct.

Mr. BROCK. Mr. Chairman, will the gentleman yield?

Mr. WIDNALL. I yield to the gentleman from Tennessee.

Mr. BROCK. Is it not also true that if we pass the Senate bill, as amended, there will be $3 billion available for immediate assistance to homebuilding; whereas, in the current bill there is absolutely not one thin dime?

Mr. WIDNALL. That is corrcet.

Mr. REUSS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I should like to reply to the proposed motion to recommit. I urge Members to vote against the motion to recommit, and to vote for the bill which, in its present form as it emerges from the committee, carries the unanimous support of all the majority members of the House Committee on Banking and Currency.

Mr. Chairman, there has been much talk today about lack of hearings, even though we have had about a year of hearings; about the lack of notice, even though we have had abundant notice of our bill; but here it is proposed in the motion to recommit to vote for a bill passed by the other body which is not before the House, and which I doubt more than two or three people on this floor have seen.

Mr. WIDNALL. Mr. Chairman, will the gentleman yield at that point?

Mr. REUSS. Mr. Chairman, I cannot yield now. I will presently.

Mr. Chairman, let me recapitulate just what the democratic bill to lower interest rates, and fight inflation, to help housing, small business, and employment does:

We have had in this country now for more than a year a policy of supertight money. That has been the administration's sole way of fighting inflation. This has not even laid a glove on the big financial institutions. They have been able to buy out of the tight money by repatriating the Eurodollars, and by issuing commercial paper. With this enormous lending power, they have expanded their marginal lending for consumer durables financing, for business conglomerate takeover, for unnecessary business inventory expansion and capital expansion. That kind of lending is up 10 percent, and at a time when we have had a boiling inflation at the annual rate of 6 percent.

Housing, wage earners, small business, State and local governments, they are the ones who have suffered.

The Democratic bill before us seeks to give the President the power to do something about it—to control inflation without ruining half the economy in the process. It does this by permitting him to put reserve requirements on Eurodollars and on commercial paper; and by giving him the power which Mr. Martin has urged to have the Federal Reserve, if it deems fit, impose controls on consumer credit. It directly helps housing by broadening the secondary mortgage market, and by empowering the banks to do what the Federal Reserve urges—to increase their lending for housing. It puts definitely needed money into small business.

The issue is very clear. If you believe in lower interest rates, if you believe in fighting inflation, if you believe in helping small business, housing, State and local governments, and the wage earner, then vote against the motion to recommit and vote for the committee bill, and give President Nixon the finest Christmas present that a Democratic Congress could possibly give a Republican President.

Mr. WIDNALL. Mr. Chairman, would the gentleman yield?

Mr. REUSS. I yield to the gentleman from New Jersey.

Mr. WIDNALL. I would like to point out to the gentleman that the Senate bill, S. 2537, was referred to our committee before the present bill was taken up by the Committee on Banking and Currency. The Senate had full hearings on their bill.

Mr. REUSS. As we had on our bill.

Mr. WIDNALL. We had no full hearings on our bill. I just want to make the point that a great deal of consideration has been given to the Senate bill, which has passed.

Mrs. SULLIVAN. Mr. Chairman, will the gentleman yield?

Mr. REUSS. Mr. Chairman, I yield to the gentlewoman from Missouri (Mrs. SULLIVAN).

Mrs. SULLIVAN. Mr. Chairman, every Member of the House knows what our builders are up against. When the homebuilders came up to Washington for help just a few months ago every Member was sympathetic and all Members said they would like to help, but their hands were tied. Their hands would be untied today with this piece of legislation if it is passed the way we passed it in the Committee on Banking and Currency. Their votes today will tell just how much they want to help the builder build much-needed housing.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. BROCK. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I would like to just point out some erroneous impressions: The Senate bill which is the recommittal motion does have the same authority this bill does—control of Eurodollars and commercial paper.

I want to point out there is just one significant difference between the bill you have before you now and the bill we are going to offer you in the recommittal.

You have heard all day long about the plight of the homebuilder and the plight of the homeowner. Let me make it abundantly clear that this bill has no money in it whatsoever for any homebuilder or any homebuyer for that matter.

In contrast, the Senate bill provides for an increase of the Treasury authority from $1 to $4 billion to purchase these obligations. If you want to help homebuilding, vote for the recommittal.

Mr. PUCINSKI. Mr. Chairman, I move to strike out the last word and rise in support of the bill and in opposition to the proposed substitute. Mr. Nixon may very well need this legislation next spring and he may be grateful to Congress for giving him the tools with which to fight inflation.

Mr. Chairman, I would merely like to point this out to the Members of the House.

Last Friday I included in the RECORD on page 38947 a copy of a full page ad which appeared in the New York Times by Merrill Lynch suggesting three ways in which investors can save on their 1969 taxes.

If you read this ad, you may fully appreciate why the President may need the legislation being proposed by the gentleman from Texas.

There is strong reason to believe that the administration may fall short by as much as $20 billion of anticipated revenue from taxes for 1969.

The loss of the stock market values in 1969 is now in excess of $100 billion. This loss of value will be reflected in a lower tax yield to the Federal Government by "tax selling" in the closing days of 1969. In other words, at an estimated rate of 20 percent, it is entirely possible the Government could fail to receive as much as $20 billion it had expected to collect when estimates were made last year.

It is entirely possible, well meaning as a lot of people are, that this administration may find itself with a deficit of as much as $15 billion for the fiscal year 1970. You and I know if the Government will have to go into the money market to borrow $15 billion next year, there are going to be great inflationary pressures on the rest of the economy.

So I would like the House to consider this. If you do not believe what I am saying and if you do not agree with what I am saying, I suggest that you look at the CONGRESSIONAL RECORD at page 38947 for last Friday and read the full page ad by Merrill Lynch that I put in the RECORD. It describes in detail how investors can save substantial taxes by claiming a loss through "tax selling." Read what they had to say about "tax selling" before December 31. Draw your own conclusions of what effect this will have on the anticipated revenues for 1969 and what impact it is going to have on the budget. Then realize that the President may very well, even though today there is some objection to this legislation, be very pleased that he got this standby legislation when he may need it next spring. Because, if we do have to go into the money markets to borrow $15 billion or whatever the deficit may be to meet operating expenses, we all know that we would have new flames to fire inflation.

Even if the President tries to curtail expenditures, as he may well have to do, it would not be enough to avoid a deficit if tax selling does reduce our anticipated revenue from taxes in 1969.

So I submit to my colleagues in all honesty and sincerity that this bill may very well be a bill that the President will need very desperately next spring when we see the full impact of tax selling and a loss in anticipated revenues that we had expected in 1969. We had expected in 1969 revenues of $197½ billion and we have a budget of $192 billion. I believe the President was sincere when he said he was going to try to have a $5½ billion surplus. But when you consider this tax selling and its impact on the anticipated revenue of $197 billion, you see this matter could be out of the President's hands.

So I say to my colleagues to consider carefully the consequences if we fail to act on this standby legislation which I believe the President needs and might use next spring.

Mr. STANTON. Mr. Chairman, will the gentleman yield?

Mr. PUCINSKI. I yield to the gentleman.

Mr. STANTON. Mr. Chairman, I am very happy that the gentleman has yielded to me because he makes an excellent point.

When you vote, if you vote for the bill passed out of the committee, you vote for mandatory credit controls. Do not let anybody on the other side think otherwise.

Mr. PUCINSKI. I believe the record is clear that these are standby controls which the President may or may not use at his discretion. I also believe the assistance provided in the bill to the home construction industry can help us avoid a full-scale recession in the construction industry.

Mr. MELCHER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, there is no more important economic task confronting us than getting the cost of money—interest rates—back down to a reasonable level. The danger signals to our national economy are out, and they are grave.

Treasury notes are yielding returns in excess of 8 percent and the bond market is described by financial houses as a "once in a lifetime opportunity" for investors.

The attractions are no less enticing than the gingerbread that led Hansel and Gretel to the witch's oven in Grimm's fable. Hansel and Gretel escaped and the witch was burned. That is a fable. This is for real and we all may be burned.

Individuals and families who once deposited money in savings accounts in local banks and savings institutions, keeping the money available for loans locally, are now turning to sound, safe and higher return investments in governments and blue ribbon bonds.

The savings institutions, banks, and trust fund administrators, large and small, must, in meeting their responsibility and trust, direct an increasing part of their investments to the safety, surety, and high income yields of these securities.

The tight money, high interest policy advocated by so many within and without the administration is, in my judgment, an ill-conceived device for controlling inflation. The fruits of this policy are reflected in the current high Treasury note and bond markets, and mounting Government interest costs. On the other hand, the harvest of these modern record high interest rates are to be found in a dangerously declining stock market, a dried-up homebuilding industry, a rising unemployment rate, and a great acceleration in the rate of agricultural and small business failures, or resort to existence out of accumulated capital if they are fortunate enough to have a little.

The bountiful harvest from high interest rates for a few people can mean ruin for untold millions.

The President and the administration, while concentrating on developing a course to bring peace in Vietnam, have neither heeded advice nor reflected a concern for the effect on the people of the Nation of a money policy that is almost out of hand.

The theory that rising interest rates and tight money will control inflation should be discounted, if not wholly discredited. Interest is built into the cost of everything we buy; concerns capitalized long ago on low-cost money and widen their margins, basing their charges on the current interest level. Utilities want their rates raised to offset increased bond interest costs. Supplies of goods are shortened by the inability of small businesses to maintain levels of operation for lack of capital, putting further pressure on prices.

Out in Montana, stockmen are shortening up on their feeding operations for lack of capital to buy feeders, or inability to make a profit, after interest, on the money they can borrow. That will mean more unfed, lightweight cattle ultimately going to market, smaller beef tonnages and more pressure on prices.

Since Treasury notes have been in the vanguard of the advance in interest yields, the first thing we should do is direct the Federal Reserve bank system and any Government trust funds with assets to invest, to act immediately to absorb Treasury bills, Treasury notes, and Treasury bonds at lower interest levels. We should release impounded funds and relax restraints on loan programs and money supplies for home building, small business and farm and ranch operating capital while reducing expenditures for military hardware, space exploration, supersonic transports, military establishments abroad, and every other nonessential, luxury, or postponable items.

I am not advocating senseless penny-pinching in such areas as medical research, environmental controls, education, or human nutrition; nor am I proposing cuts, as in the case of education, which will force the burden of essential programs on local taxpayers. I do support the recent action of the House and Senate that reduced the level of military expenditures by $9 billion.

I expect to support every measure which will hold down interest levels, and I call on the administration to implement savings voted by Congress, reduce Treasury expenditures on nonessentials, and turn the tide on the interest rate climb, especially as it affects Federal securities, with every available technique or tool.

This bill is a partial answer to high interest rates and the lack of home building and to provide more credit authority for the Small Business Administration. It is a positive step and should be taken by this House.

Mr. BURLISON of Missouri. Mr. Chairman, I move to strike the requisite number of words. I desire to ask a question of the distinguished ranking minority member of the committee. Is there anything in the substitute bill, the Senate bill, which would put a limitation on the amount of interest that could be charged to those borrowing money?

Mr. WIDNALL. No; there is not. There is none in the other bill, either.

Mr. BURLISON of Missouri. It is my understanding, my interpretation of the

other bill that there is a limitation of 6 percent, a maximum of 6 percent.

Mr. WIDNALL. That is not so. It is not in the bill.

Mr. BURLISON of Missouri. I wish to make this observation, if I may, for purposes of further questioning. It is my understanding that regulation Q places a limitation on the amount that depositors can get on their deposits in savings and loan associations or in banks. Is that true? I would like an explanation of why we place a limitation on the amount of money that depositors can get, while we place no limitation on the interest rate which the banks and the savings institutions will receive on the money that they lend out. I have never been able to understand that. I wonder what the explanation for it is.

Mr. WIDNALL. At the present time we are endeavoring to limit the amount for the protection of the depositors, but such a provision as the gentleman refers to is not in this bill.

Mr. BURLISON of Missouri. I thank the gentleman, but I would submit that this is the type of protection that the depositor can do without.

Mr. DON H. CLAUSEN. Mr. Chairman, I move to strike the requisite number of words.

Mr. DON H. CLAUSEN. Mr. Chairman, regarding the legislation under discussion, I would like to take this opportunity to relate to my colleagues the drastic effects that the present tight money situation is having on my district.

Quite frankly, my district and many others in this Nation that are dependent on the homebuilding industry, are today facing economic distress. While much of the economy is experiencing rampant inflation, there are far too many areas that are faced with the prospect of a very real recession.

The fiscal mismanagement policies of the previous administration, which led to the unprecedented $25 billion deficit in 1968, caused the runaway inflationary trends of 1969. This inflationary spiral, as everyone agrees, has to be checked in order to protect fixed-income groups, the small businessman, the average workingman and those who are forced to exist on Social Security and pensions.

I believe the Nixon administration is taking the necessary steps to break down the "inflation psychology" that prevails across the Nation.

However, I do believe we need an interim program directed specifically to helping the housing, homebuilding, and forest product oriented industries and the communities economically dependent on these industries through this inflation-checking, transitional period.

I strongly believe that the housing sector of our economy has taken the brunt of the attack against inflation. This segment of the economy has been forced to absorb a disproportionate share of the impact of stringent fiscal management policies. The Federal Reserve Board has estimated that the homebuilding industry is absorbing 60 to 70 percent of the impact of tight money. And, when that industry accounts for only 3 percent of the gross national product, the result is totally unrealistic.

Mr. Chairman, this Nation is faced with the worst housing shortage we have experienced since the years immediately following World War II. It is estimated that the housing starts in 1969 will total approximately 1.3 million units. According to the timetable established by the Housing and Urban Development Act of 1968, we should be constructing at least 1.8 million units this year.

I submit that efforts to control inflation are running counter to our commitment to provide every American with suitable living quarters, especially those families in the low-income category.

We cannot and must not downgrade the priority that absolutely must be given housing in our total economy. The resultant effect of a continuation of present policies will seriously impair or financially ruin a great many homebuilders, lumber and plywood manufacturers and distributors which will, in the final analysis seriously inhibit the capabilities of the entire industry to respond to our housing goals when the present tight money trend is checked and hopefully reversed.

Everyone must share the responsibility for the current problems. While I do not like to be partisan in this matter, I must say that the same Democratic majority that created most of the unnecessary Federal spending proposals in the past are screaming the loudest today. We tried to tell you then that "the chickens would come home to roost." You cannot spend, spend, and spend and expect to retain fiscal responsibility.

In my judgment, we must see that everyone cuts back proportionately in their spending habits in order to maintain stabilized prices. A new set of priorities must be established. But housing should not be required to assume the grossly disproportionate share of the total fiscal and inflation-checking burden.

For years I have held to the view that we must cut back nonessential spending in order to permit the release of funds for the mortgage market. This must be synchronized with noninflationary and orderly economic growth policies of both public and private sector institutions.

In July of this year, I worked with a select housing task force that offered certain recommendations to relieve the plight of the housing industry. I would like to present to my colleagues some of our findings and recommendations because I believe they will serve as a guide to Members of Congress as they listen to this debate. I hope it will influence your voting pattern accordingly.

In addition, we have been working with the Senate Banking and Currency Committee and, in my opinion, genuine progress is being made.

The recommendations listed are short term only. We must commit ourselves to developing methods whereby we can provide a steady, continuing flow of funds into the mortgage market so that the housing sector of the economy is not forced to bear the burden of stringent monetary policies.

Following are some of the task force's recommendations:

First, extend the flexible authority to regulate the rates of interest paid by financial institutions on time and savings deposits;

Second, increase the authority of the Home Loan Bank Board to borrow from the Treasury; and

Third, strengthen the authority of the Federal Reserve Board to administer regulation Q.

The Senate committee has stated:

> Our national housing goals rank equally with the objectives of the Full Employment Act and should not be abandoned or ignored during periods of restrictive fiscal and monetary policies.

In other words, Mr. Chairman, we can provide full employment and meet the goals of providing adequate housing for all Americans and, at the same time, continue our efforts to curb inflation.

As I stated earlier, it is totally unrealistic and unacceptable to expect one segment of our economy to pay the price of the previous administration's fiscal mismanagement.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. BOLAND, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 15091), to lower interest rates and fight inflation, to help housing, small business, and employment, and for other purposes, pursuant to House Resolution 755, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment?

Mr. PATMAN. Mr. Speaker, I demand a separate vote on section 2 and also section 3 of the bill, commencing on page 1, and down to the end of page 2. That is two amendments.

The SPEAKER. The Chair would like to inquire of the gentleman, does the gentleman mean the amendments striking out sections 2 and 3 of the bill?

Mr. PATMAN. I am opposed to striking out the provision which the committee had stricken out.

The SPEAKER. Is the gentleman asking for a separate vote on the striking out of section 2 and section 3?

Mr. PATMAN. That is correct.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The Clerk will report the first amendment on which a separate vote has been demanded.

The Clerk read as follows:

> Amendment: Page 2, strike out lines 2 through 15.

The SPEAKER. The question is on the amendment.

The question was taken; and on a division (demanded by Mr. STEPHENS) there were—ayes 52, noes 56.

Mr. STEPHENS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

PARLIAMENTARY INQUIRY

Mr. GERALD R. FORD. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman from Michigan will state his parliamentary inquiry.

Mr. GERALD R. FORD. Mr. Speaker, is this rollcall vote on both section 2 and section 3, or just on section 2?

The SPEAKER. The rollcall vote is on the amendment to strike out section 2. Section 3 will come later.

Mr. GERALD R. FORD. I thank the Speaker.

The SPEAKER. The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 231, nays 172, answered "present" 1, not voting 29, as follows:

[Roll No. 331]

Dawson	McCloskey	Whalley
Edwards, Calif.	Martin	

So the amendment was agreed to.

The Clerk announced the following pairs:

On this vote:

Mr. Martin for, with Mr. Edwards of California against.

Mr. Pelly for, with Mr. Hanna against.

Mr. Lipscomb for, with Mr. Fallon against.

Mr. Cunningham for, with Mr. Tunney against.

Until further notice:

Mr. Hébert with Mr. Cahill.

Mr. Rivers with Mr. Hall.

Mr. Sisk with Mr. McCloskey.

Mr. Moss with Mr. Taft.

Mr. Steed with Mr. Whalley.

Mr. Abbitt with Mr. Andrews of Alabama.

Mr. Fascell with Mr. Evins of Tennessee.

Mr. Kirwan with Mr. Conyers.

Mr. Dawson with Mrs. Chisholm.

Mr. BINGHAM, Mr. LONG of Maryland, Mr. WALDIE, and Mr. SLACK changed their votes from "yea" to "nay."

The result of the vote was announced as above recorded.

The doors were opened.

The SPEAKER. The Clerk will report the next amendment on which a separate vote has been demanded.

The Clerk read as follows:

Amendment: On page 2, beginning on line 16, strike all of section 3.

The SPEAKER. The question is on the amendment.

The question was taken; and on a division (demanded by Mr. PATMAN) there were—ayes 162, noes 115.

Mr. PATMAN. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 233, nays 170, answered "present" 1, not voting 29, as follows:

[Roll No. 332]

Edwards, Calif.	Martin	

So the amendment was agreed to.

The Clerk announced the following pairs:

On this vote:

Mr. Coughlin for, with Mr. Evins of Tennessee against.

Mr. Martin for, with Mr. Edwards of California against.

Mr. Pelly for, with Mr. Hanna against.

Mr. Lipscomb for, with Mr. Fallon against.

Mr. Cunningham for, with Mr. Tunney against.

Until further notice:

Mr. Hébert with Mr. Cahill.
Mr. Rivers with Mr. Hall.
Mr. Sisk with Mr. McCloskey.
Mr. Andrews of Alabama with Mr. Taft.
Mr. Abbitt with Mr. Whalley.
Mr. Dawson with Mr. Moss.
Mr. Fascell with Mr. Steed.
Mr. Kirwan with Mr. Powell.
Mr. Conyers with Mrs. Chisholm.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. WIDNALL

Mr. WIDNALL. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. WIDNALL. Mr. Speaker, I am opposed to the bill.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. WIDNALL moves to recommit the bill H.R. 15091 to the Committee on Banking and Currency with instructions to report the same back to the House forthwith with the following amendment: Strike all after the enacting clause and insert in lieu thereof:

That section 7 of the Act of September 21, 1966 (Public Law 89-587; 80 Stat. 823), is amended to read:

"SEC. 7. Effective March 22, 1971—

"(1) So much of section 19(j) of the Federal Reserve Act (12 U.S.C. 371(b)) as precedes the third sentence thereof is amended to read as it would without the amendment made by section 2(c) of this Act;

"(2) The second and third sentences of section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) are amended to read as they would without the amendment made by section 3 of this Act;

"(3) The last three sentences of section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) are repealed; and

"(4) Section 5B of the Federal Home Loan Bank Act (12 U.S.C. 1425b) is repealed."

SEC. 2. (a) Section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) is amended by adding at the end thereof the following new sentences: "The authority conferred by this subsection shall also apply to noninsured banks in any State if (1) the total amount of time and savings deposits held in all such banks in the State, plus the total amount of deposits, shares, and withdrawable accounts held in all building and loan, savings and loan, and homestead associations (including cooperative banks) in the State which are not members of a Federal home loan bank, is more than 20 per centum of the total amount of such deposits, shares, and withdrawable accounts held in all banks, and building and loan, savings and loan, and homestead associations (including cooperative banks) in the State, and (2) there does not exist under the laws of such State a bank supervisory agency with authority comparable to that conferred by this subsection, including specifically the authority to regulate the rates of interest and dividends paid by such noninsured banks on time and savings deposits, or if such agency exists it has not issued regulations in the exercise of that authority. Such authority shall only be exercised by the Board of Directors with respect to such noninsured banks prior to July 31, 1970, to limit the rates of interest or dividends which such banks may pay on time and savings deposits to maximum rates not lower than 5½ per centum per annum. Whenever it shall appear to the Board of Directors that any noninsured bank or any affiliate thereof is engaged or has engaged or is about to engage in any acts or practices which constitute or will constitute a violation of the provisions of this subsection or of any regulations thereunder, the Board of Directors may, in its discretion, bring an action in the United States district court for the judicial district in which the principal office of the noninsured bank or affiliate thereof is located to enjoin such acts or practices, to enforce compliance with this subsection or any regulations thereunder, or for a combination of the foregoing, and such courts shall have jurisdiction of such actions, and, upon a proper showing, an injunction, restraining order, or other appropriate order may be grateful without bond."

(b) Section 5B of the Federal Home Loan Bank Act (12 U.S.C. 1425b) is amended to read as follows:

"SEC. 5B. (a) The Board may from time to time, after consulting with the Board of Governors of the Federal Reserve System and the Board of Directors of the Federal Deposit Insurance Corporation, prescribe rules governing the payment and advertisement of interest or dividends on deposits, shares, or withdrawable accounts, including limitations on the rates of interest or dividends on deposits, shares, or withdrawable accounts that may be paid by members, other than those the deposits of which are insured in accordance with the provisions of the Federal Deposit Insurance Act, by institutions which are insured institutions as defined in section 401(a) of the National Housing Act, and by nonmember building and loan, savings and loan, and homestead associations, and cooperative banks. The Board may prescribe different rate limitations for different classes of deposits, shares, or withdrawable accounts, for deposits, shares, or withdrawable accounts of different amounts or with different maturities or subject to different conditions regarding withdrawal or repayment, according to the nature or location of such members, institutions, or nonmembers or their depositors, shareholders or withdrawable account holders, or according to such other reasonable bases as the Board may deem desirable in the public interest. The authority conferred by this subsection shall apply to nonmember building and loan, savings and loan, and homestead associations, and cooperative banks in any State if (1) the total amount of deposits, shares, and withdrawable accounts held in all such nonmember associations and banks in the State, plus the total amount of time and savings deposits held in all banks in the State which are not insured by the Federal Deposit Insurance Corporation, is more than 20 per centum of the total amount of such deposits, shares, and withdrawable accounts held in all banks, and building and loan, savings and loan, and homestead associations (including cooperative banks) in the State, and (2) there does not exist under the laws of such State a bank supervisory agency with authority comparable to that conferred by the first two sentences of this subsection, including specifically the authority to regulate the rates of interest and dividends paid by any such association or bank on deposits, shares, or withdrawable accounts, or if such agency exists it has not issued regulations in the exercise of that authority. Such authority shall only be exercised by the Board with respect to such nonmember associations and banks prior to July 31, 1970, to limit the rates of interest or dividends which such associations or banks may pay on deposits, shares, or withdrawable accounts to maximum rates not lower than 5½ per centum per annum.

"(b) In addition to any other penalty provided by this or any other law, any institution subject to this section which violates a rule promulgated pursuant to this section shall be subject to such civil penalties, which shall not exceed $100 for each violation, as

may be prescribed by said Board by rule and such rule may provide with respect to any or all such violations that each day on which the violation continues shall constitute a separate violation. The Board may recover any such civil penalty for its own use, through action or otherwise, including recovery thereof in any other action or proceeding under this section. The Board may, at any time before collection of any such penalty, whether before or after the bringing of an action or other legal proceeding, the obtaining of any judgment or other recovery, or the issuance or levy of any execution or other legal process therefor, and with or without consideration, compromise, remit, or mitigate in whole or in part any such penalty or any such recovery.

"(c) Whenever it shall appear to the Board that any nonmember institution is engaged or has engaged or is about to engage in any acts or practices which constitute or will constitute a violation of the provisions of this section or of any regulations thereunder, the Board may, in its discretion, bring an action in the United States district court for the judicial district in which the principal office of the institution is located to enjoin such acts or practices, to enforce compliance with this section or any regulations thereunder, or for a combination of the foregoing, and such courts shall have jurisdiction of such actions, and, upon a proper showing, an injunction, restraining order, or other appropriate order may be granted without bond.

"(d) All expenses of the Board under this section shall be considered as nonadministrative expenses."

SEC. 3. Section 11(i) of the Federal Home Loan Bank Act (12 U.S.C. 1431(i)) is amended—

(1) by striking out "$1,000,000,000" and inserting in lieu thereof "$4,000,000,000";

(2) by striking out the last sentence thereof and inserting in lieu thereof the following: "Each purchase of obligations by the Secretary of the Treasury under this subsection shall be upon terms and conditions as shall be determined by the Secretary of the Treasury and shall bear such rate of interest as may be determined by the Secretary of the Treasury taking into consideration the current average market yield for the month preceding the month of such purchase on outstanding marketable obligations of the United States."; and

(3) by adding at the end thereof a new paragraph as follows:

"It is the sense of Congress that the authority provided in this subsection be used by the Secretary of the Treasury, when alternative means cannot effectively be employed, to permit members of the Home Loan Bank System to continue to supply reasonable amounts of funds to the mortgage market whenever the ability to supply such funds is substantially impaired during periods of monetary stringency and rapidly rising interest rates and that any funds so borrowed will be repaid by the Home Loan Bank Board at the earliest practicable date."

SEC. 4. (a) Section 19(a) of the Federal Reserve Act (12 U.S.C. 461) is amended by inserting after the word "interest," the following: "to determine what types of obligations, whether issued directly by a member bank or indirectly by an affiliate of a member bank or by other means, shall be deemed a deposit for the purposes of subsection (j),".

(b)(1) The fourth sentence of section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) is amended to read as follows: "The Board of Directors is authorized for the purposes of this subsection to define the terms 'time deposits' and 'savings deposits', to determine what shall be deemed a payment of interest, and to prescribe such regulations as it may deem necessary to effectuate the purposes of this subsection and to prevent evasions thereof."

(2) Section 18(g) of such Act is further amended by inserting after the fifth sentence the following: "The provisions of this subsection and of regulations issued thereunder shall also apply, in the discretion of the Board of Directors, to obligations other than deposits that are undertaken by insured nonmember banks or their affiliates for the purpose of obtaining funds to be used in the banking business. As used in this subsection, the term 'affiliate' has the same meaning as when used in section 2(b) of the Banking Act of 1933, as amended (12 U.S.C. 221a(b)), except that the term 'member bank', as used in such section 2(b), shall be deemed to refer to an insured nonmember bank."

(c) The first sentence of section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) is amended by inserting "or dividends" after "interest".

SEC. 5. Section 19(b) of the Federal Reserve Act (12 U.S.C. 461) is amended by adding at the end thereof a new sentence as follows: "The Board may, however, prescribe any reserve ratio, not more than 22 per centum, with respect to any indebtedness of a member bank that arises out of a transaction in the ordinary course of its banking business with respect to either funds received or credit extended by such bank to a bank organized under the law of a foreign country or a dependency or insular possession of the United States.".

Mr. WIDNALL (during the reading). Mr. Speaker, I ask unanimous consent that the motion to recommit be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

Mr. GERALD R. FORD. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 193, nays 206, answered "present"—1, not voting 33, as follows:

Edwards, Calif.	Moss	Yates
Evins, Tenn.		

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Moss for, with Mr. Coughlin against.

Mr. Hanna for, with Mr. Martin against.

Mr. Fallon for, with Mr. Pelly against.

Mr. Rivers for, with Mr. Lipscomb against.

Mr. Edwards of California for, with Mr. Cunningham against.

Mr. Yates for, with Mr. Denney against.

Until further notice:

Mr. Hébert with Mr. Cahill.

Mr. Abbitt with Mr. Hall.

Mr. Steed with Mr. Utt.

Mr. Rogers of Colorado with Mr. Taft.

Mr. Tunney with Mr. McCloskey.

Mr. Andrews of Alabama with Mr. Whalley.

Mr. Conyers with Mrs. Chisholm.

Mr. Evins of Tennessee with Mr. McMillan.

Mr. Fascell with Mr. Kirwan.

Mr. Dawson with Mr. Powell.

Mr. COLLIER changed his vote from "nay" to "present."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. PATMAN. Mr. Speaker, I ask unanimous consent that the Committee on Banking and Currency be discharged from the further consideration of the bill (S. 2577) to provide additional mortgage credit, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Texas (Mr. PATMAN)?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2577

An act to provide additional mortgage credit, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 7 of the Act of September 21, 1966 (Public Law 89-587; 80 Stat. 823), is amended to read:

"SEC. 7. Effective September 22, 1970—

"(1) So much of section 19(j) of the Federal Reserve Act (12 U.S.C. 371(b)) as precedes the third sentence thereof is amended to read as it would without the amendment made by section 2(c) of this Act;

"(2) The second and third sentences of section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) are amended to read as they would without the amendment made by section 3 of this Act;

"(3) The last three sentences of section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) are repealed; and

"(4) Section 5B of the Federal Home Loan Bank Act (12 U.S.C. 1425b) is repealed."

SEC. 2. (a) Section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) is amended by adding at the end thereof the following new sentences: "The authority conferred by this subsection shall also

apply to noninsured banks in any State if (1) the total amount of time and savings deposits held in all such banks in the State, plus the total amount of deposits, shares, and withdrawable accounts held in all building and loan, savings and loan, and homestead associations (including cooperative banks) in the State which are not members of a Federal home loan bank, is more than 20 per centum of the total amount of such deposits, shares, and withdrawable accounts held in all banks, and building and loan, savings and loan, and homestead associations (including cooperative banks) in the State, and (2) there does not exist under the laws of such State a bank supervisory agency with authority comparable to that conferred by this subsection, including specifically the authority to regulate the rates of interest and dividends paid by such noninsured banks on time and savings deposits, or if such agency exists it has not issued regulations in the exercise of that authority. Such authority shall only be exercised by the Board of Directors with respect to such noninsured banks prior to July 31, 1970, to limit the rates of interest or dividends which such banks may pay on time and savings deposits to maximum rates not lower than 5½ per centum per annum. Whenever it shall appear to the Board of Directors that any noninsured bank or any affiliate thereof is engaged or has engaged or is about to engage in any acts or practices which constitute or will constitute a violation of the provisions of this subsection or of any regulations thereunder, the Board of Directors may, in its discretion, bring an action in the United States district court for the judicial district in which the principal office of the noninsured bank or affiliate thereof is located to enjoin such acts or practices, to enforce compliance with this subsection or any regulations thereunder, or for a combination of the foregoing, and such courts shall have jurisdiction of such actions, and, upon a proper showing, an injunction, restraining order, or other appropriate order may be granted without bond."

(b) Section 5B of the Federal Home Loan Bank Act (12 U.S.C. 1425b) is amended to read as follows:

"SEC. 5B. (a) The Board may from time to time, after consulting with the Board of Governors of the Federal Reserve System and the Board of Directors of the Federal Deposit Insurance Corporation, prescribe rules governing the payment and advertisement of interest or dividends on deposits, shares, or withdrawable accounts, including limitations on the rates of interest or dividends on deposits, shares, or withdrawable accounts that may be paid by members, other than those the deposits of which are insured in accordance with the provisions of the Federal Deposit Insurance Act, by institutions which are insured institutions as defined in section 401(a) of the National Housing Act, and by nonmember building and loan, savings and loan, and homestead associations, and cooperative banks. The Board may prescribe different rate limitations for different classes of deposits, shares, or withdrawable accounts, for deposits, shares, or withdrawable accounts of different amounts or with different maturities or subject to different conditions regarding withdrawal or repayment, according to the nature or location of such members, institutions, or nonmembers or their depositors, shareholders or withdrawable account holders, or according to such other reasonable bases as the Board may deem desirable in the public interest. The authority conferred by this subsection shall apply to nonmember building and loan, savings and loan, and homestead associations, and cooperative banks in any State if (1) the total amount of deposits, shares, and withdrawable accounts held in all such nonmember associations and banks in the State, plus the total amount of time and savings deposits held in all banks in the State which are not insured by the Federal Deposit Insurance Corporation, is more than 20 per centum of the total amount of such deposits, shares, and withdrawable accounts held in all banks, and building and loan, savings and loan, and homestead associations (including cooperative banks) in the State, and (2) there does not exist under the laws of such State a bank supervisory agency with authority comparable to that conferred by the first two sentences of this subsection, including specifically the authority to regulate the rates of interest and dividends paid by any such association or bank on deposits, shares, or withdrawable accounts, or if such agency exists it has not issued regulations in banks prior to July 31, 1970, to limit the rates of interest or dividends which such associations or banks may pay on deposits, shares, or withdrawable accounts to maximum rates not lower than 5½ per centum per annum.

"(b) In addition to any other penalty provided by this or any other law, any institution subject to this section which violates a rule promulgated pursuant to this section shall be subject to such civil penalties, which shall not exceed $100 for each violation, as may be prescribed by said Board by rule and such rule may provide with respect to any or all such violations that each day on which the violation continues shall constitute a separate violation. The Board may recover any such civil penalty for its own use, through action or otherwise, including recovery thereof in any other action or proceeding under this section. The Board may, at any time before collection of any such penalty, whether before or after the bringing of an action or other legal proceeding, the obtaining of any judgment or other recovery, or the issuance or levy of any execution or other legal process therefor, and with or without consideration, compromise, remit, or mitigate in whole or in part any such penalty or any such recovery.

"(c) Whenever it shall appear to the Board that any nonmember institution is engaged or has engaged or is about to engage in any acts or practices which constitute or will constitute a violation of the provisions of this section or of any regulations thereunder, the Board may, in its discretion, bring an action in the United States district court for the judicial district in which the principal office of the institution is located to enjoin such acts or practices, to enforce compliance with this section or any regulations thereunder, or for a combination of the foregoing, and such courts shall have jurisdiction of such actions, and upon a proper showing, an injunction, restraining order, or other appropriate order may be granted without bond.

"(d) All expenses of the Board under this section shall be considered as nonadministrative expenses."

SEC. 3. Section 11(i) of the Federal Home Loan Bank Act (12 U.S.C. 1431(i)) is amended—

(1) by striking out "$1,000,000,000" and inserting in lieu there of "$4,000,000,000";

(2) by striking out the last sentence thereof and inserting in lieu thereof the following: "Each purchase of obligations by the Secretary of the Treasury under this subsection shall be upon terms and conditions as shall be determined by the Secretary of the Treasury and shall bear such rate of interest as may be determined by the Secretary of the Treasury taking into consideration the current average market yield for the month preceding the month of such purchase on outstanding marketable obligations of the United States."; and

(3) by adding at the end thereof a new paragraph as follows:

"It is the sense of Congress that the authority provided in this subsection be used by the Secretary of the Treasury, when alternative means cannot effectively be employed, to permit members of the Home Loan Bank System to continue to supply reasonable amounts of funds to the mortgage market whenever the ability to supply such funds is substantially impaired during periods of monetary stringency and rapidly rising interest rates and that any funds so borrowed will be repaid by the Home Loan Bank Board at the earliest practicable date."

SEC. 4. (a) Section 19(a) of the Federal Reserve Act (12 U.S.C. 461) is amended by inserting after the word "interest," the following: "to determine what types of obligations, whether issued directly by a member bank or indirectly by an affiliate of a member bank or by other means, shall be deemed a deposit for the purposes of subsection (j),".

(b) (1) The fourth sentence of section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) is amended to read as follows: "The Board of Directors is authorized for the purposes of this subsection to define the terms 'time deposits' and 'savings deposits', to determine what shall be deemed a payment of interest, and to prescribe such regulations as it may deem necessary to effectuate the purposes of this subsection and to prevent evasions thereof."

(2) Section 18(g) of such Act is further amended by inserting after the fifth sentence the following: "The provisions of this subsection and of regulations issued thereunder shall also apply, in the discretion of the Board of Directors, to obligations other than deposits that are undertaken by insured nonmember banks or their affiliates for the purpose of obtaining funds to be used in the banking business. As used in this subsection, the term 'affiliate' has the same meaning as when used in section 2(b) of the Banking Act of 1933, as amended (12 U.S.C. 221a(b)), except that the term 'member bank', as used in such section 2(b), shall be deemed to refer to an insured nonmember bank."

(c) The first sentence of section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) is amended by inserting "or dividends" after "interest".

SEC. 5. Section 19(b) of the Federal Reserve Act (12 U.S.C. 461) is amended by adding at the end thereof a new sentence as follows: "The Board may, however, prescribe any reserve ratio, not more than 22 per centum, with respect to any indebtedness of a member bank that arises out of a transaction in the ordinary course of tis banking business with respect to either funds received or credit extended by such bank to a bank organized under the law of a foreign country or a dependency or insular possession of the United Stats.".

SEC. 6. Section 708(b) of the Defense Production Act (50 U.S.C. 2158(b)) is amended by striking out everything after "United States", the first time it appears, and inserting a period in lieu thereof.

SEC. 7. Section 708(f) of the Defense Production Act (50 U.S.C. 2158(f)) is repealed.

AMENDMENT OFFERED BY MR. PATMAN

Mr. PATMAN. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PATMAN: Strike out all after the enacting clause of the bill S. 2577, and insert in lieu thereof the provisions of H.R. 15091, as passed, as follows:

TITLE I—AMENDMENTS TO EXISTING ACTS

SECTION 1. So much of section 7 of the Act of September 21, 1966 (Public Law 89-597; 12 U.S.C. 461 note) as precedes paragraph (1) thereof is amended to read as follows:

"SEC. 7. Effective March 22, 1971,"

SEC. 2. The authority conferred by section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) shall also apply with respect to noninsured banks in any State if (1) the total amount of time and savings deposits held in all such banks in the State,

plus the total amount of deposits, shares, and withdrawable accounts held in all building and loan, savings and loan, and homestead associations (including cooperative banks) in the State which are not members of a Federal home loan bank, is more than 20 per centum of the total amount of such deposits, shares, and withdrawable accounts held in all banks, and building and loan, savings and loan, and homestead associations (including cooperative banks) in the State, and (2) there does not exist under the laws of that State a bank supervisory agency with authority comparable to that conferred by this section, including specifically the authority to regulate the rates of interest and dividends paid by noninsured banks on time and savings deposits, or if such an agency exists it has not issued regulations in the exercise of that authority. The authority conferred by section 18(g) may not be exercised with respect to noninsured banks after July 31, 1970, and may only be exercised to limit the rates of interest or dividends which those banks may pay on time and savings deposits to maximum rates not lower than 5½ per centum per annum. Whenever it appears to the Board of Directors that any noninsured bank or any affiliate thereof is engaged or has engaged or is about to engage in any acts or practices which constitute or will constitute a violation of the provisions of that section or of any regulations thereunder, the Board of Directors may, in its discretion, bring an action in the United States district court for the judicial district in which the principal office of the noninsured bank or affiliate thereof is located to enjoin such acts or practices, to enforce compliance with this section or any regulations thereunder, or for a combination of the foregoing, and such courts shall have jurisdiction of such actions, and, upon a proper showing, an injunction, restraining order, or other appropriate order may be granted without bond.

SEC. 3. (a) The authority conferred by section 5B of the Federal Home Loan Bank Act (12 U.S.C. 1425b) shall also apply with respect to nonmember building and loan, savings and loan, and homestead associations, and cooperative banks in any State if (1) the total amount of deposits, shares, and withdrawable accounts held in all such nonmember associations and banks in the State, plus the total amount of time and savings deposits held in all banks in the State which are not insured by the Federal Deposit Insurance Corporation, is more than 20 per centum of the total amount of such deposits, shares, and withdrawable accounts held in all banks, and building and loan, savings and loan, and homestead associations (including cooperative banks) in the State, and (2) there does not exist under the laws of that State a bank supervisory agency with authority comparable to that conferred by the first two sentences of this subsection, including specifically the authority to regulate the rates of interest and dividends paid by any such association or bank on deposits, shares, or withdrawable accounts, of if such an agency exists it has not issued regulations in the exercise of that authority. The authority conferred by that section may not be exercised with respect to nonmember associations and banks after July 31, 1970, and may only be exercised to limit the rates of interest or dividends which those associations or banks may pay on deposits, shares, or withdrawable accounts to maximum rates not lower than 5½ per centum per annum.

(b) In addition to any other penalty provided by the Federal Home Loan Bank Act or any other law, any institution subject to this section which violates a rule promulgated pursuant to this section and section 5B of the Federal Home Loan Bank Act shall be subject to such civil penalties, which shall not exceed $100 for each violation, as way be prescribed by the Federal Home Loan Bank Board by rule. Any such rule may provide with respect to any or all such violations that each day on which the violation continues shall constitute a separate violation. The Board may recover any such civil penalty for its own use, through action or otherwise, including recovery thereof in any other action or proceeding under this section. The Board may, at any time before collection of any such penalty, whether before or after the bringing of an action or other legal proceeding, the obtaining of any judgment or other recovery, or the issuance or levy of any execution or other legal process therefor, and with or without consideration, compromise, remit, or mitigate in whole or in part any such penalty or and such recovery.

(c) Whenever it appears to the Board that any nonmember institution is engaged or has engaged or is about to engage in any acts or practices which constitute or will constitute a violation of the provisions of this section and section 5B of the Federal Home Loan Bank Act or of any regulations thereunder, the Board may, in its discretion, bring an action in the United States district court for the judicial district in which the principal office of the institution is located to enjoin such acts or practices, to enforce compliance with these sections or any regulations thereunder, or for a combination of the foregoing, and such courts shall have jurisdiction of such actions, and, upon a proper showing, an injunction, restraining order, or other appropriate order may be granted without bond.

(d) All expenses of the Board under this section shall be considered as nonadministrative expenses.

SEC. 4. (a) The Federal Home Loan Bank Act is amended by adding at the end thereof the following:

"SEC. 31. (a) The purpose of this section is to improve the depth and liquidity of the secondary home mortgage market.

"(b) To carry out the purpose of this section, the several Federal Home Loan Banks under the direction of the Board and acting through such agencies and instrumentalities as the Board may deem appropriate, are authorized, pursuant to commitments or otherwise, to purchase, service, sell, or otherwise deal in mortgages which are originated by members or by any institutions whose accounts or deposits are insured by the Federal Savings and Loan Insurance Corporation or the Federal Deposit Insurance Corporation."

(b) Section 11(h) of the Federal Home Loan Bank Act (12 U.S.C. 1431(h)) is amended (A) by inserting "(1) pursuant to section 31 of this Act, (2)" immediately before "in obligations of the United States,", (B) by inserting "(3)" immediately before "in obligations, participations,", and (C) by inserting "(4)" immediately before "in such securities".

(c) Section 16 of the Federal Home Loan Bank Act (12 U.S.C. 1436) is amended (A) by inserting "(1) pursuant to section 31 of this Act, (2)" immediately before "in direct obligations", (B) by inserting "(3)" immediately before "in obligations, participations,", and (C) by inserting "(4)" immediately before "in such securities".

SEC. 5. (a) Effective as of the close of December 31, 1969, section 404 of the National Housing Act is amended

(1) by striking out "plus any creditor obligations of such institution" in subsection (b)(1), and the amendment made by this subdivision (1) shall be applicable also to any then unexpired portion of any then current premium year under subsection (b)(1).

(2) by striking out "and creditor obligations" in subsection (b)(2).

(3) by striking out "and its creditor obligations" in subsection (c).

(4) by striking out "and creditor obligations" each place it appears in subsection (g). The condition in the first sentence of that subsection shall be deemed to be met as of the close of December 31, 1969. The words "such year" in that sentence shall be deemed to include also the year beginning January 1, 1970.

(b) The Federal Savings and Loan Insurance Corporation is authorized by regulation or otherwise

(1) to make such provisions as it may deem advisable with respect to the order in which and the extent to which the components of a pro rata share of its secondary reserve shall be applied or be deemed to have been applied in the case of a reduction of such share through a use under the second sentence of section 404(e) of the National Housing Act or the first sentence of section 404(g), a transfer of part of such share under the third sentence of section 404(e), or otherwise.

(2) to take such action, including without limitation such adjustments and refunds and such deferrals of premium payments and other payments, as it may determine to be necessary or appropriate for or in connection with the implementation of this section or other legislation amending or supplementing said section 404.

SEC. 6. (a) Section 19(a) of the Federal Reserve Act (12 U.S.C. 461) is amended by inserting after the word "interest," the following: "to determine what types of obligations, whether issued directly by a member bank or indirectly by an affiliate of a member bank or by other means, shall be deemed a deposit,".

(b)(1) The fourth sentence of section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) is amended to read as follows: "The Board of Directors is authorized for the purposes of this subsection to define the term 'time deposits' and 'savings deposits', to determine what shall be deemed a payment of interest, and to prescribe such regulations as it may deem necessary to effectuate the purposes of this subsection and to prevent evasions thereof."

(2) Section 18(g) of such Act is further amended by inserting after the fifth sentence the following: "The provisions of this subsection and of regulations issued thereunder shall also apply, in the discretion of the Board of Directors, to obligations other than deposits that are undertaken by insured nonmember banks or their affiliates for the purpose of obtaining funds to be used in the banking business. As used in this subsection, the term 'affiliate' has the same meaning as when used in section 2(b) of the Banking Act of 1933, as amended (12 U.S.C. 221a(b)), except that the term 'member bank', as used in such section 2(b), shall be deemed to refer to an insured nonmember bank."

(c) The first sentence of section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) is amended by inserting "or dividends" after "interest".

SEC. 7. Section 19(b) of the Federal Reserve Act (12 U.S.C. 461) is amended by adding at the end thereof a new sentence as follows: "The Board may, however, prescribe any reserve ratio, not more than 22 per centum, with respect to any indebtedness of a member bank that arises out of a transaction in the ordinary course of its banking business with respect to either funds received or credit extended by such bank to a bank organized under the law of a foreign country or a dependency or insular possession of the United States.".

SEC. 8. Effective for the period beginning on the date of enactment of this Act and ending March 22, 1971, section 24 of the Federal Reserve Act (12 U.S.C. 371) is amended

(1) by changing, in clause (3) of the third sentence of the first paragraph, "80" to read "90" and "twenty-five" to read "thirty", and

(2) by striking in the first sentence of the third paragraph the comma before "shall" and inserting in lieu thereof "or, to the extent authorized by regulations issued by the Comptroller of the Currency, in the case of

a large construction project not to exceed 5 years,".

SEC. 9. (a) The following provisions of the Federal Deposit Insurance Act are amended by changing "$15,000", each place it appears therein, to read "$25,000":

(1) The first sentence of section 3(m) (12 U.S.C. 1813(m)).

(2) The first sentence of section 7(i) (12 U.S.C. 1817(i)).

(3) The last sentence of section 11(a) (12 U.S.C. 1821(a)).

(4) The fifth sentence of section 11(i) (12 U.S.C. 1821(i)).

(b) The amendments made by this section are not applicable to any claim arising out of the closing of a bank prior to the date of enactment of this Act.

SEC. 10. (a) The following provisions of title IV of the National Housing Act are amended by changing "$15,000", each place it appears therein, to read "$25,000":

(1) Section 401(b) (12 U.S.C. 1724(b)).

(2) Section 405(a) (12 U.S.C. 1728(a)).

(b) The amendments made by this section are not applicable to any claim arising out of a default, as defined in section 401(d) of the National Housing Act, where the appointment of a conservator, receiver, or other legal custodian as set forth in that section becomes effective prior to the date of enactment of this Act.

TITLE II—AUTHORITY FOR CREDIT CONTROL

Sec. 201. Short title

This title may be cited as the Credit Control Act.

Section. 202. Definitions and rules of construction

(a) The definitions and rules of construction set forth in this section apply to the provisions of this title.

(b) The term "Board" refers to the Board of Governors of the Federal Reserve System.

(c) The term "organization" means a corporation, government or governmental subdivision or agency, trust, estate, partnership, cooperative, or association.

(d) The term "person" means a natural person or an organization.

(e) The term "credit" means the right granted by a creditor to a debtor to defer payment of debt or to incur debt and defer its payment.

(f) The term "creditor" refers to any person who extends, or arranges for the extension of, credit, whether in connection with a loan, a sale of property or services, or otherwise.

(g) The term "credit sale" refers to any sale with respect to which credit is extended or arranged by the seller. The term includes any contract in the form of a bailment or lease if the bailee or lessee contracts to pay as compensation for use a sum substantially equivalent to or in excess of the aggregate value of the property and services involved and it is agreed that the bailee or lessee will become, or for no other or a nominal consideration has the option to become, the owner of the property upon full compliance with his obligations under the contract.

(h) The terms "extension of credit" and "credit transaction" include both loans and credit sales.

(i) The term "State" refers to any State, the Commonwealth of Puerto Rico, the District of Columbia, and any territory or possession of the United States.

(j) Any reference to any requirement imposed under this title of any provision thereof includes reference to the regulations of the Board under this title or the provision thereof in question.

Sec. 203. Regulations

The Board shall prescribe regulations to carry out the purposes of this title. These regulations may contain such classifications, differentiations, or other provisions, and may provide for such adjustments and exceptions for any class of transactions, as in the judgment of the Board are necessary or proper to effectuate the purposes of this title, to prevent circumvention or evasion thereof, or to facilitate compliance therewith.

Sec. 204. Determination of interest charge

Except as otherwise provided by the Board, the amount of the interest charge in connection with any credit transaction shall be determined under the regulations of the Board as the sum of all charges payable directly or indirectly to the person by whom the credit is extended in consideration of the extension of credit.

Sec. 205. Authority for institution of credit controls

(a) Whenever the President determines that such action is necessary or appropriate for the purpose of preventing or controlling inflation generated by the extension of credit in an excessive volume, the President may authorize the Board to regulate and control any or all extensions of credit.

(b) The Board may, in administering this Act, utilize the services of the Federal Reserve banks and any other agencies, Federal or State, which are available and appropriate.

Sec. 206. Extent of control

The Board, upon being authorized by the President under section 105 and for such period of time as he may determine, may by regulation

(1) require transactions or persons or classes of either to be registered or licensed.

(2) prescribe appropriate limitations, terms, and conditions for any such registration or license.

(3) provide for suspension of any such registration or license for violation of any provision thereor or of any regulation, rule, or order prescribed under this Act.

(4) prescribe appropriate requirements as to the keeping of records and as to the form, contents, or substantive provisions of contracts, liens, or any relevant documents.

(5) prohibit solicitations by creditors which would encourage envision or avoidance of the requirements of any regulation, license, or registration under this Act.

(6) prescribe the maximum amount of credit which may be extended on, or in connection with, any loan, purchase, or other extension of credit.

(7) prescribe the maximum rate of interest, maximum maturity, minimum periodic payment, maximum period between payments, and any other specification or limitation of the terms and conditions of any extension of credit.

(8) prescribe the methods of determining purchase prices or market values or other bases for computing permissible extensions of credit or required downpayment.

(9) prescribe special or different terms, conditions, or exemptions with respect to new or used goods, minimum original cash payments, temporary credits which are merely incidental to cash purchases, payment or deposits usable to liquidate credits, and other adjustments or special situations.

Sec. 207. Reports

Reports concerning the kinds, amounts, and characteristics of any extensions of credit subject to this title, or concerning circumstances related to such extensions of credit, shall be filed on such forms, under oath or otherwise, at such times and from time to time, and by such persons, as the Board may prescribe by regulation or order as necessary or appropriate for enabling the Board to perform its functions under this title. The Board may require any person to furnish, under oath or otherwise, complete information relative to any transaction within the scope of this title including the production of any books of account, contracts, letters, or other papers, in connection therewith in the custody or control of such person.

Sec. 208. Injunctions

Whenever it appears to the Board that any person has engaged, is engaged, or is about to engage in any acts or practices constituting a violation of any regulation under this title, it may in its discretion bring an action, in the proper district court of the United States or the proper United States court of any territory or other place subject to the jurisdiction of the United States, to enjoin such acts or practices, and upon a proper showing a permanent or temporary injunction or restraining order shall be granted without bond. Upon application of the Board, any such court may also issue mandatory injunctions commanding any person to comply with any regulation of the Board under this title.

Sec. 209. Civil penalties

(a) For each willful violation of any regulation under this title, the Board may assess upon any person to which the regulation applies, and upon any partner, director, officer, or employee thereof who willfully participates in the violation, a civil penalty not exceeding $1,000.

(b) In the event of the failure of any person to pay any penalty assessed under this section, a civil action for the recovery thereof may, in the discretion of the Board, be brought in the name of the United States.

Sec. 210. Criminal penalty

Whoever willfully violates any regulation under this title shall be fined not more than $1,000 or imprisoned not more than one year, or both.

TITLE III—SMALL BUSINESS ADMINISTRATION ACTIVITY

SEC. 301. The Small Business Administration shall promptly increase the level of its financing functions utilizing the business loan and investment fund established under section 4(c)(1)(B) of the Small Business Act (15 U.S.C. 633(c)(1)(B) by $70,000,000 above the level prevailing at the time of enactment of this Act. In the event that insufficient appropriated funds are available to carry out the provisions of this section, request for the necessary funds shall be promptly made by the Small Business Administration and cleared by all components of the executive branch having any functions with respect to such requests. The Small Business Administration shall submit to Congress a monthly report of its implementation of this section.

The amendment was agreed to.

The Senate bill was ordered to be read a third time, was read the third time and passed.

The title was amended so as to read: "To lower interest rates and fight inflation, to help housing, small business, and employment, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 15091) was laid on the table.

APPOINTMENT OF CONFEREES ON S. 2577

Mr. PATMAN. Mr. Speaker, I ask unanimous consent that the House insist upon its amendment to the bill (S. 2577) and request a conference with the Senate thereon.

The SPEAKER. Is there objection to the request of the gentleman from Texas? The Chair hears none, and appoints the following conferees: Messrs. PATMAN, BARRETT, SULLIVAN, REUSS, WIDNALL, BROCK, and STANTON.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Arrington, one of its clerks, an-

nounced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 13111. An act making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1970, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 13111) entitled "An act making appropriations for the Department of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1970, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. MAGNUSON, Mr. STENNIS, Mr. BIBLE, Mr. BYRD of West Virginia, Mr. HOLLAND, Mr. COTTON,, Mr. FONG, Mr. BOGGS, and Mr. YOUNG of North Dakota. to be the conferees on the part of the Senate.

GENERAL LEAVE

Mr. PATMAN. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days to extend their remarks and include relevant extraneous matter on the bill just passed

The SPEAKER. Without objection, it is so ordered.

There was no objection.

CONFERENCE REPORT ON S. 1075, NATIONAL ENVIRONMENTAL POLICY ACT OF 1969

Mr. DINGELL submitted the following conference report and statement on the bill (S. 1075) to establish a national policy for the environment; to authorize studies, surveys, and research relating to ecological systems, natural resources, and the quality of the human environment; and to establish a Board of Environmental Quality Advisers:

CONFERENCE REPORT (H. REPT. No. 91–765)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1075), to establish a national policy for the environment; to authorize studies, surveys, and research relating to ecological systems, natural resources, and the quality of the human environment; and to establish a Board of Environmental Quality Advisers, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the text of the bill and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the House amendment insert the following:

That this Act may be cited as the "National Environmental Policy Act of 1969".

PURPOSE

SEC. 2. The purposes of this Act are: To declare a national policy which will encourage productive and enjoyable harmony between man and his environment; to promote efforts which will prevent or eliminate damage to the environment and biosphere and stimulate the health and welfare of man; to enrich the understanding of the ecological systems and natural resources important to the Nation; and to establish a Council on Environmental Quality.

TITLE I

DECLARATION OF NATIONAL ENVIRONMENTAL POLICY

SEC. 101. (a) The Congress, recognizing the profound impact of man's activity on the interrelations of all components of the natural environment, particularly the profound influences of population growth, high-density urbanization, industrial expansion, resource exploitation, and new and expanding technological advances and recognizing further the critical importance of restoring and maintaining environmental quality to the overall welfare and development of man, declares that it is the continuing policy of the Federal Government, in cooperation with State and local governments, and other concerned public and private organizations, to use all practicable means and measures, including financial and technical assistance, in a manner calculated to foster and promote the general welfare, to create and maintain conditions under which man and nature can exist in productive harmony, and fulfill the social, economic, and other requirements of present and future generations of Americans.

(b) In order to carry out the policy set forth in this Act, it is the continuing responsibility of the Federal Government to use all practicable means, consistent with other essential considerations of national policy, to improve and coordinate Federal plans, functions, programs, and resources to the end that the Nation may—

(1) fulfill the responsibilities of each generation as trustee of the environment for succeeding generations;

(2) assure for all Americans safe, healthful, productive, and esthetically and culturally pleasing surroundings;

(3) attain the widest range of beneficial uses of the environment without degradation, risk to health or safety, or other undesirable and unintended consequences;

(4) preserve important historic, cultural, and natural aspects of our national heritage, and maintain, wherever possible, an environment which supports diversity and variety of individual choice;

(5) achieve a balance between population and resource use which will permit high standards of living and a wide sharing of life's amenities; and

(6) enhance the quality of renewable resources and approach the maximum attainable recycling of depletable resources.

(c) The Congress recognizes that each person should enjoy a healthful environment and that each person has a responsibility to contribute to the preservation and enhancement of the environment.

SEC. 102. The Congress authorizes and directs that, to the fullest extent possible: (1) the policies, regulations, and public laws of the United States shall be interpreted and administered in accordance with the policies set forth in this Act, and (2) all agencies of the Federal Government shall—

(A) utilize a systematic, interdisciplinary approach which will insure the integrated use of the natural and social sciences and the environmental design arts in planning and in decisionmaking which may have an impact on man's environment;

(B) identify and develop methods and procedures, in consultation with the Council on Environmental Quality established by title II of this Act, which will insure that presently unquantified environmental amenities and values may be given appropriate consideration in decisionmaking along with economic and technical considerations;

(C) include in every recommendation or report on proposals for legislation and other major Federal actions significantly affecting the quality of the human environment, a detailed statement by the responsible official on—

(i) the environmental impact of the proposed action,

(ii) any adverse environmental effects which cannot be avoided should the proposal be implemented,

(iii) alternatives to the proposed action,

(iv) the relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity, and

(v) any irreversible and irretrievable commitments of resources which would be involved in the proposed action should it be implemented.

Prior to making any detailed statement, the responsible Federal official shall consult with and obtain the comments of any Federal agency which has jurisdiction by law or special expertise with respect to any environmental impact involved. Copies of such statement and the comments and views of the appropriate Federal, State, and local agencies, which are authorized to develop and enforce environmental standards, shall be made available to the President, the Council on Environmental Quality and to the public as provided by section 552 of title 5, United States Code, and shall accompany the proposal through the existing agency review processes;

(D) study, develop, and describe appropriate alternatives to recommended courses of action in any proposal which involves unresolved conflicts concerning alternative uses of available resources;

(E) recognize the worldwide and long-range character of environmental problems and, where consistent with the foreign policy of the United States, lend appropriate support to initiatives, resolutions, and programs designed to maximize international cooperation in anticipating and preventing a decline in the quality of mankind's world environment;

(F) make available to States, counties, municipalities, institutions, and individuals, advice and information useful in restoring, maintaining, and enhancing the quality of the environment;

(G) initiate and utilize ecological information in the planning and development of resource-oriented projects; and

(H) assist the Council on Environmental Quality established by title II of this Act.

SEC. 103. All agencies of the Federal Government shall review their present statutory authority, administrative regulations, and current policies and procedures for the purpose of determining whether there are any deficiencies or inconsistencies therein which prohibit full compliance with the purposes and provisions of this Act and shall propose to the President not later than July 1, 1971, such measures as may be necessary to bring their authority and policies into conformity with the intent, purposes, and procedures set forth in this Act.

SEC. 104. Nothing in Section 102 or 103 shall in any way affect the specific statutory obligations of any Federal agency (1) to comply with criteria or standards of environmental quality, (2) to coordinate or consult with any other Federal or State agency, or (3) to act, or refrain from acting contingent upon the recommendations or certification of any other Federal or State agency.

SEC. 105. The policies and goals set forth in this Act are supplementary to those set forth in existing authorizations of Federal agencies.

TITLE II

COUNCIL ON ENVIRONMENTAL QUALITY

SEC. 201. The President shall transmit to the Congress annually beginning July 1, 1970, an Environmental Quality Report (hereinafter referred to as the "report") which shall set forth (1) the status and condition of the major natural, manmade, or altered environmental classes of the Nation, including, but not limited to, the air, the aquatic, including marine, estuarine, and fresh water, and the terrestrial environment, including, but not limited to, the forest, dryland, wetland,

range, urban, suburban, and rural environment; (2) current and foreseeable trends in the quality, management and utilization of such environments and the effects of those trends on the social, economic, and other requirements of the Nation; (3) the adequacy of available natural resources for fulfilling human and economic requirements of the Nation in the light of expected population pressures; (4) a review of the programs and activities (including regulatory activities) of the Federal Government, the State and local governments, and nongovernmental entities or individuals, with particular reference to their effect on the environment and on the conservation, development, and utilization of natural resources; and (5) a program for remedying the deficiencies of existing programs and activities, together with recommendations for legislation.

SEC. 202. There is created in the Executive Office of the President a Council on Environmental Quality (hereinafter referred to as the "Council"). The Council shall be composed of three members who shall be appointed by the President to serve at his pleasure, by and with the advice and consent of the Senate. The President shall designate one of the members of the Council to serve as Chairman. Each member shall be a person who, as a result of his training, experience, and attainments, is exceptionally well qualified to analyze and interpret environmental trends and information of all kinds; to appraise programs and activities of the Federal Government in the light of the policy set forth in title I of this Act; to be conscious of and responsive to the scientific, economic, social, esthetic, and cultural needs and interests of the Nation; and to formulate and recommend national policies to promote the improvement of the quality of the environment.

SEC. 203. The Council may employ such officers and employees as may be necessary to carry out its functions under this Act. In addition, the Council may employ and fix the compensation of such experts and consultants as may be necessary for the carrying out of its functions under this Act, in accodance with section 3109 of title 5, United States Code (but without regard to the last sentence thereof).

SEC. 204. It shall be the duty and function of the Council—

(1) to assist and advise the President in the preparation of the Environmental Quality Report required by section 201;

(2) to gather timely and authoritative information concerning the conditions and trends in the quality of the environment both current and prospective, to analyze and interpret such information for the purpose of determining whether such conditions and trends are interfering, or are likely to interfere, with the achievement of the policy set forth in title I of this Act, and to compile and submit to the President studies relating to such conditions and trends;

(3) to review and appraise the various programs and activities of the Federal Government in the light of the policy set forth in title I of this Act for the purpose of determining the extent to which such programs and activities are contributing to the achievement of such policy, and to make recommendations to the President with respect thereto;

(4) to develop and recommend to the President national policies to foster and promote the improvement of environmental quality to meet the conservation, social, economic, health, and other requirements and goals of the Nation;

(5) to conduct investigations, studies, surveys, research, and analyses relating to ecological systems and environmental quality;

(6) to document and define changes in the natural environment, including the plant and animal systems, and to accumulate necessary data and other information for a continuing analysis of these changes or trends and an interpretation of their underlying causes;

(7) to report at least once each year to the President on the state and condition of the environment; and

(8) to make and furnish such studies, reports thereon, and recommendations with respect to matters of policy and legislation as the President may request.

SEC. 205. In exercising its powers, functions, and duties under this Act, the Council shall—

(1) consult with the Citizens' Advisory Committee on Environmental Quality established by Executive Order numbered 11472, dated May 29, 1969, and with such representatives of science, industry, agriculture, labor, conservation organizations, State and local governments, and other groups, as it deems advisable; and

(2) utilize, to the fullest extent possible, the services, facilities, and information (including statistical information) of public and private agencies and organizations, and individuals, in order that duplication of effort and expense may be avoided, thus assuring that the Council's activities will not unnecessarily overlap or conflict with similar activities authorized by law and performed by established agencies.

SEC. 206. Members of the Council shall serve full time and the Chairman of the Council shall be compensated at the rate provided for Level II of the Executive Schedule Pay Rates (5 U.S.C. 5313). The other members of the Council shall be compensated at the rate provided for Level IV of the Executive Schedule Pay Rates (5 U.S.C. 5315).

SEC. 207. There are authorized to be appropriated to carry out the provisions of this Act not to exceed $300,000 for fiscal year 1970, $700,000 for fiscal year 1971, and $1,000,000 for each fiscal year thereafter.

And the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House to the title of the bill, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the amendment of the House to the title of the bill, insert the following: "An Act to establish a national policy for the environment, to provide for the establishment of a Council on Environmental Quality, and for other purposes."

And the House agree to the same.

EDWARD A. GARMATZ,
JOHN D. DINGELL,
WAYNE N. ASPINALL,
W. S. MAILLIARD,
JOHN P. SAYLOR,
Managers on the Part of the House.

HENRY M. JACKSON,
FRANK CHURCH,
GAYLORD NELSON,
GORDON ALLOTT,
LEN B. JORDAN,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1075) to establish a national policy for the environment; to authorize studies, surveys, and research relating to ecological systems, natural resources, and the quality of the human environment; and to establish a Board of Environmental Quality Advisers, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The House struck out all of the Senate bill after the enacting clause and inserted a substitute amendment. The committee of conference has agreed to a substitute for both the Senate bill and the House amendment. Except for technical clarifying, and conforming changes, the following statement explains the differences between the House amendment and the substitute agreed to in conference.

PROVISIONS OF THE CONFERENCE SUBSTITUTE

First section and section 2

Section 1 of the Senate bill provided that the bill may be cited as the "National Environmental Policy Act of 1969". Section 2 of the Senate bill contained a statement of the purpose of the bill. There were no similar provisions in the House amendment. The conference substitute conforms to the Senate bill with respect to these two sections.

TITLE I—NATIONAL ENVIRONMENTAL POLICY

Section 101

The Senate bill contained a recognition by Congress of (1) the critical dependency of man on his environment, (2) the profound influences which the factors of contemporary life have had and will have on the environment, and (3) certain specified goals in the management of the environment which the Federal Government should, as a matter of national policy, attain by use of all possible means, consistent with other essential considerations of national policy. The House amendment (in the first section thereof) contained a general statement of national environmental policy, but did not include specified policy goals. The first section of the House amendment also stated that the Federal Government should achieve the general policy in cooperation with State and local governments and certain specified public and private organizations and that financial and technical assistance should be among the means and measures used by the Federal Government to achieve the policy. Under the conference agreement, the language of the House amendment is substantially retained in section 101(a) of the conference substitute; the language setting forth the specified organizations with which the Government should cooperate was dropped in favor of "other concerned public and private agencies".

The national goals of environmental policy specified in the Senate bill are set forth in section 101(b) of the conference substitute.

Section 101(c) of the conference substitute states that "Congress recognizes that each person should enjoy a healthful environment and that each person has a responsibility to contribute to the preservation and enhancement of the environment". The language of the conference substitute reflects a compromise by the conferees with respect to a provision in the Senate bill (but which was not in the House amendment) which stated that the Congress recognizes that "each person has a fundamental and inalienable right to a healthful environment . . .". The compromise language was adopted because of doubt on the part of the House conferees with respect to the legal scope of the original Senate provision.

Section 102

This section of the conference substitute is based on section 102 of the Senate bill. There was no comparable provision in the House amendment. Under the conference substitute, the Congress authorizes and directs that, *to the fullest extent possible:* (1) the Federal laws, regulations, and policies be administered in accordance with the policies set forth in the bill; and (2) all Federal agencies shall—

(A) utilize a systematic, interdisciplinary approach to insure integrated use of the sciences and arts in any official planning or decision-making which may have an impact on the environment;

(B) in consultation with the Council on Environmental Quality, identify and develop methods and procedures to insure that unquantified environmental amenities will be considered in the agency decision making process, along with economic and technical considerations;

(C) include in every recommendation or report on proposals for legislation or other major Federal actions a detailed statement by the responsible official on the environ-

mental impact of the proposed action, any adverse environmental effects which can not be avoided should the proposal be adopted, alternatives to the proposed action, the relationship between the short-term uses of the environment and the maintenance and enhancement of long-term productivity, and any irreversible and irretrievable commitments of resources which would be involved (Under the conference substitute, the responsible Federal official, prior to making any such detailed statement, shall consult with and obtain the comments of any Federal agency having jurisdiction by law or special expertise with respect to any environmental impact involved and the comments of any such agency, together with the comments and views of appropriate State and local agencies shall thereafter be made available to the President, the Council on Environmental Quality, and the public under the provisions of section 552 of title 5, United States Code, and shall accompany the proposal through the subsequent review process. The conferees do not intend that the requirements for comment by other agencies should unreasonably delay the processing of Federal proposals and anticipate that the President will promptly prepare and establish by executive order a list of those agencies which have "jurisdiction by law" or "special expertise" in various environmental matters. With regard to State and local agencies, it is not the intention of the conferees that those local agencies with only a remote interest and which are not primarily responsible for development and enforcement of environmental standards be included. The conferees believe that in most cases the requirement for State and local review may be satisfied by notice of proposed action in the Federal Register and by providing supplementary information upon request of the State and local agencies. To prevent undue delay in the processing of Federal proposals, the conferees recommend that the President establish a time limitation for the receipt of comments from Federal, State, and local agencies similar to the 90-day review period presently established for comment upon certain Federal proposals.);

(D) study, develop, and describe appropriate alternatives to recommend courses of action in any proposal which involves unresolved conflicts concerning alternative uses of available resources;

(E) recognize the worldwide and long range character of environmental problems and, where consistent with the foreign policy of the United States, lend support to programs and other ventures designed to maximize international cooperation in anticipating and preventing a decline in the world environment;

(F) make available to State and local governments and individuals and organizations advice and information useful in restoring, maintaining and enchancing the quality of the environment;

(G) initiate and utilize ecological information in the planning and development of resource-oriented projects; and

(H) assist the Council on Environmental Quality.

As noted above, the conference substitute provides that the phrase "to the fullest extent possible" applies with respect to those actions which Congress authorizes and directs to be done under both clauses (1) and (2) of section 102 (in the Senate bill, the phrase applied only to the directive in clause (1)). In accepting this change to section 102 (and also to the provisions of section 103), the House conferees agreed to delete section 9 of the House amendment from the conference substitute. Section 9 of the House amendment provided that "nothing in this Act shall increase, decrease or change any responsibility or authority of any Federal officials or agency created by other provision of law." In receding from this House provision in favor of the less restrictive provision "to the fullest extent possible", the House conferees are of the view that the new language does not in any way limit the Congressional authorization and directive to all agencies of the Federal Government set out in subparagraphs (A) through (H) of clause (2) of section 102. The purpose of the new language is to make it clear that each agency of the Federal Government shall comply with the directives set out in such subparagraphs (A) through (H) unless the existing law applicable to such agency's operations expressly prohibits or makes full compliance with one of the directives impossible. If such is found to be the case, then compliance with the particular directive is not immediately required. However, as to other activities of that agency, compliance is required. Thus, it is the intent of the conferees that the provision "to the fullest extent possible" shall not be used by any Federal agency as a means of avoiding compliance with the directives set out in section 102. Rather, the language in section 102 is intended to assure that all agencies of the Federal Government shall comply with the directives set out in said section "to the fullest extent possible" under their statutory authorizations and that no agency shall utilize an excessively narrow construction of its existing statutory authorizations to avoid compliance.

Section 103

This section is based upon a provision of the Senate bill (section 102(f)) not in the House amendment. This section, as agreed to by the conferees, provides that all agencies of the Federal Government shall review their "present statutory authority, administrative regulations, and current policies and procedures to determine whether there are any deficiencies and inconsistencies therein which prohibit full compliance with the purpose and provisions" of the bill. If an agency finds such deficiencies or inconsistencies, it is required under this section to propose to the President not later than July 1, 1971, such measures as may be necessary to bring its authority and policies into conformity with the intent, purposes, and procedures of the bill. Section 103 thereby provides a mechanism which shall be utilized by all Federal agencies (1) to ascertain whether there is any provision of their statutory authority which clearly precludes full compliance with the bill and (2) if such is found, to recommend changes in their statutory authority which will enable full compliance with the bill. In conducting the review noted above, it is the understanding of the conferees that an agency shall not construe its existing authority in an unduly narrow manner. Rather, the intent of the conferees is that all Federal agencies shall comply with the provisions of section 102 "to the fullest extent possible," unless, of course, there is found to be a clear conflict between its existing statutory authority and the bill.

Section 104

This section, which was not in the House amendment and which is corollary to the actions taken by the conferees with respect to sections 102 and 103 of the conference substitute, provides that nothing in such sections 102 or 103 shall affect the specific statutory obligations of any Federal agency—

(1) to comply with criteria and standards of environmental quality;

(2) to coordinate or consult with any Federal or State agency; or

(3) to act, or refrain from acting contingent upon the recommendations or certification of any other Federal or State agency.

Section 105

This section declares that the policies and goals set forth in the bill are supplementary to those set forth in existing authorities of Federal agencies. The effect of this section, which is a slightly revised version of section 103 of the Senate bill, is to give recognition to the fact that the bill does not repeal existing law. This section does not, however, obviate the requirement that the Federal agencies conduct their activities in accordance with the provisions of this bill unless to do so would clearly violate their existing statutory authorizations.

TITLE II—COUNCIL ON ENVIRONMENTAL QUALITY

Section 201

Section 201 of the conference substitute, which conforms, except for a date change, with the language of section 2 of the House amendment, requires the President to submit to the Congress annually, beginning July 1, 1970, an Environmental Quality Report which will set forth an up-to-date inventory of the American environment, broadly and generally identified, together with an estimate of the impact of visible future trends upon the environment. Such report shall also include a review of the programs and activities of the Federal, State, and local governments, as well as those of nongovernmental groups, with respect to environmental conditions, together with recommendations for remedying the deficiencies of existing programs, including legislative recommendations.

Section 202

This section of the conference substitute establishes in the Executive Office of the President a Council on Environmental Quality composed of three members appointed by the President by and with the advice and consent of the Senate. One of the members shall be designated by the President as the chairman of the Council. The Senate bill would have created a three-member Board of Environmental Quality Advisors in the Executive Office of the President. (The Senate bill would also have provided for an additional officer, a Deputy Director, in the Office of Science and Technology to assist with environmental problems. The establishment of this additional office is not retained in the conference substitute.) Section 3 of the House amendment would have established a Council on Environmental Quality with five members. The conference substitute provision is basically the House provision but with the membership of the Council reduced to three.

Section 203

The provisions of section 203 of the conference substitute (which were contained in both the Senate bill and the House amendment) permits the Council to hire such officers and employees as are necessary to carry out the purposes of the Act and also permits the Council to hire such experts and consultants as may be appropriate.

Section 204

The House amendment set forth the following duties and functions of the Council on Environmental Quality—

(1) to assist the President in the preparation of the Environmental Quality Report;

(2) to gather information on the short- and long-term problems that merit Council attention, together with a continuing analysis of these problems as they may affect the policies stated in section 101;

(3) to maintain a continuing review of Federal programs and activities as they may affect the policies declared in section 101, and to keep the President informed on the degree to which those programs and activities may be consistent with those policies;

(4) to develop and to recommend policies to the President, on the basis of its activities, whereby the quality of our environment may be enhanced, consistent with our social, economic and other requirements;

(5) to make studies and recommendations relating to environmental considerations, as the President may direct; and

(6) to report at least once each year to the President.

The conference substitute contains the functions and duties listed above and also adds the following functions and duties (which, under the Senate bill, would have been the responsibilities of other Federal agencies)—

(1) to conduct investigations, studies, surveys, research, and analyses relating to ecological systems and environmental quality; and

(2) to document and define changes in the natural environment, including the plant and animal systems, and to accumulate necessary data and other information for a continuing analysis of these changes or trends and an interpretation of their underlying causes.

Section 205

Section 205 of the conference substitute sets forth those public and private organizations with which the Council on Environmental Quality shall consult in carrying out its functions and duties under the Act and states that the Council should utilize, to the fullest extent possible, the services, facilities, and information of public and private organizations and individuals in carrying out such functions and duties. Section 205 conforms to the language in section 7 of the House amendment, with the exception that the conference substitute provision specifies that the Council shall consult with the Citizen's Advisory Committee on Environmental Quality which was established in May, 1969, by Executive Order.

Section 206

This section provides that the Chairman of the Council on Environmental Quality shall be compensated at the rate provided for at Level II of the Executive Schedule Pay Rates, and that the other members of the Council shall be compensated at the rate provided for in Level IV of such Rates. This section conforms with the rates of compensation provided for in both the Senate bill and House amendment.

Section 207

This section of the conference substitute authorizes the appropriation of not to exceed $300,000 in fiscal year 1970, $700,000 in fiscal year 1971, and $1,000,000 in each fiscal year thereafter, to carry out the purposes of the Act. Under the House amendment, the same amounts were authorized to be appropriated except with respect to fiscal year 1971, for which $500,000 was authorized. The Senate bill authorized $1,000,000 to be appropriated annually.

EDWARD A. GARMATZ,
JOHN D. DINGELL,
W. S. MAILLIARD,
JOHN P. SAYLOR,
Managers on the Part of the House.

CONFERENCE REPORT ON S. 2917, FEDERAL COAL MINE HEALTH AND SAFETY ACT

Mr. PERKINS. Mr. Speaker, I call up the conference report on the bill (S. 2917) to improve the health and safety conditions of persons working in the coal mining industry of the United States, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

Mr. ERLENBORN. Mr. Speaker, reserving the right to object, I would like to make a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. ERLENBORN. It is my intention to make a point of order against the conference report. I understand that this must be made before the statement on the part of the managers is read. Am I correct?

The SPEAKER. In response to the parliamentary inquiry, the gentleman's understanding is also the understanding of the Chair. The gentleman is correct.

Mr. ERLENBORN. If I do not object to the unanimous-consent request for dispensing with the reading of the report, will I be protected in my point of order before the statement of the managers is read?

The SPEAKER. The gentleman could reserve a point of order, and he could exercise it at the conclusion of the reading of the statement of the managers on the part of the House.

Mr. ERLENBORN. Mr. Speaker, I reserve the point of order against the report and withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of December 16, 1969, page 39462.)

Mr. PERKINS (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement of the managers on the part of the House be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. ERLENBORN. Mr. Speaker, I renew my point of order.

The SPEAKER. The gentleman will state his point of order.

Mr. ERLENBORN. Mr. Speaker, I made a point of order against the conference report in that in several instances matters not in disagreement between the House and the Senate were amended in the conference report, and the conference report includes matters that were not included in either the House or the Senate version of the bill. I would like to be heard on that point of order.

The SPEAKER. The Chair will hear the gentleman.

Mr. BURTON of California. Mr. Speaker, will the gentleman yield?

Mr. ERLENBORN. I cannot yield at this time.

Mr. BURTON of California. It would be a little easier if those of us on this side of the aisle could get a copy of the gentleman's objections.

Mr. ERLENBORN. I am sorry, I do not have additional copies.

Mr. Speaker, section 401, part B, of the conference report refers to total disability due to pneumoconiosis from working in coal mines as a disease that would come under the terms of this measure. The term "pneumoconiosis" is defined as a chronic dust disease of the lung. Both the House and Senate bills make only complicated pneumoconiosis as the basis for payments.

The SPEAKER. Will the gentleman state again the section of the report to which he makes reference?

Mr. ERLENBORN. Section 401 of the conference report. All of title IV of the conference report, section 401 and the other sections in title IV.

Mr. Speaker, there was no disagreement between the House and the Senate as to complicated pneumoconiosis being the sole basis that is compensable under both the House and the Senate versions of the bill. This matter was not in disagreement. But in the report of the conference, simple pneumoconiosis was made compensable. This not only violates the provision that matters in disagreement cannot be amended, but it brings in coverage for an additional disease that was not contemplated, or stage of the disease that was not contemplated in either the House or the Senate version.

Moreover, title IV itself, of which section 401 is a part, carries the caption "Black Lung Benefits," a designation which is applicable only to coal dust pneumoconiosis and not to other forms of the disease, such as silicosis.

Thus the conference report goes beyond both bills in providing compensation for every kind of pneumoconiosis, and thus a number of diseases other than those attributable to black lung or complicated pneumoconiosis, which is coal-dust-complicated pneumoconiosis. Consequently by referring to diseases of the lung caused by dust, other diseases such as silicosis, which were not covered in either the House or the Senate version, are now being made compensable.

Secondly, Mr. Speaker, section 412(c) provides that benefit payments under title IV shall not be deemed income under the Internal Revenue Code. This provision was in neither bill nor in any provision similar in substance. Neither bill addressed itself to the taxability of the compensation paid under those bills. This section 412(c) is entirely new matter that was not contained in either bill in any fashion whatsoever.

Third, Mr. Speaker, section 413(c) requires the miner to file a claim under the applicable State workmen's compensation law subject to certain conditions prior to filing a claim under this section. No such requirement was contained in either bill.

Fourth, Mr. Speaker, section 421(a) provides that after January 1, 1973, claims for benefits shall be filed pursuant to applicable State workmen's compensation laws. Similarly the other provisions of section 421(a) are tied to this prior application by the applicant under State workmen's compensation laws. No such requirements were contained in either bill. This is entirely new matter.

Fifth, Mr. Speaker, section 422(a) of the conference report provides that certain provisions of the Longshoremen and Harbor Workers' Compensation Act shall be applicable to coal mine operators in a State whose workmen's compensation law has not been approved by the Secretary of Labor. Subsections 422 (b), (c), (d), (e), (f), (g), (h), and (i) are related to subsection (a). None of these are in either bill. No reference was made in either bill to the Longshoremen and Harbor Workers' Compensation Act. This is entirely new matter.

Sixth, Mr. Speaker, section 423 of the conference report requires the coal mine

operator to pay disability benefits in a State which has no workmen's compensation or whose law is not on the approved list of the Secretary of Labor. This, by the way, imposes new duties on the Secretary of Labor to approve or disapprove the provisions of State workmen's compensation laws. It, in effect, requires the Secretary of Labor to blacklist or make a list of States who do not have State workmen's compensation laws that he feels grant sufficient compensation. This is an entirely new duty on the Secretary of Labor that was not contemplated or provided for by either bill. It also requires the operator if he is self-insured to comply with regulations of the Secretary of Labor. No such provision was contained in either bill. It sets forth certain mandatory provisions that must be in the contract of the operator if he has a policy from an insurance company providing for payment of such benefits. No such provision was in either bill. This section imposes an obligation to pay workmen's compensation and industrial disease compensation, imposes these conditions on a mine operator, and no such imposition was made by either bill.

Seventh, Mr. Speaker, section 424 of the conference report requires that if the operator is neither self-insured nor covered by a policy or has not paid benefits in a reasonable time or there is no operator who was required to pay such benefits, the Secretary of Labor shall pay these benefits to the claimant who is eligible, and the operator shall be liable to the United States in a civil action for the amount so paid by the United States.

None of these provisions was in either bill. It provides a new cause of action to the United States against the operators that was not contemplated in either bill.

Mr. Speaker, there are many precedents holding that matters not in disagreement between the House and the Senate cannot be amended by the conference committee. There are many precedents for that.

In addition, the precedents are clear that the conference committee's jurisdiction is limited to those matters that were in disagreement, and the conference committee may not draw provisions that go outside those that were contemplated by either bill.

When a bill is sent to conference, matters in disagreement between the Houses, and only matters in disagreement between the Houses, are before the conferees. I cite volume 8, section 3253 of Hinds' Precedents. This rule has always been very strictly construed.

Conferees are restricted to the literal difference between the two Houses. The insertion of any extraneous matter, even though germane, is subject to a point of order. I cite volume 8, sections 3254 and 3258 of Hinds' Precedents.

It is clear, Mr. Speaker, from this short statement of only a few of many precedents—and I have others here and I am prepared to present them—that if any matter is placed in the conference report which goes beyond the literal differences between the two versions of the bill, which imposes new duties upon agencies or departments of Government, or grants new causes of action or new compensation not contemplated by either bill as passed by the two Houses, even though germane, these matters render the conference report subject to a point of order if the managers have exceeded their authority.

I am prepared, Mr. Speaker, if it is desired, to cite additional precedents.

The SPEAKER. Does the gentleman from Kentucky desire to be heard on the point of order?

Mr. PERKINS. Mr. Speaker, I certainly desire to be heard.

The SPEAKER. The Chair will hear the gentleman.

Mr. PERKINS. Mr. Speaker, we feel that we are clearly within the rules of the House. The word "pneumoconiosis" is not limited in the Senate bill. The Senate bill embraces the provisions to which the gentleman from Illinois objects.

In this regard, the Senate bill, in section 502, gave broad grant of authority to the Secretary of Health, Education, and Welfare to "develop and promulgate interim disability standards governing the determination of, among other things"—and I am quoting—"the methods and procedures to be used in disbursing such benefits, and such other matters as the Secretary deems appropriate."

What the conference report does is restrict and nail down what the Senate left to the Secretary's discretion.

I yield to the distinguished gentleman from Michigan, Mr. O'HARA.

Mr. O'HARA. Mr. Speaker, may I be heard on the point of order?

The SPEAKER. The Chair will hear the gentleman.

Mr. O'HARA. Mr. Speaker, I wish to emphasize the point made by the chairman of the Committee on Education and Labor that the language of the conference report objected to represents a definition of terms that is consistent with the differences betwen the House and Senate versions. In section 502, as the distinguished chairman has pointed out, the Senate left to administrative discretion the definition of the terms with respect to which the gentleman from Illinois has raised some question. The conference report by defining such terms has not gone beyond the Senate bill which on that point was entirely openended. I would like to point out as well, Mr. Speaker, that the House bill is a complete substitute for the Senate bill; that the bill went to conference after the House had stricken all after the enacting clause; and that in such conferences all matters in either bill are at issue.

In the Rules and Practices of the House of Representatives, in section 913, it is stated that:

> Where one House strikes out of a bill of the other all after the enacting clause and inserts a new text, conferees may discard language occurring both in the bill and the substitute, and exercise a wide discretion in the incorporation of germane amendments and may even report a new bill germane to the subject.

Mr. Speaker, the point of order to the conference report should be overruled.

Mr. BURTON of California. Mr. Speaker, I would like to be heard on the point of order.

The SPEAKER. The gentleman is recognized.

Mr. BURTON of California. Mr. Speaker, initially one of the objections is clearly out of order for the reasons stated by the gentleman from Michigan (Mr. O'HARA); I refer to section 412(c) as to whether or not the benefits should be subject to the Internal Revenue Code. This is clear because we have long since agreed that we were going to write a clear history that for the House portion of this bill these payments were not to be workmen's compensation payments. It was also inferentially clear that the benefits received under this bill were to be recognized as payments for disability such as are payments given in the traditional workmen's compensation area and therefore not income as made clear by section 412(c). Although this is not the proper point—and I shall deal with this more at length later in the debate—I would hope everyone on the floor would not gather by the distinguished gentleman from Illinois' remarks that the bulk of the amendments suggested that render this bill subject to some question in the mind of the gentleman from Illinois—I would hope there would be no impression of any kind whatsoever that it was the majority that in any instance except by receding to demands of the other side to clarify procedures——

Mr. ERLENBORN. Mr. Speaker, a point of order.

Mr. BURTON of California. I would hope that no one within the hearing range of any one of us would think it was the majority that imposed these sections.

Mr. ERLENBORN. Mr. Speaker, a point of order.

Mr. BURTON of California. Rather it was the majority that acceded to the minority's demands.

Mr. ERLENBORN. Mr. Speaker, a point of order.

Mr. BURTON of California. But because this is not the time to state such matters, I will simply not pursue that vein.

The SPEAKER. The gentleman from Illinois.

Mr. ERLENBORN. Mr. Speaker, I had intended to make a point of order that the gentleman was out of order and was not addressing himself to the point of order that was raised. I would like an opportunity to respond to the statements of the gentleman on the other side concerning the point of order.

The SPEAKER. The Chair will state to the gentleman that at this time the Chair declines to cut off discussion of the point of order.

Mr. ERLENBORN. Mr. Speaker, I would like to be heard.

Mr. DENT. Mr. Speaker, I would like to be heard on some points made by the gentleman from Illinois.

First of all, the gentleman will recall that the day of the conference was the 20th day of November. It was a matter of urgency——

Mr. ERLENBORN. Mr. Speaker, a point of order. The gentleman is not addressing himself to the point of order.

The SPEAKER. The Chair suggests that anyone who speaks address himself

to the point of order. The gentleman from Pennsylvania will confine his remarks to the point of order.

Mr. DENT. I am coming to that, sir, but it takes the background in order to bring the point of order into focus.

The SPEAKER. The Chair has stated that the gentleman may be heard and at this point the gentleman's remarks should be addressed to the point of order.

Mr. DENT. I thank the Chair very kindly for his indulgence and I would like a little indulgence from the gentleman from Illinois.

In the instructions of the conferees, well known to the gentleman from Illinois and every other member of the conference, there was instruction by the spokesmen for the minority on the other side of the Hill in which the staffs were given explicit orders to delve within the confines of the understanding we had come to, and write the total disability clauses that were discussed.

If you will note in the manager's report, the language contained in the description of complicated pneumoconiosis of total disability both descriptions and words and language appear in the House version on page 31 which is as follows:

Compensation shall be paid under this subsection in respect of total disability of and individual from complicated pneumoconiosis which arose out of or in the course of his employment in a coal mine—

And then we go over to the next page in the House bill and restate it in reverse so that there would be no misunderstanding of what was intended in the House bill, and we say:

For purposes of this subsection, any individual who suffers from complicated pneumoconiosis shall be deemed to be totally disabled.

The gentleman from the Senate decided that in their version there was an opportunity to pay compensation where there was total disability caused by complicated pneumoconiosis.

We do not necessarily pay for phase 1 of pneumoconiosis to which the gentleman alluded. We may not pay for phases 2 or 3. Neither one of these phases of pneumoconiosis or black lung or whatever you want to call it, necessarily crippled a man to the extent of destroying a man's ability to earn a living in any other occupation. So, the language in this act is directed toward making sure that a person entitled to the compensation shall be paid and a person who is totally disabled or has chronic and advanced pneumoconiosis deprives him of the ability to work in some job where his breathing is so badly disturbed by this respiratory disease that he cannot perform his duties to the best of his ability and to earn a full living.

I say to the gentlemen of the House we gave wide latitude to the staffs of the Senate and House members.

We gave a great deal of latitude particularly to the minority views, and I have always believed that the minority has every right that a majority has, and in some cases more. And most every word that is written into this title IV came from the minority.

Now, if it was the intent, Mr. Speaker, of the minority staff representatives to write language that later could be challenged on a point of order, if that was the purpose then the purpose has been served well by those who served that purpose, but it was not the purpose of the majority.

The majority came before the House and offered a piece of legislation designed to do exactly what 391 Members of the Congress approved. This bill does represent then what the conferees wanted to do, and I do not believe that the point of order is well taken.

The SPEAKER. The Chair is prepared to rule.

Mr. ERLENBORN. Mr. Speaker, could I be heard further?

The SPEAKER. Does the gentleman from Illinois desire to be heard further?

Mr. ERLENBORN. I do very briefly, Mr. Speaker.

The SPEAKER. The Chair will hear the gentleman from Illinois.

Mr. ERLENBORN. Mr. Speaker, my good colleagues addressed themselves only to the first of my several points of order against the conference report, and have alluded to language in the Senate bill. I would like to read some of the language of the Senate bill, section 501:

It is, therefore, the purpose of this title to provide, on a temporary and limited basis, interim emergency health disability benefits, in cooperation with the States, to any coal miner who is totally disabled and unable to be gainfully employed on the date of enactment of this Act due to complicated pneumoconiosis.

Now, that is the clear statement of the purpose of the Senate bill, to give compensation only for complicated pneumoconiosis.

The gentleman from Michigan alluded to section 502 of the Senate bill where the Secretary was given authority to develop and promulgate interim disability benefit standards.

Mr. Speaker, I submit this does not widen the coverage of the bill to any disease other than complicated pneumoconiosis, and the conference report in extending benefits to simple pneumoconiosis, silicosis, and other diseases goes beyond the scope of either bill.

The SPEAKER. The Chair is prepared to rule.

The Chair will state that the Chair had advance notice that the points of order would be raised, and had an opportunity to investigate the matter of the points of order involved therein.

The Chair has had the opportunity to examine the Senate bill and the House amendment thereto, as well as the provisions of the conference report.

The gentleman from Illinois (Mr. ERLENBORN) has raised a point of order against the conference report on S. 2917 and has cited several instances wherein he contends the conferees have exceeded their authority by either including matter that was not in controversy or going beyond the differences between the provisions of the Senate bill or the House amendment.

The Chair notes that the overall problem of pneumoconiosis and the benefits payable to persons totally disabled thereby is certainly within the matters is disagreement which the conferees could act upon.

The provision appearing in section 412(c) of the conference report is in neither the Senate bill nor the House amendment thereto, but the Chair notes that the subject of benefits is certainly included in both bills. As well as how those benefits are to be treated. While the provision cited by the gentleman from Illinois is new language, it is nevertheless germane to the subject of disability compensation which is before the conferees and does not enlarge the subject matter committed to them.

Another argument raised by the gentleman has received the close attention of the Chair. As pointed out by the gentleman, part C of title IV of the conference report sets up a new Federal workmen's compensation program for disability payments after December 31, 1972, where State programs are not adequate under State workmen's compensation laws, under a mechanism by which the mine operator would become liable for the payment of disability benefits.

The Chair finds that the subject of financing of disability benefits was a matter before the conferees.

The Chair has studied the precedents and finds them to be consistent that where one House has stricken all after the enacting clause of a bill and inserted an entire substitute therefor, the entire subject matter is committed to the conferees who may report any provision germane thereto providing that it remains within the broad outlines of the matter committed to conference.

The Chair believes that the controlling precendents are found in Hinds Precedents, V, section 6421 and Canons Precedents, volume VIII, section 3248.

The Chair is of the opinion that the conference report is germane and that the conferees have not exceeded their authority. Therefore, the Chair overrules the point of order.

The SPEAKER. The Chair recognizes the gentleman from Kentucky (Mr. PERKINS).

Mr. PERKINS. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, the conference report that we submit to the House today on S. 2917, Federal Coal Mine Health and Safety Act, is the greatest step forward taken in any industry to assure safe working conditions. I think that it is fitting that in this most hazardous occupation that we have taken such great care throughout the congressional deliberations through the committee action and the action of the House and the action of the conference committee to make certain that the requirements for industry practice will most effectively assure healthy and safe working conditions in mines consistent with current technology. I believe the conferees have been successful in retaining those provisions of the bill which passed the House on October 29 by 389 yeas to only four negative votes—which assure those objectives.

The conference establishes a 3-Omg dust standard effective 6 months after its enactment; retains provisions permitting miners to transfer from a position in the mine to another position where physical examination discloses evidence of pneumoconiosis so as to eliminate his exposure; retains those provisions with respect to the X-ray program; retains

those provisions with respect to the promulgation of mandatory health and safety standards; and in general retains the comprehensive health and safety features approved by this body on October 29.

With respect to the compensation of miners who have become disabled because of black lung disease the conference substitute provides for the payment of benefits for the death of a miner or for his total disability due to this dread disease and intends that its provisions be construed liberally in providing benefits to these people.

Coal miners and former coal miners who are totally disabled due to pneumoconiosis will receive benefits at a rate equal to 50 percent of the minimum monthly payment to which a disabled Federal employee in grade GS–2 would be entitled at the time of payment.

Widows of coal miners and former coal miners whose deaths are due to pneumoconiosis or whose death occurred while receiving benefits under this part shall receive benefits at the rate prescribed for totally disabled miners.

The rates prescribed above are increased for dependents at the rate of 50 percent for one dependent—widow or child—75 percent for two dependents, and 100 percent for three or more dependents.

The following presumptions will be used in establishing entitlement:

First. If a miner who is suffering from pneumoconiosis was employed for 10 years or more in an underground coal mine, there will be a rebuttable presumption that the pneumoconiosis arose out of such employment.

Second. If a miner worked 10 years in such a mine and died of a respirable disease, there will be a rebuttable presumption that his death was due to pneumoconiosis.

Third. If a miner is suffering from or dies from an advanced irreversible stage of pneumoconiosis it will be irrebuttably presumed his death or total disability was due to pneumoconiosis.

Claims filed before December 31, 1972, will be processed by the Secretary of Health, Education, and Welfare in a manner similar to that he uses for processing claims for disability under the Social Security Act. If the claim is filed after December 31, 1971, benefits under that claim may be paid only until January 1, 1973.

Claims filed on or after January 1, 1973, will be processed under the appropriate State workmen's compensation law if the Secretary of Labor has determined it has adequate coverage for pneumoconiosis. He will, generally speaking, determine a State law to have adequate coverage for pneumoconiosis if the benefits under such law and the criteria for determining eligibility are not less favorable to the claimant than those applicable to claims filed before January 1, 1973.

Where the applicable State workmen's compensation law does not provide adequate coverage for pneumoconiosis, the persons entitled to benefits will be paid—so far as applicable—under the terms of the Longshoremen's and Harbor Workers' Compensation Act and provided under part C of title IV of the bill.

Mr. Speaker, in his letter of today, the Secretary of Labor quoted a portion of his remarks before the Select Subcommittee on Labor on June 3, 1969. I would like at this time to quote an additional paragraph of those remarks of the Secretary:

> As to the subject of black lung disease, that is a matter of tremendous concern to us all. We have done some things about that. We have other ideas, and we will be bringing them forward shortly.

It is now December 17, 1969, or nearly 6 months later, and the Secretary has not brought any ideas to us. Instead of coming up with ideas of how to help those poor miners, widows, and children, they tell us to abandon title IV of the bill and to abandon these poor people who are trying to eck out a living with the meager amount of money they are able to scrape together. In the interim, the House passed the 1969 Federal Coal Mine Health and Safety Act with a very broad Federal benefits provision section for miners afflicted with black lung. That was on October 29, 1969. Earlier that month, the Senate also passed a broad Federal benefits provisions.

That was 2 months ago. Since then, we did not hear from the administration until late last week when Secretary Hickel gave us a cost range of this program of between $154 million. This is typical of Interior's estimates of costs. When we were concerned with the cost of replacing electrical equipment in mines, we were given an initial estimate of $150 to $300 million. That range, however, after a few weeks of pencil sharpening, was reduced to less than $50 million. I can only wonder what Interior would do if we gave them a few more days on their most recent guesses.

Still, he does not give us his ideas for helping the miner afflicted with this terrible disease and his poor widow. Rather, he now tells us 2 months after passage by both Houses, and on the day the conference report is filed, the administration tells us that a Federal benefits program for poor people "is inappropriate for the Federal Coal Mine Health and Safety Act of 1969." Mr. Speaker, I say we must meet the needs of these disabled miners regardless of the cost.

I cannot idly sit by and allow miners who walk a few steps and must stop and bend over to catch their breath because they have black lung. We must provide some relief. These miners and their widows cannot wait for the States to act. In many States this wait would be forever.

Even more importantly, this legislation transcends petty arguments over costs. What is at stake here is the health and safety of the coal miners of this country who have been waiting for passage of this bill since that terrible tragedy at Farmington, W. Va., over a year ago. If the provisions of this bill are properly administered, we should greatly reduce and, hopefully, eliminate future black lung claims with the control provided here of the cause of this disease—coal dust.

Let us pass this bill today for the miners of the past, present, and those of tomorrow.

Mr. Speaker, I want, at this time, to comment on remarks made about my handling of this conference report within the last 24 hours. I had considerable discussions with both majority and minority members of my committee yesterday, including the gentleman from Illinois (Mr. ERLENBORN), and Members of the Senate. It was my intention to file this report and to have the other body consider it just as would be the normal case. I found out later that the gentleman from Illinois (Mr. ERLENBORN) was well aware of the fact that the Senate would not act first at least 1½ hours earlier than myself. Further, when I asked unanimous consent to file the report by midnight of last night, one of the members of the minority on my committee, the gentleman from California (Mr. BELL) who has shown a keen interest in this legislation and contributed to making it the landmark legislation it is, was on the floor when I made my motion and raised no objection.

Thus, I feel that those who contend that the minority was not consulted in this matter, particularly the gentleman from Illinois (Mr. ERLENBORN), either did not state the facts accurately or were not fully appraised of the participation of other members of the minority. I also want to make it abundantly clear that I did not take advantage of any member of the minority in this matter, but, on the contrary, I believe if the gentleman from Illinois (Mr. ERLENBORN) had apprised me of the decision of the Members of the other body when he knew of it, much unnecessary work could have been avoided.

At this point, I believe we should emphasize how much this landmark Health and Safety Act for workers was the product of long and hard work of the Congress. In September of 1968 and again in January and March of this year, the Interior Department recommended proposals to protect coal miners, but we quickly found that these were not adequate given the health and safety record of this industry over the past 17 years. The hearings held in both Houses clearly demonstrated to all of us that a far more comprehensive measure was needed for our miners and their families than anything the agencies downtown were proposing or even dreamed of. To illustrate how much this legislation is the product of the Congress, I will list some of its principal features that were not included in any Interior proposal as follows:

HEALTH STANDARDS

The Congress determined very early in its consideration of this measure that a 3-milligram respirable dust standard for underground coal mines was not only necessary for the miners, but also attainable within a short time. The Interior Department, last January, first proposed a 3 standard, but left it up to the Secretary to prescribe the schedule for achieving it. Later in March, the Department proposed a 4.5-milligram standard effective 6 months after enactment, but provided an enforcement procedure that would

probably result in most mines maintaining the dust level at 5.5 milligrams.

Congress, on the other hand, prescribes in this legislation a 3 standard effective 6 months after enactment with meaningful enforcement procedures that parallel those applicable to safety standards. At the same time, we were not satisfied that this dust level would protect the health of miners and established a 2-milligram standard effective 3 years after enactment. We also directed the Secretary of Health, Education, and Welfare to begin almost immediately to establish lower dust levels which could accelerate even the 3- and 2-milligram standard timetable.

Also, the Department provided that if a miner shows substantial evidence of black lung, he shall be transferred to another area of the mine where the dust level is 2 milligrams or less. The conference report before us today provides for such a transfer where there is any evidence of this disease, after the operative date of title II, to an area where the level is 2 milligrams or less, and, effective 3 years after enactment, to an area where the level is 1 or lower.

The Department's proposal would have permitted multiple shift measurements of respirable dust indefinitely. The conference reported bill requires single shift measurements 18 months after enactment.

The conference report, unlike the Department's proposal, would establish the noise standard under the Walsh-Healey Public Contracts Act and direct that it be improved further.

SAFETY STANDARDS

The conference reported bill, unlike the Department's proposals, would:

Require a minimum quantity of air to the working face;

Require the Secretary to prescribe the minimum velocity and quantity of air reaching the working face to control methane;

Require that the Secretary prescribe the maximum respirable dust level for intake aircourses;

Require preshift examinations for all shifts, not just production shifts;

Provide for the proper installation of roof bolts;

Provide for the control of one of the most dangerous sources of methane, namely methane coming from the gob areas;

Require ventilation system and methane and dust control plans;

Provide for the separation of intake and return aircourses from belt haulageways;

Provide for expanded protection in the use and maintenance of electrical equipment and high, medium, and low voltage circuits;

Limit the number of temporary splices to one;

Provide that mine maps be available to the Department of Housing and Urban Development and to surface owners and lessees;

Provide for the use of automatic couplers or haulage equipment;

Provide against inundations in mines located under bodies of water;

Provide for self-rescue devices adequate to protect mines for 1 hour or more;

Prescribe improved methods of assuring adequate oxygen underground;

Provide for a check-in and check-out system;

Provide for the prevention and suppression of ignitions on electric face equipment;

Provide for standards to control explosive gases, other than methane; and Provide an adequate supply of potable water for the miners.

BLACK LUNG BENEFITS

Here, as I have said, is one of the most significant provisions of the bill that was initiated in the Congress to help poor miners suffering from this dread disease and the widows and children of these miners. As a matter of fact, as I have stated, the administration, for the first time, today sent a letter from Secretary Shultz opposing these black lung benefit payments for miners affected with this disease, their widows and their children. Imagine, 2 months after this benefits provision passed overwhelmingly in both Houses, the administration on the day of final passage opposes one of its most important provisions and even threatens veto. Where have they been for the last 4 months?

In summary, these are just a few of the examples of what the Congress has done to protect and help miners and their families. We can all be proud of our efforts to save lives and to bring some benefits to those people who have been forgotten in the past.

Finally, I want to admonish both the Secretary of the Interior and the Secretary of Health, Education, and Welfare that they must begin now to carry out the mandates of this legislation in a manner that will provide the greatest health and safety possible to miners and the greatest benefits possible to miners with pneumoconiosis who are totally disabled and the widows of miners with this disease. I can assure both Secretaries that hearings will be held on the progress of this legislation and its achievements before the end of July 1970 by my committee.

A summary follows:

SUMMARY OF MAJOR PROVISIONS

TITLE I—GENERAL

(1) Grants authority for the promulgation of mandatory health and safety standards to the Secretary of the Interior (hereinafter referred to as the "Secretary"). The Secretary promulgates all mandatory standards, but is responsible for developing and revising only mandatory safety standards. The Secretary of Health, Education, and Welfare (HEW) is responsible for developing and revising mandatory health standards. No standard promulgated by the Secretary shall reduce the protection afforded miners below that provided by the interim mandatory health and safety standards contained in titles II and III, respectively.

(2) Provides opportunity for a representative of miners, whenever he has reasonable grounds to believe that a violation of a mandatory health or safety standard exists or an imminent danger exists in a mine, to obtain an immediate inspection of such time.

(3) Provides a minimum of at least four annual inspections of each mine. Also provides a minimum of one spot inspection during every five working days of a mine (A) that liberates excessive quantities of methane or other explosive gases during its operations, (B) in which a methane or other gas ignition of explosion has occurred which resulted in death or serious injury at any time during the previous five years, or (C) the Secretary believes has especially hazardous conditions.

(4) Establishes the procedural mechanism for finding dangerous conditions or violations of standards in mines, and for the issuance of notices and orders—including withdrawal orders—relative to such.

(5) Provides administrative and judicial review procedures.

(6) Establishes civil penalties of up to $10,000 for operator violations of a standard or any other provision of the Act. Establishes a civil penalty of up to $250 to a miner who violates specified provisions of the Act (smoking, carrying of matches, etc.). Establishes criminal penalties to any operator who willfully violates a standard or knowingly violates or fails or refuses to comply with orders. Upon conviction, such operator shall be punished by a fine of not more than $25,000 and/or imprisonment for not more than one year for the first conviction, and for subsequent convictions, by a fine of not more than $50,000 and/or imprisonment for not more than five years. Also establishes similar civil and criminal penalties to any director, officer, or agent of a corporate operator for like violations, failures, or refusals. Criminal penalties are also established for false statements, representations, or certifications relative to the Act, and for the introduction and delivery in commerce of any equipment for use in a coal mine which is falsely represented to be in compliance with the provisions of the Act.

(7) Provides for limited pay guarantees to miners idled by a withdrawal order.

(8) Prohibits the discharge or other discrimination against a miner for exercising rights under the Act.

TITLE II—INTERIM MANDATORY HEALTH STANDARDS

(1) Establishes interim mandatory health standards effective six months after the date of enactment of the Act.

(2) Requires each operator to take accurate samples of the amount of respirable dust in the mine atmosphere. The samples are transmitted to the Secretary and analyzed and recorded by him.

(3) Establishes a 3.0 milligram per cubic meter of air (mg/m^3) dust standard effective six months after enactment. Extensions of time to comply with the standard (permits for noncompliance) may be granted by the Panel (established by section 5) for a period not to exceed twelve months from the effective date of the standard.

(4) Establishes a 2.0 mg/m^3 dust standard effective three years after enactment, but the Panel may grant permits for noncompliance to an operator for a period not to exceed three additional years from the effective date of the standard.

(5) The Secretary of Health, Education, and Welfare has the continuing authority, beginning one year after enactment, to further reduce the dust standard below the levels established by the Act to levels which will prevent new incidences of respiratory disease and the further development of such disease in any person.

(6) Each operator shall cooperate with the Secretary of Health, Education, and Welfare in making a chest x-ray available to each miner within eighteen months after enactment, again three years later, and at such subsequent intervals determined by the Secretary of Health, Education, and Welfare but not to exceed every five years. Each workers who begins work in a coal mine for the first time shall be given a chest x-ray at the commencement of his employment and again three years later. If the second x-ray shows evidence of the development of pneumoconiosis, the worker shall be given an additional x-ray two years later. The x-rays may

be supplemented by other tests deemed necessary by the Secretary of Health, Education, and Welfare. The Secretary of Health, Education, and Welfare is also responsible for reading, classifying, and recording all results of x-rays and other medical tests.

(7) Any miner who shows evidence of the development of pneumoconiosis shall be afforded the option of transferring from his position to another position in any area of the mine where the respirable dust concentration is not more than 2.0 mg/m³. Effective three years after enactment, the option of transfer shall be to an area of the mine where such concentration is not more than 1.0 mg/m³, or if such level of concentration is not attainable in the mine, to an area where the concentration is the lowest attainable below 2.0 mg/m³. Any miner so transferred shall not receive less than the regular rate of pay received by him immediately prior to transfer.

(8) Incorporates the noise standard prescribed under the Walsh-Healey Public Contracts Act, and provides authority to the Secretary of Health, Education, and Welfare to improve upon such standard.

TITLE III—INTERIM MANDATORY SAFETY STANDARDS FOR UNDERGROUND COAL MINES

(1) Establishes interim mandatory safety standards effective three months after the date of enactment of the Act.

(2) Establishes detailed requirements to provide for safer working conditions in underground coal mines. These include requirements with regard to roof support, ventilation, combustible materials and rock dusting, electrical equipment, trailing cables, grounding, underground high-voltage distribution, underground low- and medium-voltage alternating current circuits, trolley and trolley feeder wires, fire protection, maps, blasting and explosives, hoisting and mantrips, emergency shelters, communications, escapeways, and other miscellaneous matters.

(3) Establishes requirements for the use of permissible equipment in all underground coal mines. Requires that all electric face equipment at gassy mines and all such small equipment at all mines be permissible within 15 months after enactment. It is also required that, in the case of mines not previously classified as gassy which are below the watertable, such large equipment must be permissible in 15 months, but the Panel may grant extensions of time (permits for noncompliance) of not to exceed in the aggregate an additional 33 months if the Panel determines, based on specified criteria, that the operator is unable to comply with the permissibility requirements because of unavailability of permissible equipment. In the case of such mines which are located entirely above the watertable, it is required that such large equipment be permissible within 51 months after enactment but the Panel may grant extensions of not to exceed 2 additional years on a mine-by-mine basis because of unavailability of such equipment.

TITLE IV—BLACK LUNG BENEFITS

(1) Provides for the payment of benefits for death or total disability due to pneumoconiosis.

(2) Coal miners and former coal miners who are totally disabled due to pneumoconiosis will receive benefits at a rate equal to 50 percent of the minimum monthly payment to which a disabled Federal employee in grade GS–2 would be entitled at the time of payment. This represents approximately $136 per month. Widows of coal miners and former coal miners whose deaths are due to pneumoconiosis or whose deaths occurred while receiving total disability benefits, receive benefits at the rate prescribed for totally disabled miners. The rates prescribed above are increased for dependents at the rate of 50 percent for one dependent (widow or child), 75 percent for two dependents, and 100 percent for three or more dependents. The benefits for miners and widows will be reduced on account of payments under the workmen's compensation, unemployment compensation, or disability insurance laws of the State and, in the case of miners only, on account of excess earnings, as provided under the Social Security Act for benefits payable under that Act.

(3) The following presumptions are used in determining entitlement:

A. If a miner who is suffering from pneumoconiosis was employed for 10 years or more in an underground coal mine, there will be a rebuttable presumption that the pneumoconiosis arose out of such employment.

B. If a miner worked ten years in such a mine and died of a respirable disease, there will be a rebuttable presumption that his death was due to pneumoconiosis.

C. If a miner is suffering from or dies from an advanced irreversible stage of pneumoconiosis, it will be irrebutably presumed his death or total disability was due to pneumoconiosis.

(4) Claims filed before December 31, 1972, will be processed by the Secretary of Health, Education, and Welfare in a manner similar to that he uses for processing claims for disability under the Social Security Act. If the claim is filed after December 31, 1971, benefits under that claim may be paid only until January 1, 1973. Claims filed on or after January 1, 1973, will be processed under the appropriate State workmen's compensation law if the Secretary of Labor has determined it has adequate coverage for pneumoconiosis. He will, generally speaking, determine a State law to have adequate coverage for pneumoconiosis if the benefits under such law and the criteria for determining eligibility are not less favorable to the claimant than those applicable to claims filed before January 1, 1973. Where the applicable State workmen's compensation law does not provide adequate coverage for pneumoconiosis, the persons entitled to benefits will be paid (so far as applicable) under the terms of the Longshoremen's and Harbor Workers' Compensation Act.

(5) In the case of claims filed on or after January 1, 1973, no payments of benefits may be made after seven years after the date of enactment of the Act.

TITLE V—ADMINISTRATION

(1) Provides authorization for appropriations for health and safety research to be carried out by the Secretary of Health, Education, and Welfare and the Secretary, respectively.

(2) Requires the Secretary to expand programs for the education and training of operators, agents, thereof, and miners in accident-control, healthful working conditions, and in the use of coal mining equipment and techniques.

(3) Provides for economic assistance to any small business concern operating a coal mine to meet the requirements imposed by the Act. Such assistance shall be given by the Small Business Administration.

(4) Specifies qualifications and training requirements for employees of the Secretary; particularly inspectors.

Mr. BURTON of California. Mr. Speaker, will the gentleman yield?

Mr. PERKINS. I yield to the distinguished gentleman from California.

Mr. BURTON of California. Mr. Speaker, it would be fair to state, on behalf of the House conferees on both sides, we had had, up to and through the conference committee, a very constructive relationship, and it is further the case that it is the fault of no Member of this House on either side that we were informed last night about 9:30 that the other body, in their infinite wisdom, handed us an "either or else" set of procedures to follow; and is it not further the fact that the gentleman from Illinois (Mr. ERLENBORN), our distinguished subcommittee chairman, the gentleman from Pennsylvania (Mr. DENT), and myself, learned of this about 9:30 or so last night, even before the distinguished chairman of the full committee learned of it, and that the only way to cut our way through this situation, because we were not able to come to grips with any kind of dialog or communication with the other body, was to accede to the gentle nudge—although some stronger language was communicated to us from the gentlemen working on the other side of the Capitol—and so, lamentably for all of us who have worked so long and constructively together, we find ourselves at this rather late hour of the evening, due to other procedural difficulties, in a good deal more disagreement than any of us had as we walked out of the conference committee room at the conclusion of the conference.

Mr. ERLENBORN. Mr. Speaker, will the gentleman from Kentucky yield?

Mr. PERKINS. I yield to the gentleman from Illinois.

Mr. ERLENBORN. Mr. Speaker, will the gentleman yield me time to address myself to the conference report?

Mr. PERKINS. Yes. I yield the gentleman now 7 minutes.

Mr. ERLENBORN. Is that all the time the gentleman intends to yield?

Mr. PERKINS. No, I may yield more.

The SPEAKER pro tempore. The gentleman from Illinois is recognized for 7 minutes.

Mr. ERLENBORN. I agree with the gentleman from California (Mr. BURTON) that we have had a constructive relationship among the members of the subcommittee. I regret that the events subsequent to the conference have disturbed that relationship and forced me to take the action I have today. No good purpose will be served in assessing blame on any individual, but I will assert that this whole matter has been badly handled in the last few days.

Mr. Speaker, I am opposed to this conference report for one simple reason. The conferees met and reached agreement, and the broad outlines of that agreement as to what should be in this conference report, title IV, has been violated. There are matters in this which were never discussed by the conferees. There are new matters brought in, new obligations on the part of the Secretary of Labor, new causes of action against the mine operator, new duties on the Secretary of Labor never contained in either bill, never discussed by the conferees, and never agreed to by the gentleman from Illinois.

Mr. Speaker, to reinforce the fact that I did not know what was in this report, the only time I was delivered a copy—actually delivered to my counsel—of title IV of this report was last night, at about 4 o'clock in the afternoon. That was not an accurate copy of what was in title IV of the report as filed about 11:30 last night. That report would not have been filed at 11:30 last night had not the gentleman from Kentucky gotten unanimous consent to file the report without

first asking any Member of the minority if he had objection to the unanimous-consent request.

Again to reinforce what apparently is the attempt to push through something that was never contemplated by the conferees and to foreclose an opportunity for this House to work its will, the gentleman from Kentucky came on the floor of this House this afternoon intending to call up this conference report earlier in the afternoon, and had never informed me nor any other Member of the minority that it was his intention to call up the report for consideration. Every attempt has been made by the gentleman from Kentucky to preclude an opportunity for the minority to know what was in the report and to have an opportunity to inform this House of the provisions that have been put in this report.

Mr. Speaker, I am opposed, as is this administration opposed, to the provisions of title IV of this report. A copy of the letter from the Secretary of Labor Shultz was delivered to me and to the gentleman from Ohio (Mr. AYRES) and to the gentleman from Kentucky (Mr. PERKINS) outlining the position of the administration.

I am also authorized to say that if this conference report is approved and this bill becomes law with the provisions that are now in title IV, with the cost implications to the Treasury of the United States, that the President may be required to veto the bill.

I warned the gentleman from Pennsylvania and the gentleman from Kentucky when we had this matter in subcommittee that to include pneumoconiosis compensation in the mine health and safety bill was endangering the passage of this bill, and I think what I have just informed the Members concerning a possible veto of the bill is confirmation of what I said many months ago.

Mr. Speaker, I think the largest figure as to the possible cost that was ever given as an estimate, prior to the drafting of this new title IV in the conference report, was in the neighborhood of $30 million or $40 million. Some of my colleagues estimated it might be as high as $50 million to $60 million. Now the Bureau of Mines estimates it to be as high as $385 million annual cost to the Treasury, and the minimum figure they now estimate the cost of this to be is $150 million to the U.S. Treasury.

Beyond this, additional impositions are put on the State unemployment compensation systems. It was made very clear in this House when this bill was passed that this was not intended to be a workmen's compensation provision. This was special temporary relief for pneumoconiosis compensation, but now we are going to have this new provision and the Secretary of Labor will be required to pass upon the adequacy of State workmen's compensation provisions, and issue, in effect, a blacklist of those which in his judgment do not have sufficient compensation for the workers, and require that even after this program expires—as was contemplated in both bills that it would expire because it was to be temporary only—that the State workmen's compensation laws cover pneumoconiosis, or in the event they do not, that the mine operator has a new obligation, never contemplated, to pay workmen's compensation benefits to the miners.

It creates a new cause of action by the United States against coal mine operators if they do not pay this compensation, something never contemplated by the draftsman of this bill in the first place, if he was being honest with the Members of this House and with the members of our committee—if he was honest with the Members of this House when they explained the terms of this bill and carefully told us this was not to be a compensation provision.

This will be the first intrusion into the State operated workmen's compensation laws, not by implication, as I claimed when the bill was under consideration on the floor of the House, but now as drafted by the staff and by a few of the Members outside of the scope of the agreement of the conferees, expressly an intrusion into all workmen's compensation laws.

I am distressed my point of order was overruled. I am going to make a motion to recommit this bill for the purpose of reconsidering title IV. I make it clear that neither this administration nor I nor any Member of the minority is opposed to coal mine health and safety; but we are opposed not only to the provisions of title IV but we also are opposed to the kind of underhanded, behind the scenes, dealings that have brought us to the point where this is being considered today, where it almost passed earlier today without the minority having an opportunity to be heard on the floor of the House.

I hope you will support my motion to recommit not because of your political considerations, not because of your political philosophy——

Mr. BURTON of California. Mr. Speaker, will the gentleman yield?

Mr. ERLENBORN. I will not yield to the gentleman.

Not because of your lack of concern or great interest in the coal miners and in this problem of pneumoconiosis, but so that you can sustain the dignity of this House and the legislative process. This is a travesty upon the legislative process. Unless my motion to recommit is agreed to and we send this bill back to the conference where the conferees can work their will, this will have been a very black day for the House of Representatives and the legislative process.

Mr. PERKINS. Mr. Speaker, I yield 10 minutes to the distinguished chairman of the subcommittee, who is an authority in this area, the gentleman from Pennsylvania (Mr. DENT).

Mr. DENT. Mr. Speaker, I should first like to say to the gentleman from Illinois that there were no cloak and dagger episodes in this whole deal. There was nothing underhanded. If there was, the underhandedness came from your side of the table, because I did not attend any of the markup sessions, because the instructions of the conferees were to the staff of both sides to write within the confines of the understandings of the conferees. So I did not commingle with the conferees' staff at any time. They wrote the language that they felt was jusitified and cleared it with their own Senators and Congressmen.

Mr. BROWN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. DENT. Wait until I am through. I want to get this off my mind.

I am sure this opposition, the reason for it, to this legislation is probably best explained by the very letter the gentleman failed to read, the letter I have just been handed, written by Mr. Shultz, the Secretary of Labor.

It is not a question of language. It is not a question of misunderstanding. It is not a question of whether or not there were any transgressions on the part of the conferees or their staffs. It is simply a question of a firm, philosophical belief—I hate to put this down so plainly and bluntly—of those who are now directing the administration.

We believe—

Says Secretary Shultz—

that the solution to this problem is through any necessary improvement in the system of State workmen's compensation laws. * * * [The] "know-how [is in the hands of the States] in the workmen's compensation field. It is our present judgment that reliance should continue to be placed on that system of State laws." We continue to support that position.

Early in the days when this legislation was before the subcommittee we heard witnesses from all over these United States and the one deplorable fact that was brought out time after time was that the States had not done anything to relieve the situation that former miners find themselves in in Iowa, Michigan, California, New York, and in every State of the Union. There was a drop of from 600,000 to 135,000 miners in this country. These miners from the anthracite and bituminous regions of our great coal-mining States are scattered all over these 50 States. There is no responsibility on the part of Georgia and Mississippi to pass a compensation law to pay for a miner's lung disease contracted in one of the mining States. There is no way that we can deprive a man of his property without due process of law by easily trying to assess the cost of pneumoconiosis payments to an operator who has a miner who has worked for 10 or 12 or 15 or 20 years for different operators in different States or in different sections of States. You cannot do that. We found that out in our State, and we passed the last workable law and the only law that has taken care of its miners and those of neighboring States. We paid for it out of the general fund because we knew that these men were crippled and totally disabled. In many States they have no relief whatsoever.

Now, Mr. Speaker, I deny that this is an open compensation law and defy anybody to point out where it is. After 7 years no person who contracts pneumoconiosis and then files a claim can be paid by the Federal Government. We give 7 years because of the time lag in order that the people who might have the disease would have an opportunity to come in and be examined. We tightened it up so that there could be only one agency of the Government to read the findings of the X-rays in order that all would be treated alike.

Mr. Speaker, I have told this House—and I want you to know this—that I never deliberately mislead anybody. I

would not do that and I have not done it in 39 years of being a legislator, and I will not start now.

I told this House time after time that this is a one-shot compensation deal, dealing with a subject matter that is the whole lifeblood of the coal industry. There are 15,000 coal miners needed in this country in the next 18 months. Are you going to work in the coal mines? Are you going to recruit these miners in these great United States to meet the need for fuel in this country in the future? No, you are not. And you will not get any new miners—or old miners, either—to go into the mines unless you give them some security against death by explosion, death by roof falls, and death from the complications of the most dreadful of all diseases. Have you ever heard a coughing coal miner in the stillness of the night hacking away with blood coming out of his mouth and nostrils and with no care? Some have spent $180 a month for oxygen, and with nowhere to get it and depending on the charity of a charitable organization such as the Red Cross and the Salvation Army, and a man goes begging who was giving his substance to this country to make it what it is today, to build for those of us who have luxuries which we enjoy.

Yes. I know your philosophy. It is spelled out in the letter of your Secretary of Labor, who does not say the things said by the ranking minority members that sections were nongermane to the intent. Oh, no. No such language is in this letter. The plain coldblooded statement of fact is there that we oppose payment, the payment of compensation to the distressed miners of this country unless their State passes a law on it. How do you force the States to pass a law? By a statement? You cannot force them and no one else can.

These men are suffering and they are dying, and I want to give you another little bit of information that might ease your cold hearts. Eighty-five percent of all the deactivated miners in the Appalachia region are over 65 years of age, and you are worrying about what millions it is going to cost you. Their funeral services will cost more than you pay for compensation.

Let me give you some figures. These figures come from the Secretary of Health of this great Nation of ours after the only study ever made—and I have given you these figures and you know you have heard them; I gave them to the conference and they have heard them; there is nothing secret about them and you can get them. At one point a Senator came before us and told us that the cost would be as much as $180 million a year.

Gentlemen, if you took every miner in these United States and if you paid him $5,000 a year and bought his wife a chinchilla coat, you would not spend that much money.

Finally, after a little bit of fact finding, he came down to $154 million and yesterday he came down to $124 million. And, let me tell you the truth and when the truth is known to you, our Secretary of Health, Education, and Welfare, in a Public Health Service survey made in 1963 and carried through to 1965, the only authentic survey made in the field of pneumoconiosis in this great country of ours, and it was made by the Department of Health, Education, and Welfare, and it was found that 3 percent of all the active coal miners throughout the Appalachian region where the heart of black lung exists, only 3 percent of the active coal miners have the chronic and advanced stage of pneumoconiosis. That is one category paid under our provision.

If you take the 110,000 miners working underground in this country, and the only ones susceptible to the disease, the figure would go to 3,300 miners. We have a total top figure in this bill of $272 a month. And, if you count everyone of these 85 years of age or 65 years of age or 75-year-old miners and gave them credit for a wife and two children and if you paid them the top payment of $272 a month, you would be paying out something over $32.3 million for that part of the provision.

The SPEAKER pro tempore (Mr. FLOOD). The time of the gentleman from Pennsylvania has expired.

Mr. PERKINS. Mr. Speaker, I yield the gentleman 3 additional minutes.

Mr. DENT. I do not know what the total cost of this provision will be, but I do know the costs being thrown around here are outrageous and unsubstantiated. We have proven that, and evidence of that proof will appear at the conclusion of my remarks.

Now, let us go a little further. It has been said on this floor that this is an invasion of States' rights, that we are injuring the State systems. You do not have any State systems. You do not have any State programs. If you did, we would not have to have this legislation. But what do we do?

Dr. Monroe Berkowitz of Rutgers University, a renowned expert in the field appeared before the committee and said:

> This would constitute an endorsement by Congress of the State system. Some inducement of this sort is vital to the continuing health of our State system of workmen's compensation. It would express a judgment by Congress that the system is worth preserving and that it is good enough to cover all. Only if States do not act would obviously second-best solutions be brought into play. If this legislation were completely successful, not one person would ever be added to the coverage of the Longshoremen's and Harbor Workers' Act.

Certainly it is a second-best solution, because if it was a first-best solution these miners would have had their compensation payments during these last years of degradation, disease and despair. No, it is not the best we can give, but I say that any opposition to this bill today is an opposition to paying some little recompense to the men who go down into the bowels of the earth, if you will, and give us the fuel that makes and has made this Nation what it is—that built its farms and its mills, and made millionaires out of many of the people—these same men who today are poverty stricken.

Come with me, will you, hand in hand, come and take a walk through the back valleys of Pennsylvania and of West Virginia, and I will show you what a coal mine looks like, and I defy any of you to stand up in the face of a small, degradated coal town and a little coal mining family in a shanty like the one I was born in, and tell me you would vote against this because your philosophy says it is not the business of the Federal Government.

The Federal Government was constituted to do for the States and the people of the States that which the States do not do for themselves.

And in that context I will leave you with this admonition, and I leave it with you because I know it to be true, and I know it is true because I know our coal miners and I know their fiber and I know their being—you defeat this bill and there will not be a coal miner in the mines of this country within 15 days.

Mr. Speaker, I will now be brief in discussing this conference report. The House passed the coal mine health and safety bill October 29, and the conference committee met and agreed on November 20—the anniversary of the Farmington tragedy. The conference committee debated the provisions of the House amendment to the bill passed in the other body with one consistent objective: the highest degree of health and safety protection to the miner. I am proud of our agreement and satisfied that it represents the best we could have even hoped for. I believe we can all take pride in this product with the knowledge that its ramifications will extend to every coal mining community in the Nation, and will afford a greater measure of security and relief to miners and their families.

Mr. Speaker, the major provisions of the bill may be summarized rather succinctly. They follow:

TITLE I—GENERAL

First. Grants authority for the promulgation of mandatory health and safety standards to the Secretary of the Interior—hereinafter referred to as the "Secretary." The Secretary promulgates all mandatory standards, but is responsible for developing and revising only mandatory safety standards. The Secretary of Health, Education, and Welfare is responsible for developing and revising mandatory health standards. No standard promulgated by the Secretary shall reduce the protection afforded miners below that provided by the interim mandatory health and safety standards contained in titles II and III, respectively.

Second. Provides opportunity for a representative of miners, whenever he has reasonable grounds to believe that a violation of a mandatory health or safety standard exists or an imminent danger exists in a mine, to obtain an immediate inspection of such mine.

Third. Provides a minimum of at least four annual inspections of each mine. Also provides a minimum of one spot inspection during every 5 working days of a mine that liberates excessive quantities of methane or other explosive gases during its operations, in which a methane or other gas ignition or explosion has occurred which resulted in death or serious injury at any time during the previous 5 years, or the Secretary believes has especially hazardous conditions.

Fourth. Establishes the procedural

mechanism for finding dangerous conditions or violations of standards in mines, and for the issuance of notices and orders—including withdrawal orders—relative to such.

Fifth. Provides administrative and judicial review procedures.

Sixth. Establishes civil penalties of up to $10,000 for operator violations of a standard or any other provision of the act. Establishes a civil penalty of up to $250 to a miner who violates specified provisions of the act—smoking, carrying of matches, and so forth. Establishes criminal penalties to any operator who willfully violates a standard or knowingly violates or fails or refuses to comply with orders. Upon conviction, such operator shall be punished by a fine of not more than $25,000 and/or imprisonment for not more than 1 year for the first conviction, and for subsequent convictions, by a fine of not more than $50,000 and/or imprisonment for not more than 5 years. Also establishes similar civil and criminal penalties to any director, officer, or agent of a corporate operator for like violations, failures, or refusals. Criminal penalties are also established for false statements, representations, or certifications relative to the act, and for the introduction and delivery in commerce of any equipment for use in a coal mine which is falsely represented to be in compliance with the provisions of the act.

Seventh. Provides for limited pay guarantees to miners idled by a withdrawal order.

Eighth. Prohibits the discharge or other discrimination against a miner for exercising rights under the act.

TITLE II.—INTERIM MANDATORY HEALTH STANDARDS

First. Establishes interim mandatory health standards effective 6 months after the date of enactment of the act.

Second. Requires each operator to take accurate samples of the amount of respirable dust in the mine atmosphere. The samples are transmitted to the Secretary and analyzed and recorded by him.

Third. Establishes a 3.0 milligram per cubic meter of air—mg./m.^{3}—dust standard effective 6 months after enactment. Extensions of time to comply with the standard—permits for noncompliance—may be granted by the Panel—established by section 5—for a period not to exceed 12 months from the effective date of the standard.

Fourth. Establishes a 2.0 mg./m.^{3} dust standard effective 3 years after enactment, but the Panel may grant permits for noncompliance to an operator for a period not to exceed 3 additional years from the effective date of the standard.

Fifth. The Secretary of Health, Education, and Welfare has the continuing authority, beginning 1 year after enactment, to further reduce the dust standard below the levels established by the act to levels which will prevent new incidences of respiratory disease and the further development of such disease in any person.

Sixth. Each operator shall cooperate with the Secretary of Health, Education, and Welfare in making a chest X-ray available to each miner within 18 months after enactment, again 3 years later, and at such subsequent intervals determined by the Secretary of Health, Education, and Welfare but not to exceed every 5 years. Each worker who begins work in a coal mine for the first time shall be given a chest X-ray at the commencement of his employment and again 3 years later. If the second X-ray shows evidence of the development of pneumoconiosis, the worker shall be given an additional X-ray 2 years later. The X-rays may be supplemented by other tests deemed necessary by the Secretary of Health, Education, and Welfare. The Secretary of Health, Education, and Welfare is also responsible for reading, classifying, and recording all results of X-rays and other medical tests.

Seventh. Any miner who shows evidence of the development of pneumoconiosis shall be afforded the option of transferring from his position to another position in any area of the mine where the respirable dust concentration is not more than 2.0 mg/m^3. Effective 3 years after enactment, the option of transfer shall be to an area of the mine where such concentration is not more than 1.0 mg/m^3, or if such level of concentration is not attainable in the mine, to an area where the concentration is the lowest attainable below 2.0 mg/m^3. Any miner so transferred shall not receive less than the regular rate of pay received by him immediately prior to transfer.

Eighth. Incorporates the noise standard prescribed under the Walsh-Healey Public Contracts Act, and provides authority to the Secretary of Health, Education, and Welfare to improve upon such standard.

TITLE III.—INTERIM MANDATORY SAFETY STANDARDS FOR UNDERGROUND COAL MINES

First. Establishes interim mandatory safety standards effective 3 months after the date of enactment of the act.

Second. Establishes detailed requirements to provide for safer working conditions in underground coal mines. These include requirements with regard to roof support, ventilation, combustible materials and rockdusting, electrical equipment, trailing cables, grounding, underground high-voltage distribution, underground low- and medium-voltage alternating current circuits, trolley and trolley feeder wires, fire protection, maps, blasting and explosives, hoisting and mantrips, emergency shelters, communications, escapeways, and other miscellaneous matters.

Third. Establishes requirements for the use of permissible equipment in all underground coal mines. Requires that all electric face equipment at gassy mines and all such small equipment at all mines be permissible within 15 months after enactment. It is also required that, in the case of mines not previously classified as gassy which are below the watertable, such large equipment must be permissible in 15 months, but the Panel may grant extensions of time—permits for noncompliance—of not to exceed in the aggregate an additional 33 months if the Panel determines, based on specified criteria, that the operator is unable to comply with the permissibility requirements because of unavailability of permissible equipment. In the case of such mines which are located entirely above the watertable, it is required that such large equipment be permissible within 51 months after enactment but the Panel may grant extensions of not to exceed 2 additional years on a mine-by-mine basis because of unavailability of such equipment.

TITLE IV—BLACK LUNG BENEFITS

First. Provides for the payment of benefits for death or total disability due to pneumoconiosis.

Second. Coal miners and former coal miners who are totally disabled due to pneumoconiosis will receive benefits at a rate equal to 50 percent of the minimum monthly payment to which a disabled Federal employee in grade GS–2 would be entitled at the time of payment. This represents approximately $136 per month. Widows of coal miners and former coal miners whose deaths are due to pneumoconiosis or whose deaths occurred while receiving total disability benefits, receive benefits at the rate prescribed for totally disabled miners. The rates prescribed above are increased for dependents at the rate of 50 percent for one dependent, widow or child, 75 percent for two dependents, and 100 percent for three or more dependents. The benefits for miners and widows will be reduced on account of payments under the workmen's compensation, unemployment compensation, or disability insurance laws of the State and, in the case of miners only, on account of excess earnings, as provided under the Social Security Act for benefits payable under that act.

Third. The following presumptions are used in determining entitlement:

A. If a miner who is suffering from pneumoconiosis was employed for 10 years or more in an underground coal mine, there will be a rebuttable presumption that the pneumoconiosis arose out of such employment.

B. If a miner worked 10 years in such a mine and died of a respirable disease, there will be a rebuttable presumption that his death was due to pneumoconiosis.

C. If a miner is suffering from or dies from an advanced irreversible stage of pneumoconiosis, it will be irrebuttably presumed his death or total disability was due to pneumoconiosis.

Fourth. Claims filed before December 31, 1972, will be processed by the Secretary of Health, Education, and Welfare in a manner similar to that he uses for processing claims for disability under the Social Security Act. If the claim is filed after December 31, 1971, benefits under that claim may be paid only until January 1, 1973. Claims filed on or after January 1, 1973, will be processed under the appropriate State workmen's compensation law if the Secretary of Labor has determined it has adequate coverage for pneumoconiosis. He will, generally speaking, determine a State law to have adequate coverage for pneumoconiosis if the cash benefits under such law and the criteria for determining eligibility are not less favorable to the claimant than those applicable to claims filed before January 1, 1973. Where the applicable State workmen's compensation law does not provide adequate coverage for pneumoconiosis, the persons entitled to bene-

fits will have their claims processed, so far as applicable, under the terms of the Longshoremen's and Harbor Workers' Compensation Act.

Fifth. In the case of claims filed on or after January 1, 1973, no payments of benefits may be made after 7 years after the date of enactment of the act.

TITLE V—ADMINISTRATION

First. Provides authorization for appropriations for health and safety research to be carried out by the Secretary of Health, Education, and Welfare and the Secretary, respectively.

Second. Requires the Secretary to expand programs for the education and training of operators, agents thereof, and miners in accident control, healthful working conditions, and in the use of coal mining equipment and techniques.

Third. Provides for economic assistance to any small business concern operating a coal mine to meet the requirements imposed by the act. Such assistance shall be given by the Small Business Administration.

Fourth. Specifies qualifications and training requirements for employees of the Secretary; particularly inspectors.

Mr. Speaker, I would like to take an additional minute to discuss title IV of the conference report—the title providing for black lung benefits. When we began considering a coal mine health and saftey proposal early this year, I think it fair to say that this provision was not generally thought of as likely to be included in the final bill. A similar provision was in fact included in the bill passed by the House and it was done because of the tremendous effort and tenacity put forth by the gentleman from New Jersey (Mr. DANIELS) and the gentleman from California (Mr. BURTON). The gentleman from New Jersey gave this provision life when he led it through his subcommittee and was gracious enough and concerned enough about the ultimate claimants to ask that it be incorporated into the health and safety package. The gentleman from California was absolutely uncompromising in his determination to fight the battle for the provision beyond that, and existence of the provision in the conference report is a testimony to his success.

Mr. Speaker, there is only one State that now provides an assistance program of any significant scope, and that is the Commonwealth of Pennsylvania. The citizens of that State, through their taxes, provide the general revenues for the program. It is my understanding that Pennsylvania's program is the only one funded through general revenues. Other such programs are funded by employer contributions and are essentially workmen's compensation programs. The conference report contains a maintenance of effort provision which provides that no benefits shall be paid under this provision to the residents of any State which, after the date of enactment, reduces the benefits payable to persons eligible to receive benefits under this provision, under its State laws which are applicable to its general work force with regard to its State laws which are applicable workmen's compensation, unemployment compensation, or disability insurance.

Mr. Speaker, we are talking about laws which apply to a State's general work force and not laws for a segment of the work force. We are also talking about programs that are, in fact, workmen's compensation, unemployment compensation, or disability insurance. This literal interpretation is also intended to apply to sections 412(b) and 422(g)—the offsetting provisions. We are not talking about State programs funded through general revenues. Any State that has such programs could reduce benefits payable to persons eligible to receive them under this provision. If the State did not so reduce the benefits, such benefits could not be offset or deducted from payments under this provision.

This should be made unmistakably clear. The language of the conference report and the appropriate amplification of that language in the statement of the managers on the part of the House says as much.

Mr. Speaker, it is time to act on this bill. Its provisions are long overdue and our miners have waited and suffered long enough.

Mr. Speaker, if I may pay one final tribute, the gentleman in the Chair, the gentleman from Pennsylvania (Mr. FLOOD), has labored over this bill with a concern for miners and their families that can only come from living among them. Before the thought of a new coal mine health and safety law gained popular support, DAN FLOOD was the most persistent and tenacious advocate of a better law. He recognized the shortcomings of the existing law, and overcame every obstacle in fighting for a proposal that provided meaningful protection to the miner.

His imprint is indelibly inscribed on this bill. Even though he is not a member of the Committee on Education and Labor, he managed to put provisions in the bill that are solely his. The gentleman testified before our committee and before the Senate committee in support of strong coal mine health and safety legislation, and also for the provisions granting benefits to miners disabled due to pneumoconiosis and to the widows of those who died from the disease. I can well recall his impassioned pleas for these miners and widows, and I think it is fair to say that DAN FLOOD should certainly enjoy this Christmas with the knowledge that his role in this effort was major in every respect.

Mr. Speaker, I now include in the RECORD our response to Secretary Hickel's estimate of the costs of the black lung benefit provision. They follow:

RESPONSE TO HICKEL LETTER

The following comments are directed to the letter of December 12, 1969, from Secretary of the Interior Walter J. Hickel to Senator Jacob K. Javits regarding the estimated cost of Title IV of the conference report on the Federal Coal Mine Health and Safety Act. They are particularly directed to the estimates contained in "Plan I" of the letter—the estimated cost of a program similar to that provided in title IV.

The assumptions made in estimating the cost of the program are inaccurate in the light of available and relevant information.

(1) The first and basic assumption in the Hickel estimate is that the experience of title IV will be similar to the Pennsylvania law. Although the criteria for determining eligibility for receiving total disability benefits under title IV and the Pennsylvania statute are similar, the actual implementation of the two provisions may not be identical. For instance, as of December 1, some 25,579 miners were on Pennsylvania's benefit rolls. Presumably, they were all totally disabled due to pneumoconiosis. Presumably also, they were totally disabled according to the Social Security Act definition (the qualification in title IV). And yet, the fact is that only a fraction of those miners were receiving Social Security disability insurance, and there are presently only about 20,000 individuals throughout the United States receiving such disability insurance for all respiratory diseases.

(2) The Hickel estimate then progresses from that first assumption to expand the Pennsylvania experience to all potential claimants in the United States. It begins with the 25,579 Pennsylvania miners. Two thousand additional miners are arbitrarily added to that figure with the statement that 2,000 miners will be transferred within the next 18 months from Pennsylvania's workmen's compensation program to its pneumoconiosis benefit program. The reason for the 18 months is never explained. The more relevant date is the present and not 18 months from now, or July 17, 1971. In any event—in the interest of fairness—if the 2,000 miners should be added to the present benefit total, then an appropriate number should be subtracted from that total on account of the death of miners now on the rolls. The Pennsylvania experience is 187 deaths per month of miners receiving such benefits. Over 18 months then, some 3,366 miners could be expected to be dropped from the Pennsylvania rolls because of their death.

The Hickel estimate is exaggerated on this point then, by 5,366 miners.

(3) The Hickel estimate then takes the inflated figure of 27,579 miners and expands it nationwide. It does so by taking that proportion who are bituminous miners (38%)—thereby arriving at a figure of 10,500 miners—and multiplying that figure by a multiple of 4. The multiple was determined by stating that Pennsylvania has approximately 25% of the Nation's underground bituminous miners. This is quite correct, but irrelevant. The appropriate multiple should be derived by projecting the man-years of exposure for disabled Pennsylvania miners to the man-years of exposure in the coal-producing states. During the period 1930–1950, these figures were 1,940,441 and 6,828,725, respectively. The correct multiple then, should be about 3.5.

Using the Hickel multiple of 4, the total number of bituminous miners in the inactive population who meet the Pennsylvania criteria is estimated at 42,000. Using the more appropriate multiple of 3.5, that figure would be 36,750. It is obvious that the error is becoming more aggravated with each such inaccurate assumption or statistical technique.

(4) The Hickel estimate then adds 2,400 miners to the total. That number supposedly represents those active miners who have complicated or advanced pneumoconiosis. The assumption must be that all 2,400 miners will leave their jobs if offered benefits under this program, because the miner's earnings would offset his benefit allowances if he continued to work. It is highly unlikely that all 2,400 miners will do so. A more realistic assumption is that about 10%, or 240 of the 2,400 active miners, presently afflicted with complicated pneumoconiosis—would retire.

(5) After anthracite miners are added to the escalating Hickel total, it is 61,400 bituminous and anthracite miners eligible for benefits. Some 7,000 miners are then subtracted from that total. The 7,000 represent those who are on or will qualify for State workmen's compensation, thereby offsetting

Federal cost. The actual figure is nearer 10,000—according to State figures—than 7,000.

(6) A multiple for dependents of eligible miners is then applied to the 54,000 total. The assumption is made that each miner has 1.5 dependents. According to information from the United Mine Workers retirement fund, the figure or multiple should be 1.2 dependents for each miner. This inaccurate multiple, when applied to the total, represents an error of 16,320 individuals.

Mr. PERKINS. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Pennsylvania (Mr. SAYLOR).

Mr. SAYLOR. Mr. Speaker, I rise in support of this conference report, and I do so because it is a good report and I too, like my colleague, the gentleman from Pennsylvania, JOHN DENT, come from an area of coal mines, coal miners, and coal towns.

This bill is the price being paid by the Congress of the United States on behalf of the American conscience. It is a part of the price that we, the present citizens of this country, must pay for crimes of the past. It is a little effort to square accounts for what the country did not do before. Heretofore, Mr. Speaker, we followed the practice of getting the most out of our miners and our coal—get it out—get paid and to ——— with all thought of tomorrow.

Mr. Speaker, it is our privilege to sit here in the Halls of the Congress tonight. The lights are bright, not only here in the Halls of Congress, on Capitol Hill, but throughout Washington and throughout our land, not cognizant of the fact that about 80 percent of those lights are generated by coal. Whether you folks realize it or not, this country is today short 15,000 coal miners.

Companies will give you a college education, if you will just promise to come back and tell them you will work for the coal mines afterwards, and you cannot get the young people to accept this offer or without a college education to go into the coal mines.

I have lived in communities where the people have said, "Look, I work in the coal mines, and I have just one desire, and that is I do not want my children to work in the coal mines."

If we expect to have the kind of economy that we have developed, and if we expect to have electricity throughout the length and breadth of our land; if we expect to have the good things of this country and our world, then we had better pass this conference report. If we do not, I can tell you it will be less than 15 days until every miner in this country walks out of the mines and their newly elected president, their national officers, the President of the United States, the Congress of the United States, yes the Supreme Court of the United States will not get them to go back into the mines.

And you just try and get somebody else to go down in a mine and mine coal.

There is not one of you in this room, except maybe a half dozen who have ever been down in a mine and who know what it is to operate the complex machine of a modern-day mine. That is what we, the Congress, are faced with if we fail to adopt this conference report.

Mr. BRAY. Mr. Speaker, will the gentleman yield?

Mr. SAYLOR. I yield to the gentleman.

Mr. BRAY. Mr. Speaker, I certainly intend to support this conference report. I do not have any mine within 50 miles of my present district, but 15 years ago I did represent many of the mines in the State of Indiana and, in fact, I was very active on the mine safety bill of 1953, I believe it was.

I am going along with this conference report, and I think it would be fine if we all did so.

Mr. McDADE. Mr. Speaker, will the gentleman yield?

Mr. SAYLOR. I yield to my colleague, the gentleman from Pennsylvania.

Mr. McDADE. I thank my distinguished colleague for yielding.

Mr. Speaker, I want to associate myself with the remarks the gentleman has made and to express my unequivocal support of this conference report. I urge all of my colleagues to recognize the enormous debt that we owe to the coal miners of this Nation and to pass this most important and humane piece of legislation.

Mr. WAMPLER. Mr. Speaker, will the gentleman yield?

Mr. SAYLOR. I am happy to yield to my colleague from Virginia.

Mr. WAMPLER. Mr. Speaker, I rise in support of this conference report.

I think this is very important legislation. It is designed to meet one of the real needs of our time. We have heard some talk this evening about States' rights. I think there is also such a thing as States' responsibilities, and when a State cannot or will not do those things which it should do, I think we here in the Congress have the responsibility of acting accordingly.

Mr. Speaker, I urge the adoption of this conference report.

Mr. REID of New York. Mr. Speaker, will the gentleman yield?

Mr. SAYLOR. I am happy to yield to the gentleman from New York.

Mr. REID of New York. Mr. Speaker, I commend the gentleman most warmly for his excellent statement and for his initiative in this regard along with the gentleman from West Virginia (Mr. HECHLER), the gentleman from Pennsylvania (Mr. DENT) and other Members on both sides.

Mr. Speaker, this bill is a vital bill. It has been far too long delayed. I think it is absolutely essential that this conference report be supported.

Mr. SAYLOR. Mr. Speaker, let me say to you unless you have been in a coal town and unless you have seen a miner come out of a mine—black, yes, black from the dirt of the coal—and see him try to walk home from the tipple to his house which may be only a couple of hundred yards away, and to see him stagger along, fighting for his breath, hang on to a telephone post or some kind of post along the way, and cough and spit, and sit down all out of breath and fight to get his breath, wave off the efforts of his fellow miners, telling them this is his problem, to leave him alone—wondering if he will gain enough strength to get home—yes, that is what we have done to human beings in this country in coal mines in the past.

What this conference report does is to try to compensate a little bit for the ills of the past.

I think it is rather fortunate that this conference report is brought up during the advent season. Let me remind you of the words of our Master who said:

If you have done it to these my children, you have done it unto Me.

I hope we have as big a vote in support of this conference report as we did on the original bill.

Mr. PERKINS. Mr. Speaker, I yield 3 minutes to the gentleman from Illinois (Mr. PUCINSKI).

Mr. PUCINSKI. Mr. Speaker, I wish to associate myself with the remarks of the distinguished chairman of my subcommittee, the gentleman from Pennsylvania (Mr. DENT), who has worked so hard and tirelessly to bring this legislation to a fruitful conclusion.

I suggest that this bill, when finally passed by Congress, will be a monument to his compassion for his fellow men. This country owes him a great debt of gratitude.

Mr. Speaker, I reject completely the threat of a Presidential veto. With all due respect to my colleague, the gentleman from Illinois, I think any suggestion that the President may veto this bill is an unfortunate intimidation of the legislative branch of Congress. We have our responsibility and the President has his. If the President wishes to veto this bill when the time comes, he has his rights and he can exercise those rights at the proper time. But I believe it is an intrusion on the right of the legislative to threaten a veto even before Congress has had an opportunity to use its own judgment and work its will. I will tell you this—you study this bill and you will see what it does and you are going to find that this is landmark legislation. I was proud to sign the conference report on this bill and I might say to my colleagues that at no point did anybody come to me and say there were provisions in this conference report that went outside of the scope of discussion in the conference.

I doubt very much if the President will veto this bill after he familiarizes himself with all of its provisions. And if he does, he will have to make every effort to override the veto.

I think this is a good bill. I congratulate the chairman of the subcommittee (Mr. DENT) and I congratulate the chairman of the full committee (Mr. PERKINS) for bringing this bill before us today. Once we get this bill through this House, I think all of us can be proud of the contribution we made. I am not surprised that some of the conglomerates that are buying up coal mines might be opposed to some of this legislation, but as my friend said here a moment ago, unless we bring some meaningful safety standards into the coal mines of America, we will not have any coal mines. I am proud of the fact that I insisted on bringing the Public Health Service into these coal mines for the first time to establish safety standards for the American coal miner. We can now look forward to some decent standard to protect the health of our miners.

I will tell you that this is a bill that every one of us can vote for and can support with pride, because it is meaningful legislation for the health of this coun-

try and the future growth of this country. I urge adoption of the conference report.

Mr. PERKINS. Mr. Speaker, I yield 3 minutes to the gentleman from Michigan (Mr. ESCH).

Mr. ESCH. Mr. Speaker, I think the first point should be to establish my credibility and to recognize that there is more emotionalism then factual evidence being presented in the conference report today. I came from a coal mining town. My father's health was directly impaired by the black lung disease. So the intent of my remarks should be taken with that in mind.

I also favored the provisions of the House bill provision concerning black lung compensation. But I stand opposed to title IV as it now is, and I think those Members, especially those from coal mining districts, should be aware of what we are attempting to do here today, and that is to instruct the conferees to go back and to provide that they bring back in title IV the same language that left the House.

I make that statement for this particular reason: When this bill passed the House, and as stated in the committee report, there was no indication that there should be a broad base involvement of workmen's compensation acts in every State in the Union under this title. As it now stands, under title IV, we are opening the door to Federal intrusion into the total workmen's compensation program in the country.

Mr. BURTON of California. Mr. Speaker, will the gentleman yield?

Mr. ESCH. I will not yield at this time; instead of yielding to the gentleman from California, I would like to read the gentleman's remarks on October 29 of this year on the floor of this House when he rose in opposition to cutting out the compensation feature of title IV. At that time he quoted from the committee report—

> Mr. BURTON. It is intended, as the committee report so very emphatically and unambiguously states:
>
> This payment program is not a Workmen's Compensation program. It is not intended to be so. It contains none of the characteristic features which mark any Workmen's Compensation plan, and it is clearly not intended to establish a Federal prerogative or precedent in the area of payments for death, injury, or the illness of other workers.

I stand ready to support a coal mine safety bill. I stand ready to support a strong compensation bill for people who have been affected by black lung disease. But let us instruct the conferees to come back, not with an open-door provision on workmen's compensation, but with a very limited and well drawn provision that will allow us to pass this bill and see it enacted into law.

Mr. STEIGER of Wisconsin. Mr. Speaker, will the gentleman yield?

Mr. ESCH. I yield to the gentleman from Wisconsin.

Mr. STEIGER of Wisconsin. Mr. Speaker, I commend the gentleman from Michigan for his statement and wish to associate myself with his remarks. I was one of those on this floor who opposed the amendment at the time it was offered by the gentleman from Iowa (Mr. SCHERLE) and supported the pneumoconiosis conference provision. I am distressed by the action of the conference. I believe the position of the House on this question should be upheld.

The SPEAKER pro tempore (Mr. FLOOD). The time of the gentleman has expired.

Mr. PERKINS. Mr. Speaker, does the gentleman from Michigan wish more time?

Mr. ESCH. Yes, I do.

Mr. PERKINS. I yield the gentleman 2 additional minutes.

Mr. BURTON of California. Mr. Speaker, will the gentleman yield?

Mr. ESCH. I yield to the gentleman from California.

Mr. BURTON of California. Mr. Speaker, I wanted the gentleman from Michigan to yield during his statement because for those who read the RECORD, there is no difficulty in finding this gentleman's observations. In my opinion the gentleman in the well, the gentleman from Michigan (Mr. ESCH) has stated in all accuracy that he had previously established his credentials and his concern for the black lung victims. There can be no challenge on any account on that question. It was for that purpose I sought to have the gentleman from Michigan yield to me, because I am very much aware not only of the most constructive contribution the gentleman from Michigan made, but similarly the contribution made by the gentleman from Wisconsin (Mr. STEIGER). If they have changed their attitude on this portion, one can clearly know it is precisely for the grounds they state and not because of their indifference to the plight of these black lung miners and their widows.

Mr. ESCH. Mr. Speaker, will the gentleman not concur that it would be very possible for the conferees to go back, before we finish this session—as we have many other conferences going on also—and next week come back with the provision that title IV, part C be stricken, so that we can assure that we get an adequate black lung compensation provision without opening up the question of State workmen's compensation? Would the gentleman not concur that would be possible?

Mr. BURTON of California. The gentleman from Michigan quoted me earlier in his remarks and quoted me accurately. Those sentiments were mine in the conference, as I hope would have been attested to by now. They are still my sentiments, but in any conference we have to accept and to give and take with the other body. We did that, upholding, I believe, the bulk of the thrust of the House bill. We simply did not win all. I wish we could have.

Mr. ESCH. Mr. Speaker, I appreciate the gentleman's remarks. I hope he will support the motion to recommit.

Mr. ERLENBORN. Mr. Speaker, will the gentleman yield?

Mr. ESCH. I yield to the gentleman from Illinois (Mr. ERLENBORN).

Mr. ERLENBORN. Mr. Speaker, I wish to explain that when I offer my motion to recommit, it will be to instruct the conference to insist upon section 110(b) of the bill as it passed the House which is the pneumoconiosis compensation provision.

Mr. PERKINS. Mr. Speaker, I yield 3 minutes to the distinguished Speaker of the House (Mr. MCCORMACK).

Mr. MCCORMACK. Mr. Speaker, I am very happy to be a Member of this House today while this bill is in its final passage through this body. I am confident that the clear majority of the Members of the House will reject the motion to recommit with instructions.

I can remember when I first came here the situation that confronted millions of human beings just like ourselves, those who came from other parts of the United States and who worked in the mines. Behind those human beings were their wives and their families.

I can remember as a member of the Ways and Means Committee, in the early 1930's, the legislation coming before that committee, legislation that was then on its way through the long journey of progress for those who worked in the mines, to which the gentleman from Pennsylvania (Mr. SAYLOR) has so graphically referred today. My heart was with them then, and my heart is with them now.

I saw them occupying a position of what I called economic slavery. They worked in the mines, they lived in company-owned houses, they bought in company-owned stores, and they were denied, through economic pressure and blacklisting and many other conditions, the right to organize.

I can remember the legislation that came out of the Ways and Means Committee by a vote of 13 to 12 in the 1930's, and I am very glad that I was one of those constituting the 13 in the Ways and Means Committee who voted for the early legislation in those years.

That was a painful journey. Today we have before us the culmination of the long, hard journey in the effort to bring justice to those who work in the mines, and in bringing justice to those who work in the mines, also bringing justice to the wives and to the families.

I am very glad to be a Member today, when this bill is up. I congratulate the chairman of the committee and the members of the committee, and the members of the conference committee. I hope that this bill will pass the House by an overwhelming vote, conveying to the miners of today a message from this body that we realize the problems which confront them and that we are doing everything possible to try to bring justice to them.

So, Mr. Speaker, I join with my colleagues in sending a message to those who work in the mines that we from all parts of the United States have extreme and favorable consideration for them.

Again I congratulate the committee, and I congratulate the Members of the House, when this conference report will be adopted, because it is another step in the cause of justice. It is another step in the consideration of human beings.

Mr. PERKINS. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Iowa (Mr. SCHERLE).

Mr. SCHERLE. Mr. Speaker, I was one of the four who voted against this bill

when it first came to the House floor. That was not because I am against safety; not at all. But I am totally and unequivocally opposed to Federal workmen's compensation.

I was pleased tonight to hear my colleague from Illinois (Mr. ERLENBORN) confirm those fears I expressed when the bill was on the floor. Up until today the proponents of this bill carefully avoided using the term "Federal workmen's compensation" for fear of States' rights usurpation, and perhaps even the possible total defeat of the bill.

One can call it anything he wants, it is still Federal workmen's compensation. It is benefits that will be paid for by the Federal Government.

This foot-in-the-door approach will relegate the jurisdiction of the States in the field of workmen's compensation to purely administrative functions. This is only the beginning.

No other disease, no injury, nothing at all is covered in this bill other than "black lung" or pneumoconiosis under the provision of Federal workmen's compensation. That term alone should frighten the Members. Much less should they vote for it.

When this bill was on the House floor it was sold on the premise that it was a coal mine safety bill. No one in this body is against coal mine safety. We all voted for that. But the inclusion of Federal workmen's compensation was not mentioned. Many Members voted for it without ever knowing that it was a provision of the bill.

Once again, the total estimate of this measure was given at $40 million. We have had varying figures, from $40 million to as high as $400 million. This, I believe, would exceed any type of support we could give this bill.

The statement was made a short time ago that we cannot get men to work in the mines. We cannot get men to work on the farms in Iowa. This bill is not a handicap.

There are three States, Virginia, West Virginia, and Pennsylvania, that have developed laws as far as pneumoconiosis is concerned.

I believe it is the responsibility of the States to take care of their own. I am not asking anybody in this Chamber to take care of my people back in Iowa who are incapacitated by inhaling dust from working in grain elevators, or any other disease.

We do have sympathy and compassion for the coal miners and are making provisions for a safety bill. However, I believe we defeat our purpose if we vote for this measure based on renumeration to be paid by Federal workmen's compensation, a real Pandoras box.

Mr. PERKINS. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Pennsylvania (Mr. FLOOD).

Mr. FLOOD. Well, Mr. Speaker, I hear the wolves howling. I fly in the face of the gods even for 2 minutes. I take this 2 minutes, Mr. Speaker, because I am from the hard coal fields—the anthracite fields. Now, you have heard about black lung and pneumoconiosis. Well, I speak for the anthracite miner's asthma. Did you ever hear of that? Anthracosis. Just as deadly and just as disastrous. I would not attempt to gild the lily and approach the speech of my friend from Pennsylvania (Mr. DENT). I knew him in Harrisburg. I knew him when. The right man in the right place at the right time as chairman of this subcommittee—DENT of Pennsylvania.

I just want to tell you soft coal people that there is still hard coal. Maybe we can only use it to make dress shirt studs any more, but when I first came here 25 years ago I had 30,000 men in my district in the hard coal fields. Today I have 3,500. But I have 25,000 retired miners spitting out their guts and their lungs in the coal buckets all through my district from miner's asthma. Now put that in your pipe and smoke it. Do you think FLOOD, with my reputation in this House, would be particeps criminis to an indictment that has been laid against this committee? I do not think you do, or I would not be standing here.

Mr. PERKINS. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from California (Mr. BURTON).

The SPEAKER. The gentleman is recognized for 5 minutes.

Mr. BURTON of California. The mine workers do not want this bill to go back to conference. I am led to believe on good information that the local operators do not want this bill to go back to conference. I hope the majority of my colleagues do not want it to go to conference, and I hope we turn down the motion to recommit.

I am particularly gratified that the black lung benefit provision—a lonely orphan several months ago—will be the law of the land, if the recommit motion is defeated.

An explanation of the bill summary will be inserted at this place in the RECORD, along with cost estimates presented by Secretary of Interior, Mr. Hickel.

Time will tell whether these last-minute estimates were straight forward—or whether they were—as is my opinion—politically motivated and White House dictated. This ignoble effort to deny any meaningful help to black lung widows and miners deserves our flat rejection.

The House payment provisions have been around for 5 months—is not it suspicious that the administration waited until the last 5 days—more than 1 month after the conference concluded, to come up with their estimates?

The material referred to follows:

U.S. DEPARTMENT OF THE INTERIOR,
Washington, D.C., December 12, 1969.

Hon. JACOB K. JAVITS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR JAVITS: In response to your request, estimates of the Federal costs of the benefit provisions of the Federal Coal Mine Health and Safety Act of 1969 have been developed. These estimates were developed after consultation between this Department and the Department of Health, Education, and Welfare; the Department of Labor, and the Bureau of the Budget.

Several major problems in preparing cost estimates developed. The language of the draft provision of the bill does not define the term "total disability due to pneumconiosis". It simply provides that the Secretary of Health, Education, and Welfare, shall, by regulation, prescribe standards for determining whether a miner is totally disabled due to pneumoconiosis. The standards established by Health, Education, and Welfare for such determination are an essential element in determining the cost of this program. From conversations with the Committee staff, it is not clear just what the intention is with respect to the establishment of criteria for determining eligibility due to total disability from pneumoconiosis. If the standards established by Health, Education, and Welfare allow those miners to qualify under this program who do not otherwise qualify for disability benefits under the social security program, the cost to the Federal Government could be in the neighborhood of $300 million or more during the first year. If, on the other hand, the standards established by Health, Education, and Welfare are similar to the standards established under the social security program, based on the Pennsylvania experience which is administered under comparable standards, the cost to the Federal Government could be in the neighborhood of $150 million or more during the first year. If the standards established by Health, Education, and Welfare are to be somewhere in between, the cost of course could range between these two figures.

The figures attached to this letter have been computed on the basis of both assumptions set out above. Any attempt to offset these costs by benefits otherwise payable for total disability under the social security program is extremely difficult. No exact figures are available indicating the number of miners presently receiving total disability benefits due to pneumoconiosis. Also various assumptions were made regarding the age of the potential beneficiaries, the number of dependents, mortality rates and other influencing factors. It must be understood that the assumptions underlying the attached figures may have introduced a margin of error into the estimates, the magnitude of which is unknown.

The estimates do not reflect State costs, which in future years would be considerable, nor do they consider Federal administrative costs of determining eligibility and making payments. It may cost $8,000,000 or more, including the cost of medical services, to make initial determinations of disability due to pneumoconiosis. In addition, there would be a continuing cost of preparing and issuing benefit checks.

Sincerely,

WALTER J. HICKEL,
Secretary of the Interior.

ESTIMATED FEDERAL COST OF BENEFIT PAYMENTS

PLAN I

Assume:

1. The Federal benefit provision will be similar in experience to the Pennsylvania Pneumoconiosis Benefit Law. The criteria for benefits are:

(1) The miner must have X-ray evidence of pneumoconiosis.

(2) The miner must be completely disabled—not able to engage in any gainful employment.

A. On 10/1/69, 25,579 miners were on Pennsylvania's benefit rolls. Two thousand will be transferred in the next 18 months from workmen's compensation to benefit payment by virtue of having exhausted benefits under workmen's compensation. Total on benefits 7/17/71: 27,579.

B. Based on workmen's compensation data, 62 percent of those compensated are anthracite miners, and 38 percent are bituminous minors. $27,579 \times 38\% = 10,500$ bituminous. $27,579 \times 62\% = 17,079$ anthracite.

C. In 1952 and 1969 Pennsylvania had approximately 25 percent of the underground bituminous-coal miners. $10,500 \times 4 = 42,000$. Total number of bituminous miners in the

inactive population who meet the Pennsylvania criteria.

Anthracite miners (see plan I for basic data):

Employed in 1952—120,000. All are no longer employed in anthracite mines. Assume 60 percent mortality. Number of survivors in 1969—48,000.

Assume 75 percent are over 61 and eligible for benefits	36,000
Assume 50 percent of those less than 61 are eligible for benefits	6,000
Assume of the 6,000 presently in the anthracite workforce, 20 percent would qualify	1,200
Total	43,200
Presently receiving State workmen's compensation	2,500
Total	40,700

Total bituminous miners	99,500
Total anthracite miners	40,700
Total	140,200

Assume each case has 1.5 dependents. Federal payment is $2,657.

Total cost of miner benefits: 140,200 × $2,657 = $374,000,000.

Widow cost—$9,650,000.

Total $383,650,000 ($374,000,000 + 9,650,000).

PLAN II

Criteria for total disability:

1. X-ray evidence of pneumoconiosis.
2. Evidence of physical impairment.
3. Age.

Population at risk in 1952:

1. Bituminous-coal miners	400,000
2. Anthracite miners	120,000
Total	520,000

Mine population in 1952 and 1969:

1952 work force				1969 Work force	
Age group	Number of men	Surviving in 1969	Age 1969	Number of men	Age group
20 to 24	48,000	47,000	37 to 41	9,600	20 to 24
25 to 29	60,000	57,000	42 to 46	12,600	25 to 29
30 to 34	56,000	52,000	47 to 51	11,200	30 to 34
35 to 44	104,000	94,000	52 to 61	20,800	35 to 44
45 to 54	76,000	56,000	62 to 71	15,200	45 to 54
55 to 59	36,000	17,000	72 to 76	7,200	55 to 59
60 to 64	20,000	6,000	77	4,000	60 to 64
Total	400,000	329,000		80,000	

Assume 95% of surviving men in 1952 work force now over 61 are eligible for benefits	75,000
Assume of the surviving men in the 52/61 age group in the 1952 work force, 10,000 are still in the work force and that 25% of the remaining group are eligible for benefits. $\frac{94{,}000-10{,}000}{4}=21{,}000$	21,000
Assume that in the present work force the number of eligibles is the same as the number with pneumoconiosis 80,000 × .10 = 8,000	8,000
	104,000
Total bituminous miners presently on State workmen's compensation plan	4,500
	99,500

D. In the active miners, the Public Health Service found 3 percent with X-ray evidence of advanced pneumoconiosis. 80,000 × .03 = 2,400.

E. Total bituminous miners eligible for benefits. 42,000 + 2,400 = 44,400.

F. There are no anthracite mines in any State other than Pennsylvania.

Number of anthracite miners on the Pennsylvania benefit roll: 17,079.

G. Total number of bituminous miners and anthracite miners eligible for benefits. 44,400 + 17,000 = 61,400.

H. Assume 7,000 men (4,500 bituminous miners and 2,500 anthracite, miners) are on or will qualify for State workmen's compensation. 61,400 − 7,000 = 54,400 Total eligible miners.

I. Assume each miner has 1.5 dependents. Federal payment is $2,657. 54,400 × $2,657 = $145,000,000.

J. Widows benefits $9,650,000.

Total: $154,650,000 ($145,000,000 + $9,650,000)

SUMMARY

Plan I

The Federal benefit provision will be similar in experience to the Pennsylvania Pneumoconiosis Benefit Law.

The criteria for disability are:

1. The miner must have X-ray evidence of pneumoconiosis.
2. The miner must be completely disabled—not able to engage in any gainful employment.

First year cost without offsets: $154,650,000.

Twenty-year cost without offsets: $1,200,000,000.

Plan II

Criteria for disability:

1. X-ray evidence of pneumoconiosis.
2. Evidence of physical impairment.
3. Age.

First year cost without offsets: $383,650,000.

Twenty-year cost without offsets: $2,980,000,000.

SUMMARY OF MAJOR PROVISIONS

TITLE I—GENERAL

(1) Grants authority for the promulgation of mandatory health and safety standards to the Secretary of the Interior (hereinafter referred to as the "Secretary"). The Secretary promulgates all mandatory standards, but is responsible for developing and revising only mandatory safety standards. The Secretary of Health, Education, and Welfare (HEW) is responsible for developing and revising mandatory health standards. No standard promulgated by the Secretary shall reduce the protection afforded miners below that provided by the interim mandatory health and safety standards contained in titles II and III, respectively.

(2) Provides opportunity for a representative of miners, whenever he has reasonable grounds to believe that a violation of a mandatory health or safety standard exists or an imminent danger exists in a mine, to obtain an immediate inspection of such mine.

(3) Provides a minimum of at least four annual inspections of each mine. Also provides a minimum of one spot inspection during every five working days of a mine (A) that liberates excessive quantities of methane or other explosive gases during its operations, (B) in which a methane or other gas ignition or explosion has occurred which resulted in death or serious injury at any time during the previous five years, or (C) the Secretary believes has especially hazardous conditions.

(4) Establishes the procedural mechanism for finding dangerous conditions or violations of standards in mines, and for the issuance of notices and orders—including withdrawal orders—relative to such.

(5) Provides administrative and judicial review procedures.

(6) Establishes civil penalties of up to $10,000 for operator violations of a standard or any other provision of the Act. Establishes a civil penalty of up to $250 to a miner who violates specified provisions of the Act (smoking, carrying of matches, etc.). Establishes criminal penalties to any operator who willfully violates a standard or knowingly violates or fails or refuses to comply with orders. Upon conviction, such operator shall be punished by a fine of not more than $25,000 and/or imprisonment for not more than one year for the first conviction, and for subsequent convictions, by a fine of not more than $50,000 and/or imprisonment for not more than five years. Also establishes similar civil and criminal penalties to any director, officer, or agent of a corporate operator for like violations, failures, or refusals. Criminal penalties are also established for false statements, representations, or certifications relative to the Act, and for the introduction and delivery in commerce of any equipment for use in a coal mine which is falsely represented to be in compliance with the provisions of the Act.

(7) Provides for limited pay guarantees to miners idled by a withdrawal order.

(8) Prohibits the discharge or other discrimination against a miner for exercising rights under the Act.

TITLE II—INTERIM MANDATORY HEALTH STANDARDS

(1) Establishes interim mandatory health standards effective six months after the date of enactment of the Act.

(2) Requires each operator to take accurate samples of the amount of respirable dust in the mine atmosphere. The samples are transmitted to the Secretary and analyzed and recorded by him.

(3) Establishes a 3.0 milligram per cubic meter of air (mg/m^3) dust standard effective six months after enactment. Extensions of time to comply with the standard (permits for noncompliance) may be granted by the Panel (established by section 5) for a period not to exceed twelve months from the effective date of the standard.

(4) Establishes a 2.0 mg/m^3 dust standard effective three years after enactment, but the Panel may grant permits for noncompliance to an operator for a period not to exceed three additional years from the effective date of the standard.

(5) The Secretary of Health, Education, and Welfare has the continuing authority, beginning one year after enactment, to further reduce the dust standard below the levels established by the Act to levels which will prevent new incidences of respiratory disease and the further development of such disease in any person.

(6) Each operator shall cooperate with the Secretary of Health, Education, and Welfare in making a chest x-ray available to each miner within eighteen months after enactment, again three years later, and at such subsequent intervals determined by the Secretary of Health, Education, and Welfare but not to exceed every five years. Each worker who begins work in a coal mine for the first time shall be given a chest x-ray at the commencement of his employment and again three years later. If the second x-ray shows evidence of the development of pneumoconiosis, the worker shall be given an additional x-ray two years later. The x-rays may be supplemented by other tests deemed necessary by the Secretary of Health, Education, and Welfare. The Secretary of Health, Edu-

cation, and Welfare is also responsible for reading, classifying, and recording all results of x-rays and other medical tests.

(7) Any miner who shows evidence of the development of pneumoconiosis shall be afforded the option of transferring from his position to another position in any area of the mine where the respirable dust concentration is not more than 2.0 mg/m³. Effective three years after enactment, the option of transfer shall be to an area of the mine where such concentration is not more than 1.0 mg/m³, or if such level of concentration is not attainable in the mine, to an area where the concentration is the lowest attainable below 2.0 mg/m³. Any miner so transferred shall not receive less than the regular rate of pay received by him immediately prior to transfer.

(8) Incorporates the noise standard prescribed under the Walsh-Healey Public Contracts Act, and provides authority to the Secretary of Health, Education, and Welfare to improve upon such standard.

TITLE III—INTERIM MANDATORY SAFETY STANDARDS FOR UNDERGROUND COAL MINES

(1) Establishes interim mandatory safety standards effective three months after the date of enactment of the Act.

(2) Establishes detailed requirements to provide for safer working conditions in underground coal mines. These include requirements with regard to roof support, ventilation, combustible materials and rock dusting, electrical equipment, trailing cables, grounding, underground high-voltage distribution, underground low- and medium-voltage alternating current circuits, trolley and trolley feeder wires, fire protection, maps, blasting and explosives, hoisting and mantrips, emergency shelters, communications, escapeways, and other miscellaneous matters.

(3) Establishes requirements for the use of permissible equipment in all underground coal mines. Requires that all electric face equipment at gassy mines and all such small equipment at all mines be permissible within 15 months after enactment. It is also required that, in the case of mines not previously classified as gassy which are below the watertable, such large equipment must be permissible in 15 months, but the Panel may grant extensions of time (permits for noncompliance) of not to exceed in the aggregate an additional 33 months if the Panel determines, based on specified criteria, that the operator is unable to comply with the permissibility requirements because of unavailability of permissible equipment. In the case of such mines which are located entirely above the watertable, it is required that such large equipment be permissible within 51 months after enactment but the Panel may grant extensions of not to exceed 2 additional years on a mine-by-mine basis because of unavailability of such equipment.

TITLE IV—BLACK LUNG BENEFITS

(1) Provides for the payment of benefits for death or total disability due to pneumoconiosis.

(2) Coal miners and former coal miners who are totally disabled due to pneumoconiosis will receive benefits at a rate equal to 50 percent of the minimum monthly payment to which a disabled Federal employee in Grade GS–2 would be entitled at the time of payment. This represents approximately $136 per month. Widows of coal miners and former coal miners whose deaths are due to pneumoconiosis or whose deaths occurred while receiving total disability benefits, receive benefits at the rate prescribed for totally disabled miners. The rates prescribed above are increased for dependents at the rate of 50 percent for one dependent (widow or child), 75 percent for two dependents, and 100 percent for three or more dependents. The benefits for miners and widows will be reduced on account of payments under the workmen's compensation, unemployment compensation, or disability insurance laws of the State and, in the case of miners only, on account of excess earnings, as provided under the Social Security Act for benefits payable under that Act.

(3) The following presumptions are used in determining entitlement:

A. If a miner who is suffering from pneumoconiosis was employed for 10 years or more in an underground coal mine, there will be a rebuttable presumption that the pneumoconiosis arose out of such employment.

B. If a miner worked ten years in such a mine and died of a respirable disease, there will be a rebuttable presumption that his death was due to pneumoconiosis.

C. If a miner is suffering from or dies from an advanced irreversible stage of pneumoconiosis, it will be irrebutably presumed his death or total disability was due to pneumoconiosis.

(4) Claims filed before December 31, 1972, will be processed by the Secretary of Health, Education, and Welfare in a manner similar to that he uses for processing claims for disability under the Social Security Act. If the claim is filed after December 31, 1971, benefits under that claim may be paid only until January 1, 1973. Claims filed on or after January 1, 1973, will be processed under the appropriate State workmen's compensation law if the Secretary of Labor has determined it has adequate coverage for pneumoconiosis. He will, generally speaking, determine a State law to have adequate coverage for pneumoconiosis if the cash benefits under such law and the criteria for determining eligibility are not less favorable to the claimant than those applicable to claims filed before January 1, 1973. Where the applicable State workmen's compensation law does not provide adequate coverage for pneumoconiosis, the persons entitled to benefits will have their claims processed (so far as applicable) under the terms of the Longshoremen's and Harbor Workers' Compensation Act.

(5) In the case of claims filed on or after January 1, 1973, no payments of benefits may be made after seven years after the date of enactment of the Act.

TITLE V—ADMINISTRATION

(1) Provides authorization for appropriations for health and safety research to be carried out by the Secretary of Health, Education, and Welfare and the Secretary, respectively.

(2) Requires the Secretary to expand programs for the education and training of operators, agents thereof, and miners in accident-control, healthful working conditions, and in the use of coal mining equipment and techniques.

(3) Provides for economic assistance to any small business concern operating a coal mine to meet the requirements imposed by the Act. Such assistance shall be given by the Small Business Administration.

(4) Specifies qualifications and training requirements for employees of the Secretary; particularly inspectors.

The SPEAKER. The gentleman yields back 4½ minutes.

Mr. PERKINS. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Ohio (Mr. HAYS).

Mr. HAYS. Mr. Speaker, I have not spoken on this bill before although I represent most of the coal mining area in Ohio and practically all of the deep coal mining area. I was born in a little town that became a coal mining center about the time that I was in kindergarten. The first funeral that I ever attended was a double funeral, you might say—a Catholic mass in the morning and a Protestant funeral in the afternoon when the teacher took the whole first grade to the funerals of the fathers of two of our classmates. I have lived with that kind of a danger to the people who are my neighbors and friends all of my life.

Now, Ohio has a pretty fair mine safety law. I had something to do with the first one when I was in the State senate, but I do not believe the argument of the gentleman from Iowa that if the States do not do it, we should not do it, which he seems to imply. I think we ought to do this and I think this bill ought to pass. I do not think it ought to be recommitted and I think that not only the coal miners and their families do not think so, but I do not think anyone in Ohio thinks so.

Mr. Speaker, I want to congratulate the chairman (Mr. PERKINS) and the chairman of the subcommittee (Mr. DENT) as well as the members of the subcommittee and the conference committee. I think they have done the best job they could in a very difficult situation. I think it is a job that will be good for people and good for all Americans. I hope we pass this bill here tonight.

Mr. PERKINS. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from West Virginia (Mr. STAGGERS).

Mr. STAGGERS. I thank the gentleman from Kentucky for yielding to me.

Mr. Speaker, as one of the cosponsors of a bill which was considered—and I think all of my colleagues from the State of West Virginia introduced similar bills because they knew the importance of this subject—I remember in 1952 when we had this bill on the floor, the mine safety bill, I made the remark that the time for dilly-dallying was strictly past. And, Mr. Speaker, I say that tonight, the time for dilly-dallying about this bill is now over.

This bill should not be recommitted because it is fraught with danger if it is recommitted. It may not come back to this floor. Further, I believe exactly what has been said here to the effect that if it is not passed before we go home, you are not going to find many coal miners working in this Nation by next week.

Mr. Speaker, I wish to take this opportunity to congratulate the distinguished gentleman from Kentucky, the chairman of the full committee, the distinguished gentleman from Pennsylvania (Mr. DENT), chairman of the subcommittee and all members of the Committee on Education and Labor and others who have had a part in bringing this legislation to the floor.

Mr. Speaker, I am speaking for all Members of the West Virginia delegation when I say this.

That we hope that this bill will not be recommitted but will be passed overwhelmingly.

Mr. PERKINS. Mr. Speaker, I yield 1 minute to the distinguished gentleman from Pennsylvania (Mr. HECHLER).

Mr. HECHLER of West Virginia. Mr. Speaker, this is a magnificent piece of legislation. It is strong and effective in its terms. It is a tribute to the initiative and hard work of Congress, and particularly my good friends the gentleman from Kentucky (Mr. PERKINS) who so ably chairs the full committee, the gen-

tleman from Pennsylvania (Mr. DENT) who chairs the subcommittee and so eloquently addressed the House earlier this evening, and the gentleman from California (Mr. BURTON), who played a major role in fashioning the compensation features of the bill along with the gentleman from New Jersey (Mr. DANIELS).

This bill was drafted in Congress, it originated in Congress, it was perfected in Congress, and the tougher provisions of the bill all came as a result of the insistence of Congress. Had the Congress followed the advice of the executive branch, this would have been a milk and water piece of legislation instead of a brick and mortar piece of legislation. Had the Congress followed the advice of the executive branch, there would have been little protection for the health and safety of the coal mines of this Nation.

That is why it is passing strange that we should suddenly at the 11th hour, at 1 minute before midnight, have unveiled to us a letter of opposition to this bill from the Secretary of Labor. Even more startling is the threat of a Presidential veto which has emanated from the minority side. The White House had no part in initiating or framing this landmark legislation. Every action taken by the White House during the consideration of this legislation was in the form of trying to weaken, delay or eliminate provisions for the protection of the coal miners. Now it ill behooves the President and a member of the President's Cabinet to send messages here at the last minute in an effort to stall or kill this legislation.

The major drive for this legislation began immediately after the tragic fire and explosions at Consol No. 9 Mine in Farmington, W. Va., resulting in the deaths of 78 miners on November 20, 1968. Passage of this legislation is a fitting monument to the memory of the 78 miners who lost their lives at Farmington. Their widows have waited 13 months since Farmington for the passage of this legislation. Everyone would acknowledge that without that tragic accident, we would not even be considering mine health and safety legislation this year. Therefore, in tribute to these men, I hope the President will invite to the signing of this landmark legislation the widows of the 78 coal miners who died at Farmington.

We have heard many references tonight to the dignity of the House of Representatives. We have also heard references to the rights of the States. But what about the dignity and rights of the coal miners working in the pits, the thousands who are suffering from black lung, the thousands who have been crippled in mine accidents, the widows and families left behind when the breadwinner is killed in the most hazardous occupation in the world? The last comprehensive mine safety law was passed in 1952. The miners have waited for 17 years. Let us not nitpick any further. I say this because I agree with those who state that if Congress does not act before Christmas, there will be a major strike in the coalfields.

There is a major challenge ahead in the manner in which this legislation is administered and enforced. Congress has provided a sturdy framework for action, but if the administrative agencies charged with administering this law are timid in their approach toward enforcement, the dangers to the health and safety of coal miners will increase. I am frank to state that one of the major reasons I became disenchanted with the top leadership of the United Mine Workers of America was the fact that down through the years they have exerted very little initiative and pressure toward improving the safety laws or regulations. Furthermore, even after the Farmington disaster, the top leadership of the United Mine Workers of America bluntly stated that in their judgment it would not be possible to enact any health protection or coal dust standard for the miners this year. Later, they took the same timid approach toward the enactment of compensation for victims of black lung. For a long time, they clung to the obviously gaping loophole provided by the Federal Coal Mine Safety Board of Review. These facts are a matter of record. It took the pressure of the candidacy of Joseph A. Yablonski to awaken the leadership of the United Mine Workers of America to their legislative responsbilities to the coal miners, and then the old leadership began to wake up and become more active.

Now that the election of December 9 is a thing of the past, the real question is whether President W. A. Boyle and the leadership of the United Mine Workers of America intend to insist on a strict enforcement of this law for the benefit of the coal miners, or whether they will in a self-satisfied fashion lapse back into their cozy relationship with the coal operators and interpret the election results as a mandate for inaction. I honestly feel that the strength of the pending legislation will depend not only on the vigor with which the administrative agencies proceed with enforcement, but also on the degree to which the United Mine Workers of America from top to bottom keeps a vigilant watch on the manner in which this legislation is administered. They must beef up their safety staff, they must beef up their legal staff, and insure that the health and safety of every coal miner receives maximum protection under the law.

Mr. BURTON of Utah. Mr. Speaker, the health and safety of over 144,000 Americans is riding with us on the vote we are about to take. These Americans are coal miners—citizens who live with danger each day of their lives. They are badly in need of help—help which we can give them through the legislation we are debating new.

In addition to detailed safety standards, this legislation prescribes health standards which place limits on the amount of coal dust permitted in the mine atmosphere—something that will curb what is known as black lung disease.

This legislation will provide payments for retired and active miners who now have an advanced stage of this horrible disease; and will provide benefits to surviving dependents of miners whose death was due to such a disease.

The mines in my State of Utah—as well as mines anywhere in the United States—would be inspected by a Federal mine inspector at least four times a year; and if any of these mines are found to be in a dangerous condition, the inspector would have the authority to order the mine workers withdrawn until the danger is eliminated.

Miners in my district have been discouraged by the lack of legislation in previous years, and while this bill does not contain all the provisions I would hope it would, still it is the best that our mining experts have been able to come up with to enable this House and the other body to form some sort of agreement.

Mr. RYAN. Mr. Speaker, this Congress is about to send to the desk of the President for signature, the coal mine health and safety bill which in a virtual single motion lifts the miners of this Nation and their families into the 20th century in terms of safety regulations and health benefits.

My distinguished colleague from California (Mr. BURTON), though his district is most remote from any mine, saw in the plight of the sufferers from the dread black lung disease and in the plight of their widows and children, a national problem, a national disgrace, to which there must be provided a national solution. The invaluable and unswerving support of Congressman JOHN DENT as subcommittee chairman, as well as the support of many of our colleagues from the coal mining areas and others has brought this problem to national attention and now to the threshold of national solution. I am pleased to participate in this effort.

It would be difficult to pinpoint in time the specific moment PHIL BURTON came to grapple with this issue. Certainly, his knowledge and concern did not stem from any pressing need with which he could be personally aware in his metropolitan district in San Francisco. Yet, I know that for many, many months now, PHIL BURTON has tirelessly and ceaselessly led a creative and determined fight to bring the black lung benefit issue through committee, to this floor, through conference and back to this floor from whence it will almost certainly be passed on to the President for signature.

I know that others in the course of the debate on this measure have cited PHIL's valuable contribution. I know also that his role has been noted in editorials in both the New York Times and the Charleston, W. Va., Gazette. I would, however, be remiss if I did not cite for the RECORD at this time, this example of PHIL BURTON's deeply imbedded concern for humanity which coupled with his skill and perserverance has not only awakened the conscience of this Nation to the problem of the black lung disease but has successfully moved us along a course which will compensate to some degree those who suffer and will also establish health standards to see to it that the number of those who suffer from this disease does not grow.

I am inserting in the RECORD at this time, the text of the editorial of the New York Times of October 31, 1969, entitled, "Landmark in Mine Safety," and the

text of the editorial from the Charleston, W. Va., Gazette of November 13, 1969, entitled, "Mining on Way to Civilization":

[From the New York Times, Oct. 31, 1969]

LANDMARK IN MINE SAFETY

Like the Triangle Shirtwaist fire of 1911 in this city, the mine explosion that killed 78 men in Farmington, W. Va., a year ago will go down as a turning point in the nation's progress toward industrial safety. That place in history was assured with the passage by the House of Representatives this week of a mine health and safety bill even stronger than the far-reaching one already approved by the Senate.

Mining will never be an unhazardous occupation; no law could accomplish that miracle. But the House bill goes far toward reducing the dangers and guaranteeing reasonable compensation to those disabled by their work underground. The conference committee should have a relatively easy task of reconciling the two versions now that both chambers have made clear their refusal to be sidetracked by the once omnipotent industry lobbyists.

Special credit for the excellent outcome in the House belongs to Representatives John H. Dent of Pennsylvania, Phillip Burton of California and Ken Hechler of West Virginia. Thanks to their efforts and to the tragic death of the 78 Farmington miners, a century of underprotection for the men of the coal fields is about to be remedied.

[From the Charleston Gazette, Nov. 13, 1969]

MINING ON WAY TO CIVILIZATION

Excavating coal from the bowels of the earth will never be a hazard free occupation. But the chances for physical injury on the job and the menace to health caused by constant exposure underground to dust will be substantially reduced, once the mine safety legislation fashioned in the 92nd Congress has been sent along to President Nixon for his signature.

The House of Representatives and the Senate should have no difficulty resolving differences on a mine bill that arose, contends The New York Times, out of last year's disaster killing 78 West Virginia miners. Like the Triangle Shirt Waist Fire of 1911 in New York City, The Times says Farmington's tragedy "will go down as a turning point in the nation's progress toward industrial safety."

Special credit for the legislation must be bestowed upon the following congressmen: Rep. John H. Dent of Pennsylvania, Phillip Burton of California, and West Virginia's Ken Hechler, all Democrats. "Thanks to their efforts . . ." observes The Times, "a century of under-protection for the men of the coal fields is about to be remedied."

Hechler and Dent represent coal mining constituencies, and despite the fact that automation has radically cut the size of the work force in the nation's coal fields, miners still outnumber coal operators; therefore, it might have been expected that these two lawmakers would have fought hard on behalf of reform legislation—although many congressmen from coal districts took no part in formulating an effective bill for fear of making enemies. Rep. Burton, however, has neither coal miners nor coal diggers in his district. His effort to civilize an industry that has needed to be civilized for decades was strictly a matter of conscience.

The main point, of course, is that at long, long last the American miner is on the threshold of being protected by law in a manner somewhat commensurate with his constant contribution to the energy requirements of his country.

Mr. PERKINS. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER. The question is on the conference report.

MOTION TO RECOMMIT OFFERED BY MR. ERLENBORN

Mr. ERLENBORN. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the conference report?

Mr. ERLENBORN. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. ERLENBORN moves to recommit the conferences report on the bill S. 2917 to the committee on conference with instructions to the managers on the part of the House to insist upon the position of the House with respect to section 110(B) of the bill as passed by the House of Representatives.

Mr. PERKINS. Mr. Speaker, I move the previous question on the motion to recommit.

The previous question was ordered.

The SPEAKER. The question is on the motion to recommit.

Mr. GERALD R. FORD. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 83, nays 259, not voting 91, as follows:

[Roll No. 335]

	Rees	

So the motion to recommit was rejected.

The Clerk announced the following pairs:

Mr. Sisk with Mr. Smith of California.
Mrs. Green of Oregon with Mrs. Dwyer.
Mr. Delaney with Mr. Widnall.
Mr. Rooney of New York with Mr. Bob Wilson.
Mr. Mills with Mr. Jonas.
Mr. Ichord with Mr. Cederberg.
Mr. Rivers with Mr. Hall.

Mr. Boggs with Mr. Martin.
Mr. Barrett with Mr. Mosher.
Mr. Rogers of Colorado with Mr. Cahill.
Mr. Blanton with Mr. Taft.
Mr. Tunney with Mr. Utt.
Mr. Fallon with Mr. Weicker.
Mr. Hébert with Mr. Williams.
Mr. Poage with Mr. Denney.
Mr. Moss with Mr. Cowger.
Mr. Abbitt with Mr. Pelly.
Mr. Corman with Mr. Lipscomb.
Mrs. Sullivan with Mrs. Heckler of Massachusetts.
Mr. Sikes with Mr. Smith of New York.
Mr. Steed with Mr. Cunningham.
Mr. Fascell with Mr. Coughlin.
Mr. Evins of Tennessee with Mr. Broyhill of Virginia.
Mr. Adams with Mr. Hosmer.
Mr. McMillan with Mr. Don H. Clausen.
Mr. Andrews with Mr. Whitehurst.
Mr. Anderson of Tennessee with Mr. Winn.
Mr. Brooks with Mr. Stanton.
Mr. Baring with Mr. Berry.
Mr. Celler with Mr. Dellenback.
Mr. Flynt with Mr. Buchanan.
Mr. Podell with Mr. McCloskey.
Mr. Chappell with Mr. Whalley.
Mr. Edwards of California with Mr. Conyers.
Mr. Fulton of Tennessee with Mr. Rees.
Mr. Yates with Mrs. Chisholm.
Mr. Hanna with Mr. Dawson.
Mr. Landrum with Mr. Lennon.
Mr. Long of Louisiana with Mr. Patman.
Mr. Roberts with Mr. Whitten.
Mr. Wright with Mr. Ullman.
Mr. Kirwan with Mr. Dorn.

Messrs. MADDEN, CABELL, and STEPHENS changed their votes from "yea" to "nay."

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the conference report.

Mr. GERALD R. FORD. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 334, nays 12, not voting 87, as follows:

[Roll No. 336]

So the conference report was agreed to.

The Clerk announced the following pairs:

Mr. Sisk with Mr. Smith of California.
Mrs. Green of Oregon with Mrs. Dwyer.
Mr. Delaney with Mr. Widnall.
Mr. Rooney of New York with Mr. Bob Wilson.
Mr. Mills with Mr. Jonas.
Mr. Ichord with Mr. Cederberg.
Mr. Rivers with Mr. Hall.
Mr. Boggs with Mr. Martin.
Mr. Barrett with Mr. Mosher.
Mr. Rogers of Colorado with Mr. Cahill.
Mr. Blanton with Mr. Taft.
Mr. Tunney with Mr. Utt.
Mr. Fallon with Mr. Weicker.
Mr. Hébert with Mr. Williams.
Mr. Poage with Mr. Denney.
Mr. Moss with Mr. Cowger.
Mr. Abbitt with Mr. Pelly.
Mr. Corman with Mr. Lipscomb.
Mrs. Sullivan with Mrs. Heckler of Massachusetts.
Mr. Sikes with Mr. Smith of New York.
Mr. Steed with Mr. Cunningham.
Mr. Fascell with Mr. Coughlin.
Mr. Evins of Tennessee with Mr. Broyhill of Virginia.
Mr. Adams with Mr. Hosmer.
Mr. McMillan with Mr. Don H. Clausen.
Mr. Andrews with Mr. Whitehurst.
Mr. Anderson of Tennessee with Mr. Winn.
Mr. Brooks with Mr. Stanton.
Mr. Baring with Mr. Berry.
Mr. Celler with Mr. Dellenback.
Mr. Flynt with Mr. Buchanan.
Mr. Podell with Mr. McCloskey.
Mr. Chappell with Mr. Whalley.
Mr. Edwards of California with Mr. Conyers.
Mr. Fulton of Tennessee with Mr. Rees.
Mr. Yates with Mrs. Chisholm.
Mr. Hanna with Mr. Teague of Texas.
Mr. Landrum with Mr. Lennon.
Mr. Long of Louisiana with Mr. Patman.
Mr. Roberts with Mr. Whitten.
Mr. Wright with Mr. Ullman.
Mr. Kirwan with Mr. Hastings.
Mr. Gallagher with Mr. Sebelius.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. PERKINS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks and include extraneous matter in connection with the conference report on mine safety.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

DEPARTMENT OF DEFENSE APPROPRIATIONS—CONFERENCE REPORT

Mr. MAHON submitted the following conference report and statement on the bill (H.R. 15090) making appropriations for the Department of Defense for the fiscal year ending June 30, 1970, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 91-766)

The Committee of Conference on the disagreeing votes of the two Houses on the Amendments of the Senate to the bill (H.R.

15090) "making appropriations for the Department of Defense for the fiscal year ending June 30, 1970, and for other purposes," having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows: That the Senate recede from its amendments numbered 5, 7, 9, 17 and 42.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 6, 13, 14, 15, 16, 19, 30, and 32, and agree to the same.

Amendment numbered 12: That the House recede from its disagreement to the amendment of the Senate numbered 12, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$6,445,900,000"; and the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$39,000,000"; and the Senate agree to the same.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$2,620,000,000"; and the Senate agree to the same.

Amendment numbered 23: That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$2,490,300,000"; and the Senate agree to the same.

Amendment numbered 25: That the House recede from its disagreement to the amendment of the Senate numbered 25, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$1,484,600,000"; and the Senate agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$3,405,800,000"; and the Senate agree to the same.

Amendment numbered 35: That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$1,596,820,000"; and the Senate agree to the same.

Amendment numbered 37: That the House recede from its disagreement to the amendment of the Senate numbered 37, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$2,186,400,000"; and the Senate agree to the same.

Amendment numbered 39: That the House recede from its disagreement to the amendment of the Senate numbered 39, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$3,060,600,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 8, 10, 11, 20, 22, 24, 26, 27, 29, 31, 33, 34, 36, 38, 40, 41, 43 and 44.

Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 15090) making appropriations for the Department of Defense for the fiscal year ending June 30, 1970, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report as to each of such amendments, namely:

TITLE I—MILITARY PERSONNEL

Military personnel, Army

Amendment No. 1: Appropriates $8,107,000,000 as proposed by the Senate instead of $8,312,000,000 as proposed by the House.

Military personnel, Navy

Amendment No. 2: Appropriates $4,368,400,000 as proposed by the Senate instead of $4,370,000,000 as proposed by the House.

Military personnel, Air Force

Amendment No. 3: Appropriates $5,823,000,000 as proposed by the Senate instead of $5,835,300,000 as proposed by the House.

Reserve personnel, Army

Amendment No. 4: Appropriates $306,700,000 as proposed by the Senate instead of $308,000,000 as proposed by the House.

Reserve personnel, Navy

Amendment No. 5: Appropriates $131,400,000 as proposed by the House instead of $127,900,000 as proposed by the Senate.

Reserve personnel, Air Force

Amendment No. 6: Appropriates $81,200,000 as proposed by the Senate instead of $83,400,000 as proposed by the House.

TITLE III—OPERATION AND MAINTENANCE

Operation and maintenance, Army

Amendment No. 7: Appropriates $7,214,447,250 as proposed by the House instead of $7,185,841,000 as proposed by the Senate.

In agreeing to the financing of International Military Headquarters from Defense appropriations, the conferees require that the Director of the Bureau of the Budget conduct a study to determine where these functions should be provided for in future budgets.

The conferees direct that the Tactical Automatic Digital Switching System and the Random Access Digital Address System of the Army be discontinued immediately.

Amendment No. 8: Reported in technical disagreement. It is the intention of the managers on the part of the House to offer a motion to recede and concur in the Senate amendment.

Operation and maintenance, Navy

Amendment No. 9: Appropriates $5,037,300,000 as proposed by the House instead of $5,129,200,000 as proposed by the Senate.

The conferees are in agreement that the fixed-wing training of helicopter pilots by the Navy and Air Force is to be discontinued by December 31, 1970.

The conferees feel that the morale and retention rate of Navy personnel is of paramount importance and recommend that ship repair work be performed in, or as near as possible to—up to 300 miles of—the home port of the vessel when it cannot be accomplished at the home port itself.

Amendment No. 10: Reported in technical disagreement. It is the intention of the managers on the part of the House to offer a motion to recede and concur in the Senate amendment.

Operation and maintenance, Marine Corps

Amendment No. 11: Reported in technical disagreement. It is the intention of the managers on the part of the House to offer a motion to recede and concur in the Senate amendment.

Operation and Maintenance, Air Force

Amendment No. 12: Appropriates $6,445,900,000 instead of $6,454,500,000 as proposed by the House, and $6,445,000,000 as proposed by the Senate.

The House conferees direct that $10,600,000 of the reduction in Operation and Maintenance, Air Force and $963,000 of the reduction in Research, Development, Test, and Evaluation, Air Force, for Automatic Data Processing operations be applied against the Phase II Base Level Data System. Also, that funds involved in Other Procurement, Air Force, for the purchase of Phase II Base Level Data equipment can be used only for the system leased during fiscal year 1969.

Operation and maintenance, defense agencies

Amendment No. 13: Appropriates $1,069,400,000 as proposed by the Senate instead of $1,074,600,000 as proposed by the House.

Operation and maintenance, Army National Guard

Amendment No. 14: Deletes language as proposed by Senate.

Amendment No. 15: Appropriates $297,800,000 as proposed by the Senate instead of $300,000,000 as proposed by the House.

Operation and maintenance, Air National Guard

Amendment No. 16: Deletes language as proposed by Senate.

National Board for the Promotion of Rifle Practice, Army

Amendment No. 17: Retains language as proposed by House.

Claims, Defense

Amendment No. 18: Appropriates $39,000,000 instead of $41,000,000 as proposed by the House and $37,000,000 as proposed by the Senate.

TITLE IV—PROCUREMENT

Procurement of equipment and missiles, Army

Amendment No. 19: Appropriates $4,254,400,000 as proposed by the Senate instead of $4,281,400,000 as proposed by the House.

With respect to the MBT–70 Main Battle Tank program, the conferees took note of the fact that the Deputy Secretary of Defense had advised the Chairman, Senate Appropriations Committee, that he would not approve development of the MBT–70 under the current design. By January 15, 1970, a decision on a new austere version of the MBT–70 and other options available will be made. The Deputy Secretary noted also that the basic agreement between the Governments of the United States and the Federal Republic of Germany prescribes that unilateral termination by either nation must be preceded by a 60 day notice of intent to terminate. For these reasons, the conferees have not acted on the question of terminating the international agreement until after the report of the Secretary of Defense, containing this decision, is transmitted to Congress.

Amendment No. 20: Reported in technical disagreement. It is the intention of the managers on the part of the House to offer a motion to recede and concur in the Senate amendment, which deletes House language limiting availability of funds. This same action is proposed in connection with amendments numbered 22, 24, 26, 27, 29, 31, 33, 34, 36, 38, 40 and 41.

Procurement of aircraft and missiles, Navy

Amendment No. 21: Appropriates $2,620,000,000 instead of $2,696,600,000 as proposed

by the House and $2,465,500,000 as proposed by the Senate. The amount of $8,500,000 proposed by the Senate for F–14A aircraft advanced procurement is denied. The Committee of Conference expects the Navy and the contractor to reach a suitable contractual agreement to carry out the intention of the conferees.

The amount of $9,500,000, as proposed by the Senate, is provided for the Shrike ARM missile, and the $14,500,000 proposed by the Senate for modification of existing A–6 aircraft to the tanker configuration is also provided. The $5,000,000 for spare aircraft engines proposed by the Senate is denied, but the amount of $5,000,000 for KA–6D tanker modification spares is provided.

The conferees agreed to the reduction of $25,600,000 for the Standard ARM missile and to the unspecified reduction of $80,000,000 based on available balances as proposed by the Senate.

An amount of $491,500,000 is approved for Poseidon missiles instead of $323,500,000 as proposed by the Senate.

Amendment No. 22: Reported in technical disagreement. It is the intention of the managers on the part of the House to offer a motion to recede and concur in the Senate amendment, which deletes House language limiting availability of funds.

Shipbuilding and conversion, Navy

Amendment No. 23: Appropriates $2,490,300,000 instead of $2,588,200,000 as proposed by the House and $2,242,770,000 as proposed by the Senate.

The amount of $110,000,000 is provided for advance procurement of five SSN–688 class high speed nuclear submarines as proposed by the House. The conferees are in agreement that the funds provided are based upon the assumption that there will be five such submarines in the fiscal year 1971 new construction program instead of four.

The amount of $77,900,000 is provided for advance procurement funding of four DXGN nuclear frigates, as proposed by the Senate.

The amount of $354,700,000 is provided for the conversion of four Polaris submarines to the Poseidon configuration, including $153,978,000 in advance procurement funds and $5,180,000 for outfitting and post delivery of previously funded conversions. The fact that the conferees agreed to provide the long leadtime funds does not constitute a commitment to the future conversion of any specific number of submarines. The Department is to report to the Congress prior to the obligation of funds for long leadtime items.

The amount of $13,230,000 is provided for eight harbor tugs and four repair, berthing, and messing barges, as proposed by the House.

Amendment No. 24: Reported in technical disagreement. It is the intention of the managers on the part of the House to offer a motion to recede and concur in the Senate amendment, which deletes House language limiting availability of funds.

Other procurement, Navy

Amendment No. 25: Appropriates $1,484,600,000 instead of $1,461,800,000 as proposed by the House and $1,524,600,000 as proposed by the Senate.

The amount of $126,300,000 is approved for the MK–48 torpedo program as proposed by the Senate.

The amount of $240,800,000 is provided for "Communications and Electronics" as proposed by the Senate, and the amount of $69,900,000 is provided for SSBN support.

Amendment No. 26: Reported in technical disagreement. It is the intention of the managers on the part of the House to offer a motion to recede and concur in the Senate amendment, which deletes House language limiting availability of funds.

Procurement, Marine Corps

Amendment No. 27: Reported in technical disagreement. It is the intention of the managers on the part of the House to offer a motion to recede and concur in the Senate amendment, which deletes House language limiting availability of funds.

Aircraft procurement, Air Force

Amendment No. 28: Appropriates $3,405,800,000 instead of $3,434,700,000 as proposed by the House and $3,380,800,000 as proposed by the Senate.

Amendment No. 29: Reported in technical disagreement. It is the intention of the managers on the part of the House to offer a motion to recede and concur in the Senate amendment, which deletes House language limiting availability of funds.

Missile procurement, Air Force

Amendment No. 30: Appropriates $1,448,100,000 as proposed by the Senate instead of $1,431,000,000 as proposed by the House.

Amendment No. 31: Reported in technical disagreement. It is the intention of the managers on the part of the House to offer a motion to recede and concur in the Senate amendment, which deletes House language limiting availability of funds.

Other procurement, Air Force

Amendment No. 32: Appropriates $1,576,200,000 as proposed by the Senate instead of $1,636,000,000 as proposed by the House.

Amendment No. 33: Reported in technical disagreement. It is the intention of the managers on the part of the House to offer a motion to recede and concur in the Senate amendment, which deletes House language limiting availability of funds.

Procurement, Defense agencies

Amendment No. 34: Reported in technical disagreement. It is the intention of the managers on the part of the House to offer a motion to recede and concur in the Senate amendment, which deletes House language limiting availability of funds.

TITLE V—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

Research, development, test, and evaluation, Army

Amendment No. 35: Appropriates $1,596,820,000 instead of $1,575,300,000 as proposed by the House and $1,600,820,000 as proposed by the Senate. The conferees agreed as follows:

(a) To restore $3,520,000 of the $5,600,000 reduction made by the House for various caseless ammunition program, as proposed by the Senate.

(b) Agreed to the restoration of $10,000,000 of the House unspecified reduction of $118,100,000.

(c) Agreed to a restoration of $3,000,000 of the House reduction of $5,000,000 for the Air Defense Control and Coordination System.

(d) Agreed to a restoration of the $5,000,000 reduction for the LANCE missile system, as proposed by the House.

(e) Agreed to a reduction of $4,000,000 in the request for Military Astronautics and Related Equipment, as proposed by the House.

With respect to Project Mallard, it is the sense of the conferees that the Department should not embark on this development program at this time. The Department of Defense is strongly urged to explore as soon as practically possible the discontinuance of this international development effort through the mutual consent of the participating countries.

Amendment No. 36: Reported in technical disagreement. It is the intention of the managers on the part of the House to offer a motion to recede and concur in the Senate amendment, which deletes House language limiting availability of funds.

Research, development, test and evaluation, Navy

Amendment No. 37: Appropriates $2,186,400,000 instead of $2,040,400,000 as proposed by the House and $2,193,251,000 as proposed by the Senate.

The amount of $1,977,000 is provided for the Crane Heavy Lift Helicopter, as provided by the House, and the amount of $8,000,000 is provided for the Condor air-to-surface stand-off missile as proposed by the Senate.

The amount of $10,000,000 is provided for the Underwater Long-Range Missile System as proposed by the Senate, and the amount of $19,659,000 is provided for "Military Astronautics and Related Equipment" as proposed by the House.

The conferees agreed to the restoration of $12,500,000 of the House general unspecified reduction of $26,000,000, reflecting a general reduction of $13,500,000 in the revised budget estimate.

The amount of $441,500,000 is provided for the F–14 aircraft development as provided by the Senate.

Amendment No. 38: Reported in technical disagreement. It is the intention of the managers on the part of the House to offer a motion to recede and concur in the Senate amendment, which deletes House language limiting availability of funds.

Research, development, test, and evaluation, Air Force

Amendment No. 39: Appropriates $3,060,600,000 instead of $3,056,900,000 as proposed by the House and $3,062,026,000 as proposed by the Senate. The sum agreed to includes $2,000,000 for the A–X close support aircraft and $1,700,000 for the Special Purpose Communications program. The $1,700,000 provided is the sum obligated under the Continuing Resolution. No additional funds are provided and the Special Purpose Communications program is to be terminated.

A total of $474,000 is included for the SHAPE Technical Center under the agreement on the funding of International Military Headquarters.

Amendment No. 40: Reported in technical disagreement. It is the intention of the managers on the part of the House to offer a motion to recede and concur in the Senate amendment, which deletes House language limiting availability of funds.

Research, development, test, and evaluation, Defense Agencies

Amendment No. 41: Reported in technical disagreement. It is the intention of the managers on the part of the House to offer a motion to recede and concur in the Senate amendment, which deletes House language limiting availability of funds.

TITLE VI—GENERAL PROVISIONS

Amendment No. 42: Retains language as proposed by the House providing authority for certain payments in connection with International Military Headquarters.

Amendment No. 43: Reported in technical disagreement. It is the intention of the managers on the part of the House to offer a motion to recede and concur. The section will provide limitations as proposed by the Senate with respect to balances of old accounts in lieu of terminations as proposed by the House.

Amendment No. 44: Reported in technical disagreement. It is the intention of the managers on the part of the House to offer a motion to recede and concur in the Senate amendment prohibiting the use of funds to finance the introduction of American ground combat troops into Laos or Thailand.

HIGH ENERGY PHYSICS AND THE NATIONAL ACCELERATOR LABORATORY

(Mr. PRICE of Illinois asked and was given permission to address the House for 1 minute, to revise and extend his remarks and to include extraneous matter.)

Mr. PRICE of Illinois. Mr. Speaker, it was announced recently that France would honor its commitment to join with Austria, Belgium, Germany, Italy, and Switzerland in financing the construction of the proposed highest energy accelerator in the world, a 300-billion-electron-volt machine. It is common knowledge that the research programs in Europe which require the spending of the equivalent of hundreds of millions of dollars have been in serious difficulties the past few years. For France, which has been plagued with severe economic problems, to follow through with its prior decision to support the program can only point to the strong conviction all European nations have that high energy physics is indeed the new frontier of physical research. I would like to point out that at present the highest energy accelerator in the world is the Russian 76-billion-electron-volt facility at Serpukhov. The 333-billion-electron-volt alternating gradient synchrotron at the AEC's Brookhaven National Laboratory has the highest energy in the United States.

The Congress recently voted $70 million in appropriations for the National Accelerator Laboratory at Batavia, Ill., for fiscal year 1970. Those responsible for designing and constructing the laboratory had requested $96 million and indicated that a minimum of $89 million would be necessary to keep construction on projected cost and time schedules. If it is really the intent of the Congress that the United States return to the forefront of high energy physics research, this reduction of $26 million below the original request is false economy, since this cut, if not restored in the fiscal year 1971 appropriations, will cause about a year's delay and an estimated increase of $30 million for the project.

However, more than money is at stake in constructing the National Accelerator Laboratory on schedule, Dr. Robert Rathbun Wilson, the Director of the Laboratory, has listed rather succinctly nine reasons for carrying out the project as planned:

Timeliness: It will be the right instrument, for the right problems at the right time, but only if it is built soon enough.

Welfare of the Country: Scientific preeminence is a vital factor in the cultural and technological health of our country. The 200 BeV machine, if finished soon enough, will help to maintain that preeminence.

Scientific Need: There are definite important scientific problems that we know can be answered by the use of the 200 BeV machine. Many of these can be done only with a 200 BeV machine. Other questions are susceptible to partial and expensive answers by the use of inadequate instruments.

International Standing: Soviet physicists now have an operating 76 BeV machine, while the United States' present top is only 33 BeV. Our 200 BeV accelerator should come into operation before the European 300 BeV machine and with enough time to insure and maintain a leading position—if built on schedule.

Scientific exploration: In scientific discovery there is no second prize—just a bag to be left holding.

Quality of the accelerator: Our present schedule wil provide the United States with the most advanced research facility in the world.

Quality of the participants: Outstanding scientists will only associate themselves with a vigorous project. Too little, too late will draw mediocre people who will perform mediocre experiments and at a very much higher cost.

Direct cost: A delay in the schedule will incur a large additional cost.

Eventual cost: In the light of the 300 BeV European machine, delay of even one year suggests that the scope of the American effort should be reviewed. This would almost certainly lead to a reorientation of the project to a larger and hence more expensive machine.

I would like to add one more thought. The State of Illinois has acted aggressively to keep its part of the bargain. The State acquired and turned over to the Federal Government a 6,800-acre site which cost some $26 million. Both State and local governments have worked hard to provide those adequate services so necessary to the success of the project. The State and local governments have sacrificed much to carry out their commitments in keeping with the proposed schedule. It would certainly seem that the Federal Government should try to do the same.

TV POLITICAL ADVERTISING RATES CUT

(Mr. EDMONDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDMONDSON. Mr. Speaker, I think most of us here will agree that we live in an age when television exposure is an essential ingredient in any political campaign. Television is an effective medium for presenting a candidate and his views. It is effective for discussion of issues; for helping the voter be aware of positions, stands, and proposals; for presenting the candidate "live and in color" to great numbers of the people he is asking to serve—many more than the candidate can meet personally or address at rallies.

For these reasons, political television advertising has helped mold in the United States the most informed electorate the world has ever known. For these same reasons, most candidates must make use of television where it is available to them if they have any hopes of success.

On the other side of the coin, television is expensive. Purchase of television time has driven campaign costs at all levels to highs we would not have dreamed of even a few years ago. The costs of television have come to dominate political fundraising and spending, and even selection of candidates. This is a matter which has greatly concerned me for some time, and I know most of my colleagues share that concern.

With this in mind, I was deeply pleased last week when I learned that Leake Television, Inc., with television stations in Tulsa, Okla., and Little Rock, Ark., has cut its political advertising rate by one-third.

James C. Leake, chairman of the board of Leake Television, Inc., stated in announcing the new political rates:

It is our position that anyone should be able to run for political office. Therefore, to do our part to insure that the use of television is available to all candidates, it will be our policy henceforth to reduce all rates to bona fide candidates by 33 per cent.

Mr. Speaker, I believe Mr. Leake deserves a sincere thanks from all Americans in setting forth this new and enlightened policy. I salute him, and I hope that he is only the first of many of the men who control the television medium who adopt this unselfish and public spirited approach.

RADIO AND TELEVISION TIME SHOULD BE MADE AVAILABLE FOR CANDIDATES FOR PUBLIC OFFICE

(Mr. MURPHY of New York asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MURPHY of New York. Mr. Speaker, I want to commend the gentleman from Oklahoma (Mr. EDMONDSON) for his remarks about radio and television stations KTUL and KATV.

Of course, in the gentleman's broadcast area he probably has many television stations.

In my particular area we have probably 35 Members of Congress, 20 of them from one city alone. The television rates in the area almost make it prohibitive for candidates running for public office in New York to buy substantial amounts of television time.

I, therefore, commend these two television stations for cutting their political advertising rates by one-third. However, I would like to make the statement that I have made on many of our channels in the New York area and that is public television time should not be available for purchase but that public officials and candidates running for office in a broadcast area should have the opportunity to appear on television at the expense of the television channel. That is, time should be made available to all candidates running for public office.

Mr. HOLIFIELD. Mr. Speaker, will the gentleman yield?

Mr. MURPHY of New York. I am glad to yield to the gentleman from California.

Mr. HOLIFIELD. The same situation exists in many large metropolitan areas like San Francisco and Los Angeles. The rates are prohibitive. The gentleman is striking at the heart of this thing. The television licensees are using for their own profit a public communication channel. Therefore, the public interest time should include the availability of time for public servants and for candidates for Federal offices to come before the public on a public service basis and not on a cost for time which is so high, that it is prohibitive.

Mr. EDMONDSON. Mr. Speaker, will the gentleman yield?

Mr. MURPHY of New York. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. I think the gentleman from California is making a very fine point. I think television stations should be encouraged to give public service time for all candidates, but I think it is also a good step in the right direction to lower advertising rates and that should be commended.

Mr. MURPHY of New York. It is certainly a step in the right direction.

A SALUTE TO LEAKE TELEVISION, INC.

(Mr. KEE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KEE. Mr. Speaker, I wish to join in this salute to James C. Leake and Leake Television, Inc. I hope this is just the first in a series of announcements of this nature.

Political advertising on television is useful and necessary—and costly. I believe Mr. Leake has demonstrated an awareness of these facts when he announced as his reason for cutting political advertising rates by one-third that he wants to insure that the use of television is available to all candidates.

His action is clearly to the benefit of the public, which relies a great deal on television for information. It also will benefit the public in the areas his television stations serve by helping to slow down the mushrooming costs of political candidacy and making it possible for able candidates with limited resources to run for elective office.

A STEP IN THE RIGHT DIRECTION

(Mr. UDALL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. UDALL. Mr. Speaker, this is exceptionally good news which has been called to our attention today. It is good news to learn that an owner in the television industry is as aware as those of us in politics and government of the increasing costs of political campaigning.

There has been much discussion of these costs, and the need for more and larger political contributions which go with the costs.

There have been newspaper and magazine articles on the role television is playing in political campaigns, both from the standpoint of effectiveness and costliness. Most Americans are aware of these problems, but until today I have not been aware of anyone who has done anything about it.

Now we hear about Mr. Leake who has taken a very firm and dramatic step toward doing something about it. I hope he is a bellwether in the industry.

PROPOSED RAISING OF THE "TECUMSEH"

(Mr. EDWARDS of Alabama asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDWARDS of Alabama. Mr. Speaker, midst all the talk of national priorities, some specific projects frequently get lost in the shuffle. This all too frequently occurs when the projects are not of an urgent nature or do not affect masses of people. One such project is the raising of the *Tecumseh*, the U.S. Navy's ironclad monitor that went down in 38 feet of water while trying to run past the shore guns of Fort Morgan in the famous Battle of Mobile Bay.

Now, Mr. Speaker, all this took place back in 1864. Since then the old *Tecumseh* with all hands has been lying offshore for these 105 years. The Smithsonian Institution has a four-phase plan for raising the vessel including interment of the human remains of the ship's crew.

However, defense needs in Vietnam, space shots, the urban crisis, and many other national problems have scuttled any hope for salvaging the historic artifact. Although technical assistance would be available from the Smithsonian and the Navy Department, private funds would be necessary to cover the major cost of the project.

This is good. The Federal Government should not be in the business of financing everything that comes along. If it were, taxes would be even higher than they are today. But no; this country has survived on the principle of private industry, and private industry is what is necessary to bring the *Tecumseh* to the surface. The Government, as it has offered to do, should provide its assistance where necessary, to help the project along.

This project, I believe, is greatly worthwhile. Sometimes, not only today's youth, but some of us older folk, need a reminder of the conflicts and difficulties that have taken place in the past. Battles that have been fought, struggles that have been won, all in the cause of human rights and freedoms. Although the Civil War was a devisive point in our history, the country has survived to this day, thereby proving the strength of our constitutional system and the courage of the American people.

The study of our historic past is probably the cornerstone of patriotic fervor and pride in our country. By reflecting on our past struggles and achievements, we draw strength to go forward and meet the challenges of the future. Our past history is like a marker, that when lined up with our future goals, keeps us on the right path.

I hope that I will one day be able to see the *Tecumseh* restored. It will take the efforts of private citizens interested in keeping the memory of our historic past alive for this and future generations. If this aspect of the American spirit should die, then no amount of Federal funds will be able to hold the country together. Dollars do not buy a strong democracy.

FRANK HOWARD: DEAN OF COLLEGE FOOTBALL COACHES

(Mr. DORN asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. DORN. Mr. Speaker, Frank Howard, dean of American football coaches is relinquishing active coaching at Clemson University to devote his full time to his duties as athletic director.

Coach Howard is one of the greatest coaches in the history of American football. When he first came to Clemson, one wondered if the rickety stands seating only a handful of spectators would collapse before the end of the game. Mud or red dust was everywhere and the lack of equipment and facilities was appalling. Today Clemson has one of the most magnificent stadiums and colosseums in the United States. Its athletic facilities are second to none. Howard's is a success story in the Horatio Alger tradition.

When Frank Howard first came to Clemson, almost 40 years ago, he brought the Clemson Tigers and South Carolina football national fame. Howard literally took the Tigers from the cow pasture to national prominence.

Perhaps the highlights of Howard's great career were January 1, 1949, when the greatest Gator Bowl game of all time was played in Jacksonville, Fla., and Clemson defeated a powerful Missouri team, 24 to 23; on January 1, 1950, in the Orange Bowl when he defeated the undefeated Hurricanes of Miami, 15 to 14; on January 1, 1959, when his Tigers outplayed the Nation's No. 1 team, the powerful LSU Tigers, in the Sugar Bowl, finally losing 7 to 0; and on December 19, 1959, when his underdog team outplayed and crushed the cochampion of the Southwest Conference, TCU, 23 to 7 in the Bluebonnet Bowl.

Frank Howard's teams won more Atlantic Coast Conference championships than any other team since the conference was founded, winning five titles and being cochampion once. His overall record as head coach is 165 victories.

In the sports world, Frank Howard is a national and even an international figure. He coached for the Armed Forces overseas, conducted many football clinics, and coached in various post-season bowls. In his almost 40 years of coaching, he has influenced the lives of as many young Americans on the gridiron as perhaps anyone in the history of our country.

Mr. Speaker, above all, Frank Howard is a great patriotic American who is dedicated to those principles and ideals that made our Nation great. He believes in courtesy, discipline, and character. His "boys" carried the principles of courage and fearlessness on to the battlefields of Europe, Korea, and Vietnam. They have stood out for America in war and in peace. In World War II, more Clemson graduates and Howard-coached men were officers of the Armed Forces of our country than any other college except Texas A. & M.

Mr. Speaker, the news media throughout the Nation and the Armed Forces network announced Coach Howard's recent decision. Splendid tributes have appeared in the Nation's leading newspapers and on radio and television. Among those paying high tribute to Coach Howard were Bear Bryant, Bobby Dodd, Paul Dietzel, Jim Dooley, Earle Edwards, "Peahead" Walker, and Bob King.

Among the many tributes was a splendid editorial which appeared in the Greenville, S.C., News. I commend it to the attention of my colleagues here in the Congress and the American people:

THE BARON'S RETIREMENT

The fact that Frank Howard is front page news this morning speaks for itself. His retirement is of great general interest, ranking right up there with the textile imports amendment, the Vietnam war, taxes and other subjects of importance to people.

Nobody in South Carolina asks "Frank Who?"

Nobody needs to be told that Frank Howard has been Clemson University's head football coach for 30 years. The Bashful Baron of Barlow Bend is better known than many successful politicians, businessmen, scientists and other famous South Carolinians.

Everybody from schoolboy to grand-daddy realizes Frank Howard made Clemson a nationally-known gridiron power, winning championships and bowl bids and developing several All-America and other great stars who now hold their own niches in football history. And the Baron's fame as banquet speaker and conductor of grid clinics is widespread.

The man has become a living legend whose outspoken comments, country-style wit and "feuds" (many of them carefully contrived) with other grid coaches are a part of gridiron lore. They'll be telling stories for years about Frank Howard and Peahead Walker, and recounting numerous incidents in Clemson's Death Valley when the tobacco-chewing Baron prowled the sidelines.

Whenever and wherever football fans gather, the name of Frank Howard is bound to come up before the session gets far along. He is part and parcel of the game itself, one of those strong individuals who have stamped their own image on an entire era of the sport.

Quite possibly the era of the Frank Howards is passing. The trend seems to be away from the colorful, rugged-individual mentor and toward the corporation executive type coach who organizes staffs and platoons and applies scientific techniques. If so, a great deal of the warmth and inspiration which made college football great for participants and fans will be lacking in the future.

It goes without saying that Frank Howard has been good for football in this area. It also is true that he has been good for Clemson University and for the entire State of South Carolina as an ambassador of good will all over the country.

As he retires from active coaching, it is fair to ask but impossible to answer the question—how many Americans were introduced to Clemson University and the State of South Carolina by Frank Howard and the great football teams he produced? The number has to be legion.

Like all coaches good enough to stay with the game for any length of time, Frank Howard has had his fine years and bad. He has been praised and assailed. But the sum total of his career is all to the good, for football, for Clemson and for South Carolina.

For that reason, Clemson men everywhere and all South Carolinians are delighted that the Bashful Baron will remain as the university's athletic director. We haven't heard the last of his "cornball" wit, and we confidently expect him to be an even better ambassador of good will for Clemson and for the state now that he no longer shoulders the burdens of coaching.

But college football in this area will be different next year because of his retirement as active coach—and Death Valley will never be the same again without him pacing the Clemson sideline.

NEW APPROACHES TO JUNK MAIL OFFERED BY GALLAGHER

(Mr. GALLAGHER asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and include extraneous matter.)

Mr. GALLAGHER. Mr. Speaker, I rise today to introduce legislative concepts of inviting simplicity which may be of considerable assistance in the continuing debate over what must be done about the problem of junk mail. Let me immediately state that I do not regard this legislation as a polished bill; rather, it points the way toward a more constructive and meaningful debate and, hopefully, may provide key provisions for those congressional committees now wrestling with the problem of pornography sent through the mails.

INVASION OF PRIVACY AS AN INDIVIDUAL DECISION

One of the central facts I have learned during the 5 years I have been closely identified with the issue is that it is virtually impossible to impose a single universal standard on what constitutes an invasion of personal privacy. What is personal to one citizen is frequently openly advertised by another; what one discusses willingly in one context may be regarded as deeply intimate in another.

This is especially true in unsolicited mail. Many people enthusiastically welcome it, others find it yet another of the irritations of modern life, and some claim it to be a direct invasion of their personal privacy. Charitable and nonprofit organizations employ the direct mail industry to gain funds to carry forward their worthwhile work, and it is an indisputable fact that direct mail is an aid to legitimate businesses.

THREE NEW APPROACHES

Recognizing these facts, my new approaches to the direct mail industry are based upon the idea that the individual has the right to control, at least to some extent, the content of his mailbox. My legislation builds upon the foundations laid by others by adding the dimension of personal choice, of individual action, and of citizen responsibility.

The bill I introduce today is keyed to the new idea that each piece of unsolicited mass mail must contain identifying information clearly specifying where the sender got the name of the recipient. It also gives the individual the option of filing a form with the Postmaster General stating that he does not wish to receive any mass mailings, generated by registered mailing list brokers, or that he only wishes to receive those pieces of mail relating to nonprofit, charitable solicitations.

The third original idea is that the individual may write directly to the ultimate source and direct his name to be removed from that particular list. This provision is enforceable, for the Postmaster General may enter the dispute if those who control the list do not abide by the citizen's wishes. Under current legislation, the citizen may now write to the Postmaster General and request his name be removed from a list if he finds the offering to be pornographic; my original concept allows him to write directly to the source which generated the mail by giving out his name. Further, it removes the necessity for the individual to find the mailing pornographic.

The two most frequently heard complaints about unsolicited mass mailings are, "How did they get my name?" and "How can I get off that list?" The new concepts embodied in my legislation provide the answer to both those questions and, by giving the individual the option to take action himself, puts power back in the hands of the citizen.

Mr. Speaker, I would regard this as an extremely important and vitally necessary alternative for the Congress to recognize. All around us we hear slogans which are huckstered by antidemocratic forces and which can destroy the foundations of our Republic. "All power to the people" and similar catch phrases mean, in reality, all power to the particular leader who mouthes them. Their accompanying corollary is the direct denial of basic civil rights of anyone who opposes the sloganeer. This is a grave threat to the basic American principles of tolerance and compromise of conflicting views on public policy.

We must recognize, however, the existence of a legitimate and very real feeling of powerlessness on the part of many of our citizens. Such inflammatory phrases are fueled by the widespread sense of dehumanization and depersonalization in modern society. I introduce these legislative concepts today for I continue to believe that the Congress must direct itself to devising ways to put a sense of personal control over the ways in which strangers manipulate intimate facts about the individual.

It is this desire which caused me to initiate congressional consideration of the credit reporting industry, to introduce a resolution to establish the Select Committee on Technology, Human Values, and Democratic Institutions, and why I have spoken out for more than 3 years about the dangers of misapplying computer technology. Protecting the space where the individual's basic human nature resides, reenforcing what I call "the intellectual imperative," must become the focal point of legislative concern.

POSSIBLE ASSISTANCE IN THE BATTLE AGAINST PORNOGRAPHY

This powerlessness I mentioned is particularly distressing to many constituents who have communicated with me about their difficulty in preventing pornography coming through the mails. These are law-abiding citizens who are trying to raise their children in a clean and wholesome atmosphere; yet, they cannot keep from their mailboxes what they regard as disgusting obscenity, camouflaged as "sophisticated adult material." Indeed, I am always amazed that some of the most blatant is termed "sophisticated"; that some of the most puerile is called "adult."

The Congress has addressed itself to

the pornography question and a bill which passed the 90th Congress allows the individual to write the Postmaster General to have such material removed from his mails. Unfortunately, this provision is now widely regarded as being ineffective and the Supreme Court is now considering constitutional questions about it.

There are new bills now circulating on Capitol Hill and many hearings have been held. One idea which is attracting influential support is to have each piece of mail which may be regarded as obscene to be clearly labeled as such on the envelope. This attractive idea may however, be self-defeating. It does not take a particularly acute observer of human nature to know that the label itself may be the most persuasive form of advertising and it is not hard to imagine younger members of a family fighting to be the one to open such a provocative piece of mail.

I would hope that one positive effect of the new concepts I introduce today will be to assist in the war on obscene mailings. Because it does not require the citizen to make an evaluation of pornography and thus enter the thicket of constitutional questions before he may direct mail to be stopped, it will avoid at least one opposing argument. By not referring to pornography, it may be a valuable tool in controlling it.

Let me make it very clear that I believe the flood of filth now flowing into many homes must be stopped. I support effective legislation which would accomplish that purpose. But the fact is that the exchanging selling, or renting of names in order to mail pornography represents but a tiny fraction of the activities of the mailing list industry and an infinitesimal portion of direct mailing generally.

Mr. Speaker, I believe it is important that we find a way to focus on the more general problem; that we do not let the obvious stench rising from obscenity to mask the more subtle odors of mounting citizen irritation over junk mail.

WHAT IS THE MAILING LIST INDUSTRY

Perhaps the best way to describe this industry is to let it speak for itself. The April 1968 issue of its trade journal, The Reporter of Direct Mail Advertising, contains the following offerings:

The National Demographic Information List . . . 100,000 names now ready for testing; total compilation expected to reach 3.5 million verified names . . . in addition to normal information the National Demographic List offers you: verified titles, single or married persons, either sex or occupation codes: Professional & Executive; retail sales and clerical; skilled, unskilled . . . whether wife works or not . . . number of dependent children . . . list is completely computerized, available by any one or any combination of the factors above . . . .

The List . . . One million, seven hundred thousand of the best credit-checked spenders you'll ever find, the American Express Credit Card List.

Mr. Speaker, one could cite many other examples, but these two point up the most obvious features of mailing lists. Using the computer, it is now possible to create an incredibly sophisticated confluence of personal attributes and habits. Virtually any human activity can be the source of a list, and can have your name permanently and inescapably embedded in someone's moneymaking computer.

Even if the individual chooses not to receive direct mailings, his name is now added to a list. If you have declined a piece of direct mail or have indicated displeasure with a specific mailing, your name is added to a "sorehead" list. The people so labeled are prime recipients for solicitations offering animal repellents, burglar alarms, and bomb shelters.

This brief and admittedly incomplete description of what the industry is suggests a very real problem in drafting legislation to deal with it. Pornography aside, there may be first amendment difficulties with any attempt to control it. A vast majority of the information is on what can be termed the public record—drivers licenses, memberships in professional societies, "good payers" in computerized credit bureaus, and so forth. This is why I stated earlier that my bill is offered more in the spirit of stimulating useful debate and providing some possible insights for eventual legislation than it is offered as the totally perfect answer to all the ramifications of the mailing list industry.

OTHER POTENTIAL BENEFITS

Mr. Speaker, it is possible that another benefit of these approaches will be to take one small burden from our already overburdened Post Office Department. The basic provision of my legislative concepts is to give the individual the opportunity to contact directly the source which originally generated or compiled his name. While this is an enforceable provision, merely having the power of the Postmaster General and the Department of Justice looming in the background may make it unnecessary for the Post Office to become involved in any specific dispute.

When Timothy J. May testified on behalf of the Post Office Department before the Subcommittee on Postal Operations, headed by my distinguished colleague, the Honorable ROBERT NIX, of Pennsylvania, he expressed concern about the already existing administrative responsibilities:

We get many requests, oftentimes from Congressmen, demanding that we find out how their names got on a particular mailing list.

Aside from revealing that Congressmen are as powerless as the rest of the populace in this matter, I think it is important to note that my concepts will remove any responsibility from the Post Office to determine how the individual's name appeared on a particular list.

And by allowing the individual to write directly to the source responsible for a mailing, this legislation will let the individual vent and rage he may feel. It is important to provide a person with an occasional safety valve and I would suspect that merely the pleasure in composing and sending an angry letter to those responsible will be a very valuable emotional release for many citizens.

In addition, it is not inconceivable that a valuable side effect of this legislation would be to improve the quality of the offerings of direct mail solicitations. If the commercial organization which rents or sells its list is aware that its identity as the generating source will be clearly specified in each piece of mail, it will probably exercise a greater degree of care in selecting who may use its names and what may be offered. If, for example, a card saying, "The Diners Club felt you would be interested in this offer," were to be included, the name and image of the Diners Club, could be adversely affected if the mailing were repugnant to many of its cardholders. This side effect might not diminish the extent of junk mail, but it could improve the content.

CONCLUSION

Mr. Speaker, I believe these new approaches could have a number of valuable impacts on the mailing list industry, the operations of the Post Office, and on individual privacy. By not focusing on the issue of pornography, it makes it clear that the mailing of obscenity is not the prime purpose of the direct mail industry and would bypass some constitutional tangles. By providing the individual with the opportunity to have the Post Office direct register mailing list brokers to send either nothing at all or just nonprofit, charitable solicitations, it might well cut down on the number of direct mailings and, at the same time, make those which do reach the home more effective. By providing the citizen direct access to the ultimate source of his name, I suspect that the Post Office Department might not be administratively involved in the vast majority of the cases.

Of paramount importance, Mr. Speaker, my new legislative ideas would buttress privacy in the age of the computer. Since the vast majority of these lists are computerized, we can use the ease of entering and altering data in a computer to protect the privacy of our citizens rather than to invade it. Note that we would not be legislating what an invasion of privacy is—a task I am coming to increasingly believe may be almost impossible—we would permit the individual to make that determination for himself.

By allowing the individual to recapture a measure of control over the exchange of his name, address, and personal characteristics, I believe we may help to alleviate the disenchantment with the legislative process and strengthen the true foundations of our Republic—citizen control and citizen responsibility. If a man's home can truly be called his castle, he must have the opportunity to raise the drawbridge on occasion by protecting his mailbox from things he regards as unsuitable for himself and his family.

Mr. Speaker, my bill follows:

H.R. 15309

A bill to require mailing list brokers to register with the Postmaster General, and suppliers and buyers of mailing lists to furnish information to the Postmaster General with respect to their identity and transactions involving the sale or exchange of mailing lists, to provide for the removal of names from mailing lists, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) chapter 53 of title 39, United States Code,

relating to the several classes of mail, is amended by adding at the end thereof the following new section:

"§ 4061. Registration of mailing list brokers; furnishing of information by suppliers, buyers, and users of mailing lists

"(a) Each broker engaged in the sale or exchange of mailing lists for profit shall register with the Postmaster General, within — days of enactment, a registration statement in such form and detail as the Postmaster General shall determine, respecting (1) the name under which he is or intends to do business, (2) the scope and general character of the business transacted or to be transacted, (3) the relationship, if any, of the mailing list operation with other business undertakings, (4) the location of his principal business office, and (5) the names and addresses of the directors and the chief executive officers where the broker is a corporation, association, partnership, or other such entity.

"(b) Each individual and each corporation, partnership, or other business organization or association using, buying, selling, leasing, renting, exchanging, or otherwise making available to others for profit any list of addresses or other similar mailing list shall on request furnish the Postmaster General, in such form and detail and at such time as he shall determine, information respecting (1) the name of the individual, corporation, partnership, or other business association or organization, and (2) the identity of individuals having a financial interest in any such organization or association, including the responsible officers and employees thereof. Records shall be kept for a period of not less than five years and postal officials upon request shall be permitted to examine such records and particulars of transactions or mailings pertaining to any such address or mailing list;

"(c) Any person may file with the Postmaster General an application for a form, to be furnished to him by the Postmaster General, upon which that person may indicate his desires with respect to the following :

"(1) that he does or does not wish his name to be on any mailing list of any broker registered with the Postmaster General;

"(2) that he wishes his name to be only on those mailing lists of that broker which is to be made available to nonprofit charitable organizations.

Such person may transmit that information to the Postmaster General. The Postmaster General shall transmit the above information to each mailing list broker and order that broker to remove the name of that person from the mailing list. If the Postmaster General believes that the broker is not complying with that order, the Postmaster General shall request the Attorney General to make application in district court of the United States for an order directing such compliance in accordance with the provisions of section 4009 of this title;

"(d) All circulars, letters printed in identical terms, advertisements, and similar material constituting solicitations for the orders of goods or services shall not be carried in the mails and shall be disposed of as the Postmaster General directs unless such matter contains or bears the name and address of the sender and information disclosing whether or not the name of the addressee, or the occupant and the address, was obtained from a mailing list and, further, information as to the appropriate party or parties (including mailing list brokers) for the addressee or occupant to notify that the addressee or occupant wishes his name removed from that list. If the addressee or account continues to receive such mail from that sender after notification that he does not wish to continue to receive such mail, he may file with the Postmaster General statement that he has given appropriate notice that he does not wish to receive such mail. The Postmaster General shall transmit a copy of that statement to the sender, including any mailing list broker, and notify the sender to discontinue sending such mail to that person, and notify the mailing list broker to remove the name of that person from the mailing list. If the Postmaster General believes that his notice is not being complied with, he shall request the Attorney General to make application in a district court of the United States for an order directing such compliance in accordance with the provisions of section 4009 of this title;

"(e) As used in this section—

" 'broker' means any person who engages either for all or part of his time, directly or indirectly, as agent, dealer, or principal, in the business of offering, buying, selling, or otherwise dealing or trading in mailing lists owned, rented, or used by another person;

" 'registration statement' means the statement provided for in this section, and includes any amendment thereto and any report, document, or memorandum filed as part of such statement or incorporated therein by reference;

" 'supplier' means to include broker, owner, and compiler;

" 'buyer' shall mean any person who buys mailing lists or buys the use of such lists through leasing or renting agreements;

" 'user' shall mean any person who uses mailing lists supplied by someone else, or the person performing the acts and assuming the duties of handling, compiling, sending by mail or by messenger lists of names to be used for his own benefit, or the benefit of another, for profit;

"(f) The Postmaster General shall make appropriate rules and regulations to carry out the purposes of this section.".

(b) The table of contents of such chapter 53 is amended by inserting—

"4061. Registration of mailing list brokers; furnishing of information by suppliers, buyers, and users of mailing lists."

immediately below

"4060. Foreign publications free from customs duty.".

SEC. 2. (a) Chapter 83 of title 18, United States Code, relating to offenses against the postal service, is amended by adding at the end thereof the following new section:

"§ 1735. Mailing list brokers, suppliers, buyers, and users.

"Whoever, being required by section 4061 of title 39, United States Code, to furnish information to the Postmaster General, fails or refuses to furnish such information as the Postmaster General shall request under such section, shall be fined not more than $5,000, or imprisoned not to exceed one year, or both."

(b) The table of contents of such chapter 83 is amended by inserting

"1735. Mailing list brokers, suppliers, buyers, and users."

immediately below

"1734. Editorials and other matter as 'advertisements'.".

SEC. 3. The foregoing provisions of this Act shall become effective on the —— day following the date of enactment of this Act.

POLITICALLY MOTIVATED REPLACEMENT OF U.S. DISTRICT ATTORNEY MORGENTHAU

(Mr. RYAN asked and was given permission to address the House for 1 minute, to revise, and extend his remarks, and include extraneous matter.)

Mr. RYAN. Mr. Speaker, today President Nixon and Attorney General Mitchell in effect fired Robert M. Morgenthau as U.S. attorney for the southern district of New York by nominating a replacement for him. In doing so, they have sought to remove from office an able public servant, one whose exemplary conduct, and administration have made the U.S. attorney's office for the southern district a leader in achieving just and effective law enforcement.

That the President and his Attorney General have thereby raised political partisanship over merit is ironical.

Republican Members of Congress themselves, in the House Republican task force on crime report issued in July 1968, highly praised Mr. Morgenthau for the administration of his office. Obviously, even the judgment of the administration's own congressional membership, including the Republican Senators from New York who have urged that Mr. Morgenthau not be deposed, is to be ignored.

Despite championing "law and order," the administration, by its action, seeks the removal of a conscientious U.S. attorney who has regarded his office as above politics as evidenced by his prosecution of prominent Democrats.

To deprive the southern district of New York of Robert Morgenthau's services is pure politics, without any redeeming justification. It does New York City a disservice, and it does just and effective law enforcement a disservice.

COMMENDATION OF YOUNG AMERICANS FOR FREEDOM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. LUKENS) is recognized for 60 minutes.

(Mr LUKENS asked and was given permission to revise and extend his remarks and include extraneous matter.)

GENERAL LEAVE

Mr. LUKENS. Mr. Speaker, I ask unanimous consent that all Members may have permission to revise and extend their remarks and include extraneous matter for 5 legislative days on the subject of my special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. LUKENS. Mr. Speaker, I have asked for this special order today that I might commend the activities witnessed this past weekend of the members of Young Americans for Freedom. YAF has, in the past, impressed me with their concern for, and their realistic approach toward, the problems that beset this Nation. I am proud to be joined by many of my colleagues in congratulating the members of this fine organization throughout the United States for their "Vietnam: Alternative Weekend, December 12–13, 1969," during which time they distributed several million copies of the "Tell It to Hanoi" tabloid, the text of which follows:

VIETNAM: A TIME FOR CHOOSING

Political procrastination, indecision, attrition, disillusionment and despair are the

ingredients that have transformed Vietnam into America's death wish. All the facts, figures, and historical precedents have blurred and blended in a plethora of "involvement debates."

Now in 1969 we are faced with a situation that has degenerated to the point, that humanitarians of 1966, then concerned about napalmed children, now wave Viet Cong flags in hopes of a Communist victory. These 1966 humanitarians petitioned for bombing halts in order that North Vietnam might show good faith. Today these 'Americans' demand unilateral withdrawal and the surrender of Southeast Asia to the Communists.

Their conscience qualms regarding napalm victims have been muted in order to accept the inevitable, Communist perpetrated Asia bloodbath of the seventies. In essence, many Americans have brought Chamberlainian peace thirty years after it was proven counterfeit.

The retreat has begun with the battle lost. To these "patriots" the choice is simple; gas or electrocution. America can effect a staged withdrawal a la Nixon or turn tail and run a la McGovern.

Others have perceived a different choice however. In December of 1961 the late John F. Kennedy wrote to the president of South Vietnam, 'The situation in your embattled country is well known to me and the American people. Our indignation has mounted as the deliberate savagery of the Communist program of Assassination, kidnapping and wanton violence becomes clear . . . the campaign of force and terror now being waged against your people and your government is supported and directed from the outside by the authorities at Hanoi'.

Soon President Kennedy chose. He raised the United States' Commitment in South Vietnam from 775 men to 40,000 men. From that tragic day in Dallas until very possibly today political procrastination, indecision and attrition have been our policies.

A Bug-Out Will Beget Treachery

(By Walter J. Conlon)

Fyodor Dostoevsky once observed that, whereas the man who teaches that two plus two equals four will put his students to sleep, his erroneous counterpart who incessantly proclaims that two plus two equals five, or three, or the cube root of the Euler constant, will gain the undying allegiance of starry-eyed millions. The thrust is obvious: fiction is infinitely more exciting than fact.

It is with this in mind that I approach my task. I really do not expect to make many converts to my position. Perhaps it is left to the campus conservative to play the part of Cassandra, condemned by Apollo to prophesy unbelieved by all who heard her words. Perhaps indeed, the left and the benevolent innocents who parrot their slogans are the wave of the present. If this is the case, so be it.

But, what of the future? That is, what will be in store for the left—and for the country—after the inevitable Vietnam bugout they so earnestly desire comes to pass?

So let us look forward to the day when the Left scores success. Nixon capitulates, and begins an immediate pullout of all American forces from Southeast Asia. Then what?

If the *sforzando* chorus of innocents is to be believed, then we will have peace. Poverty and "racism" will be eradicated *hesto presto;* all men will love one another; and, each to our own thing, we will all live happily ever after. Such are the beliefs of the naive, innocent love generation of America 1969. In case you may have forgotten, such also were the beliefs of their intellectual ancestors of England and France 1938.

Euphoria is exhilarating and disillusionment is dastardly, but disillusionment is infinitely less dastardly before it is too late. Realistically, what would be the long-range consequences of a Red takeover in South Vietnam?

As far as the South Vietnamese are concerned, the answer does not require excessive conjecture. Just check your history books and see what happened when the Communists took over the countries they hold now: mass deportations and executions, show trials, overflowing slave-labor camps. "Oh, but the North Vietnamese Communists are not like that!" returns our chorus of innocents. "They are Nationalists!"

Well, so what? Hitler was a nationalist, too. And what evidence do we have to believe that the North Vietnamese Reds will be any more humane than were their honored heroes, Mao Tse Tung and Joseph Stalin? You may or may not recall that the former, according to Guiness' Book of World Records, supervised the execution of twenty million peasants during the collectivization drives of the fifties; the later, by his own admission to Churchill at Yalta, had ten million peasants starved during the winter of 1932–33 alone.

But, alas, this is all irrelevant to our domestic innocents. After all, our national priorities demand that more attention be given "racism" in Chicago and air pollution in Dubuque (or vice versa) than to the lives and liberty of 16 million South Vietnamese. According to this perverse and isolationist world view, we should really be concerned with the deleterious effect of the war on the home front.

Well, what would be the effect of a Vietnam surrender on the home front? Of course, there would be an initial alleluia chorus that the boys were coming home; but when the stark reality of an American defeat sinks into the public consciousness, joy will turn to horror. For the first time in our history, our armies will have been sabotaged and our allies betrayed by the treachery on the home front. Adolf Hitler's rise to power was largely due to the adroit usage of a "stab in the back" explanation of Germany's defeat in World War I. In his case, the thesis was a typical National Socialist lie; if we give up the ghost in Vietnam, it will be indisputable fact.

And the innocents' joy will turn to horror. An outraged public seeking out the culprits guilty of treason will initiate a search for scapegoats that will make the Joseph McCarthy era after the betrayal of China look like mild stuff. When this inevitable reaction comes, the George McGoverns, the Charles Goodells, and the J. William Fulbrights among us may find themselves hard pressed to insure their physical survival.

My dissenting brothers, stop and take a good look at what you are doing. You cannot win more than a pyrrhic victory. In the process of pursuing the short shortsighted goal of peace at any price, you might very well bring down the ancestral American system of freedom and democracy which we all hold most dear.

Reading List for the Serious Dissenter

The following list of reading material is provided for those who wish seriously to reflect on the Vietnam war. The time for super-simplistic solutions has passed. Be careful, however. It is possible that to think about Vietnam will encourage conclusions somewhat different from those that the organizers of the "Moratoriums" have in mind.

Our Vietnam Nightmare, by Marguerite Higgins, Harper and Row.

The Two Vietnams: A Political and Military Analysis, by Bernard Fall, Praeger.

Vietnam Witness, by Bernard Fall, Praeger.

Why Vietnam? by Professor Frank N. Trager, Praeger.

Can We Win In Vietnam?, by Herman Kahn, Praeger.

No Exit from Vietnam, by Sir Robert Thompson, David MacKay, Co.

John Steinbeck on Charley as SOB

Saigon.—Do you remember my telling you that any mistakes might be beauties but they would be my own? Well, I've only been two weeks in Vietnam but of that time I have spent 10 days out of 14 in the field from base camp to forward position, to patrol, to assault operation. I've covered a lot of country and have seen many things ugly and/or beautiful with my own eyes. I haven't been to the Delta yet.

Anyway I'm cocked and set to make some generalities which the home guard commandos can shoot down if they wish. In New York, in other places and in those full-page advertisements in the New York Times as well as in political speeches aimed at U.S. foreign policy. I have heard and read that we are interfering with the internal affairs of a foreign country—that this is essentially a civil war and that the Vietnamese people should be allowed to settle it for themselves, that the V.C. is an organized army of Boy Scouts, selling their lives to free people from the intolerable pressure of a ruling class backed up by the brutal and imperialist soldiery which delights to kill and maim women and children.

My first generality item is that this is pure horse manure, and I base this on what I myself, have seen.

The V.C. has much the same selfless impulse, the same gentle democratic direction and uses the same methods for gaining his ends as the Mafia does in Sicily. The parallel is very close. Terror and torture are his weapons. He bleeds the people he is saving of everything movable, kidnaps whole villages for forced labor, recruits the young men and holds the parent hostage. He murders any opposition noisily or secretly. He impales living bodies on sharpened stakes, slashes stomachs so that a man drags his intestines on the ground before he dies. He tosses grenades in markets where poor people gather to buy food.

* * * * *

If a village refuses to pay his tax (the Mafia or Costa Nostra would call it protection) he burns the houses. And lately he has a refinement. A man suspected of communicating, only suspected, is taken to a village center. His neighbors are forced to look on while he is taken apart little by little, starting with fingers and toes but carefully so that bleeding will not give him quick release, and when they have finished, he is a ghastly mound of butcher's meat. You don't believe it? I could show you photographs but no American paper would dare print them for fear of disturbing the comfortable self satisfaction of its readers.

I wish I could take the people who have written me hate-letters calling me murderer, through some the sweet and tender activities of the National Liberation Front which is what Charley calls himself. But I suspect their stomachs couldn't stand it.

I would like them to see the refugee camps we help to build and help to maintain. These people did not run from us. They ran to us. Doesn't it make any impression that there are no reverse refugees. Nobody runs north to escape the brutality of the South Vietnamese and the brutal Americans. Why is that?

* * * * *

Of course this is a most complicated situation. The new party line word is so many of my hate-letters is simplistic. Well if this is

simplistic, comrades, make the most of it, *Charley is a pure SOB. His purpose is domination of the land and the minds of poor people and he will stop at no horror, no lie, no trick to achieve it.*

This is a simplistic generalization. I can go into its complicative opposite if you wish, but meanwhile if you hear someone celebrating the misunderstood and mistreated V.C., just punch him in the nose for me, will you?

But this is not a pretty war and Charley sets the pace. Our kids are learning to fight back. *But how I would like to run a protest parade down a V.C. trail. Charley puts paddy peasants over a suspected path before he goes in. Maybe the Peace Marchers might like to serve in this capacity. Sorry to be so vehement but I've seen a boy with punji wounds.*

Yours,

JOHN.

THE MASSACRE OF HUE

"At first the men did not dare step into the stream," one of the searchers recalled. "But the sun was going down and we finally entered the water, praying to the dead to pardon us." The men who were probing the shallow creek in a gorge south of Hue prayed for pardon because the dead had lain unburied for 19 months: according to Vietnamese belief, their souls are condemned to wander the earth as a result. In the creek, the search team found what it had been looking for—some 250 skulls and piles of bones. "The eyeholes were deep and black, and the water flowed over the ribs," said an American who was at the scene.

The gruesome discovery late last month brought to some 2,300 the number of bodies of South Vietnamese men, women and children unearthed around Hue. All were executed by the Communists at the time of the savage 25-day battle for the city, during the *tet* offensive of 1968. The dead in the creek in Nam Hoa district belonged to a group of 398 men from the Hue suburb of Phu Cam. On the fifth day of the battle, Communist soldiers appeared at Phu Cam cathedral, where the men had sought refuge with their families, and marched them off. The soldiers said that the men would be indoctrinated and then allowed to return, but their families never heard of them again. At the foot of the Nam Hoa mountains, ten miles from the cathedral, the captives were shot or bludgeoned to death.

Shallow Graves. When the battle for Hue ended Feb. 24, 1968 some 3,500 civilians were missing. A number had obviously died in the fighting and lay buried under the rubble. But as residents and government troops began to clean up, they came across a series of shallow mass graves just east of the Citadel, the walled city that shelters Hue's old imperial palace. About 150 corpses were exhumed from the first mass grave, many tied together with wire and bamboo strips. Some had been shot, others had apparently been buried alive. Most had been either government officials or employees of the Americans, picked up during a door-to-door hunt by Viet Cong cadres who carried detailed blacklists. Similar graves were found inside the city and to the southwest, near the tombs where Viet Nam's emperors lie buried. Among those dug out were the bodies of three German doctors who had worked at the University of Hue.

Search Operation. Throughout that first post *Tet* year, there were persistent rumors that something terrible had happened on the sand flats southeast of the city. Last March, a farmer stumbled on a piece of wire; when he tugged at it, a skeletal hand rose from the dirt. The government immediately launched a search operation. "There was certain stretches of land where the grass grew abnormally long and green," Time Correspondent William Marmon reported last week from Hue. "Beneath this ominously healthy flora were mass graves, 20 to 40 bodies to a grave. As the magnitude of the finds became apparent, business came to a halt and scores flocked out to Phu Thu to look for long-missing relatives, sifting through the remains of clothes, shoes and personal effects. "They seemed to be hoping they would find someone and at the same time hoping they wouldn't, said an American official." Eventually, about 24 sites were unearthed and the remains of 809 bodies were found.

The discovery at the creek in Nam Hoa district did not come until last month after a tip from three Communist soldiers who had defected to the government. The creek and its grisly secret were hidden under such heavy jugle canopy that landing zones had to be blasted out before helicopters could fly in with the search team. For three weeks, the remains were arranged on long shelves at a nearby school, and hundreds of Hue citizens came to identify their missing relatives. "They had no reason to kill these people," said Mrs. Le Thi Bich Phe, who lost her husband.

Negligible Propaganda. What triggered the Communist slaughter? Many Hue citizens believe that the execution orders came directly from Ho Chi Minh. More likely, however, the Communists simply lost their nerve. They had been led to expect that many South Vietnamese would rally to their cause during the *Tet* onslaught. That did not happen, and when the battle for Hue began turning in the allies' favor, the Communists apparently panicked and killed off their prisoners.

The Saigon government, which claims that the Communists have killed 25,000 civilians since 1957 and abducted another 46,000, has made negligible propaganda use of the massacre. In Hue it has not had to. Says Colonel Le Van Than, the local province chief: "After *Tet*, the people realized that the Viet Cong would kill them, regardless of political belief." That fearful thought haunts many South Vietnamese, particularly those who work for their government or for the Americans. With the U.S. withdrawal under way, the massacre of Hue might prove a chilling example of what could lie ahead.

BUG OUT?

"The first consequence, as anyone can foresee, will be the cold-blooded massacre of a couple of million South Vietnamese who have put their faith and trust in the United States. If anyone doubts this, he had better study the hideous massacre of about 3,500 old men, women and children that was perpetrated by the Communists when they occupied the city of Hue for a couple of weeks."

—JOSEPH ALSOP.

REDS DOMINATE "PEACE" MOVEMENT

(By Rowland Evans and Robert Novak)

The tens of thousands of well-meaning war protesters set to converge on Washington Saturday will be joining a demonstration planned since summer by advocates of violent revolution in the U.S. who openly support Communist forces in Viet Nam.

Accordingly, whatever happens here Saturday, the Nov. 15 march on Washington will mark a postwar high water mark for the American far left. Responsible liberals have been enlisted as foot soldiers in an operation mapped out mainly by extremists—testimony to the present ineffectiveness of nonviolent, liberal elements in the peace movement.

Moreover, heavy-handed Nixon administration reaction by Deputy Attorney General Richard G. Kleindienst assures that any violence on Saturday will be blamed by liberals on the government, and the avoidance of violence will be credited by these same liberals to the self-restraint of the far left.

Although liberals belatedly spent this week in frantic eleventh-hour efforts to co-opt Saturday's march, they had plenty of advance warning, The New Mobilization Committee to End the War in Vietnam (New Mobe), sponsors of the march, was formed last July in Cleveland with an executive committee dominated by supporters of the Vietcong.

The executive committee is moderate when compared with the 60-member steering committee, studded with past and present Communist Party members (including veteran party functionary Arnold Johnson). Far more important than representation by the largely moribund American Communist Party, however, is inclusion on the steering committee of leaders in its newly invigorated Trotskyite movement.

The steering committee began eclipsing the executive committee in recent weeks under the leadership of the Trotskyite Socialist Workers Party and its fast growing youth arm, the Young Socialist Alliance. Fred Halstead of the Socialist Workers Party took over planning for a march calculated to end in violent confrontation.

Participating in planning sessions were elements even more violence-prone than the Trotskyites: extreme SDS factions calling themselves the revolutionary brigade. Wild scenarios for storming the White House, the Justice Department, and the South Vietnamese Embassy were prepared.

Furthermore, the New Mobe was in closer contact with Communist Vietnamese official circles than is generally realized. Ron Young, a member of the New Mobe steering committee, journeyed to Stockholm Oct. 11–12 for a meeting attended by representatives of the North Vietnam government and the Vietcong. Reporting on plans for Nov. 15, Young urged a worldwide propaganda campaign to boost the demonstration.

The link between Hanoi and elements of the New Mobe was again demonstrated Oct. 14 when Premier Pham Van Dong of North Vietnam sent greetings to American antiwar demonstrators. Halstead, the Trotskyite leader, drafted a friendly reply to Hanoi approved by a majority of the New Mobe's steering committee. Its transmission was blocked only by the intervention of Stewart Meachem of the American Friends Service Committee, one of the New Mobe's moderates.

Thus far-left orientation of the New Mobe for weeks has worried liberal doves, including the youthful leaders of the peaceful Oct. 15 Moratorium. Sen. Charles Goodell of New York, emerging as a leading congressional foe of the war, attempted—without success—to reduce extremist influence inside the New Mobe and argued against including far leftists on the steering committee.

But the liberals, having forgotten the fate of popular front movements a generation ago and unwilling to repudiate any antiwar forces, would not actually break with the New Mobe. Any chance of that was eliminated by President Nixon's relatively hardline speech Nov. 3 and government strategy laid down at the Justice Department by Kleindienst.

Goodell and Sen. George McGovern of South Dakota, after much deliberation, accepted invitations to address the demonstration in hopes of moderating it. Similarly, moratorium leaders this week have tried to insinuate themselves into control of the march. But the march remains essentially a project of the far left, constituting a tragic failure of leadership by liberal foes of the war.

TOP-RANKING DEFECTORS ANTICIPATE RED TERROR

SAIGON.—The highest-ranking Communist defectors in South Vietnam have said that a coalition government with the National Liberation Front would be the sure downfall of the present Saigon government.

These defectors, who fled the Viet Cong and North Vietnamese army ranks last year, believe that a reign of terror would follow a Communist takeover, but not before the world had been lulled into thinking that the coalition government was working smoothly.

"Do not forget the first coalition in 1945 and 1946 (in North Vietnam)," one defector said recently. "In the north, I was told that more than 10,000 died at the hands of the party."

"You will see the deaths in the south will be a thousand times greater. But by that time your Western press will have believed peace is here and they will have gone home and will not be around to see it happen.

"The other Westerners will also have to leave and get away from the dangers. Only the Vietnamese will be left, for there is nowhere for them to go this time. There are 3 million people on the blood debt list and you will have condemned them."

The views of our defectors, who held the rank of colonel or lieutenant colonel, were expressed in a series of interviews. In addition to their military duties, they served as high-ranking political cadres.

As such, they received privileged information on the political intentions of the NLF and Hanoi. The four officers have been members of the Communist Party for an average of a little more than 20 years.

Although the interviews were conducted separately, the thinking expressed was remarkably similar.

Col. Tran Van Dac, a political officer who commanded 8,000 Viet Cong troops in last year's Tet offensive, said, "If South Vietnam should have a coalition government, there would be no future for it as a country."

He said the NLF would only seek a few positions at the higher levels, adding:

"The basic principle for them remains getting and keeping control of all lower institutions—in the hamlets, villages, districts and provinces.

"They will appear to have only a few people to fill key positions at central levels. Outwardly it will seem fair and they will seem to cooperate, but they will rely on the prevailing position they have with their control over the provinces, districts and villages . . . to overthrow the coalition government.

"At the beginning, they will appear to accept almost everyone. Then all they have to do afterward is to quietly purge the ranks, all ranks. They have ways to eliminate."

The colonel said that when senior members of the party talked:

"We did not even use the term coalition. We use the term with the enemy only for the purposes of deceiving him.

"From the Communist point of view, the idea of coalition means simply that it is an opportunity to mix in for the sole purpose of taking over."

Lt. Col. Le Xuan Chuyen, former commander of a Viet Cong division, said that the plan for taking over South Vietnam was made 10 years ago."

"The north has three targets, one after the other," he said. "First, the north wanted a complete bombing halt. Second they want a cease-fire between South Vietnamese and NLF troops. And if this happens, you cannot avoid the third one, and that will be a coalition government, because one will lead to another."

Chuyen and the others believe the United States made a mistake when it entered into peace negotiations in Paris and halted the bombing of North Vietnam.

"The allied political weapons are inferior to those of the Communists," Chuyen said. "But the allied weapons are superior. Why should you exchange your superior weapons for inferior ones?

"When I first heard of the complete bombing halt, I thought it must be a joke and I laughed, but when I realized that the United States was serious, I was dumbfounded by the stupidity."

Lt. Col. Phan Viet Dung, who commanded a North Vietnamese regiment, said, "And of course the Americans will be unable to begin the bombing again for fear of world opinion."

Lt. Col. Huynh Cu, the commander of a North Vietnamese training base, said the bombing halt "was a great victory over the aggressors. This was just what the north needed to boost sagging morale.

"Many people were having doubts about the claims made to them by the regime. In some areas, relations between the population and the regime were reaching dangerous proportions.

"They can use the bombing halt to gain back support from those who were beginning to doubt the wisdom of party leadership. For you see, the bombing halt will prove the party was right."

On the tacit agreement with Hanoi for the bombing halt—no massive infiltration across the demilitarized zone and no shelling of major cities—Dung said:

"This is like any other kind of trading. If you give something, you must get something. But what are you going to get in exchange? They will give you nothing but words. To believe them would be a mistake."

The colonel quoted a noted Japanese Communist as stating:

"The Westerners believe war and peace are two different things. The Westerner thinks it is right to deceive people in wartime but not in peacetime.

"The Communist believes that it is also right to deceive people in peacetime when making agreements with the enemy as well as in wartime because the Communist believes war and peace are the same thing."

He added, "Mao said that the closer to peace, the greater the danger. Now is the time to be most alert. At this time it is most difficult for you to see what is going on. The idea of peace may blind you."

Nixon Gives Public a Taste of Steak

(By Kenneth Elvin Grubbs, Jr.)

(The following appeared in the Philadelphia Bulletin November 7 along with three other disparate views of representatives of American youth groups. The features were written immediately after President Nixon's November 3 speech. Some critical references to the news media, noted the author, were edited out of this article.)

For the first time in all my years of President-watching—years for the most part that have been adolescent ones—I experienced the frightening feeling that the Chief Executive was not putting us on, or was not trying to assuage us with a rosy, eventual detente-with-the-Reds sort of world view that used to be the pablum LBJ fed us while our brothers were dying for Southeast Asia and for America.

No, fellow Americans, we were being fed steak.

If I can stop the culinary analogy before it gets out of hand, we were given the straightest presidential speech, I suspect, that we've had probably for a decade.

And for God's sake, an American President told us we were in Vietnam to ward off an otherwise inexorable march of Communists to take over South Vietnam—an historical abomination which would, in the minds of most conservatives, lead to a sealing off of the hemisphere by totalitarians.

In somewhat veiled terms President Nixon faulted Lyndon Johnson for dragging the war this long and for the naive negotiation syndrome. About time. About time also that, for the benefit of his saner critics, he quoted President Kennedy in behalf of our original commitment.

And isn't it nice—nice in terms of fighting the good fight with his emotional critics who find "atrocities" as the only argument against "the war"—that he cited to millions of Americans at prime the atrocities, I mean sickening, sadistic atrocities, committed by the enemy at Hue.

That was little publicized, wasn't it? Three thousand South Vietnamese buried alive, decapitated or tortured in even more unspeakable terms, because they were defined by Uncle Ho and company as "counterrevolutionary."

Now Mr. Nixon's speech felt good; but we obviously need to tone up with more of those hard-core pronouncements.

Just as the President signed off, after having detailed as best he could his plan for "Vietnamization," CBS news decided to air its very own footage of an atrocity committed by a South Vietnamese soldier against a captured enemy.

The captive, held on the ground, was stabbed in the stomach; some blood gushed from the wound, enough to make a viewer queasy, and the victim reportedly was shredded by a South Vietnamese knife.

We were spared witnessing that, the kind reporter said, himself stabbing the Nixon plan in its soft underbelly.

One wonders where the hell CBS was during the siege of Hue; why are there no reporters accompanying the NLF or VC?

Endurance, friends, endurance.

Vietnamization: What Does It Mean?

(A review by Ronald B. Dear)

The policies of the Johnson administration in Vietnam since 1965 were ill-conceived and have been the cause of much of the legitimate frustration over the conduct of the war.

This is a conclusion expressed in a new book by Sir Robert Thompson. Thompson, who is generally considered the world's foremost authority on counter-insurgency warfare, was the principal architect of the British victory over the Malayan Communist guerrillas in the late 1950's, and headed the British Advisory Mission to South Vietnam from 1961 to 1965. ("No Exit from Vietnam", David McKay Company, Inc., New York, $4.50).

The American military strategy since 1965 totally failed to grasp the nature of a "Peoples' Revolutionary War." Instead of concentrating on building a stable South Vietnamese government capable of controlling and eliminating the guerrilla insurgency throughout the countryside, the Johnson policy was one of "destruction of the enemy's main forces on the battlefield."

"The net effect of the 'search and destroy' strategy combined with a fixation on the infiltration routes was to disperse American forces in a positional instead of a mobile role all over the mainly unpopulated areas of the Vietnamese map." While American troops were winning on the casualty charts, the organization and structure of the enemy within South Vietnam was never threatened.

". . . the military strategy,, because it was not related to a winning aim, was largely irrelevant to the political results. At the very best, because it held some ground and helped maintain the existence of South Vietnam, the strategy might have achieved a stalemate. But in a People's Revolutionary War, if you are not winning you are losing, because the enemy can always sit out a stalemate without making any concessions. It was therefore, a no win strategy." Thompson suggests a counter-strategy unrelated to conventional warfare—the strategy that worked in Malaya. It will involve the systematic replacement of American troops with South Vietnamese—with the emphasis on quality rather than quantity.

The American aim should be revised to read: "To establish, at a cost acceptable to the United States, South Vietnam as a free, united and independent country which is politically stable and economically expand-

ing." This does not require a defeat of the North but only that its design to take over the South should be frustrated. To achieve the aim does, however, leave a long-haul, low-cost strategy as the only option. If this is the meaning of President Nixon's Vietnam policy, it should be worth a try. But in the meantime, Americans should be wary of any attempt to substitute "peace" for freedom anywhere in the world. The serious dissenter would do well to read "No Exit From Vietnam."

Mr. Speaker, on this same weekend, the members of Young Americans for Freedom and of the National Student Committee for Victory in Vietnam conducted teach-ins urging students to support President Nixon's efforts to attain a lasting and just peace, pointing out the reasons for our involvement in Vietnam, and showing the consequences of an irresponsible, immediate withdrawal. They circulated petitions on over 600 college campuses. These petitions will be presented to the North Vietnamese delegation to the Paris peace talks, to show that there is a large body of students who do not call for an immediate sellout to communism in Vietnam. I submit this petition for insertion in the proceedings at this point:

TELL IT TO HANOI

We, the people of the United States of America, call upon the government of North Vietnam to:

1. Renounce military victory in the South;
2. Agree to negotiate cease-fire under international supervision;
3. Agree to free elections in South Vietnam under international supervision;
4. Declare that they will abide by the political decision that results from free elections and renounce, as we have, all military bases in the South;
5. Support the right of the South Vietnamese to determine their own future without outside interference.

Our government agrees with and supports these points. We ask you to join us in our desire for the peaceful conclusion of the Vietnam war.

[Lines for signatures.]

The completed petitions will be sent to the North Vietnam delegation in Paris. Return to: "Tell It To Hanoi" c/o Y.A.F., 1221 Massachusetts Ave., NW., Washington, D.C. 20005.

I urge all of my colleagues in the House of Representatives and all Americans to join with Young Americans for Freedom in their responsible approach to conclude the war and attain lasting peace and freedom for the people of Vietnam.

Mr. FOREMAN. Mr. Speaker, I commend the distinguished gentleman from Ohio (Mr. LUKENS), for his forthright leadership in the recognition of the Young Americans for Freedom on their "Tell It to Hanoi" program.

I appreciate and commend the clean-cut, dedicated, outstanding young people, members of the Young Americans for Freedom, on their work and efforts toward the restoration and preservation of a strong, free America and a meaningful, lasting peace in Southeast Asia. Young Americans for Freedom typify the responsible voice of youth today.

Mr. STEIGER of Arizona. Mr. Speaker, Young Americans for Freedom has made a significant contribution to the Nation through its activities in acquainting many Americans—most especially youths—of the moral, political and military imperatives in supporting President Nixon's program of continuing to aid South Vietnam against North Vietnamese and Communist aggression.

No organization of younger adults has more stanchly resisted acceptance of the intellectual fallacies and simplistic temptations voiced by the purported humanitarians who would have the United States renege on its word, deny an ally and retreat to a posture of isolationism. Peace would not be served, YAF members realize, by acquiescence to such reasoning. Members of this organization are realist and rational enough to be able to learn from the lessons of history and to ignore the siren call of taking the easy way out.

In a concerted effort this past weekend, Young Americans for Freedom distributed several million copies of a carefully documented and intellectually honest paper "telling it as it is" on why it is vital to United States and Western interests to continuing providing assistance to South Vietnam. The cause of peace is well served by such efforts. In a follow-up action, petitions signed by Americans are to be sent to the North Vietnamese delegation in Paris requesting their Government to: First, renounce military victory in the South; second, agree to negotiate cease-fire under international supervision; third, agree to free elections in South Vietnam under international supervision; fourth, declare that they will abide by the political decision that results from free elections and renounce, as we have, all military bases in the south; fifth, support the right of the South Vietnamese to determine their own future without outside interference. Polls, mail, interviews all indicate that the "silent majority" of Americans support the President's initiatives to create a climate in which a just, honorable peace can be obtained for South Vietnam. I believe that the North Vietnamese delegation can expect an avalanche of petitions bearing American names.

North Vietnam will disregard the sentiments of this majority at its own peril. I would like to commend Young Americans for Freedom on their constructive service to the Nation and the cause of a just peace. It is time for more citizens to display the same.

Mr. ADAIR. Mr. Speaker, I rise to commend the efforts of Young Americans for Freedom in supporting the President in his quest for a just and honorable peace in Vietnam. The theme of their campaign is "Tell It to Hanoi." My understanding is that their endeavors on some 600 campuses in recent days have been very successful. This is no small thing. A student these days supporting an honorable end to the war in Vietnam runs certain risks. The radical elements on our campuses have demonstrated that they are not averse to using violence on those with whom they disagree. Further, students espousing the position taken by Young Americans for Freedom on this matter are inevitably subjected to ridicule and scorn by some members of the faculty who know all the answers to the Vietnam problems—safe and snug behind their lecture podiums. Therefore, I salute these young people who are working in a constructive manner to support our President and who dare to challenge the arrogance of our campus radicals.

Mr. BUCHANAN. Mr. Speaker, I am pleased to join with my distinguished colleague from Ohio (Mr. LUKENS) in commending the members of Young Americans for Freedom for their recent efforts to put the "silent majority" on record in support of President Nixon's policy to bring about a just and lasting peace in Vietnam. Most importantly, the Young Americans for Freedom are taking the initiative to see that the North Vietnamese delegation in Paris is aware of the extent of support in this country for the President's peace efforts as well as the strong resolve on the part of our Nation's citizens that the people in South Vietnam should be guaranteed the right to determine their own future through free elections.

During recent weeks the members of Young Americans for Freedom have distributed petitions on over 600 college campuses, affording the many students who support our Nation's efforts to guarantee the freedom and self-determination of the South Vietnamese people an opportunity to stand up and be counted. The petitions, which will be sent to the North Vietnam delegation in Paris, call upon the Government of North Vietnam to: First, renounce military victory in the South; second, agree to negotiate cease-fire under international supervision; third, agree to free elections in South Vietnam under international supervision; fourth, declare that they will abide by the political decision that results from free elections and renounce, as we have, all military bases in the South; and fifth, support the right of the South Vietnamese to determine their own future without outside interference.

Mr. Speaker, we have heard from those who do not support our President's efforts for a lasting peace in Vietnam. They made their views known loud and clear during the recent moratorium activities, as they had every right to do under our Nation's Constitution. Those who feel otherwise, however, have an equal right to be heard on this important issue and I sincerely appreciate the efforts being undertaken by Young Americans for Freedom toward insuring that these people are given an effective means to express their convictions.

On Monday night of this week, the President reiterated his disappointment over the lack of progress at the Paris negotiating table. There is little doubt in my mind that this situation will not improve so long as Hanoi has reason to believe that the people of the United States do not support their President's efforts toward peace in Vietnam and that they are willing to "sue for peace at any price." The North Vietnamese will take no steps toward peace so long as they believe that the United States will be forced in time by its own citizens to abandon the principles of peace and self-determination for which we have fought so long in this unfortunate war. It is my profound hope that this misguided belief will be dispelled through such actions as those now being taken by the Young Americans for Freedom.

I commend the thousands of young people who have participated in this worthwhile endeavor initiated by the Young Americans for Freedom and am certain that millions of Americans share my appreciation for their actions.

LEGISLATION TO ENCOURAGE STATE AND LOCAL TAX REFORM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. FARBSTEIN) is recognized for 15 minutes.

Mr. FARBSTEIN. Mr. Speaker, I have today introduced H.R. 15301, H.R. 15302, and H.R. 15303, bills to provide financial incentives to States and localities to reform their tax structures.

Under these bills, the Federal Government would reimburse State and local governments for half of their revenue lost under tax reform. The measures are aimed at inducing governments to make sales, property, and income tax more progressive. The revenue received from the Federal Government could be used for programs to benefit low-income persons.

It is no secret that the sales and property taxes are regressive measures which hurt the low- and middle-income families at the expense of the wealthy. As inequitable as the Federal income tax system is, it pales by comparison with the tax structures of many State and local governments. This is particularly important as the State and local tax bite is increasing at a much faster rate than is that from the Federal Government.

TABLE 1.—FEDERAL AND LOCAL TAX COLLECTIONS

[Dollars in billions]

	1960	1968	Percent change
Actual:			
Federal	$99.8	$165.2	66
Local	$53.3	$100.4	88
Per capita (in dollars):			
Federal	484	667	38
Local	242	421	74

There is a great deal of talk of tax reform at the Federal level, and this is all to the good. But the biggest tax bite of all comes at the State and local level and reform is needed there most of all. Federal tax relief for low- and middle-income families means little if the State and the cities continue to prey on these very people.

The property tax is the most regressive tax of all. According to figures compiled by the Tax Foundation for 1965, the average family with an income under $2,000 paid three times the percentage of their incomes in taxes as the family earning over $15,000.

TABLE 2.—FEDERAL, STATE AND LOCAL TAXES AS A PERCENTAGE OF TOTAL INCOME FOR ALL FAMILIES BY INCOME CLASS—1965

	Under $2,000	$2,000 to $2,999	$3,000 to $3,999	$4,000 to $4,999	$5,000 to $5,999	$6,000 to $7,499	$7,500 to $9,999	$10,000 to $14,999	$15,000 and over	
Federal Individual income tax	1.9	3.1	4.5	6.4	6.9	7.7	8.8	10.0	16.1	8.3
State and local:										
Property	6.9	5.2	4.7	4.2	4.2	3.8	3.5	3.3	2.4	3.8
Sales, excise, etc	6.1	5.5	5.6	5.2	5.1	4.8	4.4	4.0	2.6	4.6
Individual income tax	.2	.2	.3	.5	.6	.6	.8	.8	1.3	.7

Source: Tax Foundation, Inc., Tax Burdens and Benefits of Government Expenditures by Income Class, 1961 and 1965, table 7.

The most visible example of the severe hardship imposed on low income households is the burden imposed on elderly householders. With retirement, the flow of income drops sharply and a yearly property tax bill of, say, $500 that once could be taken in stride becomes a disproportionate claim on the income of an elderly couple living on a pension of $1,500 a year. By the same token, if the flow of income falls sharply as a result of the death or physical disability of the breadwinner, or unemployment, then again payment of the residential property tax can become an extraordinary tax burden.

A study by the Wisconsin Tax Department in 1965, for example, found that over 5,000 elderly households were forced to turn over more than 20 percent of their total money income to the residential property tax collector. This Wisconsin study also revealed that there were 841 households headed by elderly persons who were paying out on the average 55 percent of all of their total money income to the local property tax collector. These householders were obliged to draw on their savings to pay this tax on shelter. Compared to the average family's property tax burden—3 to 4 percent of household income, this situation not only violated the ability-to-pay principle, it produced a catastrophic family expense situation.

From the standpoint of ability to pay, the general sales tax is an upside down revenue measure. The burden declines as income rises. This is because a person's nutritional needs do not correlate with his income. For 1965, the average family with an income under $2,000 paid 2½ times the percentage of its income in sales tax than did the family earning over $15,000. See Table 2. It is clear from this that a tax on food is a tax on the poor people who spend a greater proportion of their income on food. The flat-rate State income tax can impose a major hardship on the poor. They may be paying the same percentage of their income to the State as the more well-to-do, but the amount represents a more significant bite out of their income. What makes it doubly significant is that it is the fastest growing of any of the local taxes.

The three bills I have introduced would provide financial incentives to the States to reform these tax structures. One would stimulate property tax rebates for low-income property owners and apartment dwellers. The second would stimulate State and localities to exempt food from the sales tax or provide a rebate to the poor for the payment of sales taxes on food. The third would encourage States to adopt standard deductions at least as liberal as those found in the Federal income tax.

In all three cases, the Federal Government would reimburse the State and localities for one-half the revenue lost on a formula basis. States which already have taken action to establish any of the reforms set forth in these bills would be eligible to receive the Federal compensation as well. If all three bills were adopted, payments to States and localities would run approximately $2 billion the first year of the program. I have introduced them separately to emphasize that each reform could be undertaken separately, taking into account the Federal resources available to finance them.

In order to bring the payment of the property tax more in line with the ability to pay principle, State governments should reimburse those property owners and renters forced to make an extraordinary tax contribution in relation to their limited income.

The point must be emphasized that an affluent society should be able to finance its public services without forcing low-income households through the property tax wringer. A model for State action can be found in Wisconsin's and Minnesota's plan calling on the State to reimburse those elderly homeowners and renters for that part of their property tax bill excessive in relation to household income. The results of this program in Wisconsin are suggested in table 3.

TABLE 3.—WISCONSIN'S "CIRCUIT BREAKER" SYSTEM FOR PROTECTING LOW INCOME HOUSEHOLDERS FROM PROPERTY TAX OVERLOAD SITUATIONS 1966

Household income class	Number of beneficiaries	Average household income	Average taxes before relief	Average taxes after relief	Percent of tax burden relieved	Tax burden before relief [1] (percent)	Tax burden after relief [1] (percent)
$0	146	$0	$210	$54	75	----------	----------
$1 to $499	1,373	302	174	47	73	58	16
$500 to $999	7,788	790	175	50	71	22	6
$1,000 to $1,499	13,947	1,259	199	98	51	16	8
$1,500 to $1,999	14,423	1,749	221	130	41	13	8
$2,000 to $2,499	11,274	2,232	239	166	31	11	8
$2,500 to $2,999	7,021	2,728	266	216	19	10	8
$3,000 to $3,500	3,317	3,200	284	269	5	9	8

[1] Tax burden is expressed as the percent of household income allocated to pay taxes before and after the relief program. Property taxes include rent paid in lieu of taxes.

Source: Wisconsin Department of Revenue—Kenneth E. Quindry and Billy D. Cook, "The Effects on Income Redistribution and Residential Property Tax Regressivity of the Wisconsin Homestead Relief Program—Its Antipoverty Role and Possible Extensions" (manuscript to be published).

H.R. 15301 would reimburse a State one-half of the cost incurred in extending aid to those homeowners and renters found to be carrying an extraordinary tax load in relation to their household income. If Wisconsin-type guidelines were broadened to cover all homeowners and renters, not just the elderly, Federal reimbursement costs would probably approximate $200 million assuming that all 50 States join this program.

In order to remove the regressive stinger from the sales tax, a State can exempt purchases of food for home consumption or tax them, or drugs, at a lower rate. This, unfortunately, is a costly approach. Such exemptions can cut sales tax collections by as much as 25 percent or more where tax enforcement is not effective. Another approach is to provide personal credits against the income tax for food and drugs sales tax payment with refunds for those persons whose income is either too low to take full advantage of the tax credit or below the income tax filing requirement. Indiana, for example, has a system where each person is granted an $8 sales tax credit. This figure is based on an "assumed" food and drug purchase of $400 for each person multiplied by Indiana's 2 percent for the year from which I am taking my data sales tax rate. Thus, a family of four is automatically entitled to a $32 reduction on its Indiana individual income tax or a cash refund of $32 if it has no State income tax liability.

A second approach which is even more sophisticated is the diminishing sales tax credit. Hawaii pioneered this approach in 1965 with its credits for consumer-type taxes ranging from $18 per qualified exemption for taxpayers having a income of less than $1,100 to $.45 per exemption for those with incomes of $6,-300 or more. This vanishing type of credit scores high from the standpoint of maximizing tax yield. See table 4 for an analysis of these various reforms and table 5 for a list of States with sales tax reforms.

TABLE 4.—ESTIMATED EFFECTIVE SALES TAX RATES FOR A 2-PERCENT SALES TAX UNDER ALTERNATIVE EXEMPTION PLANS, BY SELECTED INCOME CLASSES

Income class	Average family size	Average annual income after taxes	Alternative 1, no exemption		Alternative 2, exempting food [1]		Alternative 3, $6 credit per person		Alternative 4, diminishing credit [2]	
			Sales tax	Effective rate	Sales tax	Effective rate	Sales tax (after credit)	Effective rate	Sales tax (after credit)	Effective rate
Under $1,000	1.2	$704	$14.90	2.12	$9.76	1.39	$7.70	1.09	$2.90	0.41
$1,000 to $1,999	1.6	1,532	23.02	1.50	13.90	.91	13.42	.88	7.02	.46
$2,000 to $2,999	2.4	2,510	35.38	1.41	23.20	.92	20.98	.84	16.16	.64
$3,000 to $3,999	2.5	3,480	45.88	1.32	31.04	.89	30.88	.89	25.88	.74
$4,000 to $4,999	3.0	4,487	60.56	1.35	42.58	.95	42.56	.95	42.56	.95
$5,000 to $5,999	3.4	5,476	71.52	1.30	50.40	.92	51.12	.93	51.12	.93
$6,000 to $7,499	3.7	6,700	85.74	1.28	61.78	.92	63.54	.95	63.54	.95
$7,500 to $9,999	4.0	8,557	106.04	1.24	79.06	.92	82.04	.96	90.04	1.05
$10,000 to $14,999	4.3	11,510	134.68	1.17	104.56	.91	108.88	.95	126.08	1.09
$15,000 and over	3.7	21,567	199.02	0.92	158.42	.73	176.82	.82	199.02	.92

[1] Food prepared in the home.
[2] Diminishing credit per person equal to $10 if average annual income after taxes is less than $2,000; $8 if between $2,000 and $3,999; $6 between $4,000 and $7,499; $4 between $7,500 and $9,999; $2 between $10,000 and $14,999; no credit if income is $15,000 or over.

TABLE 5.—STATE USE OF PERSONAL INCOME TAX CREDITS AND CASH REBATES TO MINIMIZE OR OFFSET THE REGRESSIVITY OF SALES AND PROPERTY TAXES [1]

State	Type of credit	Year adopted	Amount of credit	Law	Administrative procedure
Colorado	For sales tax paid on food.	1965	$7 per personal exemption (exclusive of age and blindness).	Ch. 138, art. 1, (secs. 138-1-18 and 138-1-19 added by H. B. 1119, laws 1965, effective June 1, 1965)	Credit to be claimed on income tax returns. For resident individuals without taxable income a refund will be granted on such forms or returns for refund as prescribed by the director of revenue.
Hawaii	For consumer-type taxes.	1965	Varies, based on income [2]	Ch. 121 (secs, 121-12-1 and 121-12-2 added by Act 155, laws 1965)	The director of taxation shall prepare and prescribe the appropriate form or forms to be used by taxpayers in filing claims for tax credits. The form shall be made an integral part of the individual net income tax return. In the event the sales tax credits exceed the amount of the income tax payments due, the excess of credits over payments due shall be refunded to the taxpayer.
Indiana	For sales tax paid on food.	1963	$8 per personal exemption (exclusive of age and blindness).	Ch. 50 (ch. 30, sec. 6d added by H. B. 1226, laws 1963, 1st special sess., effective April 20, 1963).	Credit to be claimed on income tax returns. If an individual is not otherwise required to file a return, he may obtain a refund by filing a return, completing such return insofar as may be applicable, and claiming such refund.
Iowa	For sales taxes paid.	1967	Varies, based on income [3]	Ch. 422 (sec. 18 added by H.B. 702, laws 1967).	Tax credit or refund to be claimed on income tax return. If an individual is not otherwise required to file a return, he may obtain a refund by furnishing the department of revenue with proof of his taxable income and the number of his personal exemptions.
Massachusetts	For consumer-type taxes.	1966	$4 for taxpayer, $4 for spouse, if any, and $8 for each qualified dependent.[4]	Ch. 62 (sec. 6b added by ch. 14, acts 1966).	Same as Indiana.
Minnesota	For senior citizen homestead relief.[5]	1967	Varies with income from 75 to 10 percent of property tax or equivalent rent not to exceed $300 (maximum credit $225).	Ch. 32 (H.B. 27) art VI	Tax credit or refund to be claimed on income tax return. Department of taxation shall make available a separate schedule for information necessary to administration of this section and the schedule shall be attached and filed with the income tax return. Cash refund granted if property tax credit exceeds State personal income tax liability.
	Tax relief for renters.	1967	3.75 percent of the total amount paid by claimant as rent, not to exceed $45.[6]	Ch. 32 (H.B. 27) art XVII	Same as above.
Nebraska	For sales tax paid on food.	1967	$7 per personal exemption (exclusive of age and blindness).	H.B. 377, laws 1967	Credit to be claimed on income tax returns. Refund will be allowed to the extent that credit exceeds income tax payable but no refund will be made for less than $2.
Wisconsin	For senior citizen homestead tax relief.	1963	Varies, based on income and amount of property tax or rental payment.	Ch. 71 (sec. 7109 (7) added by ch. 566 (A.B. 301) eff. June 10, 1964. ch. 580 (A.B. 907) repealed and recreated sec. 71. 09(7) effective Dec. 19, 1964.	Tax credit or refund to be claimed on income tax return. The department of taxation shall make available a separate schedule which shall call for the information necessary to administering this section and such schedule shall be attached to and filed with the Wisconsin income tax form. Cash refund granted if property tax credit exceeds State personal income tax due.

[1] If a taxpayer has no State personal income tax liability or a tax liability insufficient to absorb the entire credit (a negative tax credit situation) he is entitled to the appropriate cash refund. If the taxpayer's State personal liability is equal to or greater than the tax credit, his personal income tax liability is reduced by the amount of the credit (a positive tax credit situation).
[2] The credits for consumer-type taxes are based on "modified adjusted gross income" (regular taxable income plus exempt income such as social security benefits, life insurance proceeds, etc.) and range from $20 per qualified exemption for taxpayers having a modified adjusted gross income of less than $1,000 to $1 per exemption where such income is between $5,000 and $6,999.
[3] Ranges from $12 per qualified exemption for taxpayers having taxable income under $1,000 to 0 where such income is over $7,000.
[4] Credits are only allowed if total taxable income of taxpayer and spouse, if any, does not exceed $5,000 for the taxable year.
[5] All homeowners residing in their own homes are allowed a direct reduction of their property taxes due by means of the homestead property tax credit. This credit amounts to 35 percent of the tax levy, excluding the amount levied for bonded indebtedness, to a maximum credit of $250. Since senior citizen homeowners also receive this credit the amount of the homestead property tax credit must be applied against the amount of the senior citizen income tax credit claimed. Local governments are reimbursed for their tax loss from the State property tax relief fund.
[6] Elderly may choose this relief or senior citizen relief but not both.

H.R. 15302 would reimburse a sales tax jurisdiction—States and local governments—one-half of the amount of revenue currently foregone as a result of either exempting food purchases or making appropriate tax credit and refund adjustments. This "reward" approach would both strengthen the revenue position of those jurisdictions now exempting food and provide a powerful incentive to the other sales tax States to pull the regressive stinger from their State and local levies. If all 44 sales tax States had exempted food purchases, Federal reimbursement grants would have approximated $850 million in 1966.

TABLE 6.—HYPOTHETICAL FEDERAL PER CAPITA GRANT FOR STATE GENERAL SALES TAX EXEMPTION OR CREDIT FOR FOOD TAX PAYMENTS

[Dollar amounts in millions]

State	State general sales tax rate, Jan. 1, 1967 (percent)	State general sales tax collection, 1966	Estimated population, Dec. 31, 1965 [1]	Estimated cost of exempting food [2]	Grant (⅓ of exemption cost) Amount	Grant (⅓ of exemption cost) Percent of State general sales tax collection
19 States exempting or allowing a credit for food: [3]						
California (exempt)	3	$1,099.4	18,763,000	$168.9	$84.5	7.7
Colorado (credit)	3	98.7	1,973,000	17.8	8.9	9.0

[1] Average of estimated population for July 1, 1965, and July 1, 1966 (excluding Armed Forces overseas).
[2] Based on an estimated cost of $3 per capita per year for each 1 percent of tax.
[3] Includes the District of Columbia which taxes food at 1 percent of (⅓ of the general sales tax rate).
[4] Assuming that Hawaii's diminishing type consumer tax credit meets the antiregressitivity objective of the proposed Federal sales tax grant.
[5] Excludes "business and occupation gross receipts taxes" in Indiana, Washington, and West Virginia.
[6] Partial year collections. Tax effective Apr. 1, 1966.
[7] New sales tax effective after beginning of fiscal year 1966, not available.
[8] New sales tax effective Aug. 1, 1967.
[9] New sales tax effective June 1, 1967.
[10] New sales tax effective July 1, 1966.
[11] Partial year collections. Tax effective Aug. 1, 1965.
[12] Based on estimated full year collections. Fiscal year 1966 collections increased by 9.1 percent.
[13] Average for the 13 States and the District of Columbia with full year collections.
[14] New sales tax effective Sept. 1, 1966.
[15] Average for the 25 States with full year collections.
[16] Average for the 38 States and the District of Columbia with full year collections.

A flat rate State income tax can be made progressive with a sufficient personal exemption. The size and nature of that personal exemption has an extremely important bearing on the productivity and incidence of an individual income tax. Since the personal exemptions in use today do not vary with size of income, they contribute to the progressiveness of the tax. A flat-rate income tax with personal exemptions is "progressive" as that concept is usually defined because with such a tax the yield-income ratio rises as income rises. Table 7 illustrates this principle. The 5-percent flat-rate income tax shown in the example is "diminishing-progressive" because the tax ratio—the "effective rate"—starts at zero and approaches—but never quite reaches—5 percent as income rises.

TABLE 7.—EFFECT OF A 5 PERCENT FLAT-RATE INCOME TAX WITH A $1,000 PERSONAL EXEMPTION ON THE TAX OWED BY A SINGLE TAXPAYER AT SELECTED INCOME LEVELS

Income	Personal exemption	Taxable income	Tax rate (percent)	Tax owed	Tax income ratio
$900	$1,000	[1] —$100	5	0	0.0000
$2,000	1,000	1,000	5	$50	.0250
$3,000	1,000	2,000	5	100	.0333
$5,000	1,000	4,000	5	200	.0400
$10,000	1,000	9,000	5	450	.0450
$20,000	1,000	19,000	5	950	.0475
$100,000	1,000	99,000	5	4,950	.0495

[1] Or zero.

H.R. 15303 would provide a direct Federal per capita grant to the State or local government for a personal exemption of at least $600 applied to the income tax. Just as the sales tax grant would reimburse a State one-half the cost of a food exemption, a $3 per capita income tax grant—for each 1 percent tax—would reimburse a jurisdiction one-half the cost of a $600 personal exemption.

TABLE 8.—HYPOTHETICAL FEDERAL PER CAPITA GRANT ADJUSTED FOR 1965 STATE PERSONAL INCOME TAX EFFORT

State	Estimated population, Dec. 31, 1965 [1] (thousands) (excluding Armed Forces overseas)	Basic grant Per capita	Basic grant Total (thousands) (before adjustment)	State personal income tax effort [2]	Total grant (adjusted) Amount (thousands)	Total grant (adjusted) As percent of 1966 State personal income tax collection

Wyoming	334	3	1,004	0	0	

[1] Average of estimated population for July 1, 1965, and July 1, 1966.
[2] Effort is defined as State personal income tax collections in 1966 as a percent of Federal taxable income in 1965, X100.
[3] Effort based on actual State collections adjusted upward to account for State sales tax credit.
[4] Based on an estimate of $290,000,000 ("gross" income tax liability before deducting property and municipal income tax credits) related to 1965 Federal taxable income.
[5] New State income tax. No collections fiscal year 1966. The tax effort figure used for Nebraska is the U.S. average.

These proposed Federal reimbursement grants are designed to help those States that help themselves, or to be more specific, to reward those States that are willing to go the extra mile in constructing an equitable and productive revenue system. For example, in 1966 the State of Wisconsin spent approximately $5 million granting relief to homeowners found to be carrying extraordinary property tax burdens in relation to their income. That State also exempted food purchases from its retail sales tax and made relatively intensive use of the personal income tax. Thus, under this reimbursement plan, Wisconsin for that year would receive $2.5 million for its property tax effort, $18.7 million as sales tax reimbursement—table 6, and $74.8 million—table 8—for its income tax effort—or a reimbursement total of approximately $95 million to be used for programs to benefit low-income persons.

By contrast, its neighbor Illinois would receive nothing, because in 1966, Illinois made no effort to help those property owners carrying extraordinary burden. It did not exempt food from its 3.5 percent State sales tax, nor did it impose a personal income tax. There is every reason to believe, however, that Illinois would be encouraged by these plans to exempt food and impose a personal income tax.

To put the matter more sharply, while tax sharing arrangements would tend to reduce the pressure on States to "shape up" their revenue systems, these reimbursement grants would hurry State tax reform efforts along.

It should also be noted that these reimbursement grants could help local governments in general and the big cities in particular. New York City, for example, exempts food from its 3 percent sales tax and imposes an individual income tax with personal exemptions. New York City, therefore, should be entitled to a sales tax reimbursement estimated at approximately $35 million and a per capita income tax grant of approximately $40 million. This type of direct Federal grant to cities could be made while avoiding the trauma involved in devising a Federal revenue sharing plan with a local "pass-through" provision.

The text of the three bills follows:

H.R. 15301

A bill to encourage State and local governments to reform their tax systems so as to decrease the property tax burden of low-income taxpayers

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "State and Local Property Tax Reform Act of 1970".

SEC. 2. DEFINITIONS.

For purposes of this Act:

(1) State.—The term "State" means a State or the District of Columbia.

(2) The term "jurisdiction" means a State or political subdivision of a State.

(3) Secretary.—The term "Secretary" means the Secretary of the Treasury.

(4) Qualifying Personal Income Tax.—The term "qualifying personal income tax" means an income tax imposed on individuals which—

(A) (i) allows as a deduction in determining taxable income personal exemptions for the taxpayer, his spouse (unless she files a separate return), and his dependents, and provides an aggregate deduction in the case of a return on which personal exemptions are claimed for taxpayer, spouse, and two dependents of at least $2,400,

(ii) provides for computation of tax by means of tables which are designed to impose amounts of tax equivalent to the amount of tax which would be imposed if deductions for personal exemptions were allowed in accordance with clause (i), or

(iii) allows as a credit against tax, personal exemption credits for the taxpayer, his spouse (unless she files a separate return), and dependents, and provides for an aggregate credit in the case of a return on which a personal exemption is claimed for the taxpayer, his spouse, and two dependents, in an amount not less than the tax imposed (in absence of the credit) on the first $2,400 of taxable income, and

(B) does not limit the number of personal exemptions allowed on account of dependents who are children of the taxpayer.

SEC. 3. REIMBURSEMENT TO JURISDICTIONS PROVIDING PROPERTY TAX RELIEF TO LOW-INCOME TAXPAYERS.

(a) Entitlement to Reimbursement.—If the Secretary determines that a jurisdiction has established a qualifying property tax relief program which meets the requirements of subsection (b) and that such jurisdiction will expend the proceeds of any reimbursement to which it is entitled under this section for the purposes specified in section 4, then the Secretary shall reimburse such jurisdiction under subsection (c) for a portion of its revenue loss in each fiscal year arising out of the operation of such program.

(b) Qualifying Property Tax Relief Program.—For purposes of this section—

(1) Definition.—The term "qualifying property tax relief program" means—

(A) a program established by a State by law which provides for credit against income taxes imposed by a jurisdiction in such State, or a cash rebate, or both, or

(B) a program established by a jurisdiction (other than a State) which provides for credit against a qualifying personal income tax imposed by such jurisdiction,

to low-income households in such State or jurisdiction, the direct or indirect property tax burden of which is considered by such State or jurisdiction to be extraordinary in relation to the income of such household. Under such a program, no household's direct and indirect property tax burden may be considered extraordinary in relation to its income unless its income does not exceed $1,000, or unless such tax burden exceeds 5 percent of its income. Such a program may provide that only households a principal member of which has attained the age of 65 are eligible for benefits under the State's program.

(2) Income limitations.—The program must establish income limitations for households considered to be low-income households, but in establishing such limitation it may not include any household which ranks above the lowest quartile in income in the jurisdiction.

(3) Direct and indirect property tax burden.—The term "direct and indirect property tax burden" means (A) real property taxes imposed on the principal residence of a household, if such residence is owned (and such taxes are paid) by a member of the household; or (B) if such residence is not owned by a member of such household, 25 percent of any rental paid with respect to such residence.

(4) Household; household income.—The membership of a household, and the income of a household shall be determined under the law of the jurisdiction which receives reimbursement, but the income of a household must include wage and salary disbursements, other labor income, proprietors' and rental income, interest and dividends, and transfer payments.

(c) Amount of Reimbursement.—The Secretary shall pay for each fiscal year to each jurisdiction which has a qualifying property tax relief program an amount equal to the lesser of—

(1) 50 percent of the revenue foregone by such jurisdiction during such fiscal year by reason of the operation of such program, or

(2) 2 percent (1 percent in the case of a program limited to households the principal member of which has attained the age of 65) of the aggregate amount of real property taxes collected by such jurisdiction and the political subdivisions (if any) of such jurisdiction during such fiscal year.

In determining revenue loss for purposes of paragraph (1), any revenue loss attributable to a credit or a rebate (or both) to any household in a fiscal year in excess of $500 shall be disregarded.

SEC. 4. USE OF PROCEEDS.

(a) Programs Benefiting Low-Income Residents.—The Secretary may pay a jurisdiction the amount to which it is entitled under section 3 for a fiscal year only if he receives assurances from such jurisdiction that such amount will be used for programs which the Secretary determines (in accordance with regulations prescribed by him after consultation with the Secretaries of Health, Education, and Welfare and of Housing and Urban Development and with the Director of the Office of Economic Opportunity) benefit the low-income residents of such jurisdiction.

(b) Pass-Through Requirement.—If a jurisdiction collects a tax with respect to which reimbursement is made under this Act, and if a portion of such tax is required to be transferred by the jurisdiction to another jurisdiction, the Secretary shall by regulation require that such portion of such reimbursement as he determines to be equitable to be transferred to such other jurisdiction.

SEC. 5. ADMINISTRATION.

(a) Application, Etc.—

(1) A jurisdiction which desires to receive payment under this Act for a fiscal year shall make an application therefor at such time, in such manner, and containing such information as the Secretary shall prescribe by regulation. Payment may be made to a jurisdiction only if its application for payment is approved by the Secretary. The Secretary may not finally disapprove any application submitted under this Act, or any modification thereof, without first affording the jurisdiction submitting the application reasonable notice and opportunity for a hearing.

(2) Whenever the Secretary, after reasonable notice and opportunity for a hearing to a jurisdiction which is receiving reimbursement under section 3, finds that—

(A) such jurisdiction no longer has a qualifying property tax relief program, or

(B) the proceeds of such reimbursement are not used in the manner provided by section 4,

the Secretary shall notify such jurisdiction that it will not be eligible to participate in the program under this Act until he is satisfied that the jurisdiction has a qualifying property tax relief program or will use the proceeds of the reimbursement under section 3 in the manner provided in section 4, as the case may be.

(b) Judicial Review.—

(1) If any jurisdiction is dissatisfied with the Secretary's final action with respect to the approval of its application submitted under subsection (a)(1) or with his final action under subsection (a)(2), such jurisdiction may, within sixty days after notice of such action, file with the United States court of appeals for the circuit in which the jurisdiction is located a petition for review of that action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Secretary. The Secretary thereupon shall file in the court the record of the proceedings on which he based his action, as provided in section 2112 of title 28, United States Code.

(2) The findings of fact by the Secretary, if supported by substantial evidence, shall be conclusive; but the court, for good cause shown, may remand the case to the Secretary to take further evidence, and the Secretary may thereupon make new or modified findings of fact and may modify his previous action, and shall certify to the court the record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence.

(3) The court shall have jurisdiction to affirm the action of the Secretary or to set it aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code.

(c) Payment.—Payment of an amount to which a jurisdiction is entitled for a fiscal year shall be made at such time after the close of the fiscal year as the Secretary shall prescribe by regulation.

(d) Fiscal Year.—For purposes of determining eligibility for, and the amount of, assistance provided a jurisdiction under this Act, any reference in this Act to "fiscal year" shall be considered to be a reference to the annual accounting period of such jurisdiction.

SEC. 6. EFFECTIVE DATE.

Payment may be made under this Act with respect to fiscal years beginning after the date of enactment of this Act.

H.R. 15302

A bill to encourage State and local governments to reform their tax systems so as to decrease the sales tax burden of low-income taxpayers

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "State and Local Sales Tax Reform Act of 1970".

SEC. 2. DEFINITIONS

For purposes of this Act:

(1) State.—The term "State" means a State or the District of Columbia.

(2) The term "jurisdiction" means a State or political subdivision of a State.

(3) Secretary.—The term "Secretary" means the Secretary of the Treasury.

(4) Qualifying Personal Income Tax.—The term "qualifying personal income tax" means an income tax imposed on individuals which—

(A)(i) allows as a deduction in determining taxable income personal exemptions for the taxpayer, his spouse (unless she files a separate return), and his dependents, and provides an aggregate deduction in the case of a return on which personal exemptions are claimed for taxpayer, spouse, and two dependents of at least $2,400,

(ii) provides for computation of tax by means of tables which are designed to impose amounts of tax equivalent to the amount of tax which would be imposed if deductions for personal exemptions were allowed in accordance with clause (1), or

(iii) allows as a credit against tax, personal exemption credits for the taxpayer, his spouse (unless she files a separate return), and dependents, and provides for an aggregate credit in the case of a return on which a personal exemption is claimed for the taxpayer, his spouse, and two dependents, in an amount not less than the tax imposed (in absence of the credit) on the first $2,400 of taxable income, and

(B) does not limit the number of personal exemptions allowed on account of dependents who are children of the taxpayer.

SEC. 3. REIMBURSEMENT TO JURISDICTIONS PROVIDING CERTAIN SALES TAX RELIEF.

(a) Entitlement to Reimbursement.—If the Secretary determines that a jurisdiction collects a retail sales tax, that such jurisdiction affords sales tax relief for a fiscal year in accordance with subsection (b), and that such jurisdiction will expend the proceeds of any reimbursement to which it is entitled under this section for the purposes specified in section 4, then the Secretary shall reimburse such jurisdiction under subsection (c) for a portion of its revenue loss in such fiscal year arising out of the operation of such program.

(b) Sales Tax Relief Requirements.—

(1) In general.—In order for a jurisdiction to receive reimbursement for a fiscal year under this section, such jurisdiction must—

(A) collect no sales tax on food or collect a sales tax on food at a rate lower than the rate on other items, or

(B) collect a qualifying personal income tax (as defined in section 2(5)) under which there is allowable (i) a credit (in addition to any allowable credit which satisfies the personal exemption requirement under section 2(5)(B)), (ii) a cash rebate, or (iii) both such a credit and rebate, to each low income individual in such jurisdiction in an amount not less than the product of $300 times the jurisdiction's food sales tax rate times the number of personal exemptions allowed the taxpayer for himself, his spouse, and his dependents, or

(C) in the case of a jurisdiction which does not collect a qualifying personal income tax, allow a cash rebate to each low income individual in such jurisdiction, in an amount not less than the product of $300 times the jurisdiction's food sales tax rate times the number of persons in such individual's family (including such individual, his spouse, and his dependents) who do not claim rebates on their account.

(2) Low-income taxpayer.—For purposes of this section, a jurisdiction must establish income limitations for individuals considered to be low-income individuals. In establishing such limitation the jurisdiction may not include any individual whose income ranks above the lowest quartile in income in the jurisdiction.

(3) Amount of income.—The income of an individual shall be determined under the law of the jurisdiction which receives reimbursement. The income of an individual must include wage and salary disbursements, other labor income, proprietors' and rental income, interest and dividends, and transfer payments.

(c) Amount of Reimbursement.—The Secretary shall pay each fiscal year to each jurisdiction—

(1) which is entitled to reimbursement by reason of subsection (b)(2)(A) for such fiscal year an amount equal to the product of the population of such taxing jurisdiction times $150 times the adjusted sales tax rate for such jurisdiction,

(2) which is entitled to reimbursement by reason of subsection (b)(2)(B) for such fiscal year an amount equal to one-half of the revenue foregone by such jurisdiction by reason of the operation of the provision described in such subsection.

(3) which is entitled to reimbursement by reason of both such subsections an amount equal to the sum of the amounts determined under paragraph (1) and paragraph (2), and

(4) which is entitled to reimbursement under subsection (b)(2)(C) an amount equal to 50 percent of the cost of providing cash rebates.

For purposes of paragraph (1), the adjusted sales tax rate for a jurisdiction is the general sales tax rate for such jurisdiction less the food sales tax rate (if any) for such jurisdiction.

SEC. 4. USE OF PROCEEDS.

(a) Programs Benefiting Low-Income Residents.—The Secretary may pay a jurisdiction the amount to which it is entitled under section 3 for a fiscal year only if he receives assurances from such jurisdiction that such amount will be used for programs which the Secretary determines (in accordance with regulations prescribed by him after consultation with the Secretaries of Health, Education, and Welfare and of Housing and Urban Development and with the Director of the Office of Economic Opportunity) benefit the low-income residents of such jurisdiction.

(b) Pass-Through Requirement.—If a taxing jurisdiction collects a tax with respect to which reimbursement is made under this Act, and if a portion of such tax is required to be transferred by the taxing jurisdiction to another taxing jurisdiction, the Secretary shall by regulation require that such portion of such reimbursement as he determines to be equitable to be transferred to such other jurisdiction.

SEC. 5. ADMINISTRATION.

(a) Application, Etc.—

(1) A jurisdiction which desires to receive payment under this Act for a fiscal year shall make an application therefor at such time, in such manner, and containing such information as the Secretary shall prescribe by regulation. Payment may be made to a jurisdiction only if its application for payment is approved by the Secretary. The Secretary may not finally disapprove any application submitted under this Act, or any modification thereof, without first affording the jurisdiction submitting the application reasonable notice and opportunity for a hearing.

(2) Whenever the Secretary, after reasonable notice and opportunity for a hearing to a jurisdiction which is receiving reimbursement under section 3, finds that—

(A) such jurisdiction no longer has a sales tax relief program which meets the requirements of section 3(b), or

(B) the proceeds of such reimbursement are not used in the manner provided by section 4,

the Secretary shall notify such jurisdiction that it will not be eligible to participate in the program under this Act until he is satisfied that the jurisdiction has a sales tax relief program which meets the requirements of section 3(b) or will use the proceeds of its reimbursement under section 3 in the manner provided in section 4 (as the case may be).

(b) Judicial Review.—

(1) If any jurisdiction is dissatisfied with the Secretary's final action with respect to the approval of its application submitted under subsection (a)(1) or with his final action under subsection (a)(2), such jurisdiction may, within sixty days after notice of such action, file with the United States court of appeals for the circuit in which the jurisdiction is located a petition for review of that action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Secretary. The Secretary thereupon shall file in the court the record of the proceedings on which he based his action, as provided in section 2112 of title 28, United States Code.

(2) The findings of fact by the Secretary, if supported by substantial evidence, shall be conclusive; but the court, for good cause shown, may remand the case to the Secretary to take further evidence, and the Secretary may thereupon make new or modified findings of fact and may modify his previous action, and shall certify to the court the record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence.

(3) The court shall have jurisdiction to affirm the action of the Secretary or to set it aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code.

(c) Payment.—Payment of an amount to which a jurisdiction is entitled for a fiscal year shall be made at such time after the close of the fiscal year as the Secretary shall prescribe by regulation.

(d) Fiscal Year.—For purposes of determining eligibility for, and the amount of, assistance provided a jurisdiction under this Act, any reference in this Act to "fiscal year" shall be considered to be a reference to the annual accounting period of such jurisdiction.

SEC. 6. EFFECTIVE DATE.

Payment may be made under this Act with respect to fiscal years beginning after the date of enactment of this Act.

H.R. 15303

A bill to encourage State and local governments to adopt more equitable personal income taxes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "State and Local Income Tax Reform Act of 1970."

SEC. 2. DEFINITIONS.

For purposes of this Act:

(1) State.—The term "State" means a State or the District of Columbia.

(2) The term "jurisdiction" means a State or political subdivision of a State.

(3) Secretary.—The term "Secretary" means the Secretary of the Treasury.

(4) Qualifying Personal Income Tax.—The term "qualifying personal income tax" means an income tax imposed on individuals which—

(A)(i) allows as a deduction in determining taxable income personal exemptions for the taxpayer, his spouse (unless she files a separate return), and his dependents, and provides an aggregate deduction in the case of a return on which personal exemptions are claimed for taxpayer, spouse, and two dependents of at least $2,400,

(ii) provides for computation of tax by means of tables which are designed to impose amounts of tax equivalent to the amount of tax which would be imposed if deductions for personal exemptions were allowed in accordance with clause (i), or

(iii) allows as a credit against tax, personal exemption credits for the taxpayer, his spouse (unless she files a separate return), and dependents, and provides for an aggregate credit in the case of a return on which a personal exemption is claimed for the taxpayer, his spouse, and two dependents, in an amount not less than the tax imposed (in absence of the credit) on the first $2,400 of taxable income, and

(B) does not limit the number of personal exemptions allowed on account of dependents who are children of the taxpayer.

SEC. 3. PERSONAL INCOME TAX EFFORT GRANTS TO TAXING JURISDICTIONS.

(a) Entitlement to and Amount of Grant.—Subject to section 4, if a jurisdiction collects a qualifying personal income tax (as defined in section 2(4)) for a fiscal year, the Secretary shall pay to such jurisdiction an amount for such year equal to the product of the population of such jurisdiction times $3.00 times the personal income tax effort index.

(b) Personal Income Tax Effort Index.—For purposes of this section, the personal income tax effort index of a taxing jurisdiction is a number equal to 100 times the aggregate amount collected by such taxing jurisdiction under its personal income tax, divided by the aggregate adjusted gross income (as defined in section 62 of the Internal Revenue Code of 1954) of the individuals residing in such taxing jurisdiction.

SEC. 4. USE OF PROCEEDS.

(a) Programs Benefiting Low-Income Residents.—The Secretary may pay a jurisdiction the amount to which it is entitled under section 3 for a fiscal year only if he receives assurances from such jurisdiction that such amount will be used for programs which the Secretary determines (in accordance with regulations prescribed by him after consultation with the Secretaries of Health, Education, and Welfare and of Housing and Urban Development and with the Director of the Office of Economic Opportunity) benefit the low-income residents of such jurisdiction.

(b) Pass-Through Requirement.—If a jurisdiction collects a tax with respect to which a grant is made under this Act, and if a portion of such tax is required to be transferred by the jurisdiction to another jurisdiction, the Secretary shall by regulation require that such portion of such grant as he determines to be equitable to be transferred to such other jurisdiction.

SEC. 5. ADMINISTRATION.

(a) Application, Etc.—

(1) A jurisdiction which desires to receive payment under this Act for a fiscal year shall make an application therefor at such time, in such manner, and containing such information as the Secretary shall prescribe by regulation. Payment may be made to a jurisdiction only if its application for payment is approved by the Secretary. The Secretary may not finally disapprove any application submitted under this Act, or any modification thereof, without first affording the jurisdiction submitting the application reasonable notice and opportunity for a hearing.

(2) Whenever the Secretary, after reasonable notice and opportunity for a hearing to a jurisdiction which is receiving a grant under section 3, finds that—

(A) such jurisdiction no longer has a qualifying personal income tax which meets the requirements of section 2(4), or

(B) the proceeds of such grant are not used in the manner provided by section 4,

the Secretary shall notify such jurisdiction that it will not be eligible to participate in the program under this Act until he is satisfied that the jurisdiction has a qualifying personal income tax which meets the requirements of section 2(4) or will use the proceeds of its grant under section 3 in the manner provided in section 4 (as the case may be).

(b) Judicial Review.—

(1) If any jurisdiction is dissatisfied with the Secretary's final action with respect to the approval of its application submitted under subsection (a)(1) or with his final action under subsection (a)(2), such jurisdiction may, within sixty days after notice of such action, file with the United States court of appeals for the circuit in which the jurisdiction is located a petition for review of that action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Secretary. The Secretary thereupon shall file in the court the record of the proceedings on which he based his action, as provided in section 2112 of title 28, United States Code.

(2) The findings of facts by the Secretary, if supported by substantial evidence, shall be conclusive; but the court, for good cause shown, may remand the case to the Secretary to take further evidence, and the Secretary may thereupon make new or modified findings of fact and may modify his previous action, and shall certify to the court the record of the further proceedings. Such new

or modified findings of fact shall likewise be conclusive if supported by substantial evidence.

(3) The court shall have jurisdiction to affirm the action of the Secretary or to set it aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code.

(c) Payments.—Payment of an amount to which a jurisdiction is entitled for a fiscal year shall be made at such time after the close of the fiscal year as the Secretary shall prescribe by regulation.

(d) Fiscal Year.—For purposes of determining eligibility for, and the amount of, assistance provided a jurisdiction under this Act, any reference in this Act to "fiscal year" shall be considered to be a reference to the annual accounting period of such jurisdiction.

SEC. 6. EFFECTIVE DATE.

Payment may be made under this Act with respect to fiscal years beginning after the date of enactment of this Act.

TAKE PRIDE IN AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. MILLER) is recognized for 5 minutes.

Mr. MILLER of Ohio. Mr. Speaker, in 1968 per capita income was $4,278 for each U.S. citizen, the highest figure for any major country in the world. The next highest was Sweden's $3,130.

SUBVERSIVE INFILTRATION OF ARMED FORCES

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Louisiana (Mr. RARICK) is recognized for 10 minutes.

Mr. RARICK. Mr. Speaker, in previous remarks I have alluded to the obvious infiltration of our Armed Forces by subversives, and have suggested that either the Committee on Internal Security or the Committee on Armed Services conduct appropriate inquiries into this vital question.

Dr. Fred Schwarz, of the Christian Anti-Communist Crusade, has performed another of his great services to freedom by making available to the American people the text of remarks by Andy Stapp, of the subversive "American Servicemen's Union" before a Black Panther conference in Oakland, Calif. Dr. Schwarz has also correctly related this particular type of subversion to that which occurred in the Armed Forces of both Germany and Russia in the last days of World War I, as an essential part of the Bolshevik revolution in both nations.

I call to the attention of our colleagues the mounting of a well financed campaign to discredit those who are loyal to our country and faithful to their oath in the military service. Such is the explantation of both the Mylai propaganda and the previous attack on the Green Beret officers.

I also call to the attention of our colleagues the Communist history of David Rein, the local attorney representing Roger Priest in the naval court-martial case, and to the obvious security problem which this involves.

I include Dr. Schwarz' December 1 bulletin as part of my remarks:

COMMUNIST INFILTRATION OF THE MILITARY

Infiltration and subversion of the military forces are regarded by the communists as essential for a successful revolution. It was the Bolshevik infiltration of the Russian army which enabled Lenin and his cohorts to seize power in Russia.

Ominous progress has been made recently by the communists in their efforts to infiltrate the United States armed forces. They are operating through an organization called the "'American Servicemens Union" whose chairman is Andy Stapp. Stapp made a speech at the Conference for a United Front Against Fascism called and conducted by the Black Panthers in Oakland, California, July 18–20, 1969.

During this speech Stapp 1) associated the American Servicemens Union with the North Korean Communists and all communist enemies of the United States. This is the practical application of the communist doctrine of Proletarian Internationalism; 2) claimed that the present American Government is fascist; 3) boasted that the American Servicemens Union has chapters on 60 large military installations in the United States and 40 overseas; 4) exulted over numerous rebellions that have taken place at American bases on Long Binh, DaNang, Ft. Bragg, and Ft. Dix; 5) stated the tactics of the ASU were modeled on the tactics of the Bolsheviks within Russia; 6) emphasized the major objective was to foment strife between the officers and the GI's; 7) bragged that they were going to unite with the Black Panthers for a violent revolution.

The text of his speech is as follows:

"I am going to run down tonight about the GI revolt and rebellion that has been going on in the U.S. army in the last year and the organizing drives that we are undertaking. But before I do that, I've got something real important here.

"The Korean people have asked the American Servicemens Union to send their greetings to the revolutionary young people in America, and they sent us a letter which I am going to read. I can't think of a better place to read it than here where we are fighting the same kind of fascism that the Koreans have been faced with for 20 years in the U.S.-supported puppet government of South Korea. Here's the letter:

" 'Dear Andy: We plan to print an article on American GI's used as policemen against hungry South Korean workers. Your contributions will be of great service to deepening the friendly ties between the peoples of Korea and America, and become a big blow to the U.S. imperialist aggressors. Our thinking is that the ASU and Peoples Korea will combine efforts in chopping the head off U.S. imperialism and tearing its limbs in concert with the revolutionary people the world over. You will readily agree with us in this respect, I believe. Right On! The 40,000,000 Korean people led by Marshall Kim il Sung, the great leader of the revolution, firmly stand behind the American people in mutilating the U.S. ruling circle, wholly supporting the ASU. You will find enclosed copies of the words of Marshall Kim il Sung.

" 'The Democratic Peoples Republic of Korea is the banner of independence and freedom of our people and also a powerful weapon of building socialism and communism, and the great anti-imperialist revolutionary cause of Asian, African and Latin American peoples is invincible. You will find it interesting, I am sure, if you will kindly contribute an article on the anti-imperialist, anti-U.S. strategy and tactics of Marshal Kim il Sung, dealt with in the aforementioned work of Peoples Korea for worldwide publication. It will be translated into Korean, Japanese, Russian, Chinese, Spanish, Arabian, as well as English.

" 'Your contributions will greatly encourage the Korean people in their struggle to achieve an independent, peaceful unification of the Fatherland, accomplishing the complete victory of socialism and communism, and defending world peace, and will contribute toward the strengthening of the anti-imperialist, anti-U.S. joint action, and deepening the friendly relations between the Korean and the American people. You may kindly inform members of your ASU of the Korean people and their leader, Marshal Kim il Sung. Thank you very much in anticipation. Our militant greetings to members of the American Servicemens Union and the American people through the ASU chairman and its members.

" 'Sincerely yours, (signed) Jen Yong, Editor-in-Chief of the Peoples Korea.'

"Well, the Koreans have known about fascism for a long time—first the Japanese Fascists, then the U.S. imperialists who brought fascism to their country in 1945 and murdered millions of them in the Korean war, and now in the United States itself and around the world the troops of the U.S. imperialist army are also learning how to fight against fascism, the same fascism that the Koreans are fighting against. The ASU is playing a leading role in this fight, in this organizing drive. *We have chapters of the American Servicemens Union on 60 large military installations in the United States and 40 overseas.* And these guys know what repression is—we have more than 150 union brothers in the stockade now. *Just as the Bolshevik Party organized through the Soviets in 1917 against the Czar and the oppression in Russia, the American Servicemens Union is organizing Soviets within the U.S. imperialist army.*

"Now by organizing, we mean organizing against white racism, and we are organizing against the imperialist war. Concretely, if you are organizing against white racism and against imperialist war, that means you are organizing against the officer class. In reality, that's what it means, that you are organizing against the officers. Because when a GI, who is a member of the American Servicemens Union, refuses to fight in Korea or go to Vietnam, or go to Chicago like some of the black guys did last summer during the Democratic National Convention, it means that you are going to come into a head-on conflict with the brass, and this is the primary contradiction within the army right now between the enlisted personnel and the officers.

Who are these army officers? Well, it's the same as the class contradictions within American society at large. The officers are just the bosses. They come from the upper middle class; and those who don't come from the ruling class, cross lines and join it. This clique of officers (less than one-sixth of the army) dominates it now and sets the tone for the army. This was recognized very well, I thought, in the Weatherman proposal, which pointed out that army officers are the class enemy. This is something that the American Servicemens Union has been organizing around for two years. The most important thing now in the U.S. Army is for guys to be able to get together and stand up against these officers, and not stand at rigid attention and feel that they have to button all their buttons and salute and stammer out 'Sir', 'Yes sir', and 'No sir', but to get together and say, 'Listen you ———, we are demanding our rights and that includes the right to get rid of you.' And what I am saying about officers in the U.S. imperialist army has been true of every capitalist army.

"I am sure many of you have seen the film, The Potemkin, about the revolt in the Russian fleet in the Black Sea in 1905 when

the rank and file sailors rose up against their officers; and their demand, which was simply a demand for food that didn't have worms in it, ultimately, through the leadership of the Bolsheviks, led to a proletarian revolution in that country; and it started with the rank and file guys standing up against the officers.

"We got a case right now of an ASU GI, named Roger Priest, who was distributing Black Panther Party literature, and also distributed this handbill and it showed a picture of Wheeler, and above it said, 'Does this pig speak for you?' and because Roger did that, he faces 36 years in prison for sedition, treason, trying to overthrow the government, and all kinds of ——— disrespect for General Wheeler, etc. And that's where the contradiction is, just for simply putting out this leaflet. We've had ASU GI's put out a leaflet over a year ago saying the guys had a right to get together and make demands on the officers. These guys were sentenced to three years in prison each, on a disloyalty charge, meaning they were disloyal to the officer class.

"I'm not going to take up a lot of time tonight talking about all the rebellions that have been taking place in Long Binh and DaNang and Fort Bragg, rebellions out of Fort Dix—every one of them has had an anti-officer basis. At Fort Dix they kept the guys without water after keeping them standing in the sun for hours and hours inside the stockade; then they tried to deny them water, and the guys rose up in a mass rebellion inside the stockade; and out of this, four members of the American Servicemens Union are facing very heavy charges on that. There are other guys also facing heavy charges, and it was an anti-officer rebellion.

"There are elements trying to work with GI's now that have a phony line that you can organize army officers—that the oppressor and the oppressed should both be organized by the revolutionaries. It's like saying you should organize the bosses. We consider this to be counterrevolutionary. This is a counterrevolutionary line. The only line that is going to lead to victory and revolution is a proletarian line in the army. That means organizing against the officers.

"Now it was a long time ago that Marx pointed out something so true, and that is that the state, stripped of all the ———, all the parliaments and the congress and all that ———, stripped of all that, the State is nothing but organized violence. Lenin called the congress a 'talk shop'. Nothing is really decided there. It's the pigs, the cops, who decide things; and it's the army, that's where the State really is, and the army is a State on wheels. That's where the power of U.S. imperialism is—it's in the U.S. Army because even the ——— civilian pigs—there are those cops who run so ——— fast when the GI's turn on them. They are going to be burning their uniforms.

"The real power is in the three million-man army. Now the Pentagon is where this fascism is. It's a snake pit of fascism—just like the pig department. Now, just as the Pentagon is the breeding ground of fascism, the bourgeoisie know that you can't have a fascist dictatorship unless they've got the army completely under their thumb. And they know that whoever can command the allegiance of the rank and file troops, that command is going to be decisive in revolution or counterrevolution, and right now the American Servicemens Union is building an army within an army, a workers' militia inside the U.S. army, and along with the Panthers and others we are going to make that revolution. Power of the people!"

Historically, successful infiltration of the military has signified an advanced stage of the communist revolutionary process. It is difficult to exaggerate the present danger. There is cause for concern and even alarm, but panic must be avoided. The laws must be strengthened where this is necessary and applied meticulously to preserve internal peace.

AIDING CZECHOSLOVAK REFUGEES

(Mr. MONAGAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MONAGAN. Mr. Speaker, I have been greatly concerned about the plight of Czechoslovak refugees since the Russian invasion of 1969 which caused so many of them to flee from their homeland.

I have proposed through House Concurrent Resolution 457 that the President take steps to ease the plight of these refugees both by action and by expressing the national policy in his position as Chief Executive.

A more specific type of help has recently been demonstrated in my own congressional district at the Cheshire, Conn., plant of the Waterbury Farrel Manufacturing Co. where six Czechoslovak refugees have been enlisted for a training program in which the company has cooperated with the American Fund for Czechoslovakian Refugees. The company hopes to expand the program to 25 refugees in the near future and 30 to 60 eventually.

To receive these men and to make a place for them in our affluent society constitutes citizenship at the highest level. I am proud of this action and I include herewith a laudatory editorial from the New Haven Register which appropriately compliments all concerned:

A BETTER LIFE FOR SOME CZECHS

There is something that Americans can do to ease the frustration felt by their inability to free Czechoslovakia from the grip of Soviet Union oppression. While the threat of nuclear war does not enable the U.S. to liberate the enslaved nation, there is an opportunity to help those Czechoslovakians who have left their homeland in quest of freedom.

At the Cheshire plant of the Waterbury Farrel Manufacturing Company, six Czechoslovakian refugees are seeking fulfillment of the promises that went down the drain with the inflexible socialism. And there are at least 20,000 other refugees waiting in Austria for a place where they can build a new life.

The six refugees came to Waterbury Farrel under a training program which has seen the company co-operating with the American Fund for Czechoslovakian Refugees. The company hopes to expand the program to at least 25 refugees in the near future and 30 to 60 eventually. The only requirement involved in placement is provision of adequate housing and good environment.

This is a program that could work to the mutual advantage of the refugee and the company that trains them. Many of the trainees are skilled in trades pursued in their homeland, which boasted a thriving economy before Communist red tape destroyed initiative.

Their lives were risked by those Czechoslovakians who chose to start anew far from their native land rather than endure a circumscribed existence. Their faith in democracy deserves the kind of generous response that has made America a symbol of hope.

THE NICKEL PROBLEM

(Mr. MONAGAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MONAGAN. Mr. Speaker, on behalf of many small manufacturers in my district I want to express my gratification over the announcement of the release of 20 million pounds of nickel from the Government stockpile. A short time ago we were able to obtain 4,500 tons of nickel from the Treasury Department and this of course had provided some relief from the critical shortages created by the Canadian strikes.

The Office of Emergency Preparedness has, I think, worked out an effective program to make nickel available now, not only to the defense contractors but also to the small manufacturers and their employees who had suffered serious damage and whose production programs were at times threatened with curtailment. Under the program outlined, the stockpile nickel will be loaned for release with the understanding that it will be returned in 18 months. Again, on behalf of nickel consumers in my district I want to express my appreciation to the officials of the Office of Emergency Preparedness, the Treasury Department, and the Business and Defense Services Administration of the Department of Commerce with whom I have worked to bring about this development which will have an immediate and favorable effect on Connecticut production and employment.

POLLUTION TARNISHES THE GOLDEN STATE

(Mr. BROWN of California asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BROWN of California. Mr. Speaker, California's image long has been one of a land of opportunity, of a sunshine mecca bounded by whitecap mountains and sparkling beaches, of rich farmlands, of bright city streets lined with towering palms.

That California may soon exist only in myth. For today, environmental pollution seriously tarnishes the Golden State.

California's air, California's water, California's soil, California's beaches, California's ocean waters—all are slowly, steadily, deteriorating in quality.

And the immediate prospect for improvement is not encouraging—given current statewide levels of recognition of these dangers as well as the ability of the State and its residents to combat them.

Certainly as the State's population continues to soar, demands for scarce resources will zoom, and as that demand rises, environmental quality implications become increasingly important.

For years, Californians—like most other citizens—took for granted that certain vital resources would always be available either free or at reasonably low costs. The land was rich, the wild water would flow, the air would clean itself. If there was pollution, the remedy was simple: the State was huge, living densities sparse, and you could move away or find some new, or relatively untapped, source. There was always more.

Take a prime example: water supply for southern California has been a long-time problem. But, with relatively under-utilized northern water resources readily available, it was easy to devise means so as to divert water down to the south.

Yet, as the State's population concentrated more and more into three distinct regions—San Francisco-Oakland-Sacramento; Los Angeles-Orange County-Santa Barbara; and, San Diego—resource demands, especially for water, intensified. These urban regions competed both with each other and with the largely agricultural inner areas of the State for resources—and everyone wanted their resources cheap.

Vision was purely short range. Resources were needed now, the future could wait. There is always more.

Pollution does not happen overnight. The process is slow, tedious, but steady. And hard to notice—unless you look for it.

The search for good water deepened. Secondary effects to getting the water were ignored. The need was for water for the cities, and that was most important. The result: salinity hazards now endanger thousands of prime agricultural land and overall effects are massive throughout numerous ecological systems.

Smog did not just appear one day. More Californians meant more cars, meant more coal or oil-burning power facilities, meant more industrial waste, meant more backyard trash to burn.

Then there was the "California style of life." Prompted by existing construction technologies and by the seemingly endless expanse of land, growth was horizontal, not vertical. This led to increased traveling time and more use of air polluting vehicles; it led away from conventional mass transit systems and built freeways instead. Add that to the State's quickly gained affluence, the rise of the two- and three-car family, and all the ingredients for air pollution came together.

At first, smog was a joke. The sky was muddy some days; eyes watered; clothes hung outside grayed. Everyone laughed. There was always more air. It will clean up when the wind is right.

But it did not. The smog got worse. The laughs became gagged. And suddenly California's air was not taken for granted.

The effect of air pollution is not felt only in cities. Recent reports note desert communities beset by smog; other studies indicate forest growth severely effected by air pollution. And given nature's delicate balance, the overall implications can be immense—reach into every community in the State, touch every life form.

Over the past two decades, billions of dollars have been allocated to try and solve California's air pollution. If there is a joke, then it is on us, and the laugh has been costly indeed.

Yet, air pollution stands as but one of the dangers facing California, and it may not even be the most threatening. All California's resources are in immediate peril, and the need for positive action to counter these hazards is imperative.

I believe, and know, that the battle for quality environment in California can be won. Man's technology produced much of the problem and it can be harnessed to both eradicate the pollution and improve the condition of the world we live in.

But, we must resolve to meet these dangers. Not a single California resource can be taken for granted. The cost to halt pollution and to improve resources may be staggering. Citizens may be forced to accept new living styles, styles which conserve resources and which charge high prices for them. This must be done. There is no other way.

California's problems, unfortunately, are not unique. They just are vivid. What happened in California now is apparent and easily seen, though less easily understood. However, it could happen anywhere else. And it probably is.

That is why I now wish to insert in the RECORD an article from the current issue of the Washington Monthly by Dr. Barry Commoner, director of the Center for the Biology of Natural Systems at Washington University in St. Louis.

I consider this article the most powerful study I have ever read detailing the environmental quality crisis in California. As much as the article is revealing—and it is—it also is a desperate cry for action on a wide scale—local, statewide, and national, private and public.

I strongly endorse Dr. Commoner's recommendations and his conclusions. If he is right—and I think he is—future environmental quality policy must be strong, and it may be extremely expensive: Yet, we have no choice but to accept it.

As the article asks, "Can We Survive?" We can and we must. The article follows:

CAN WE SURVIVE?

(By Barry Commoner)

No one can escape the enormous fact that California has changed. What was once desert has become the most productive land in the world. The once-lonely mountain tops are crisscrossed with humming power lines. Powerful industries, from old ones like steel to the most modern aerospace and electronic operations, have been built. California has become one of the most fruitful, one of the richest places on the surface of the earth. This is all change, and it is good.

But there are other changes in California. Its vigorous growth has been achieved by many men and women who came to give their children a healthy place to live. Now, however, when school children in Los Angeles run out to the playing fields, they are confronted by the warning: "Do not exercise strenuously or breathe too deeply during heavy smog conditions." For the sunshine that once bathed the land in golden light has been blotted out by deadly smog. In a number of California towns the water supplies now contain levels of nitrate above the limit recommended by the U.S. Public Health Service; given to infants, nitrate can cause a fatal disorder, methemoglobenemia, and pediatricians have recommended the use of bottled water for infant formulas. The natural resources of California, once a magnet that attracted thousands who sought a good life, now harbor threats to health. Beaches that once sparkled in the sun are polluted with oil and foul-smelling deposits. Rivers that once teemed with fish run sluggishly to the sea. The once famous crabs in San Francisco Bay are dying. Redwoods are toppling from the banks of eroding streams. All this, too, is change, and it is bad.

Thus, much of the good that has been produced in California, through the intelligence and hard work of its people, has been won at a terrible cost. That cost is the possible destruction of the very capital which has been invested to create the wealth of the state—its environment.

The environment makes up a huge, enormously complex living machine—an ecosystem—and every human activity depends on the integrity and proper functioning of that machine. Without the ecosystem's green plants, there would be no oxygen for smelters and furnaces, let alone to support human and animal life. Without the action of plants and animals in aquatic systems, there would be no pure water to supply agriculture, industry, and the cities. Without the biological processes that have gone on in the soil for thousands of years, there would be neither food crops, oil, nor coal. This machine is our biological capital, the basic apparatus on which our total productivity depends. If it is destroyed, agriculture and industry will come to naught; yet the greatest threats to the environmental system are due to agricultural and industrial activities. If the ecosystem is destroyed, man will go down with it; yet it is man who is destroying it. For in the eager search for the benefits of modern science and technology, we have become enticed into a nearly fatal illusion: that we have at last escaped from the dependence of man on the rest of nature. The truth is tragically different. We have become not less dependent on the balance of nature, but more dependent on it. Modern technology has so stressed the web of processes in the living environment at its most vulnerable points that there is little leeway left in the system. We are approaching the point of no return; our survival is at stake.

These are grim, alarming conclusions; but they are forced on us. I am convinced, by the evidence. Let us look at some of that evidence.

A good place to begin is the farm—on which so much of California's prosperity is based. The wealth created by agriculture is derived from the soil. In it we grow crops which convert inorganic materials—nitrogen, phosphorus, carbon, oxygen, and the other elements required by life—into organic materials—proteins, carbohydrates, fats, and vitamins—which comprise our food.

The soil, the plants that grow in it, the livestock raised on the land, and we ourselves are parts of a huge web of natural processes—endless, self-perpetuating cycles. Consider, for example, the behavior of nitrogen, an element of enormous nutritional importance, forming as it does the basis of proteins and other vital life substances. Most of the earth's available nitrogen is in the air, as nitrogen gas. This can enter the soil through nitrogen fixation, a process carried out by various bacteria, some of them living free in the soil and others associated with the roots of legumes such as clover. In nature, nitrogen also enters the soil from the wastes produced by animals. In both cases the nitrogen becomes incorporated into a complex organic material in the soil—humus. The humus slowly releases nitrogen through the action of soil microorganisms which finally convert it into nitrate. In turn, the nitrate is taken by the roots of plants and is made into protein and other vital parts of the crop. In a natural situation the plant becomes food for animals, their wastes are returned to the soil, and the cycle is complete.

This cycle is an example of the biological capital that sustains us. How has this capital been used in California?

The huge success of agriculture in California is a matter of record; it forms the largest single element in the state's economy. To achieve this wealth a vast area in the center of the state has been transformed

from a bare desert into the richest agricultural land in the nation. How has this been done? How has this transformation affected the continued usefulness of the soil system, especially the nitrogen cycle?

When the first farmers came to the San Joaquin Valley, they found fertile soil and sunshine; only water was needed to make the valley bloom. This was obtained first from local streams and later, increasingly, from wells which tapped the huge store of water that lay beneath the entire Central Valley. As the bountiful crops were taken, the soil, originally rich in nitrogen, became impoverished. To sustain crop productivity, inorganic nitrogen fertilizers were added to the soil. But with the loss of natural soil nitrogen, humus was depleted; as a result the soil became less porous, and less oxygen reached the roots, which were then less efficient in taking up the needed nutrients from the soil. The answer: more nitrogen fertilizer, for even if a smaller proportion is taken up by the crop, this can be overcome by using more fertilizer to begin with. California now uses more nitrogen fertilizer than any other state—an average of about 450 pounds per acre in 1959.

One of the rules of environmental biology is: "Everything has to go somewhere," and we may ask: Where did the extra nitrate added to the soil, but not taken up by the crops, go? The answer is clear: The unused nitrate was carried down into the soil, accumulating at greater and greater depths as the water table fell due to the continual pumping of irrigation water.

With the water table falling, agriculture in the Central Valley was headed for disaster; recognizing this fact, the state constructed the Friant-Kern Canal, which began to supply the valley with above-ground irrigation water beginning in 1951. Irrigation water must always be supplied to soil in amounts greater than that which is lost by evaporation; otherwise salts accumulate in the soil and the plants are killed. So, following the opening of the new canal, the valley water table began to rise toward its original level—carrying with it the long-accumulated nitrates in the soil.

Now there is another simple rule of environmental biology that is appropriate here: "Everything is connected to everything else." The valley towns soon learned this truth, as their drinking water supplies—which were taken from wells that tapped the rising level of underground water—began to show increasing concentrations of nitrate. In the 1950's, the Bureau of Sanitary Engineering of the California Department of Public Health began to analyze the nitrate content of city water supplies in the area. They had good reason for this action, for in July, 1950, an article in the *Journal of the American Water Works Association* had described 139 cases of infant methemoglobenemia in the United States identified since 1947; 14 cases were fatal; all were attributed to farm well water contaminated with more than 45 ppm of nitrate.

At first, only a few scattered instances of high nitrate levels were found in valley water supplies. However, a study of 800 wells in southern California counties in 1960 showed that 88 of them exceeded the 45 ppm limit; 188 wells had reached half that level. In that year, the U.S. Public Health Service recommended that a nitrate level of 45 ppm should not be exceeded, warning:

"Cases of infantile nitrate poisoning have been reported to arise from concentrations ranging from 66 to 1100 ppm. . . . Nitrate poisoning appears to be confined to infants during their first few months of life; adults drinking the same water are not affected, but breast-fed infants of mothers drinking such water may be poisoned. Cows drinking water containing nitrate may produce milk sufficiently high in nitrate to result in infant poisoning."

In Delano, a 1952 analysis showed only traces of nitrate in the city water supply: in 1966, analyses of three town wells obtained by the Delano Junior Chamber of Commerce showed nitrate levels of 70–78 ppm. In 1968, a study by the Water Resources Board, made in reply to a request by State Senator Walter W. Stiern, showed:

"Nitrate concentrations in groundwater underlying the vicinity of Delano are currently in excess of the limit . . . recommended by the U.S. Public Health Service . . . similar geologic and hydrologic conditions occur in other areas of the San Joaquin Valley and the state generally."

So agricultural wealth of the Central Valley has been gained, but at a cost that does not appear in the farmers' balance sheets—the general pollution of the state's huge underground water reserves with nitrate. Fortunately, there appear to be no reports of widespread acute infant methemoglobenemia in the area as yet. However, the effects of chronic exposure to nitrates are poorly understood. We do know that in animals nitrate may interfere with thyroid metabolism, reduce the availability of vitamin A, and cause abortions. Moreover, there is evidence that even small reductions in the oxygen available to a developing human fetus—which might occur when the mother is exposed to subcritical levels of nitrate—result in permanent damage to the brain. In sum, the success of agriculture in the Central Valley has been won at a cost which risks the health of the people.

Nor does the nitrogen problem end there. Much of the nitrogen fertilizer applied to the soil of the Central Valley finds its way into the San Joaquin River, which drains the irrigated fields. As a result, the river carries a huge load of nitrate into the San Francisco Bay-Delta area. Here the added nitrate intrudes on another environmental cycle—the self-purifying biological processes of natural waters—bringing in its wake a new round of environmental destruction. The excess nitrate—along with excess phosphate from agricultural drainage and municipal wastes—stimulates the growth of algae in the waters of the Bay, causing the massive green scums that have become so common in the area. Such heavy overgrowths of algae soon die off, releasing organic matter which overwhelms the biological purification processes that normally remove it. As a result, the natural balance is destroyed; the water loses its oxygen; fish die; the water becomes foul with putrefying material. In the cooler words of the Department of Interior report on the San Joaquin Master Drain, "Problems resulting from nutrient enrichment and associated periodic dissolved oxygen depression are numerous in the Bay-Delta area."

So the agricultural practices of the great Central Valley have overwhelmed the natural nitrogen cycle of the soil with massive amounts of fertilizers; once this cycle was broken, the rivers were contaminated with nitrate. Reaching the Bay-Delta area, the excess nitrate has destroyed the natural balance of the self-purifying processes in these waters, with the foul results that are only too well known to those who live in that once-sparkling natural area.

This much is known fact. But once the natural cycles of the Bay-Delta waters are disrupted, other biological disasters may soon follow. At the present time, in a number of regions of the Bay-Delta waters, the bacterial count exceeds the limit recommended by the California Department of Public Health for water contact sports. This may be due to the entry of too much untreated sewage. But experience with the waters of New York harbor suggests another, more ominous, possibility which connects this problem, too, to the drainage of nutrients from agricultural areas, as well as from treated sewage. In New York harbor, in the period 1948–1968, there has been a 10–20-fold increase in the bacterial count despite a marked improvement in the sewage treatment facilities that drain into the bay. Here too there has been an increase in nitrate and phosphate nutrients, in this case largely from treated sewage effluent. The possibility exists that bacteria, entering the water from sewage or the soil, are now able to grow in the enriched waters of the bay. If this should prove to be the case, changes in water quality such as those which have occurred in the Bay-Delta area may lead to new, quite unexpected, health hazards. The soil contains many microorganisms which cause disease in human beings when they are first allowed to grow in a nutrient medium. There is a danger, then, that as the Bay-Delta waters become laden with organic matter released by dying algae (resulting from overgrowths stimulated by agricultural and municipal wastes), disease-producing microorganisms may find conditions suitable for growth, resulting in outbreaks of hitherto unknown types of waterborne disease.

Nor does the nitrogen story quite end here. We now know that a good deal of the excess nitrogen added to the soil by intensive fertilization practices may be released to the air in the form of ammonia or nitrogen oxides. In the air, these materials are gradually converted to nitrate and carried back to the ground by rain. In 1957, a national study of the nitrate content of rainfall showed excessively high levels in three heavily fertilized regions: the Corn Belt, Texas, and the Central Valley of California. There is increasing evidence that nitrate dissolved in rain can carry enough nutrient into even remote mountain lakes to cause algal overgrowths and so pollute waters still largely free of the effects of human wastes. Recent pollution problems in Lake Tahoe may originate in this way.

I cite these details in order to make clear a profound and inescapable fact of life: that the environment is a vast system of interlocking connections—among the soil, the water, the air, plants, animals, and ourselves—which forms an endless, dynamically interacting web. This network is the product of millions of years of evolution; each of its connections has been tested against the trial of time to achieve a balance which is stable and long-lasting. But the balance, the fine fabric of physical, chemical, and biological interconnections in the environment, is a delicate one; it hangs together only as a whole. Tear into it in one place—such as the soil of the Central Valley—and the fabric begins to unravel, spreading chaos from the soil to the rivers, to the Bay, to remote mountain lakes, to the mother and her infant child. The great Central Valley has become rich with the fruits of the land, but at a cost which has already been felt across the breadth of the state and which is yet to be fully paid.

Nor do we yet know how the destructive process can be halted, or if indeed it can be. In Lake Erie, where the natural balance of the water system has already been largely overwhelmed by excessive nutrients, no one has yet been able to devise a scheme to restore its original condition. The Bay-Delta waters may suffer the same fate. The recently released Kaiser Engineers' report on the San Francisco Bay-Delta Water Quality Control program predicts that the drainage of agricultural nutrients (nitrogen and phosphorus) from the San Joaquin will continue unabated for at least the next 50 years if present agricultural practices persist. The report proposes a system which, to control only the deleterious effects of the drainage in the Bay-Delta area, will cost about $5 billion in that period. And even at that cost the plan will only transfer the problem to the ocean—where the waste nutrients are to be discharged—which can only bring disaster to

this last remaining natural resource, on which so many of our future hopes must rest.

The root of the problem remains in the soil, for if the disrupted balance is not restored there, its destructive effects will only spread into further reaches of the environment. Tragically, each year of continued over-fertilization of the soil may make recovery increasingly difficult. For example, we know that inorganic nitrogen nutrients stop the nitrogen-fixing activity of microorganisms and may eventually kill them off or at least encourage them to mutate into non-fixing forms. If the natural fertility of the soil is ever to be restored, we may have to rely heavily on these microbial agents; but this becomes less and less possible as we continue to use massive amounts of fertilizer. In effect, like a drug addict, we may become "hooked" on continued heavy nitrogen fertilization and so become inescapably locked into a self-destructive course.

This same tragic tale of environmental disaster can be told of another prominent feature of California agriculture—insecticides. One important aspect of the biological capital on which agricitural productivity depends is the network of ecological relationships that relate insect pests to the plants on which they feed, and to the other insects that, in turn, prey on the pests. These natural relations serve to keep pest populations in check. Pests which require a particular plant as food are kept in check by their inability to spread onto other plants; the other insects which parasitize and prey upon them exert important biological control over the pest population.

What has happened in attempts to control cotton pests—where the great bulk of synthetic insecticide is used in the United States—shows how we have destroyed these natural relations and have allowed the natural pest-regulating machinery to break down. The massive use of the new insecticides has controlled some of the pests that once attacked cotton. But now the cotton plants are being attacked instead by new insects that were never previously known as pests of cotton. Moreover, the new pests are becoming increasingly resistant to insecticide through the natural biological process of selection, in the course of inheritance, of resistant types. In Texas cotton fields, for example, in 1963 it took 50 times as much DDT to control insect pests as it did in 1961. The tobacco budworm, which now attacks cotton, has been found to be nearly immune to methylparathion, the most powerful of the widely used modern insecticides.

California, too, has begun to experience environmental disaster from teh intensive use of insecticides. Consider only a single recent example. In 1965 the rich cotton fields of the Imperial Valley weer invaded by the Pink Bollworm from Arizona. The Department of Agriculture began an "eradication" program based on a fixed schedule of repeated, heavy, insecticide sprays. The Pink Bollworm was controlled (but by no means "eradicated"); however, the cotton plants were then attacked by other insects which had previously caused no appreciable damage—the beet army worm and the cotton leaf perforator. The insecticide had killed off insects that were natural enemies of the army worms and perforators, which had in the meantime become resistant to the sprays. Catastrophic losses resulted. The problem is now so serious that Imperial Valley farmers have proposed the elimination of cotton plantings for a year in order to kill off the new pests, which cannot survive a year without food.

California is beginning to experience the kind of insecticide-induced disaster already common in Latin American experience. In the Cañete Valley of Peru, for example, DDT was used for the first time in 1949 to control cotton pests. Yields increased—temporarily. For soon the number of insects attacking the cotton grew from 7 to 13 and several of them had become resistant to the insecticides. By 1965, the cotton yields had dropped to half their previous value, and despite 15–25 insecticide applications, pest control was impossible. Productivity was restored only when massive insecticide application was halted and biological control was reestablished by importing insects to attack the pests.

These instances are, again, a warning that present agricultural practices may be destroying the biological capital which is essential to agricultural productivity—in this case, the natural population of insects that attack insect pests and keep them under the control of a natural balance. Again, if the ecologically blind practice of massive insecticide treatment is allowed to continue, there is a danger of permanently losing the natural protective insects—and agriculture may become "hooked" on insecticides.

And here too we see disaster spreading through the environmental network. In 1969, the Food and Drug Administration seized two shipments of channel jack mackerel, an ocean fish originating from Terminal Island, Los Angeles, because of excessive residues of DDT and related insecticides. Insecticides draining off agricultural lands into the Bay-Delta area have caused levels of DDT which exceed the amount allowed by the FDA to appear in the bodies of striped bass and sturgeon. It is possible that the recent decline in San Francisco Baby crabs may be due to the same cause. Spreading through the food chain, DDT has begun to cause disastrous declines in the population of birds of prey, and there is some evidence that gulls are being affected as well. The latter would extend the web of disaster even further, for the gulls are vital in controlling waste in shoreline waters.

Now let me follow the track of environmental disaster from the farm to the cities of California. Again, nitrogen is a valuable guide, this time, surprisingly enough, to the smog problem. This problem originates with the production of nitrogen oxides by gasoline engines. Released to the air, these oxides, upon absorption of sunlight, react with waste hydrocarbon fuel to produce the noxious constituents of smog. This problem is the direct outcome of the technological improvement of gasoline engines: the development of the modern high-compression engine. Such engines operate at higher temperatures than older ones; at these elevated temperatures the oxygen and nitrogen of the air taken into the engine tend to combine rapidly, with the resultant production of nitrogen oxides. Once released into the air, nitrogen oxides are activated by sunlight. They then react with waste hydrocarbon fuel, forming eventually the notorious PAN—the toxic agent of the smog made famous by Los Angeles.

The present smog-control technique—reduction of waste fuel emission—by diminishing the interaction of nitrogen oxides with hydrocarbon wastes, enhances the level of airborne nitrogen oxides, which are themselves toxic substances. In the air, nitrogen oxides are readily converted to nitrates, which are then brought down by rain and snow to the land and surface waters. There they add to the growing burden of nitrogen fertilizer, which, as I have already indicated, is an important aspect of water pollution. What is surprising is the amount of nitrogen oxides that are generated by automotive traffic: more than one-third of the nitrogen contained in the fertilizer currently employed on U.S. farms. One calculation shows that farms in New Jersey receive about 25 pounds of nitrogen fertilizer per year (a significant amount in agricultural practice) from the trucks and cars that travel the New Jersey highways. Another recent study shows that in the heavily populated eastern section of the country, the nitrate content of local rainfall is proportional to the local rate of gasoline consumption.

Thus, the emergence of a new technology—the modern gasoline engine—is itself responsible for most of the smog problem and for an appreciable part of the pollution of surface waters with nitrate. And no one needs to be reminded that smog is a serious hazard to health. Again we see the endless web of environmental processes at work. Get the engines too hot—for the sake of generating the power needed to drive a huge car at destructive speeds—and you set off a chain of events that keeps kids off the playground, sends older people to a premature death, and, in passing, adds to the already excessive burden of water pollutants.

This is some of the tragic destruction that lies hidden in the great panorama of the changing California environment—costs to the people of the state that do not appear as entries in the balance sheets of industry and agriculture. These are some of the great debts which must be paid if the state's environment is to be saved from ultimate destruction. The debts are so embedded in every feature of the state's economy that it is almost impossible to calculate them. Their scale, at least, can be secured from the figure produced for the water quality-control system which will transfer the pollution problem of the Bay-Delta area to the ocean: $5 billion over 50 years, and continuing at $100 million a year.

At what cost can the smog that envelops Los Angeles be cleared up—as it surely must if the city is to survive? Start with the price of rolling back air pollution that risks the health and well-being of the citizens of the Bay area, the Peninsula, and San Diego. And do not neglect the damage already done by smog to the pine forests in the area of Lake Arrowhead. Nitrogen oxides have just been detected in Yosemite Park; what will it cost if the state's magnificent forests begin to die, unleashing enormous flood problems? How shall we reckon the cost of the huge redwoods on the North Coast, which need for their secure footing the soil built up around their roots during annual floods, when these floods are stopped by the new dams and the trees begin to topple? How shall we determine the cost of the urban spread which has covered the richest soil in the state? What will it cost to restore this soil to agriculture when the state is forced to limit intensive, pollution-generating fertilization, and new lands have to be used to sustain food production? What is the price of those massive walls of concrete, those freeways, which slice across the land, disrupting drainage patterns and upsetting the delicate balance of forces that keeps the land from sliding into ravines? Against the value of the new real-estate developments on landfills in San Francisco Bay, calculate the cost of the resulting changes in tidal movements, which have decreased the dilution of the polluting nutrients by fresh water from the sea and have worsened the algal overgrowths. Or balance against the value of the offshore oil the cost of a constant risk of beach and ocean pollution until the offending wells are pumped dry. Finally, figure, if possible, what it will cost to restore the natural fertility of the soil in central California, to keep the nitrogen in the soil, where it belongs, and to develop a new, more mixed form of agriculture that will make it possible to get rid of most insecticides and make better use of the natural biological controls.

If the magnitude of the states environmental problems is staggering, perhaps there is some consolation in the fact that California is not alone. Most of Lake Erie has been lost to pollution. In Illinois, every major river has been overburdened with fertilizer drainage and has lost its powers of self-purification. Automobile smog hangs like a pall over even Denver and Phoenix. Every major city is experiencing worsening air pollution. The entire nation is in the grip of the environmental crisis.

What is to be done? What can be done? Although we are, I believe, on a path which can only lead to self-destruction, I am also convinced that we have not yet passed the point of no return. We have time—perhaps a generation—in which to save the environment from the final effects of the violence we have already done to it, and to save ourselves from our own suicidal folly. But this is a very short time to achieve the massive environmental repair that is needed. We will need to start, now, on a new path. And the first action is to recognize how badly we have gone wrong in the use of the environment and to mobilize every available resource for the huge task of saving it.

Yet all the marvelous knowledge in our universities and laboratories seems now to stand helpless, while the air becomes fouler every day, beaches covered with oil, and precious water and soil more heavily laden with pollutants.

But there is another crisis—one that has struck the nation's entire scientific community. This crisis, like the environmental one, is also man-made and disastrously shortsighted; it is the drastic curtailment of the funds for research and education.

What a tragedy! At the very moment that the nation has begun to sense the urgency of the environmental crisis, when the first steps in the large and urgent task must be taken in the laboratories and classrooms of our universities, the tools are denied the men who would use them.

The huge undertakings listed here cannot even be begun unless we drastically reorganize our priorities. We cannot continue to devote the talent of our engineers and the competence of our workers to the production of overpowered, pollution-generating cars that do violence on the road and in the ecosystem. We cannot burden our productive resources with a monstrous device like the SST—which, if used in the U.S., will bring the violence of airport noise to 60 million Americans. We cannot continue to waste manpower and resources on weapons that become obsolete before they are produced—and which, if ever used, will destroy this planet as a place for human life. In a crisis of survival, business as usual is suicide.

The environmental crisis has brought us to a great turning point in this nation's history. We have become a nation that wields the greatest power in the history of man; power in the form of food, industrial plants, vehicles, and the weapons of war. We have also become a nation beset by violence; on the battlefield, on the highways, in personal encounters, and, more fundamentally, in the destruction of the natural, harmonious fabric of the environmental system which supports us. It is this fundamental violence to the world in which we live which divides us, as we compete among ourselves for the earth's goods, unaware that each of us, in our own way is thereby contributing to the destruction of the whole that supports us all.

The time has come to forge a great alliance in this nation: All of us now know that if we are to survive, the environment must be maintained as a balanced, harmonious whole. We must all work together to preserve it. If we fail, we shall abandon the place where we must live—the thin skin of air, water, soil, and living things on the planet Earth—to destruction. The obligation which our technological society forces upon all of us, young and old, black and white, right and left, scientist and citizen alike, is to discover how humanity can survive the new power which science has given it. Every major advance in the technological competence of man has enforced new obligations on human society. The present age of technology is no exception to this rule of history. We already know the enormous benefits it can bestow, and we have begun to perceive its frightful threats. The crisis generated by this knowledge is upon us.

We are enormously fortunate that our young people—the first generation to carry strontium 90 in their bones and DDT in their fat—have become particularly sensitive to this ominous paradox of the modern world. For it is they who face the frightful task of seeking humane knowledge in a world which has, with cunning perversity, transformed the power that knowledge generates into an instrument of catastrophe.

The environmental crisis is a grim challenge. It also is a great opportunity. From it we may yet learn that the proper use of science is not to conquer nature, but to live in it. We may yet learn that to save ourselves we must save the world that is our habitat. We may yet discover how to devote the wisdom of science and the power of technology to the welfare, the survival of man.

IRRESPONSIBLE COLUMNIZING ON ORDERLY MARKETING

(Mr. WYMAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. WYMAN. Mr. Speaker, Marquis Childs' attempt to tie needed restrictions on floods of cheap foreign imports to the prospect of further fueling the fires of inflation in this country is irresponsible columnizing. Reasonable restrictions on as yet unrestricted imports, especially in the cheap footwear field, are unrelated to the price spiral involved in the inflationary process.

In a current column, Mr. Childs paints a dark picture of lobbyists seeking preferential consideration against the public interest when the truth of the matter is that tens of thousands of American workers and whole U.S. industries are fighting for their lives because they sell a product that has a high labor cost. Abroad this cost is but a fraction of what it is in this country. Left to unrestricted competition in the U.S. market there will be a gradual and inescapable loss of shoe production to low-cost labor areas outside of the United States of America except for a few high-quality specialized lines.

It is the responsibility of this Government and of its legislative branch in particular, to insure that this does not happen by imposing reasonable restrictions on future imports of footwear, textiles, and certain other imports. This can be accomplished by enactment of orderly marketing legislation. This law should be passed now—with or without administration support.

Mr. Childs' position would surrender U.S. jobs to foreign nations by the thousands. It would spell the end of the road for hundreds of American factories. His description of Senator PERCY'S characterization of Senator COTTON'S amendment to authorize the President to block imports, as "an unconscionable surrender of legislative power to the executive" is a gross example of grandstanding by overstatement on the part of one who knows better. Congress cannot keep a currently flexible eye on import figures with attendant import controls or relaxation thereof. The committee mechanism is not that flexible. This is clearly for the executive branch. What the Senator really is complaining about is the prospect of a policy of doing something to protect American workers and American industry. Apparently he, too, wants to turn it all over to foreign production if they can make it cheaper.

Worthy of consideration here is not only the American worker but the American consumer. Clearly, the cheapest of cheap foreign imports are not good for American feet. Any podiatrist will confirm this fact.

Curiously, even many of the luxury shoe imports end up costing American taxpayers more than what they would pay for the corresponding American luxury shoe. Construction of higher priced shoes abroad has changed in many areas so that they are difficult to repair in the United States of America. A shoe repairman demonstrated this to a constituent of mine recently, showing him a heel from a woman's shoe that had been imported. The plastic heel was a molded one. It was installed by drilling the heel proper with approximately a $\frac{3}{16}$-inch drill in five places and then driving in the plastic heel that had five plastic pins molded onto its thin plastic heel plate. When this thin plastic heel plate wears out it has to be replaced. The only alternative that shoe repairman has in this country is to replace it with materials on hand. Being faced with a heel that has five holes in it and therefore lacks sufficient surface to use nails, to have material on hand that would meet the import design would necessitate hundreds of styles of heel stock that are beyond his capability.

Now it is both in the junk class and luxury class of footwear imports that shoe repairmen are running into problems. This is a justifiable item deserving of attention on the part of those who are so interested in consumer protection these days. It deserves widespread publicity.

Mr. Speaker, it is becoming a fair question these days—Does the administration really want to help the shoe industry? If it does, the road is open. It is easy. Just pass the word that the light is green for an orderly marketing law. I venture to say it would not take 30 days for this to become a reality.

Those who espouse the irresponsible course of continued unrestricted foreign imports such as Mr. Childs does in his column, have, over the years, been responsible for more troubles for the working men and women of this country than Carter has pills. If they had their way, wages in the United States would be forced down to European levels and eventually toward Oriental levels as production from the Far East steps up to gleefully feast in the American market.

Union members can well ask themselves and their leaders which side their bread is buttered on in this raging controversy. The answer is not in continued unrestricted reciprocal trade. This is demonstrably true in the shoe and textile industries.

I am including the Childs column at this point in the RECORD to show just how grossly the situation can be misstated by those who seek to raise spec-

ters of financial loss in the mind of the general public should Congress provide a measure of protection for critically hurt domestic industries. This has always been the clarion call of the free traders. Against this must be matched the fact that in simple truth those seeking minimum protections are merely calling for an orderly future rise in imports checking unrestricted floods against which no U.S. industry can plan. Legislation which I introduced in January, H.R. 733, will accomplish just that.

The United States must not become a dumping ground for cheap foreign goods at the expense of the jobs of millions of Americans, many of whom have no other skills. There is a crisis in the U.S. shoe industry today. Can it be that those of Mr. Childs' persuasion do not know this? Or knowing it, do not care?

FRESH IMPORT RESTRICTIONS COULD INTENSIFY INFLATION

(By Marquis Childs)

With the surge of Christmas shopping nobody is looking, but if certain powerful lobbies have their way the cost of basic items in the householder's budget will take a sharp jump in the New Year. The prospect is for more rather than less inflation as the spiral of rising prices becomes a political issue hardly second to the Vietnam war.

The immediate threat is in shoes. The pressure for a quota on foreign imports has grown to such a volume that 72 senators signed a petition to President Nixon calling for "voluntary" quotas. Needless to say, voluntary quotas are a fiction, since once the United States turns on the heat the shoe-exporting countries have no choice but to accept.

From Italy, Spain, France and Britain come specialized and expensive footwear. Japan and Taiwan export low-cost shoes that, according to retailers opposing the quota, are unavailable from domestic makers. It is at the bottom of the scale that the rise in prices—perhaps as much as 15 to 25 per cent—would be most immediate if a quota greatly limits foreign imports.

Last spring the shoe industry is reported to have collected a kitty of $300,000 to lobby for a "voluntary" quota. The 72 senatorial signers to the petition to the White House is one measure of the success of the drive. Of that total, 20 signers are from big exporting states that would feel the backlash of certain reprisals from the countries feeling the pinch of an imposed quota.

Using the battered "tax reform" bill as a vehicle, Sen. Norris Cotton (R-N.H.), one of the strongest backers of a shoe quota, threw in an amendment giving the President broad powers to block imports from almost any nation. It was adopted by a vote of 65 to 30 after Sen. Charles Percy (R-Ill.), called it an "unconscionable" surrender of congressional powers to the executive.

The shoe industry is only the latest to move with powerful leverage against the free trade policy of the '60s. A "voluntary" quota on cotton textiles already imposed is hurting developing countries, notably South Korea and Taiwan, where American aid has been an important factor. A "voluntary" steel quota puts a limit on imports from Japan.

In his round-the-world trip early in the year Secretary of Commerce Maurice Stans made the threat clear that unless nations greatly curtailed their exports to this country in certain fields, conspicuously textiles, Congress in an increasing wave of protectionism would clamp on tariff restrictions. Pressed by Japanese newsmen to say whether other "voluntary" quotas were impending, Stans said: "At the present time it is not our intention to seek voluntary negotiations for any other commodities than textiles."

Within trade circles there was immediate speculation that after textiles Stans would respond to the demands of other industries, shoes first. And this was underscored when Senate Minority leader Hugh Scott came out of the White House to say that the President considered shoes as being "fully as urgent as textiles."

Here, as in almost every other area, the question is where Mr. Nixon really stands. How far is he willing to go in pushing for solutions that are in the national interest but that have active opposition from powerful minority interests? In his trade message to Congress the President's rhetoric on behalf of keeping the channels clear and free in America's own self-interests was unexceptional.

Rhetoric is not enough. In a speech that got too little attention John Gardner, head of the Urban Coalition on Action Council, said what is widely felt here but seldom expressed that if there is to be action in solving the nation's problems the President must show far greater urgency. He must move with the kind of vigor he employed in putting over the antiballistic missile and in trying to get the Senate to approve the Haynsworth nomination to the Supreme Court.

That the price spiral is continuing upward there can be little doubt. Cutting back or eliminating competitive imports will only kick it up faster.

The rhetoric dispensed with one hand hardly conceals the counter maneuvers or the careful indifference on the other hand. In trade, in hunger, in a half-dozen areas that is the tragic duality of the Nixon administration.

ST. LAWRENCE SEAWAY: A BOONDOGGLE GOING TO POT

(Mr. SAYLOR asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SAYLOR. Mr. Speaker, in a Wall Street Journal article last Friday, the St. Lawrence Seaway was characterized as "deeply in debt, in disrepair, and almost obsolete—it may just go to pot." Fifteen years ago during the log-rolling authorization debate for the seaway I apologized to my colleagues in this Chamber for being a "purveyor of gloom" about the economic prospects for the seaway. All has come to pass; after 10 years of operation, the $500 million white elephant is slowing drowning in its own economic miscalculations.

My gloomy prognostications of 1954 were based on the expected loss of jobs and the adverse impact the seaway would have on the industries served by the St. Lawrence area. Fortunately, the impact on jobs and industry has been less than I anticipated—not because the seaway did not try to capture business, but because in a market economy, businessmen just do not buy a pig-in-a-poke. Nevertheless, the American public has poured $500 million into the St. Lawrence and any way you cut the pie, it has been an expensive experiment.

The Journal article points out there is a cry being raised to wipe out the seaway debt. What then? Another investment by the American people to bail out something that should be abandoned? The seaway is a monument to Government's inability to properly assess economic risk before plunging ahead with the expenditures of public money. The plight of the St. Lawrence Seaway serves a graphic lesson of what happens when traditional American, market-risk, economic philosophy is thrown over for industrial socialization. I can think of no finer tribute to the Socialists of this country who have foisted one after another of such projects on an unsuspecting public than to let the seaway fill up.

I have appended to my remarks a copy of the Wall Street Journal article concerning the economic woes of the St. Lawrence Seaway:

DIRE STRAITS: ST. LAWRENCE SEAWAY, COMPLETING 10TH YEAR, IS AWASH IN PROBLEMS—ITS TRAFFIC IS OFF, DEBT IS UP AND IT IS GETTING OBSOLETE; SOME SHIPS CURTAIL RUNS—STEEL SILOS TRAVEL BY RAIL

(By Jim Hyatt)

CLEVELAND.—The last ocean-going vessel leaves the St. Lawrence Seaway this weekend, ending the 2,300-mile water routes' 10th season of operation. It has not been a very good year.

For the St. Lawrence Seaway, heralded a decade ago as a "second Mediterranean" or a "fourth seacoast" for the U.S., is a flop at this point. Shippers shun it. Shipbuilders curse it. Ship operators ignore it. It is deeply in debt, in disrepair and almost obsolete. Its traffic this year probably will be the lowest since 1964, and some people worry about its future.

"The seaway won't be shut down," insists one backer of the project. And then he adds, "But it may just go to pot."

The seaway, a joint U.S.-Canadian project that cost $500 million to build, is an engineering wonder. A channel-and-lock system that bypasses rapids, lifts ships 600 feet from the time they enter the seaway at the mouth of the St. Lawrence River in the Atlantic Ocean to the time they reach Lake Superior.

WHAT WENT WRONG?

A big ship can make the trip from the Atlantic to Duluth in eight days, and about the only problem the seaway builders envisioned was one of traffic jams as everybody rushed to use the wondrous new route. They pictured huge ocean-going vessels docking in such previously landlocked places as Chicago, Milwaukee and Cleveland. They figured seaway ships, with their low rates, would take cargo away from the railroads. They saw vast markets opening up for Midwestern-made goods, and they saw the Midwest being showered with foreign-made manufactures transported cheaply to its doorstep by ship.

But none of these things has come to pass. The main problem, say people who are expert in the affairs of the seaway, is that everybody underestimated the difficulty of persuading shippers to abandon rail transport for moving goods to and from East Coast ports. So insignificant is the seaway's presence here in Cleveland, for example, that the Port of Cleveland handles only 3% of the goods manufactured for export in the area.

"It's like water wearing away rock," complains Richard Shultz, executive director of the Port Authority of Cleveland.

All told, seaway ships carried about 40 million tons of cargo this year, it's estimated, off sharply from the 48 million tons of 1968. Seaway officials attribute part of the decline to a strike of iron-ore workers in Canada, but some observers say the total would have been down even without the strike. The 1968 total was up from 1967 but was below the peak of 49.2 million tons of 1966. The dearth of business is causing some American-flag

carriers to cut back on their seaway operations and some have indicated they might pull out of the Great Lakes entirely. "We can't cruise like a taxicab looking for business," asserts one shipping official. "The cargo just isn't there."

BEWARE OF THE MUD

Scarcity of cargo isn't the shipping lines' only complaint. Until recently, they maintain, many seaway ports weren't dredged to the maximum 27-foot depth of the rest of the seaway. What's more, they say, that 27-foot depth is no longer enough. Many old ships would get stuck in the mud if they came into the seaway fully loaded, and some new ships don't have a chance. New container-ships under construction have 33-foot drafts—and are 10 feet too wide for the 80-foot locks. Estimates of the cost to modernize the seaway to handle these big new ships range up to $5 billion.

The decline in traffic on the seaway could turn into a vicious cycle. The shipping lines say they want to cut service because the shippers don't have much to ship. And shippers say one reason they don't use the seaway much is that the number of ships available is decreasing, making schedules erratic.

In mid-October, for instance, Lubrizol Corp. of Cleveland needed quick shipment to Liverpool, England, of 150 drums of a petroleum additive. But the next possible sailing from Cleveland was three weeks off, and even then a ship would call here only if enough cargo were available to make a stop worthwhile. So the company spent an added $1,300 to ship the drums by rail to New York, where they were loaded on a ship scheduled to arrive in Liverpool two days before the earliest date any ship might show up in Cleveland.

Anchor Hocking Corp. of Lancaster, Ohio, says it has halved its seaway tonnage in recent years because of the haphazard sailing schedules.

WHAT WILL HAPPEN IN 2009?

The less tonnage hauled, the more the seaway falls in debt. The seaway is committed to repaying the U.S. and Canada its capital costs as well as to meeting its operating expenses. Legislation requires this capital to be repaid by the year 2009, but based on current traffic projections and present tolls the seaway will instead be $821 million in debt by then, according to Sen. Walter F. Mondale of Minnesota.

Sen. Mondale thinks the seaway's only problem is its commitment to repay its capital costs. "The financial framework of the seaway is unfair and unreasonable and discriminates against the nation's fourth seacoast," he states. At the moment, the seaway is $20 million behind in debt payments, and one Congressman says it is "dangerously close to going bankrupt."

Sen. Mondale and some other members of Congress think that the U.S. should cancel the existing debt and that the seaway should simply be required to turn over to the Treasury any money it takes in beyond its operating costs. Such a proposal doesn't sit well well with everyone. "Holy hell will break loose" if pro-seaway members try to eliminate the debt, asserts one source who favors the Eastern ports.

Another solution, of course, would be to increase tolls, and Sen. Mondale fears possible 30% to 60% rises. But Leonard Goodsell, executive director of the Great Lakes Commission, an association of officials of Midwestern states, says an increase of only 10% would "knock us out of a lot of world markets."

It's questionable, however, how many markets there are to be knocked out of. In an appraisal of the seaway, the Canadian Imperial Bank of Commerce says: "Neither the fear that the seaway would allow foreign manufacturers to flood the markets of the St. Lawrence Basin nor the hope that it would enable producers there to greatly expand their markets has been realized."

At the moment, the seaway tolls do provide some real bargains. One example: A recent shipment of power transformers from Oil City, Pa., to LeHavre, France, cost the shipper $1,387 a ton through Cleveland, compared with $2,232 a ton had the transformers been shipped by rail to New York and then to France. Rail rates for some goods, however, are designed to encourage use of East Coast ports, as seaway backers see it. It costs nine times as much per mile, for instance, to ship steel silos by train from Kankakee, Ill., to Chicago than from Kankakee to New York.

Seaway officials cite the high rail rates to Great Lakes ports as just one of the problems they are fighting. They also complain that Congress has blocked the St. Lawrence Seaway Development Corp. from using any funds for advertising and promotion. This ban means the seaway is "operating with its hands tied behind its back," asserts H. D. Doan, president of Dow Chemical Co. and chairman of the seaway's 10th anniversary observance.

OPERATION BREAKTHROUGH ANNOUNCEMENT

(Mr. ANDERSON of Illinois asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. ANDERSON of Illinois. Mr. Speaker, today Housing and Urban Development Secretary George Romney announced the opening of the final round of negotiations on Operation Breakthrough housing design and site proposals. The Department had originally intended to make the final selections known in mid-November, but the national interest and response to the program has been so overwhelming that it has taken HUD longer than originally anticipated to sift through all the proposals. I think this response augurs well for Operation Breakthrough, which is an attempt to introduce new systems of housing construction and marketing to meet our national housing goal.

Today, Secretary Romney announced the names of 37 housing system organizations selected from a total of 236 full housing systems proposals or type A proposals. Following further negotiations, about 20 of these will be chosen to build prototypes on some 10 sites around the Nation. The Secretary has also named the 11 site proposals which have been chosen for further negotiations; these have been selected from 218 site proposals. And some 365 type B proposals are still under consideration. These cover research and development concepts for various "hardware" and "software" components for the housing systems.

Mr. Speaker, I wish to commend HUD on the outstanding progress it has made thus far with Operation Breakthrough. The national response is a clear indication of the time, effort, and weight which HUD has given this new program which was initiated in May of this year. At this point in the RECORD I include the HUD news release, the list of 37 type A proposals selected for further consideration, and a press release my office issued last week:

BREAKTHROUGH ANNOUNCES SITES, POTENTIAL PLANNERS, BUILDERS

The Department of Housing and Urban Development today announced the start of final evaluations and negotiations with proposers seeking to participate in Operation Breakthrough, HUD's major program to help solve the Nation's housing problems.

Secretary George Romney, announcing the detailed discussions and negotiations, said that National interest in the program had exceeded expectations, and many more proposals were submitted than were anticipated.

"To assure that the very best selection is made from the very large number of good plans, further discussions are necessary," Romney said. "We want to be certain that every phase of the program is fully clarified and understood. We want no possible misunderstanding to threaten the success of the program.

"Detailed discussions and negotiations are being held with localities offering prototype sites, as well as with site planners, and prospective producers of housing systems.

"At the conclusion of these talks, HUD will make final arrangements for sites and enter into contracts with site planners and producers of the housing systems finally selected.

"However," he emphasized, "we are now confident that improved approaches in all aspects of the housing business—management, financing methods, land planning, and development, housing system technology, and company strength—are available in the combinations of companies selected for further negotiations.

"These housing concepts are in the forefront of today's available housing production technology. They will take the housing industry from the construction, financing, and management methods of the past, to the production, financing, and management methods of the present and the future.

"They cover a wide range of materials, and include some systems that are already in production, some that are nearing production, and some that still require design, testing, and performance evaluation before production can be started.

"We are also convinced that the sites and the site planners selected for further negotiation offer the opportunity to demonstrate to the Nation how modernization of building, housing and zoning regulations, and improved land use can lead to even greater improvements in housing systems. . . . This is only the beginning of the progress that must, and can be, made."

Negotiations will be conducted with the proposers and local officials of the following prototype sites: Indianapolis, Indiana; Jersey City, New Jersey; Kalamazoo, Michigan; Macon, Georgia; Memphis, Tennessee; Sacramento, California; St. Louis, Missouri; Wilmington, Delaware (New Castle County).

In addition, HUD is still considering proposed sites in the States of Washington and Texas. The sites chosen followed thorough examination of the 218 sites proposed.

In all cases, FHA site engineers and appraisers inspected and evaluated the sites. Regional Office officials added their suggestions and evaluations. And for many of the proposed sites, HUD officials made follow-up inspection trips.

"In addition to the Operation Breakthrough plan to develop prototype sites, HUD plans to work with site proposers and community groups to arrange for housing to be developed on all suitable proposed sites in accordance with community needs," the Secretary added.

Eleven site planners, of 82 organizations that submitted proposals, have been selected for further discussions and negotiations. (Their names are listed separately). Each of the planners finally selected will be responsible for preparing an overall plan for

a designated site that effectively combines the housing systems selected for that site into good, attractive, livable, community environments.

A list of the 37 housing system organizations with whom further discussions and negotiations are planned is attached. The prime contractor, or consortium (group) names are also shown as well as the subcontractors or team members.

HUD officials said they expect to finally select about 20 of these housing system organizations under consideration.

These organizations were selected from 236 proposals submitted to HUD for Type A (full housing systems). The proposals were evaluated on the basis of building system designs, production methods, financial capability, management, land use design, and other factors. These building concepts include some now in production; some that are new approaches for the proposing organization, although not wholly new concepts; some that are new concepts; and some foreign systems that will be adapted to U.S. methods and designs.

The 365 Type B proposals are still being evaluated. These cover advanced research and development of ideas or concepts not yet ready for prototype construction, or which provide individual elements of a total housing system. These include "hardware" items, as well as "software" elements concerned with management, financing, site development, and user needs.

The Type B proposers being named today for further talks are: Ross, Hardies, O'Keefe, Babcock, McDugald & Parsons, of Chicago, Ill., to prepare a manual on practical methods for overcoming obstacles that bar new income housing; and George Washington University of Washington, D.C., to develop feasible recommendations for improvement in real property tenure and transfer practices to reduce closing and financing costs.

Three Type A full housing systems proposals that are being considered for Type B contracts are The Habitat Group of Rio Piedras, Puerto Rico; Aitken, Collins & Associates of Berkeley, California; and Dano Modules, Inc. of Chicago, Illinois.

During this negotiation period, discussions will be held with consultants in specific areas to obtain their comments on the various concepts selected for possible contract awards. HUD officials said their schedule calls for the final selections to be made in about a month.

Preliminary letter contracts will be awarded to site planners so they can assist HUD in further evaluation of the housing systems, and to help in matching housing systems to prototype sites.

Mr. Harold B. Finger, HUD Assistant Secretary for Research and Technology, has the overall responsibility for all negotiations and discussions. Mr. Alfred A. Perry, Program Director of Operation Breakthrough, is his personal representative in the negotiations.

OPERATION BREAKTHROUGH—
TYPE A PROPOSALS

HOUSING SYSTEMS ORGANIZATIONS SELECTED FOR FURTHER DISCUSSION, EVALUATION, AND NEGOTIATIONS

Alodex Corp., Memphis, Tenn.; Ellers, Reaves, Fanning & Oakley, Inc., Memphis, Tenn.; Cambridge Seven Assoc., Inc., Cambridge, Mass.; Low and Rodin, London, SWI, England; Building Design Partnership, London WIP 2DA, England.

Aluminum Co. of America, Pittsburgh, Pa.; Christian Frey, San Francisco, Calif.; Component Bldg. Systems, Ltd.

Ball Bros. Research Corp., Boulder, Colo.; Borg-Warner Corp., Chicago, Ill.; Mr. Elliott H. Brenner, AIA, Lafayette, Ind.; Mr. Leo E. Zickler, Indiana.

Bechtel Corp., San Francisco, Calif.; Stressed Structures, Inc., Denver, Colo.; Building Systems Dev., Inc., San Francisco, Calif.

Henry C. Beck Co., Atlanta, Ga.; Balency-MBM-U.S. Corp., New York, N.Y.; Raymond D. Nasher, Dallas, Tex., Borg-Warner Corp., Chicago, Ill.

Boise-Cascade Corp., Boise, Id.; Dalton-Dalton-Little, Cleveland, Oh.; Frank Hall Assoc.; Computer Applications, Inc.; National Bldg. Agency; David Crane Assoc.; Brevard Engineering.

Christiana Western Structures, Los Angeles, Calif.; B. A. Berkus Assoc.; Mutual Ownership Dev. Fndn.

Descon/Concordia—A joint venture between: Concordia Mgmt., Ltd., Montreal, Canada; Descon Mgmt Corp., Ltd., Montreal, Canada.

Dev. Corp. of Am., Boston, Mass.; San-Vel Concrete Corp., Littleton, Mass.; Stull Assoc., Inc., Boston, Mass.

The Dow Chemical Co., Houston, Texas; Rohr Corp., Chula Vista, Calif.; Daniel Const. Co., Greenville, S.C.; Geometrics, Inc., Cambridge, Mass.

Forest City Enterprises, Inc., Cleveland, Ohio; Forest City Materials Co., Kent, Ohio; Thomas J. Dillon & Co., Inc., Akron, Ohio; Top Roc Corp., Hudson, Ohio; Barbitta-James & Assoc., Akron, Ohio.

General Electric Co., Philadelphia, Pa.; Hugh Gibbs, FAIA, & Donald Gibbs, AIA, Long Beach, Calif.; Leon Julius, AIA, Washington, D.C.; Candeub, Fleissig & Assoc., Newark, N.J.; FCH Services, Inc., Washington,, D.C.

Hercules, Inc., Wilmington, Dela.; Modular Structures, Inc., Bethesda, Md.; Armstrong & Salomonsky, Architects, Richmond, Va.; Harlan, Betke & Meyers; Univ. of Utah.

Home Building Corp., Sedalia, Mo.

Housing Development Co., Cleveland, Ohio; Architectural Computer Systems, Inc., Cleveland, Ohio; Concrete Bldg. Systems Co., Cleveland, Ohio; John David Mgmt. Co., Cleveland, Ohio; Kinsdale Construction Co., Cleveland, Ohio; Palevsky Industries, Inc., Cleveland, Ohio; Thomas G. Snavely Co., Cleveland, Ohio; Plaskolite Corp., Cleveland, Ohio; Zaremba & Sons, Cleveland, Ohio.

Keene Corp., New York, N.Y.; Formigli Corp., Philadelphia, Pa.; Alvin E. Gershen Assoc., Trenton, N.J.; Robert Hughes Assoc., Ltd., Montreal, Canada; Lennox Industries, Inc., Marshalltown, Iowa; Node-4 Assoc., Brooklyn, N.Y.; Ryan Inc. of Wisc., Janesville, Wisc.; Warner, Burns, Toan & Lunde, New York, N.Y.; Wickes Corp., Saginaw, Mich; Winston Development Corp, Chicago, Ill.

Levitt Tech, Corp., Lake Success, N.Y.; B. A. Berkus Assoc., Inc., Los Angeles, Calif.; The Stanley Works, New Britain, Conn.; Auerbach Corp., Philadelphia, Pa.; Dunham-Bush, Inc., Hamilton-Howe, Inc., Los Angeles, Calif.; Simpson Timber Co., Seattle, Wash.

United States Steel Corp., Pittsburgh, Pa.

Urban Systems Development Corp., Arlington, Va.; Hellmuth, Obata & Kassabaum, St. Louis, Mo.; Nat'l Urban League, New York, N.Y.; Chase Manhattan Bank, New York, N.Y.; Princeton Univ. Research Center for Urban & Environmental Planning, Princeton, N.J.; Westinghouse Info. Systems & Westinghouse Research Labs., Pittsburgh, Pa.

ANDERSON PRAISES CONFERENCE REPORT ON HOUSING BILL

WASHINGTON, D.C.—Congressman John B. Anderson (R-Ill.) today praised the House-Senate Conference Report on the Housing and Urban Development Act of 1969. The House of Representatives is today considering adoption of the report on the $4.9 billion housing authorization.

"I am especially pleased that the conferees have agreed to the amendment I introduced in the House which encourages the Secretary of HUD to eliminate restraints against the use of new technologies and materials in producing low-cost, high-quality housing," said Anderson. "This will give Secretary Romney a very essential weapon in

his fight to provide this nation with adequate housing. It is unconscionable in this age of moon shots that we are actually falling behind in meeting the basic shelter needs of our people."

The Anderson amendment is popularly referred to as the "Breakthrough Amendment" because it is aimed at ensuring the success of "Operation Breakthrough," a new HUD program launched in May of this year by Housing Secretary Romney. Operation Breakthrough is an attempt to enlist private industry in the design and construction of quality housing on a volume basis to meet the nation's critical housing shortage. HUD is currently considering some 650 such proposals from which 10 to 20 will be selected to be built as prototypes on eight to ten sites around the nation.

"My amendment directs the Secretary to assure, to the extent feasible, that there are no restraints by labor practices, building codes or zoning ordinances against the use of these new techniques which are crucial to the success of meeting our national housing goal of 26-million units in the next decade," explained Anderson. "This goal includes the need for six-million publicly assisted units in the next ten years, and HUD must be given every tool necessary to implement it."

MANAGING FOR CHANGE IN THE SEVENTIES

(Mr. PEPPER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PEPPER. Mr. Speaker, recently the International City Management Association, formerly known as the International City Managers Association, held its 55th annual conference in New York City. The theme of the conference was "Managing for Change in the '70's."

The ICMA has worked with cities and city managers since 1914 for the improvement of all aspects of local government administration. Although it is primarily a professional association of managers, it has always seen its mission as encompassing the administrative practices and procedures of local governments. For years, I have known of the ICMA's good work since Dade County is represented by a past official of the Association, Dade County Manager Porter Homer.

Under the able leadership of their executive director, Mark Keane, the ICMA is continuing to conduct a variety of programs, including research, training, information, publications and public affairs, which strive to meet the needs of today's urban administrator. In line with this endeavor, the ICMA invited three highly recognized management strategists, representing the disciplines of business, academia, and urban administration, to present papers on their involvement with city problems.

One of these papers was presented by Frank J. Carr, the director of the Westinghouse Information Systems Laboratory. Mr. Carr, himself an able administrator, is directing the Washington Corp., into applying its vast resources to solving urban problems. He combines the experience of many years of public administration problem solving with advanced computer-based technology to aid city, county, region, and State administrators in solving and defining their problems.

I was most impressed with Mr. Carr's speech which I feel contains a good deal of insight into a problem that concerns us all. Therefore, Mr. Speaker, I urge you and my colleagues to read Mr. Carr's paper as we are all concerned with managing for change in the 1970's.

The item follows:

MANAGEMENT STRATEGIES

(A background paper prepared by Frank J. Carr, director, Westinghouse Information Systems Laboratory, Pittsburgh, Pa., for discussion at the 55th annual conference of the International City Management Association, October 14, 1969)

Fundamentally, managers are people who control the use of resources. The problems of a manager are to identify the tasks before him and organize the available resources to accomplish these tasks. His problems are much more acute today than they were a century ago. As Margaret Mead has pointed out, "No one will live all his life in the world into which he was born, and no one will die in the world in which he worked in his maturity." The manager is faced not only with the problems and opportunities offered by new technologies, but he must carry out his work in a rapidly changing environment. This is clearly as true for the urban manager as it is for the business manager.

In a large measure, a manager's work itself creates change. In business, as in other areas, we are concerned with creating change that promotes the objectives of the enterprise. This function calls for a basic vision of the purposes of the enterprise and a continuing evaluation of its relations to its internal structure and external environment. Management strategies are the pragmatic techniques that are employed to assure that the organization maintains a proper relation to its environment.

Ultimately these strategies result in performance. Along the way, objectives are formed and plans are created to direct an organization's technology towards bringing products or services to customers in the face of competitors who are trying to do the same thing.

Because your environments differ, each of you must develop your own strategies. Today, I would like to discuss planning strategy, dealing with changing technology, and strategy for people—based on personal experience reaching back over 15 years and on the observations of others.

PLANNING STRATEGY

Generally, the formulation of management planning strategies rests on three actions:

(1) Analysis of past, present, and future trends, leading to an understanding of the bounds within which action may be taken.

(2) Setting of desirable objectives within what is possible.

(3) Formulation of plans that define the steps in utilizing resources to achieve the objectives.

The procedure begins, then, with a careful analysis of environmental factors, followed by an analysis of capabilities.

Environmental analysis

The first steps in making an environmental analysis are to interpret the underlying causes of historic patterns, to describe current performance, and to make future projections. In business, the important areas are three:

(1) Customers—market volume, customer mix, pricing.

(2) Competitors—market share, customer preference, and product cost, as well as competitive marketing and product development actions.

(3) Technology—particularly advances expected within the planning horizon, with a quantitative estimate of their effect on current and projected operations.

In municipal planning, parallels to customers may be found in public demand and special-interest groups. In case you do not feel you have competitors, let me suggest that your major customers, the citizens of your community, have other uses for their tax dollars. These alternative uses represent competition, in the sense that the word is used here.

The assumptions you make regarding the future wants and needs of the people whom you serve are of particular importance. These assumptions will determine the future nature of your activities. You should make explicit the assumptions you consider most important, based upon the preceding analysis.

"Potentials" are statements of the outside limits of performance that you could not be expected to achieve but against which you could be measured. In business, an example is the dollar value of the total market or total demand for which a company will be competing. In municipal governments, an example might be the maximum possible usage of a rapid transit system. The potentials should be identified and tabulated for each area being served within the period of the planning horizon. The assumptions regarding potentials are important, because potentials furnish the basis for quantitatively specifying future results and establishing management controls.

Within the broad range of potentials, particular opportunities should be identified. An opportunity is an economic choice which is unusually attractive from a return-on-investment or cost/effectiveness standpoint. At this point, we are beginning to combine the actual or potentially available resources of money, competence, and facilities with the measures of expected impacts on performance and environment. It is important that potentially available resources be considered here, so that they may be acquired to fully develop opportunities.

The demonstrated existence of an opportunity is not an adequate basis for the decision to seek it out. Opportunity without competence is a garden path. What is needed is not simply competence but "distinctive competence." The "distinctive competence" is truly distinctive may hold the real key of an organization is more than what it can do; it is what it can do particularly well. The effort to find or create a competence that to success and future growth and development. In the municipal environment this is illustrated by decisions on what services to provide directly and what services to encourage outside organizations to provide.

Capability analysis

Having pursued the environmental analysis to the point where it is becoming clear where future efforts and programs should be directed, we must now turn to a more explicit evaluation of capabilities. Here, the chief evaluation areas are skills and resources. Because a company's strength exists primarily in experience in making and marketing a product line, the evaluation process begins by examining the company's current product line and the function it serves in its markets. This strength constitutes a resource for growth and diversification. Identifying the skills that underlie whatever success has been achieved is a necessary step in evaluating this resource.

The evaluation must be conducted using competitors as a frame of reference. Therefore, we specifically look at our relative strengths, highlighting distinctive competence—special attributes which make a company different from and better than its competitors—and also relative weaknesses. When problems are identified, we give particular attention to defining them carefully. It is particularly desirable that the statements of problems be structured so that specific business plans can be directed towards the solution of specifically identified problems. For example, "unsatisfactory profits" might be a clear characterization of a company's posi-

tion, but problems should be defined in terms of the underlying causes of the condition, unsatisfactory product features, high product or indirect costs, etc. It is these underlying problems which subsequent plans will aim to solve. In addition to the definition of a problem, an appropriate quantitative description of its magnitude should be given. For example, an identified cost problem should indicate how far out of line costs are.

In business, competitive information is sometimes lacking. In this case, a basis for comparison may be found in other divisions of one's own company, with similar activities, or with related but different activities. A municipality would have a similar basis for comparison—between departments, with other cities, and with private suppliers of the same services.

Strategic objectives

A strategic objective is a statement of what an organization hopes to accomplish with respect to its environment. Based upon the preceding environmental and capability analyses, and only after these analyses, would we formulate strategic objectives. In business, the following objectives will generally be included:

(1) A clear definition of products in functional rather than literal terms, saying what they do rather than what they are made of

(2) Clearly designated markets and market segments for which products are now or will be designed

(3) Types and categories of customers, including size, location and distinctive characteristics

(4) Identification of the channels through which these customers and markets will be reached

(5) The satisfaction provided customers by the products and services they receive and the manner in which the products and services are marketed and delivered

(6) The means by which the operation will be financed (when the means will change over time, the appropriate periods should be indicated)

(7) Techniques, skills, and facilities required in this type of business

(8) The size and kind of organization which is to be the medium of achievement, expressed in terms of characteristics which will clearly differ from the competitors' and of characteristics which mark a significant departure from current practices.

Planning objectives

Planning objectives are developed by first identifying those problems and opportunities which have unusually high impact upon achievement of strategic objectives, then formulating one or more actions to counter the problem or capitalize on the opportunity. It is important that you restrict yourself to those five to ten problems or opportunities which are characterized by the greatest potential effect upon future performance.

The actions to be formulated are those which would yield a large payoff relative to the time and effort involved, or those which are crucial to the survival of the business. These actions constitute the planning objective towards which the major plans and programs of the organization are to be directed.

Planning objectives are not restricted to development and facilities programs; they include organizational changes, product transfers, changes in distribution channels, or a variety of other types of business action. The criterion for listing planning objectives is not the type or magnitude of expenditures involved, but the importance of the action upon performance.

DEALING WITH CHANGING TECHNOLOGY

Technology may be broadly thought of as the ways in which work is done. In this sense, new management techniques of processes which people can follow in doing their jobs are just as must a part of the technology that managers should be interested in as are products and services.

Ten years ago, the Ford Foundation and the Carnegie Foundation sponsored two independent studies of business education in the United States. The Gordon-Howell report, Higher Education for Business, and the Pierson Report, The Education of American Businessmen, were reviewed by Leonard S. Silk who, at the time, was Senior Editor of Business Week. In Mr. Silk's words, "They suggest that most business schools, because of their adherence to outworn doctrines, may not be meeting the requirements of business firms for competent, imaginative, flexible and creative managers, prepared to deal with the unsolved problems of tomorrow, rather than repeat the routines of yesterday."[1]

Both reports recommended that the focus of business studies should be upon managerial decision-making "with emphasis upon the application of scientific knowledge to business problems." This, the authors of the two reports felt, would provide an organizing concept for business education and research that was sorely needed.

The influence of these two reports has literally revolutionized business education around the world. Business school faculties became obsolete overnight. In many schools, plans were put into effect which substantially changed the makeup of these faculties within a few years. No schools of any significance were unaffected by the recommendations.

The reports not only represented an evaluation of American business education, but also an evaluation of a new technology which had been introduced into the business scene during the 10 years prior to the reports. These post World War II developments, now referred to as "information technology," have two components: the computer; and decision-making techniques that had their genesis in operations research. In the 10 years since the reports, both of these components have blossomed and are fulfilling their early promise as significant management tools. I would like to use this experience to illustrate how a manager can introduce new technology into his organization.

In the application of any technology, it is necessary to "smooth" the environment. For example, the success of the automobile has depended greatly upon the effectiveness of the way in which the environment has been smoothed through the building of roads. The automobile becomes a problem only when the environment becomes inadequate (as in the case of traffic-clogged streets).

A more meaningful illustration of the introduction of a new technology occurs when one considers the problems associated with the application of computers—the most important technological introduction of the mid-Twentieth Century.

The most difficult part of the computer's environment is man himself. The first problem of the manager in applying computer technology is to smooth this part of the environment, and he has to begin with himself. We should not be concerned here with what the computer should be used to do, nor how it should do it. Rather, we should be concerned with what the manager should do and with giving suggestions of how he should proceed. Consequently, most of what follows can be viewed as dealing with the problem of smoothing man's portion of the computer's environment.

Most unpleasant experiences with the use of computers have resulted from the failure of management to recognize the strategic considerations involved in introducing such a major technology into an organization. With respect to introducing computers into an organization. I have found that my own guidelines fall into five categories:

(1) Management viewpoint.

(2) Factors which lead to successful computer utilization.

(3) Major source of problems in application of computers.

(4) The role of education.

(5) Selected action recommendations and thoughtful observations.

The point of view taken by the manager is critical in developing a management strategy. The three most important considerations to remember are:

(1) The computer is a data handling device—not simply a computation device.

(2) The computer represents a big investment; it should be used in solving big problems, not trivial ones.

(3) Everyone will be affected by the computer; no part of the organization will be immune.

An excellent study, made over five years ago, provided some conclusions about the specific factors which lead to successful utilization of computers that are just as valid as they were then.[2] These factors were:

(1) The quality of executive leadership provided to the computer systems effort.

(2) The soundness of the planning and control tools used in managing the effort.

(3) The degree of operating management involvement.

(4) The caliber of the computer systems manager.

(5) The caliber of the computer systems technical staff.

It is also important to recognize the major sources of past problems in utilizing computers. The following statement, although made in the context of process control computers rather than data processing computers, is especially valid:

"In the application of computers by humans, there are at least three things which cloud our vision. Most commonly, these are the desire to try to do too much; the conviction to believe what we want to believe; and the impulse to react rather than plan. These three factors, or syndromes, are really more significant in the application of computers . . . than all of the brilliant design engineering and scientific breakthrough that has occurred in the past two decades."[3]

Education has always been a powerful force in change, and it plays an equally important role in computer systems. However, the purpose of education must be understood if it is to be effective. One objective in computer education is to remove the psychological block that an unknown quantity like the computer develops in people. This goal can be achieved only through training-type sessions that explain how a computer works and through "hands-on" exercises that place the student in an active role with a particular computer. This question, then, is not one of depth or length of time, but of effectiveness in the design of such a program.

A manager attempting to develop a management strategy for utilizing computers will not do an effective job unless he goes through this type of educational experience. Although this is not enough to assure that he will do a good job, he certainly can do better with it than without it.

As a manager, you must also define your role in the utilization of computers. Here again, education can help enormously, but it is more difficult to be specific about what kind of program would be most helpful. An appropriate course of study would seem to

---

[3] Bates H. Murphy, "Computers Are For People," *Automation*, December 1968.

be one that would start with an elaboration of the items covered in this section and that would lead to case studies of computer utilization in municipalities. This suggestion is offered as one which might be developed into a self-study or training program which your association might want to sponsor. In any case, it should follow the basic education in computer techniques described earlier.

Finally, I would like to make the following action recommendations and observations:

(1) Get started; startup costs are high, but they don't improve if you wait.

(2) Expect costs to increase; look for the return in increased effectiveness of operations.

(3) Be precise about the changes you expect will happen and the benefits to be accrued; otherwise, they will not happen.

(4) Don't assume or hope you will get someone's cooperation when the time comes; if you get his commitment early, it's less expensive to overcome his opposition during planning and it may turn out he is right and you are wrong.

(5) Get the right people on the job, and don't assume the man with the overall responsibility should or should not be the technical expert; both types have done well.

(6) If the lead man is not the technical expert, he should have at least two sources of technical advice; otherwise, the leadership will, in fact, pass over to the lead technical man under him, because the technology gene is dominant.

(7) Don't berate the computer type; he has been responsible for most of what has happened (both good and bad), but when it has been bad, he generally was not given the proper leadership.

(8) The computer revolution has evolved more because opposition was overcome than because acceptance was won; without overcoming opposition, acceptance could not materialize, but real progress (i.e., maximum benefits) were realized after acceptance rather than before.

(9) Self interest on all sides, including that of the computer system proponents in an organization, is the single major problem you must face.

(10) Get into the heart of the operations of the city; if you wander around on the shoreline, just getting your feet wet, you will, in fact, create more problems for yourself than you will solve.

I have just presented one way a manager can introduce a new technology (in this case, computers), but I would like to reiterate that each organization and the injection of each new technology is unique in the way it must be handled, so each of you must develop your own strategy in dealing with new technology.

STRATEGY FOR PEOPLE

As mentioned earlier, in developing an overall business strategy, the manager must be true to himself in analyzing the capabilities of his organization. He must identify the skills and talents required and the quantity and number of people needed who possess these skills. He selects the key people who, in turn, assist him in further careful selection as the numbers grow. In the selection process, he will review the organization's previous experience, including sources, costs, and permanency of hires; review the current recruiting scene; consider his organization's advantages and disadvantages; and develop a recruiting program.

A key management strategy is to remember that the best recruiting is done within the organization itself—by avoiding losses of qualified personnel. Accordingly, the manager will develop and maintain a personnel retention program by establishing policies and practices which will guarantee good employe relations. He will be particularly cognizant of policies and practices in the following areas:

(1) Salary administration.
(2) Placement and work assignments.
(3) Performance appraisal practices.
(4) Communications programs.
(5) Recognition of special efforts by employes.
(6) Employe training and development programs.

If the manpower needs are specific, and the selection and retention programs are soundly developed with total involvement by management, the manager will be successful in staffing the organization.

SUMMARY

I have reviewed a few of the lessons that we in the private sector have learned in recent years. Our school has been the competitive business environment in which we find ourselves—an environment of growing demands for new and better services, of continuously rising costs, and of rapidly changing technology. Our teacher has been the constant pressure for improved cost-effectiveness in all of our activities.

Your teacher would appear to be the same—unless your current budget includes adequate funding for all of the services you consider necessary or desirable. Your school would appear to be the same—unless your municipality has no demands for new and better services, is not faced with continuously rising costs, and cannot benefit from new technology. Are the lessons learned in business management not equally applicable in municipal management?

LEONARD HICKS: EXCITING JOURNEY, BIG REWARDS

(Mr. PEPPER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PEPPER. Mr. Speaker, success stories are a part of the American way of life. In fact the United States is the greatest success story in the history of the world. We especially like to read a success story when the subject of it is a friend and the son of a friend. We particulraly like to read such a success story when it involves a subject which not only relates to the health and happiness of people but tends to encourage more understanding and friendship among the people of the world and, therefore, contributes to peace—such a subject is tourism and an organization which has comfortable and agreeable living accommodations awaiting the traveler when he or she arrives at his or her destination.

The worldwide organization representing hotels and the man who has made it and now heads this great organization are the subject of an interesting and informative article in the current issue of the Bahamian Review. The article tells how Leonard Hicks, the son of the late Leonard Hicks of Chicago, one of the outstanding hotelmen of the Nation, has built a great universal organization representing hotels in securing tourist travel. It is the story not only of a successful business but of a successful man, in his family life as well as his personal life. It is the story of what vision, hard work, and a warm and understanding heart in respect to other people can accomplish. The article reveals the genuineness of Leonard Hicks' interest in other people by telling the story of how he and his lovely and talented wife have adopted 15 youngsters, each in need of help and each from a different country where poverty is severe and a chance to earn a decent living is slim. The children continue to live in their native countries where they will remain until they complete their education but Mr. Hicks hopes to make their dreams come true by providing them financial support and a wide horizon of opportunity. We learned that Leonard Hicks is never too busy to concern himself with the individual problems of these children in 15 different countries of the world.

Leonard Hicks lives in Miami and in my district, I am pleased to say, and he has helped the Greater Miami area immeasurably by keeping our great tourist center in close and throbbing contact with a large part of the world population. He has developed a relationship between Miami and the Bahamas which he and many believe makes each complement the other in tourism. This article quotes a maxim which Leonard Hicks lives, passed on to him by his great father. The maxim is, "Success Is a Journey, Not a Destination."

Leonard Hicks has made the journey of life not only a happy venture for him but he has made it a happier venture for vast numbers of his fellow citizens of the world.

Mr. Speaker, the article in the current issue of the Bahamiam Review immediately follows my remarks.

LEONARD HICKS: EXCITING JOURNEY, BIG REWARDS

(By Ethel Blum)

The success of the Hicks Organization did not happen overnight. It took Leonard Hicks more than two dozen years of determined hard work to achieve what is known internationally as a "success story." The rigid road he followed in business has also been the pattern for his personal life—hard work, study, travel and no half-way measures about anything.

Three months after his discharge from the U.S. Army in 1945, Hicks opened his first hotel representation office in Chicago. With 20 hotels on his books and some borrowed capital, he was able to show a profit within his first year of operation, setting a precedent for a phenomenal growth pattern which reached bookings of $101,024,527 last year.

Hicks' romance with the Bahamas was largely responsible for his Miami office and his own move to South Florida. In anticipation of a tremendous tourist explosion in the Bahamas and Caribbean, he decided to devote his personal time toward building and promoting this market. His vision proved correct. Last year, the Hicks offices booked $19,911,924 into the Bahamas.

"The Bahamas had the ingredients people were looking for in the ever expanding leisure time field—marvelous climate and a nearby 'foreign' atmosphere."

"The way I looked at it, and still do" adds Hicks, "is that Florida and the Bahamas are next door neighbors that complement each other. What is good for one is good for the other. Some Florida hotelmen regard the Bahamas as a threat, but I feel that Bahama hotels bring people into the Florida area as well as to their own Islands."

Although the New York Hicks office books more business into the Bahamas, Hicks points out that the Miami office is the only one that can fill Bahama hotel rooms at a moment's notice.

When Hicks took over representation of his first resort property in the Bahamas 15 years ago, less than 90,000 tourists visited the

Islands annually. The latest figures reported by the Bahamas Ministry of Tourism show that more than one million visitors came to the Bahamas by air and sea during the first nine months of 1969.

The Bahamas have earned their place in the tourist sun, says Hicks. "The Ministry of Tourism has done a fantastic job in encouraging visitors. They realize that tourism is not like turning a faucet on and off. It develops momentum over a period of time and the flow must be nurtured with just the right pressures exerted to increase the volume."

"L. H." as he is affectionately called by many of his employees, credits much of his success to a good choice of parents. The senior Hicks was one of the most popular hotelmen of his era and the younger Hicks is cast from just as unique a mold.

A third generation hotel man, he likes professionals and his dedication to perfection is sometimes less than diplomatic. In his organization that stretches around the globe, he is exuberant, yet forceful; considerate of his employees, yet demanding of results. But what he demands of his employees and executives is nothing more or less than he demands of himself. He has a completely equipped office in his home on an inlet off Biscayne Bay, a short drive from his Miami office. There he finshes jobs he is frequently unable to get to in his busy bank building office. The incompleted tasks are toted home in "boodle bags" packed by his secretary.

Hicks firmly believes that much of his organizations' growth must be attributed to the fact that he has surrounded himself with competent people. To attract and keep high level personnel, his staff members are among the highest paid in the industry. The organization also has a substantial profit sharing system in addition to other employee benefits.

The physical pattern of the Hicks offices around the globe follow a similar format. Hicks is a man who likes comfort and pleasant surroundings and he assumes his employees feel the same way about working in beautifully appointed offices with the latest mechanical and technical facilities at their fingertips. The offices present the quiet elegance of richly paneled walls and choice art works, but they also have meeting rooms for visiting hotel men and the Miami and New York offices house theatres built expressly for orientations or presentations to the travel industry by hotel sales teams or individual managers. Office space is also provided for visiting hotel managers where they can meet with prospective clients in privacy.

To the ordinary traveler, hotel representatives is still somewhat of a mystery, but Hicks explains it simply as doing the job of the hotel manager or sales manager if he could be in 15 places at one time. "It's damned hard work, demanding but fun. We strive to increase the sales volume of the properties we represent, provide a reservation and marketing network and among other services present the image of the property to the public, the association executive, the corporate executive and the travel agent."

The Hicks Organization consists of 16 corporations stretching from Honolulu to Frankfurter (none are franchised), plus affiliate offices in six cities in the Far East. Over 100 major cities are covered by the Hicks' reservations and marketing network. The newest office in Frankfurt, Germany opened October 1, 1969.

Last year a Hotel Management Division was formed under the direction of Ray Watson, a veteran hotelier. It does not affect the representation organization, but provides a service that complements those already offered. Affiliate management groups have been announced in London with others soon to be announced in Canada, Bangkok and Hawaii.

Hicks maintains no "main office" for fear of subordinating the total picture to the problems of individual offices. These remain the complete responsibility of the various office managers.

To keep in close touch with his far flung organization, Hicks airmails recorded messages. He has found this system of communication overcomes time zone differences and enables recipients to absorb messages at their own convenience. Following a similar pattern in residences, Hicks maintains a home in Miami and apartments in New York, Chicago, Washington, Los Angeles, Florence, Italy and two in the Bahamas (one in Nassau and the other in Freeport). This makes traveling to these focal points on the globe possible at a moment's notice for the executive who claims the world as his hobby.

Hicks is unemotional about his success, grateful but not overawed by it. He learned his trade well and did well by it. At 29 he was the youngest president of the International Hotel Sales Management Association. He has been recognized in the Congressional Record, received numerous awards for his promotional efforts in the travel industry and for his civic contributions, but he has somehow managed to remain an astonishingly normal person. At the 41st Annual Convention last year of the 4,000-member Hotel Sales Management Association, Leonard Hicks was one of the four persons honored by being named to the "HSMA Hall of Fame." He has authored five Sales Books and donated them to the Association. He serves as Chairman of the HSMA Educational Foundation and is in the process of writing his sixth book.

In addition to his strenuous business pursuits, Hicks is an active sportsman and his shelves are lined with trophies attesting to the handball, boxing and golf prowess of his younger days. His varied activities require excellent physical condition and a light daily work out is part of his Miami area routine.

A convenience demanded by his heavy schedule is a complete barber shop in his home. The barber chair in which his favorite barber attends him is one of his favorite gimmicks. It was installed on the same floor of the Hicks' home as the art studio built for his wife Dorothy, an accomplished portrait artist who studies every year in Florence, Italy.

The Leonard Hicks Organization is a relatively youthful team with the average executive group age at 43 and the overall corporate average at 32. Many languages are spoken in most offices with nationalities of personnel sounding like a mini-United Nations, another pattern followed by the Hicks "family."

Having no children of their own, Mr. and Mrs. Hicks "adopted" fifteen youngsters, each in need of help and each from a different country where poverty is often severe and a chance to earn a decent living is slim. The children live in their native countries where they will remain until they can complete their education, but the Hicks Organization hopes to make their dreams turn into reality through encouragement, financial support and visions of wide horizons. Chains of correspondence with the children have been established and Mr. Hicks is never too busy for a growing youngster's individual problems.

While Hicks is a successful man in the broadest sense of the word, he still feels that real success is measured by accomplishment. A soft spoken, emotionally happy man, he says that the "joy of doing is what really counts."

A recognized travel authority, Hicks looks at the future. With transportation continuing to shrink the world, the international tourism picture has just begun to develop, according to Hicks. He is convinced that the Bahamas will continue to receive more than their proportionate share of the business, so long as they continue to earn it.

"Several ingredients are necessary for the continued development of tourism," says Hicks who has seen the world many times and is in a position to analyze the market. "A healthy political attitude and a welcome mat for the visitor is required and the Bahamas have both. Tourists travel in order to get away from the problems of home. They look for fun, relaxation and escape from their daily involvements. They will go where they are wanted."

With a note of caution, he adds, "Tourism to the Bahamas is everyone's job, not just the hotel industry, the Ministry of Tourism, the travel agent, or the hotel rep. It is the job of the government, the airline or steamship carrier, the customs inspector, the cab driver, the doorman, the room clerk and yes, the man on the street whose economy depends in some measure on tourism. People don't have to go anywhere . . . they may go once, but they return over and over again, then you have a successful resort area."

You could call Leonard Hicks an original man in the true sense of the word. He refuses to fit into a mold and despite his many successes has remained an independent man who forms his judgments without concern for the approval of other people. He feels that all individuals deserve respect and he gives it. As a result, he receives a great deal of respect in return. A remarkably modest man, he says he has learned more from his failures than from his successes.

And always with him, wherever he goes, is the maxim passed on to him by his father . . . "Success is a journey, not a destination."

THE AMERICAN INDIAN

(Mr. HALEY asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. HALEY. Mr. Speaker, much has been written recently about the plight of the American Indian. I regret that much of the interest displayed is by persons who have expressed little or no interest in Indians in the past, by persons who have little knowledge about Indian history, and by persons who have little knowledge about the efforts of the United States to help the Indians. The comment tends to be emotional rather than rational; and some of it appears, unfortunately, to be designed primarily to gain publicity.

The problem needs to be put in perspective. As chairman of the Subcommittee on Indian Affairs, I have spent many hours, days, weeks, months, and years in an effort to help the Indians improve their social and economic conditions. I believe that I am as sympathetic as anyone to their needs, and I sincerely want to help them. In my opinion, it is a disservice to the Indians to distort the facts and to state half-truths.

Some basic facts need to be restated. Although they are vaguely known, they tend to be ignored in appeals to the emotions.

The Indians were badly treated during the earlier periods of our history. There is no dispute about that fact, and most Americans regret this part of our history. The past is past, however, and at some point the effort to make amends must be regarded as completed. We cannot beat our collective breasts and tear our thinning hair forever. At some

time the Indians must be regarded in the context of present day circumstances.

It should be noted that practically all of the Indians who were the subject of mistreatment in the past are no longer living. It is their descendants with whom we are concerned, and the Government is not guilty of mistreating them. During the present century the Government's approach to the Indians has been constructive rather than oppressive.

I should also point out that our country is the only country in the world that has set up a system that allows the aboriginal inhabitants to sue the Government and recover just compensation for the lands that were taken from them by conquest. The Indian Claims Commission was established for that purpose in 1946, and it is in the process of adjudicating all of the remaining tribal claims. Many millions of dollars have already been awarded, and many of the cases are not yet completed.

Many people also fail to realize that the Indians are not a single unified group. They are divided into many different tribes, with different histories, different needs, different desires, different organizations, and different cultures. They cannot be forced into a uniform mold. On the contrary, the needs of each tribal group must be considered separately. The hundreds of statutes on our books reflect this fact. While some of our legislation is general in nature, most of it is tailored to meet the needs of a particular tribe. This approach places a severe burden on the Congress, because in a sense it must function as a local legislature for each tribe. Although this is burdensome, it is appropriate. The tribes are different and their different needs should be recognized.

There is also a frequent failure to realize that Indians today are full citizens of the United States and the States where they reside. This was not always so. Today, however, they are entitled to vote and to participate in all Federal and State programs without discrimination.

Although Indians are eligible to participate in all general programs, Indians are the only ethnic group for whom the Federal Government provides special services that are not provided for others. This fact is frequently overlooked.

I sometimes hear this question asked: "How does it happen that after 150 years of Federal control over Indian affairs the Indians are still so poverty-stricken?" Another version of the question is: "Why does the Federal Government not take care of all the financial needs of the Indians?" While I frequently question the efficiency of the Bureau of Indian Affairs and the Secretary of the Interior, these questions are really unfair. We do not yet have a welfare state that provides all essential services from the cradle to the grave, and I hope we never will. There is still room in this country for individual initiative. There is still a place for private charitable and philanthropic work. This is as true of Indian communities as it is of non-Indian communities.

Emphasis is frequently placed on the increasing amounts of money spent by the Federal Government on Indian programs. A few years ago it was less than $100,000,000 per year. Now it is almost one-half billion dollars per year. While these facts are correct, constantly increasing expenditures are not the answer to the problem.

I am not sure there is any single answer, and I know there is no simple answer. There is a general consensus that our ultimate goal is to raise the educational and economic level of all Indian communities to a point where the individual Indians can manage their own affairs without special Federal assistance, and where the Indians can participate on a plane of equality at all levels of our social and political life. While this goal is easily stated, the means for attaining it are much more elusive.

Several conflicting philosophical attitudes are involved. For example, Indian reservation resources cannot possibly support all of the Indians living on or near the reservations. Either more jobs must be brought to the reservation, or some of the Indians must leave the reservations and seek jobs elsewhere. Indians are free to live and work where they desire. Although there is a limit to the creation of jobs on the reservations, some people want to encourage the Indians to remain on the reservations and rely on welfare subsistence in order to preserve a tribal community. Others feel that Indian cultural values can be preserved without keeping the Indians isolated as an ethnic group. No other minority group in this country is encouraged to maintain ethnic identity in this manner.

Another philosphic conflict is the desire to get as many special benefits as possible for Indians as a group in contrast to a desire to distinguish between those members of the group who need special help and those who do not.

Another conflict involves the desire to educate Indian children in the regular public schools, rather than educate them in segregated Federal schools on the various reservations. In many cases the latter is the only realistic alternative because of location and transportation problems, but in other cases there is a choice.

Another conflict involves cost-sharing between the Federal and State Governments. Indians are citizens and are entitled to all State and local services that are provided for citizens generally. In some cases, however, efforts are made to place the entire financial burden on the Federal Government.

Another conflict involves the desire to foster and expand tribal governments as separate political entities outside the Federal-State system; that is, to let tribal governments operate as enclaves within the boundaries of, but not a part of, the States. Historically, this was necessary in the earlier days, but it is not necessary in many instances today.

Another philosophic conflict involves an emotional use of the phrase "self-determination," which is used to mean that each Indian tribe should have the right to determine for itself the extent to which a particular Federal law should be changed or applied to that tribe. This is a distortion of the phrase and ignores the fact that no other ethnic or minority group has that privilege, and the fact that no special interest group has a right, under the guise of self-determination, to require the Federal Government to continue or discontinue any particular program.

Without further elaboration, I hope that I have said enough to show the need to marshal the facts carefully when considering a specific legislative proposal concerning Indians, and to refrain from an emotional approach based on wrongs inflicted on a different people in a different century. I also hope that persons sincerely interested in helping the Indians will offer specific suggestions rather than generalized criticisms of the past.

PRESIDENT URGES MEMBERS OF CONGRESS TO JOIN IN FIGHT AGAINST INFLATION

(Mr. GERALD R. FORD asked and was given permission to extend his remarks at this point in the RECORD and to include a letter from the President of the United States.)

Mr. GERALD R. FORD. Mr. Speaker, there has just been delivered to me a letter from the President of the United States, appealing to Members of this Congress to join with him in bringing inflation under control through firm budget and fiscal policies. I understand that a similar letter was sent to the distinguished Speaker and, while the hour is late and time does not permit me to read it in full, I commend the thoughtful and statesmanlike statement of President Nixon regarding the current state of our economy to each of my colleagues. We have equal responsibility with the executive branch for protecting the American consumer and the American saver against runaway prices and the steady erosion of his dollars. I hope we will face up to this responsibility in the remainder of this session and throughout the New Year.

The text of the President's letter follows:

THE WHITE HOUSE,
Washington, December 17, 1969.

HON. GERALD R. FORD,
Washington, D.C.

DEAR CONGRESSMAN FORD: When government spending gets out of hand, consumer prices go out of sight. To combat rising prices, I proposed last April to hold down Federal spending to $192.9 billion, cutting $4 billion from the programs proposed by the prior administration.

The integrity of the $192.9 billion budget total was seriously threatened in the summer by Congressional actions and by increases in uncontrollable payments such as interest on the public debt. To hold the line, I directed a further cut of $3½ billion in controllable budget outlays. Six out of seven dollars of this reduction was in Defense, a cut which last week concurred in by the House of Representatives.

The Congress, in midsummer, also expressed its concern for overall fiscal responsibility, fixing a ceiling of $191.9 billion on total budget spending. This is one billion dollars less than my own target.

The Congressional limit, however, was a rubber ceiling. It provided—quite appropriately—an allowance for further increases in those uncontrollable payments, but it also—quite wrongly—removed the incentive for the Congress to exercise continued restraint by

providing that increase spending later enacted by the Congress would be added to the ceiling and decreases taken away. The *only* significant decrease the Congress has considered thus far is the defense cut we had already made last summer. Every other major change has been up—more spending, which would have the effect of driving prices upward.

Furthermore, the legal allowance for uncontrollables was limited to $2 billion. But committed government payments in 1970 are likely to exhaust that $2 billion allowance and go an additional $2 billion beyond. Interest cost on the public debt has mounted by another $½ billion. In addition, quite apart from newly proposed Social Security benefit increases, existing Social Security, Medicare and similar benefit payments fixed by law will add another billion dollars to the April estimate. Still another $½ billion overrun is imminent, reflecting increased spending because of the loss of offsetting offshore oil receipts, and a potential shortfall in the sale of government financial assets, due to the persistence of high interest rates. In all, about six billion dollars in fixed, built-in increases have swelled government spending since we took office in January.

Therefore, both the Congressional ceiling and my own fiscal target are in jeopardy. The responsible path toward protecting the buying power of the consumer's dollar is clear. But the Congress has not appeared to be willing to take that path.

Congressional actions that have already passed at least one House could add about $4 billion to Federal spending this fiscal year. Such spending includes:

—Increased educational aid provided by the Labor–HEW appropriations bill.

—A premature civilian and military pay raise, following on the heels of substantial raises just this past summer.

—A 15 per cent increase in Social Security benefits in place of my 10 per cent recommendation, and effective months earlier.

—New legislation, worthy though it may be, to benefit veterans, children and others.

In addition, a billion dollars this year has been lost through Congressional inaction on Administration requests to make the postal system self-supporting and to permit sales of certain financial assets of the Farmers Home Administration and the Veterans Administration—actions which do not affect at all the benefits of these programs.

Taken together, this combination of action and inaction would load an additional five billion dollars onto an already overheated economy.

In spite of these actions that increase *expenditures*, recent Senate tax actions to increase personal income tax exemptions and retain part of the investment credit would, if approved, actually take $1.6 billion away from *revenues*.

The Congress appears to be well on its way to substituting tax reduction for tax reform. This will harm rather than help the average taxpayer. Sugar-coating a bitter pill is understandable, but all sugar coating and no pill will not help the patient. A tax cut for some citizens would mean a rise in prices for every citizen.

In a situation without parallel in our history, we came into the month of December, almost halfway through the fiscal year, with most of the regular appropriation bills yet to be passed. If the Administration is to achieve its goal of slowing down the rise in prices, it will have to reserve funds on many popular spending programs. The other course—of appealing to sundry interests—would run directly counter to the public interest.

A dollar of spending does not add just one dollar to the spending stream: It is spent, and in turn provides income to someone else to spend again, multiplying its effects. Every dollar released through reduced taxes or increased expenditures will produce several dollars of additional price pressures in the economy as those who receive the initial benefit in turn spend the money. A billion dollars of Federal spending or tax relief can add many times that amount to the escalation of our rising price levels. And inflation—the hole in everybody's pocket—is the most unfair tax of all.

If the American people do not believe that their government will maintain its commitment to a responsible fiscal policy, inflationary expectations will raise prices and interest rates further.

In a year that is already half gone, the Administration's ability to make expenditure cuts in the few areas where we have discretion is quite limited. Significant cuts would adversely affect the proper execution of ongoing government programs.

With the full loss of the surtax by July 1, revenues for the year beginning that day must be calculated from a base $8½ billion lower than the present base. At the same time, increases in uncontrollable Federal payments will raise next year's budget expenditures substantially—probably above $200 billion—quite apart from further Congressional spending actions or Administration initiatives to meet critical national challenges.

The achievement of a sound prosperity with steady economic growth demands restraint now. New Federal programs and increased benefit payments would be dissipated by ever-rising prices.

The Congress, along with the Executive Branch, carries the responsibility for the economic health of the nation.

This budget whipsaw—and the proposed increase in spending and reduction of revenues does whipsaw the consumer—comes at a particularly ironic time in the course of economic events. While restoring order in an economy racked by inflation for over five years requires the patience of Job, the fact is that some results have already been showing up:

—Retail sales have been relatively flat since midsummer.

—Business inventories have been piling up more rapidly, and this may require some further easing of production schedules.

—The consumer price index was rising at the rate of 6.4% per year in the first half of 1969, but the rate has dropped to 5.3% per year since June.

This is tangible evidence that we are beginning to make some progress in relieving those excess pressures on the economy that have been driving up the cost of living.

We are now, therefore, at a critical moment. If we persevere in strong, responsible fiscal policies, we can expect to see confidence building steadily in the year ahead—confidence that government really does intend to manage economic policies responsibly. The way we handle the Federal budget will determine whether millions of consumers can balance their family budget.

Unfortunately, reluctance by the Congress to come to grips with the need to hold down prices is recreating doubts about the will of government to persevere. An increase in personal exemptions or further large increases in Federal expenditures, let me repeat, do not make people better off in an economy already under pressure. They simply guarantee that price tags in the grocery stores, and the cost of living generally, will be higher.

These actions go a long way toward explaining why our financial markets find it hard to believe that Washington is capable of responsible budget policy.

Recently high quality bond issues could be marketed only at interest rates in excess of 9 per cent. It is difficult to develop a flourishing mortgage market when high grade corporate bond yields are at these levels. Why are bond rates so high? Contrary to what some believe, the primary reason is not Federal Reserve policy. Interest rates are high because savers and managers of money are insisting that nominal rates be high enough to give them a worthwhile rate of return after the inflation which they are assuming will continue.

We stand at the crossroads of credibility. If we can regain a fiscal grip on ourselves and carry through with a strong budget and fiscal policy, we can build on the growing evidence that policies of 1969 are beginning to exert a stabilizing effect. But if we miss this opportunity, it will be a long time before the public will ever believe that government can manage its finances in any way other than to produce sustained and serious inflation.

For this reason, I urge the Congress to join with the Executive Branch in a continuing display of determination to hold down spending and maintain revenue so as to contain the cost of living, no matter what the cost in political popularity. At stake is nothing less than the future of the American economy.

Sincerely,

RICHARD NIXON.

TROOP STRENGTH CUT IN VIETNAM PERMITS REDUCTION IN DRAFT CALL

(Mr. GERALD R. FORD asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. GERALD R. FORD. Mr. Speaker, President Nixon's cutback of an additional 50,000 in our troop strength in Vietnam has produced a side effect which will help to make Christmas 1969 more merry for all Americans.

I refer to Secretary of Defense Laird's announcement that the troop withdrawal will permit a similar reduction in the total size of our Armed Forces and thus will mean a 10-percent reduction in the 1970 draft call.

This 10-percent cut in the draft call strengthens the possibility that roughly one-third of the men whose names were recently drawn in the "luck of the draw" lottery will never be inducted into the Armed Forces. And the steady reduction we are seeing in the total size of Armed Forces points also toward the day when we can go to an all-volunteer Army and do away with the draft.

I agree with the Defense Secretary's warning that there will probably be difficult days ahead for the South Vietnamese forces who are gradually taking over the combat burden from us in Vietnam. But I think the evidence to date indicates that the program of Vietnamization so vigorously pushed by the President is proceeding on schedule.

I would also observe that even those Americans most inclined to doubt it are now convinced the President has a carefully drawn plan to end the Vietnam war.

Mr. Speaker, I believe that President Nixon has done a tremendous job of dealing with the Vietnam problem and that he deserves the praise and thanks of all of us.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. SISK, for December 18, 1969 through January 5, 1970, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. BINGHAM, for 60 minutes, today; to revise and extend his remarks and to include extraneous matter.

Mr. STAGGERS, for 60 minutes, on Thursday, December 18; to revise and extend his remarks and to include extraneous matter.

(The following Members (at the request of Mr. DANIEL of Virginia) to revise and extend their remarks and include extraneous material.)

Mr. GONZALEZ, for 10 minutes, today.

Mr. RARICK, for 10 minutes, today.

Mr. BINGHAM, for 60 minutes, December 18.

Mr. SIKES, for 30 minutes, December 18.

Mr. SIKES, for 30 minutes, December 19.

Mr. MILLER of Ohio (at the request of Mr. PETTIS), for 5 minutes today; to revise and extend his remarks and include extraneous material.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. PHILBIN in four instances and to include extraneous matter.

Mr. BURTON of Utah (at the request of Mr. SAYLOR) to extend his remarks on the conference report on mine safety.

(The following Members (at the request of Mr. DANIEL of Virginia) and to include extraneous matter:)

Mr. MANN.
Mr. CONYERS in six instances.
Mr. LONG of Maryland in two instances.
Mr. RIVERS in two instances.
Mr. PEPPER in three instances.
Mr. ALBERT in two instances.
Mr. WALDIE.
Mr. BURKE of Massachusetts.
Mr. MARSH.
Mr. VAN DEERLIN.
Mr. THOMPSON of New Jersey.
Mr. KLUCZYNSKI.
Mr. FOUNTAIN.
Mr. YATES.
Mr. MOSS in two instances.
Mr. JONES of Tennessee.
Mr. TEAGUE of Texas in ten instances.
Mr. PURCELL in two instances.
Mr. RYAN.
Mr. FEIGHAN in two instances.
Mr. BOLAND.
Mr. OTTINGER in two instances.
Mr. GONZALEZ in two instances.
Mr. COLMER in two instances.
Mr. KOCH in two instances.
Mr. PICKLE.
Mr. DANIELS of New Jersey in ten instances.
Mr. CORMAN.
Mr. DULSKI in six instances.
Mr. MOORHEAD in two instances.

(The following Members (at the request of Mr. PETTIS) and to include extraneous material:)

Mr. ERLENBORN.
Mr. PETTIS.
Mr. ASHBROOK.
Mr. EDWARDS of Alabama.
Mr. WYMAN in two instances.
Mr. WHALLEY.
Mr. SKUBITZ in three instances.
Mr. BROOMFIELD in four instances.
Mr. HOSMER in two instances.
Mr. MCCLURE in two instances.
Mr. FOREMAN.
Mr. ROUDEBUSH in three instances.
Mr. WEICKER.
Mr. BROTZMAN.
Mr. LANDGREBE in two instances.
Mr. KUYKENDALL.
Mr. KEITH in two instances.
Mr. NELSEN.
Mr. WIGGINS.
Mr. MYERS.
Mr. DERWINSKI in two instances.
Mr. THOMPSON of Georgia.
Mr. MORSE in two instances.
Mr. BROYHILL of Virginia.
Mr. WOLD.
Mr. LUKENS in two instances.

ENROLLED BILL SIGNED

Mr. FRIEDEL, from the Committee on House Administration, reported that that committee had examined and found a truly enrolled bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 14916. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending June 30, 1970, and for other purposes.

SENATE ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to enrolled bills and a joint resolution of the Senate of the following titles:

S. 1108. An act to waive the acreage limitations of section 1(b) of the Act of June 14, 1926, as amended, with respect to conveyance of lands to the State of Nevada for inclusion in the Valley of Fire State Park;

S. 2734. An act granting the contest of Congress to the Connecticut-New York Railroad Passenger Transportation Compact;

S. 3169. An act to amend the Atomic Energy Act of 1954, as amended, and for other purposes; and

S.J. Res. 90. Joint resolution to enable the United States to organize and hold a diplomatic conference in the United States in fiscal year 1970 to negotiate a Patent Cooperation Treaty and authorize an appropriation thereof.

ADJOURNMENT

Mr. DANIEL of Virginia. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 32 minutes p.m.), the House adjourned until tomorrow, Thursday, December 18, 1969, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1419. A letter from the Comptroller General of the United States, transmitting a report on the opportunity for savings and better service to map users through improved coordination of federally financed mapping activities. Geological Survey, Department of the Interior; to the Committee on Government Operations.

1420. A letter from the Comptroller General of the United States, transmitting a report on the opportunities for more effective use of an automated procurement system for small purchases, Department of the Navy; to the Committee on Government Operations.

1421. A letter from the Commissioner, Immigration and Naturalization Service, U.S. Department of Justice, transmitting reports concerning visa petitions approved according certain beneficiaries third and sixth preference classification, pursuant to the provisions of section 204(d) of the Immigration and Nationality Act, as amended; to the Committee on the Judiciary.

1422. A communication from the President of the United States, urging Congress to hold down spending and maintain revenues (H. Doc. No. 91–205); to the Committee on Ways and Means and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as folows:

Mr. POAGE: Committee on Agriculture. H.R. 6244. A bill to enable the Secretary of Agriculture to extend financial assistance to desertland entrymen to the same extent as such assistance is available to homestead entrymen; (Rept. No. 91–762). Referred to the Committee of the Whole House on the State of the Union.

Mr. HALEY: Committee on Interior and Insular Affairs, H.R. 10184. A bill to provide for the disposition of judgment funds of the Sioux Tribe of the Fort Peck Indian Reservation, Mont.; with amendments (Rept. No. 91–763). Referred to the Committee of the Whole House on the State of the Union.

Mr. HALEY: Committee on Interior and Insular Affairs. H.R. 11372. A bill to amend the act entitled "An act to authorize the partition or sale of inherited interests in allotted lands in the Tulalip Reservation, Wash., an for other purposes", approved June 18, 1956 (70 Stat. 290); with an amendment (Rept. No. 91–764). Referred to the Committee of the Whole House on the State of the Union.

Mr. GARMATZ: Committee of Conference. Conference print on S. 1075 (Rept. No. 91–765). Ordered to be printed.

Mr. MAHON: Committee of Conference. Conference report on H.R. 15090 (Rept. No. 91–766). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. DINGELL (for himself, Mr. REUSS, Mr. SAYLOR, Mr. FEIGHAN, Mr. MCCLOSKEY):

H.R. 15300. A bill to amend section 8(c) of the Federal Water Pollution Control Act relating to reapportionment of unobligated funds; to the Committee on Public Works.

By Mr. FARBSTEIN:

H.R. 15301. A bill to encourage State and local governments to reform their tax systems so as to decrease the property tax burden of low-income taxpayers; to the Committee on Ways and Means.

H.R. 15302. A bill to encourage State and local governments to reform their tax systems so as to decrease the sales tax burden of low-income taxpayers; to the Committee on Ways and Means.

H.R. 15303. A bill to encourage State and

local governments to adopt more equitable personal income taxes; to the Committee on Ways and Means.

By Mr. MINSHALL:

H.R. 15304. A bill to establish an Office of Consumer Affairs to advise the President with regard to all matters affecting the interests of consumers, to have central responsibility for coordinating all Federal programs and activities affecting consumers, and to assure that the interests of consumers are considered by Federal agencies; to establish a Consumer Advisory Council to advise the Director of the Office of Consumer Affairs on matters relating to the consumer interest; and to establish a Consumer Protection Division within the Department of Justice to represent the interests of consumers in administrative and judicial proceedings; to the Committee on Government Operations.

By Mr. PODELL:

H.R. 15305. A bill to amend title II of the Social Security Act to provide for the payment of social security benefits on a semimonthly basis; to the Committee on Ways and Means.

By Mr. TALCOTT:

H.R. 15306. A bill to establish a Select Commission on Nationality and Naturalization; to the Committee on the Judiciary.

By Mr. BINGHAM:

H.R. 15307. A bill to implement the Convention on the Recognition and Enforcement of Foreign Arbitral Awards; to the Committee on the Judiciary.

By Mr. DUNCAN:

H.R. 15308. A bill to delay for 1 additional year any reduction in certain pension or dependency and indemnity compensation payable under title 38 of the United States Code resulting from increases in insurance benefits under the social security amendments of 1967; to the Committee on Veterans' Affairs.

By Mr. GALLAGHER:

H.R. 15309. A bill to require mailing list brokers to register with the Postmaster General, and suppliers and buyers of mailing lists to furnish information to the Postmaster General with respect to their identity and transactions involving the sale or exchange of mailing lists, to provide for the removal of names from mailing lists, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. LUKENS (for himself, Mr. BUCHANAN, Mr. CARTER, Mr. DON H. CLAUSEN, Mr. COWGER, Mr. FISH, Mr. FISHER, Mr. FRIEDEL, Mr. LUJAN, Mr. POLLOCK, and Mr. SNYDER):

H.R. 15310. A bill to exclude from gross income the first $750 of interest received on deposits in thrift institutions; to the Committee on Ways and Means.

By Mr. RANDALL:

H.R. 15311. A bill to provide additional benefits for optometry officers of the uniformed services; to the Committee on Armed Services.

By Mr. STAGGERS:

H.R. 15312. A bill to amend the Railroad Retirement Act of 1937 to provide a 15 per centum increase in annuities; to the Committee on Interstate and Foreign Commerce.

By Mr. WHITEHURST:

H.R. 15313. A bill to amend title 10, United States Code, to provide for the rank of major general for the Chief of the Dental Service of the Air Force; to the Committee on Armed Services.

By Mr. BROTZMAN (for himself, Mr. ARENDS, Mr. NELSEN, Mr. TIERNAN, Mr. POLLOCK, Mr. SCOTT, Mr. PELLY, Mr. ESCH, Mr. BRADEMAS, Mr. MATHIAS, Mr. LUKENS, Mr. MCKNEALLY, Mr. STOKES, and Mr. MATSUNAGA):

H. Res. 757. Resolution to amend the Rules of the House of Representatives to create a standing committee to be known as the Committee on the Environment; to the Committee on Rules.

By Mr. BROTZMAN (for himself, Mr. BEALL of Maryland, Mr. MORSE, Mr. SHRIVER, Mr. DEVINE, Mr. KUYKENDALL, Mr. THOMSON of Wisconsin, Mr. BUSH, Mr. SANDMAN, Mr. HASTINGS, Mr. ADAIR, Mr. GOODLING, Mr. FRELINGHUYSEN, Mr. DANIELS of New Jersey, and Mr. BUTTON):

H. Res. 758. Resolution to amend the Rules of the House of Representatives to create a standing committee to be known as the Committee on the Environment; to the Committee on Rules.

By Mr. MINSHALL:

H. Res. 759. Resolution to amend the Rules of the House of Representatives to create a standing committee to be known as the Committee on the Environment; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred, as follows:

By Mr. DONOHUE:

H.R. 15314. A bill for the relief of Dr. Ghansham P. Massand; to the Committee on the Judiciary.

By Mr. PODELL:

H.R. 15315. A bill for the relief of Aveleen Elfredia Hughes; to the Committee on the Judiciary.

By Mr. YATES:

H.R. 15316. A bill for the relief of Miss Ljiljana Nikodinovic; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII,

358. The SPEAKER presented petition of Bedingfield, Grant & Bedingfield, attorneys at at law, Coos Bay, Oreg., attorneys for Larry Lucas, Agness, Oreg., relative to the proposed plan of the Forest Service, Department of Agriculture, for the Rogue River in Oregon under the Wild and Scenic Rivers Act (Public Law 90-542); to the Committee on Interior and Insular Affairs.

EXTENSIONS OF REMARKS

RESOLUTION PAYS TRIBUTE TO SERVICEMEN

HON. JULIA BUTLER HANSEN

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mrs. HANSEN of Washington. Mr. Speaker, I am proud to be a cosponsor of the House resolution which "pays the highest tribute to the American serviceman who has has given his life or has been wounded in the Vietnam conflict" and which "commends each serviceman and veteran of Vietnam for his individual sacrifice, bravery, dedication, initiative, and devotion to duty."

I believe it is important that this position be plainly stated and that it be widely known that this resolution passed the House unanimously last Monday.

Furthermore, we should note that under the House rules, only 25 Members could be cosponsors of the actual resolution which passed—H.R. 661. But that is only part of the picture. There were a total of nine bills—each with a similar message—which were before the Committee on Armed Services. I was a cosponsor of H.R. 662, which contained the same thanks for "the bravery and dedication" of our servicemen.

In addition to the unanimous vote, we should point out carefully that a total of 152 Members of Congress joined as cosponsors of this declaration. Under House rules, the public should know, each of those nine resolutions is considered passed.

The resolution made clear in its wording, sponsorship, and vote that our servicemen have maximum support from the House of Representatives.

SOCIAL SECURITY AMENDMENTS OF 1969

HON. RICHARD T. HANNA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. HANNA. Mr. Speaker, in March of this year, a noted task force reported to the Special Senate Committee on Aging the following conclusion:

The average social security benefit payable to an elderly couple who retired in December 1950—even though it has been adjusted over the years—would now purchase a significantly smaller fraction of the Retired Couple's Budget for a Moderate Standard of Living than at the time of retirement.

What this means is that the cost of living has been rising at such a pace, even though social security payments have increased more than 100 percent since 1950, a retired couple actually can purchase less now than he did 20 years ago.

The Department of Labor has determined that a retired couple can have a moderate standard of living with an income of around $340 a month. A poverty, or what has been termed a "lower budget" for an elderly couple averages $220 a month.

Breaking these figures down, the Department of Labor would allow about $15 a week for food for retired couples living at the lower budget. Housing transportation, clothing are similarly scheduled.

Now, of course, these figures are just for the lower budget $220 a month. Present social security benefits are almost 100 percent less than the minimum poverty budget. Today most retired couples depend upon social security for the major portion of their budget. The maximum payment of $118 per month of the retired poor is supplemented by State welfare—old-age assistance—checks. In no instance do welfare payments bring their recipients up to the minimum poverty budget.

In other words, the majority of elderly Americans receive a monthly income that

is less than what the Department of Labor considers to be a poverty budget. At the conclusion of this statement, I will attach a report, complete with tables, that was released by the Department of Labor late in October of this year. The report identifies the costs of living for the elderly. It defines the types of budgets and indicates the costs of each.

One additional item needs to be discussed. The average budgets included in the report take into account the differences in the cost of living in various sections of the country. In my home State of California, an elderly retired couple will find the lower budget costing from 5 to 8 percent more than the average. As a result an older couple in California at the poverty level will find it much more difficult to make ends meet.

Most of these people have really never been able to enjoy the raises in social security that Congress has provided in the past two decades. Most States reduce the amount of old-age assistance payments in direct ratio to the rise in social security payments. When you couple that hard fact with a 4.5-percent rate of inflation in the past year, the elderly poor are being crushed with no real relief in sight.

The 15-percent raise we are talking about really does not solve the depressing financial squeeze now hurting millions of older Americans. The average raise amounts to around $17 per month per couple. With the Consumer Price Index increasing at almost one-half percent a month, 15 percent will not begin to even keep the recipients even with the pace of rising prices. Since 1955, the rise in benefits has not equaled the rise in prices and 1969 will be no exception.

The current conditions in our economy have most seriously hurt those on a fixed income. Older Americans depending on social security for the major part of their income have been hurt more than other groups.

A 15-percent raise is the very least we can do. A 15-percent raise is a minimum gesture and no one is entitled to slap themselves on the back with self-congratulations for their generosity. It is merely a holding action. Hopefully, it will prod us into a meaningful program in the immediate future. If we cannot do better soon, the suffering will be tragic.

The report and tables follow:

THREE BUDGETS FOR A RETIRED COUPLE

"In spring 1967, it cost a retired couple almost $2,700 to maintain the level of living specified in the lower budget, roughly $3,900 to live at the intermediate level, and about $6,000 to meet the requirements of the higher budget."

These findings are from "Measuring Retired Couples' Living Costs in Urban Areas," an article that will appear in the November issue of the *Monthly Labor Review*. A research bulletin—*Three Budgets for a Retired Couple in Urban Areas of the United States*—will be published later in 1969 by the U.S. Department of Labor's Bureau of Labor Statistics.

Rising prices between spring 1967 and spring 1969 have added about 9 percent to the cost of goods and services required to sustain the retired couples.

Lower and higher budgets for a retired couple are available for the first time. The intermediate budget (formerly the moderate budget) is a sequel to the retired couple's budget, autumn 1966, which was published in June 1968.

The budgets have been developed to meet the needs of public assistance agencies, voluntary social and welfare agencies, businesses, labor unions, and individuals concerned with retirement planning.

The retired couple is defined as a husband, age 65 or over, and his wife, self-supporting, living independently in a separate dwelling, and enjoying reasonably good health.

The budgets are based on the manner of living and consumer choices of the 1960's. They permit the couple to maintain its health and well-being, and to participate in community activities. The goods and services were selected as follows: nutritional and health standards, as determined by experts, were used for the food-at-home and housing components. However, the selection among the various kinds of foods and housing arrangements were based on actual choices made by families as revealed by surveys of consumer expenditures. In the absence of standards the choices reported in the BLS Survey of Consumer Expenditures were used for housefurnishings, household operation, clothing, personal care, reading, recreation, meals away from home, and alcoholic beverages.

The style of living provided by the lower budget differs from the intermediate and higher levels in this manner: A smaller proportion of couples own their homes, dwelling units lack air conditioning, couples rely more on public transportation, they perform more services for themselves, and they make greater use of free recreation facilities.

By contrast, the higher budget assumes the largest proportion of homeowners, provides new cars for some couples, allows more household appliances and equipment, and more paid services than at the intermediate level.

Also, a majority of the items common to the three budgets are in greater quantity and of better quality at each higher level of living.

Total budget costs in urban United States in spring 1967 averaged $2,671 at the lower level, $3,857 at the intermediate, and $6,039 at the higher.

Consumption items—food, housing, transportation, clothing, personal care, medical care, and other family consumption in the lower budget cost $2,556. In addition, an allowance for gifts and contributions amounted to $115.

The intermediate budget required $3,626 for consumption items plus $231 for gifts and contributions, while the higher budget needed $5,335 for goods and services and $398 for gifts and contributions. Additional allowances are made in the high budget of $71 for life insurance premiums and $235 for personal taxes.

FOOD

Total food costs at spring 1967 prices averaged $789 for the lower budget, $1,048 for the intermediate, and $1,285 for the higher.

Of total food costs in the lower budget, $735 was for food at home. Compared with the two higher budgets, the lower food allowance calls for larger quantities of potatoes, dry beans and peas, flour and cereal, and smaller quantities of meat, and poultry and fish.

The family also has an allowance of $54 which permits them to enjoy a restaurant meal about once a month.

In the intermediate budget, food for home consumption cost $937 and restaurant meals and snacks—$111. At the top level the couples required $1,115 for food consumed at home, and $170 for meals outside the home.

HOUSING

Urban U.S. housing costs ranged from $939 in the lower budget to $2,066 in the higher level. The middle group housing costs amounted to $1,330.

Shelter—the major expense in the housing total—required an average annual outlay of $704 for the lower budget, $849 for the intermediate, and $1,188 for the higher level. These amounts are based on the average costs for rented and owned dwellings.

Rental housing which had 2 or 3 rooms were specified for 40 percent of the couples at the lower level, 35 percent of the middle level, and 30 percent of the higher level couples. The renters' cost included rent plus estimated costs of fuel and utilities, where these were not part of the rent, and insurance on household effects.

The majority of the families at all budget levels lived in 5- or 6-room mortgage-free homes. Typical homeowner costs for these couples include taxes, insurance, fuel and utilities, and routine repair and maintenance charges. The higher budget provides for greater utility usage and a larger repair and maintenance allowance than the intermediate and lower budgets.

TRANSPORTATION

Transportation costs stepped up from $191 at the lower budget level to $382 for the intermediate, and $682 for the higher. These allowances provide for ownership and operation of an automobile for some of the couples at each budget level—except for lower budget families in Boston, Chicago, New York, and Philadelphia who rely on public transit.

The budget level and city size determined whether couples owned an automobile and how much they patronized public transit. In the lower budget it was assumed that car owners bought 6-year-old cars, intermediate group owners bought 2-year-old cars as did 45 percent of the higher budget families. For the remaining 55 percent of the higher budget couples, the purchase of a new car was specified.

CLOTHING AND PERSONAL CARE

Clothing costs—replacement of the clothing, and materials and services—averaged $134 for the lower budget couple. The intermediate budget couple needed $234 and the higher $371, at spring 1967 prices.

The clothing allowances for husband and wife were about the same in the lower and intermediate budgets. At the higher level, however, the wife's allowance averaged about $20 more than the husband's.

Personal care costs moved from $83 for the lower budget to $123 for the intermediate, and to $178 for the higher budget. These costs constituted about 3 percent of the total family consumption for the three budgets.

MEDICAL CARE

The lower budget couple required $294 to cover its total medical costs for a year. This was only $2 less than the intermediate budget couple's $296, and $5 less than the top level cost of $299. Although there is only a $5 difference between the lower and the higher allowances, in the lower budget medical costs accounted for 12 percent of total family consumption, compared with only 6 percent of family consumption for the higher budget.

The medical care costs include hospital and medical insurance provided by the Federal Medicare program. Also included in the costs are eye examinations and eye glasses, drugs, and a physical checkup for Medicare enrollees not using Medicare services within a year.

OTHER CONSUMPTION

In the lower budget, "other consumption"—reading, recreation, tobacco, alcohol, and miscellaneous expenses—cost $126. For these same items, the intermediate budget required $213 while the higher budget totaled $454.

At the lower level, the largest single cost in "other consumption" was reading ($46), while at the intermediate and higher levels, costs for recreation—$81 and $256, respectively—accounted for the largest portions of the item.

Tobacco—cigars or pipes—and alcohol allowances are part of "other consumption" costs. No allowance was made for cigarettes in view of the findings of the U.S. Public Health Service concerning the effects of cigarette smoking on health.

LIVING COST DIFFERENCES AMONG CITIES

The new budgets provide a wide variety of total budget costs and comparative living cost indexes (tables 1–6) for major categories of consumer goods and services.

All indexes relate to costs for families established in the areas. They do not measure differences in costs associated with moving from one area to another, or costs incurred by recent arrivals in the community.

Within each budget, the intercity indexes reflect differences among areas in price levels, climatic or regional differences in the quantities and types of items required to provide the specified level of living, and differences in State and local taxes.

The annual cost of the lower budget in spring 1967 amounted to $3,110 in Honolulu and $2,334 in small Southern cities. In relative terms, with U.S. urban average costs equal to 100, this constitutes a range of 87 to 116, or 33 percent. For the other two budgets, Honolulu families spend $4,429 for the intermediate and $7,219 for the higher. In small Southern cities, families averaged $3,222 for the middle budget and $4,827 for the higher.

Of the mainland cities, the lower and intermediate budgets total costs were highest in Hartford—$3,022 and $4,343, respectively. The highest cost mainland city for the higher budget was Boston—$7,198.

For all three budgets, food, rental shelter, and transportation were most expensive in Honolulu, medical care in Los Angeles, and clothing in Portland, Maine. The cost of homeownership was highest in New York for the lower and middle budgets and in Boston for the higher budget.

PUBLICATIONS

"Measuring Retired Couples' Living Costs in Urban Areas" appears in the November issue of the *Monthly Labor Review*. Single copy price 75 cents, annual subscription $9.

The *Three Budgets for a Retired Couple in Urban Areas of the United States 1967–68*, Bulletin No. 1570–6, will become available later in 1969.

Other published bulletins in the series are:

Bulletin 1570–1, *City Worker's Family Budget for a Moderate Living Standard, Autumn 1966*. Price 30 cents.

Bulletin 1570–2, *Revised Equivalence Scale* for estimating budget costs for families of different size, age, and type. Price 35 cents.

Bulletin 1570–3, *Pricing Procedures, Specifications and Average Prices, Autumn 1966*, used for the moderate standard of the city worker's budget. Price 75 cents.

Bulletin 1570–4, *Retired Couple's Budget for a Moderate Living Standard, Autumn 1966*. Price 35 cents.

Bulletin 1570–5, *Three Standards of Living for an Urban Family of Four Persons, Spring 1967*. Price $1.00.

Publications can be purchased from the regional offices of the Bureau of Labor Statistics and the Superintendent of Documents, Washington, D.C. 20402.

[1] A husband age 65 or over and his wife.

[2] The total cost of the budget includes an allowance for gifts and contributions.

[3] The total represents the weighted average costs of renter and homeowner families. The weights in the lower budget were 40 percent for families living in rental dwellings; 60 percent for homeowners.

[4] Average contract rent plus the cost of required amounts of heating fuel, gas, electricity, water, specified equipment, and insurance on household contents.

[5] Taxes; insurance on house and contents; water, refuse disposal, heating fuel, gas, electricity, and specified equipment; and home repair and maintenance costs.

[6] The average costs of automobile owners and nonowners were weighted by the following proportions of families; Boston, Chicago, New York, Philadelphia, 100 percent for nonowners; all other metropolitan areas, 45 percent for car owners, 55 percent for nonowners; nonmetropolitan areas, 55 percent for car owners, 45 percent for nonowners.

[7] For a detailed description see the 1967 edition of "Standard Metropolitan Statistical Areas," prepared by the Bureau of the Budget.

[8] Places with populations of 2,500 to 50,000.

Note: Because of rounding, sums of individual items may not equal totals.

[1] A husband age 65 or over and his wife.
[2] The total cost of the budget includes an allowance for gifts and contributions.
[3] The total represents the weighted average costs of renter and homeowner families. The weights in the higher budget were 30 percent for families living in rental dwellings; 70 percent for homeowners.
[4] The total includes an allowance of $53 for lodging away from home city. The allowance is the same for all areas. This allowance is not shown separately or included in any of the housing subgroups.
[5] The average costs of automobile owners and nonowners were weighted by the following proportions of families: Boston, Chicago, New York, Philadelphia, 75 percent for car owners, 25 percent for nonowners; all other metropolitan and nonmetropolitan areas, 100 percent for car owners.
[6] Average contract rent plus the cost of required amounts of heating fuel, gas, electricity, water specified equipment, and insurance on household contents.
[7] Taxes; insurance on house and contents; water, refuse disposal, heating fuel, gas, electricity, and specified equipment; and home repair and maintenance costs.
[8] For a detailed description see the 1967 edition of "Standard Metropolitan Statistical Areas," prepared by the Bureau of the Budget.
[9] Places with populations of 2,500 to 50,000.

Note: Because of rounding, sums of individual items may not equal totals.

The family consists of a retired husband and wife, age 65 years or over.

[2] The total represents the weighted average costs of renter and homeowner families. See the weights cited in footnote 4.

[3] The lower and intermediate budgets do not include an allowance for lodging away from home city, but the higher budget includes $53 for all areas. These costs are not shown separately or included in any of the housing subgroups.

[4] The average cost of shelter is weighted by the following proportions: Lower budget, 40 percent for renters, 60 percent for homeowners; intermediate budget, 35 percent for renters, 65 percent for homeowners; higher budget, 30 percent for renters, 70 percent for homeowners.

[5] Average contract rent plus the cost of required amounts of heating fuel, gas, electricity, water, specified equipment, and insurance on household contents.

[6] Taxes, insurance on house and contents, water, refuse disposal, heating fuel, gas, electricity, specified equipment, and home repair and maintenance costs.

[7] The average costs to automobile owners and nonowners in the lower budget are weighted by the following proportions of families: New York, Boston, Chicago, and Philadelphia, 100 percent for nonowners; all other metropolitan areas, 45 percent for automobile owners, 55 percent for nonowners; nonmetropolitan areas, 55 percent for owners, 45 percent for nonowners. The intermediate budget proportions are: New York, 25 percent for owners, 75 percent for nonowners; Boston, Philadelphia, and Chicago, 40 percent for owners, 60 percent for nonowners; all other metropolitan areas, 60 percent for owners, 40 percent for nonowners; nonmetropolitan areas, 68 percent for owners, and 32 percent for nonowners. The higher budget proportions are: New York, Boston, Philadelphia, and Chicago, 75 percent for owners, 25 percent for nonowners; all other areas, 100 percent for automobile owners. Intermediate budget costs for automobile owners in autumn 1966 were revised prior to updating to spring 1967 cost levels.

[8] For a detailed description, see the 1967 edition of the Standard Metropolitan Statistical Areas, prepared by the Bureau of the Budget.

[9] Places with population of 2,500 to 50,000.

TABLE 7.—ANNUAL COSTS OF CONSUMPTION FOR 3 LEVELS OF LIVING FOR A RETIRED COUPLE, URBAN UNITED STATES, SPRING 1967, AUTUMN 1968, AND SPRING 1969 [1]
(ESTIMATED ON THE BASIS OF THE CONSUMER PRICE INDEX)

	Spring 1967	Autumn 1968	Spring 1969 [1]	Percent change, spring 1967 to spring 1969
Lower:				
Food	$789	$835	$851	7.9
Housing	939	986	1,010	7.6
Transportation	191	200	205	7.3
Clothing and personal care	217	234	240	10.6
Medical care	294	321	334	13.6
Other family consumption	126	135	137	8.7
Total family consumption	2,556	2,711	2,777	8.6
Intermediate:				
Food	1,048	1,111	1,131	7.9
Housing	1,330	1,400	1,433	7.7
Transportation	382	400	412	7.9
Clothing and personal care	357	387	396	10.9
Medical care	296	323	337	13.9
Other family consumption	213	229	231	8.5
Total family consumption	3,626	3,850	3,940	8.7
Higher:				
Food	1,285	1,363	1,387	7.9
Housing	2,066	2,183	2,239	8.4
Transportation	682	713	735	7.8
Clothing and personal care	549	595	608	10.7
Medical care	299	326	339	13.4
Other family consumption	454	484	495	9.0
Total family consumption	5,335	5,664	5,803	8.8

[1] The budget estimates for spring 1969 reflect a slower rise than the 9.6-percent increase in the CPI because a majority of the retired couples live in mortgage-free homes. Therefore, their budgets were not affected by the sharp rise in mortgage interest rates. Data for spring 1969 will be revised later to reflect the spring 1969 repricing of goods and services that make up the budgets.

COMPUTERIZATION OF COURT DOCKETS

HON. CHARLES McC. MATHIAS, JR.

OF MARYLAND

IN THE SENATE OF THE UNITED STATES

Tuesday, December 16, 1969

Mr. MATHIAS. Mr. President, on December 9, I had the pleasure of speaking to a meeting of the Pentagon and Capitol Hill chapters of the Federal Bar Association on the subject of backlogs in our courts.

In stressing methods of coping with this problem other than merely increasing the number of judgeships, I mentioned the value of computerization of court dockets.

I am pleased to say that the city of Baltimore, under a grant from the Federal Law Enforcement Assistance Administration, is developing a model system of this type. The project will, it is hoped, encompass even more than docketing in an attempt to simplify and expedite the administrative side of the judicial process.

A computerized docket in the Common Pleas Court of Philadelphia has served as a guide for the Baltimore undertaking. As a member of the Committee on the Judiciary, I have been deeply troubled by backlog problems in Maryland and across the Nation. I applaud the Baltimore and Philadelphia efforts. I ask unanimous consent that an article about the Philadelphia plan contained in the December 1969, issue of Judicature, published by the American Judicature Society, be printed in the Extensions of Remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

COMPUTER STREAMLINES CASELOAD AT PHILADELPHIA COMMON PLEAS COURT

(By Edward J. Blake and Larry Polansky)

A complex, innovative transition to computer-assisted court operations has been completed at the Common Pleas Court of Philadelphia. This has provided a range of immediate improvements even as work continues toward development of a comprehensive system that will encompass all aspects of the administration of justice.

Installed in June and fully operational by September of 1968, the new computer system has already helped achieve a significant decrease in criminal cases outstanding—particularly serious cases—and has helped reduce a heavy backlog of civil cases, and, for the first time, supplied timely statistics to court administration to facilitate operational decisions.

Equally important, from the point of view of court management, has been the demonstrated ability to respond quickly and positively to a changing workload that doubled data processing activities almost overnight.

This new workload resulted from a Constitutional Court consolidation of Common Pleas and County Courts and the creation of a new Municipal Court of record as of January 1, 1969. The reorganization and the installation of a computer system both represented a response to the extremely heavy burdens placed on the court system by such developments of the recent past as rising crime rates and automobile litigation, and higher court decisions resulting in increases in pretrial evidence hearings and post-trial motions.

While court facilities had to be expanded, this move alone was not considered sufficient to meet the overall problem, since the total effect of such changes would be impeded without proper control and record keeping support.

Under the direction of President Judge Vincent A. Carroll and Court Administrator Edward J. Blake, Esq., studies began in January 1967 toward the development of an advanced computer system which would go beyond routine accounting and clerical tasks to assist in court management. In November of 1967 Larry P. Polansky was appointed deputy court administrator for data processing, specifically to design and implement the new system.

The IBM System/360 Model 30 was selected, with auxiliary equipment including three 2311 magnetic disk units, a magnetic tape unit, and a high-speed printer. A basic philosophy in designing the system was to anticipate future needs. Thus, a data base was created to readily accommodate on-line (directly linked to the computer) terminal devices when such devices are put into operation at various local and remote offices. This system extension is scehduled for implementation by December 31, 1969.

BACKLOG ANALYZED

By September 1968, the computer was producing a range of information which permitted the first systematic analysis of the court's caseload. In the civil area it was possible to document the exact composition of the backlog.

Further, it became possible to document a prime cause of case backlog—attorneys individually involved in a large number of cases, and therefore frequently engaged or otherwise unavailable. This condition had been suspected, but until documented, it was all but impossible to work out a solution or even to provide proof of the problem.

During 1968, the computer was used to establish two separate systems for the Common Pleas Court—civil and criminal. Pennsylvania's new judiciary article, effective January 1, 1969, merged the Common Pleas, County, and Orphans Court into a 56-judge Common Pleas Court. The prior magistrate system was replaced by the Municipal Court, which will eventually be staffed wholly by law-trained judges. Not included is the Traffic Court, which is a separate operation. In December 1968, it was decided to extend computer operations to the new Municipal Court, which began activities on January 1, 1969. A unique opportunity was afforded by the creation of a new court and the availability of a computer system. Therefore, the new court of record was fully automated. This meant that the computer workload was more than doubled overnight. There were no funds for new personnel or equipment. Nevertheless, the computer began functioning as a "clerk" for the new court on the effective date.

There are now, in effect, four separate computer systems—serving civil and criminal cases for the Common Pleas Court, and civil and criminal cases for the Municipal Court. The systems for both courts are basically similar. Thus when a case is appealed from the Municipal Court to the Common Pleas Court the system can follow the progress internally.

The data base—or automated master file—for the civil systems includes the following information:

Present status of each case, type of trial requested, court term and number, the date a certificate of readiness was filed by either party's attorney; type of case, any insurance company involved, whether a minor is involved, complete names of attorneys, complete disposition data, continuance information including number of times continued, complete trial data, and miscellaneous information such as plaintiff demands and defendant offers.

HOW THE CIVIL SYSTEM WORKS

As certificates of readiness are filed by either party, copies are sent to the data processing department where cards are punched and fed into the computer. The magnetic data base is automatically updated, and a daily trial listing of available cases—which does not carry definite date and courtroom assignments—is produced. The list is sent to the Philadelphia legal newspaper by 3 p.m. of the same day. It is published and distributed to law offices early the following morning.

Attorneys for the top 20 cases on the list must appear in a call room at 10:00 that morning. They declare themselves ready to go to trial, or ask for a postponement. The computer program lists the top 150 cases by priority, which means—in effect—the oldest cases in which the attorney is not otherwise engaged are always listed first. Postponements are not normally granted, since the case has had about five days to work its way into the top 20.

Of the 20 cases called each day, about 15 are found ready for trial, and of these, approximately 12 are assigned to a courtroom. A trial worksheet produced on the computer follows the case into the courtroom, and is used by the judge to indicate its disposition. The worksheet carries the names of the principals, attorneys, whether a minor is involved, and the number of trial days estimated.

Information on cases which actually go to trial flows back to the data processing department on a daily basis to update the data base. Similarly, cases which are held over are repeated in the trial listing for the following day.

If the attorney is engaged, his name is entered in the engaged pool listing. This is also produced daily and shows, for each attorney on the list, the number of cases he has in the engaged pool, those for which he is solely responsible, those for which he has joint responsibility, and those for which he is not responsible for postponement though he is the attorney of record.

As settlement notices, the results of trial calls, and trial results are received, they are also punched into cards and put through the computer, and a daily case results report is produced. This indicates settlement, continuances, cases originally scheduled for a nonjury trial, which were transferred for jury trial, cases stricken by the judge, and cases actually under way, with the name of the judge indicated.

A final daily routine captures and prints information on attorney changes, and objections to published listings. The daily published list of cases certified as ready for trial provides attorneys with an opportunity to correct any errors well before the case reaches the top 20. This fact alone has significantly increased the number of cases ready for trial on the date indicated.

In addition, the monthly report to each attorney on the status of every case in which he is involved has been an invaluable tool for the bar and the court.

Settlement conference schedules are also produced on the computer. The system's program of instruction does an excellent job of producing week-long conflict-free schedules for ten judges hearing ten or more cases each day. Here, too, a computer-produced worksheet accompanies the case into the conference room.

The engaged attorney's report has been a major tool in attacking the heavy backlog of cases. It is used by court administration officers, the Board of Judges, and the Bar As-

sociation as a basic document and also as a tool for exploring operational improvements.

Reports are also furnished, about six to ten times yearly, to every attorney whose name appears in the system. These reports have been well received, since they notify the attorney of the relative position of all his cases and provide the opportunity to make necessary corrections well in advance of the trial.

The Pennsylvania Supreme Court permits judges a maximum of 60 days for cases held under advisement; a special monthly report lists these automatically and, in fact, shows when and before which judge the case went to trial.

Special monthly reports list all cases by court term and number, each attorney's cases, dispositions month and year to date, and cases awaiting adjudication 60 days or over.

THE CRIMINAL SYSTEM

Equivalent information is developed for the criminal divisions of both courts. The data base for criminal activities includes: master docket records reflecting the grand jury's bill of indictment, offense description, names of attorneys and assistant district attorneys, police medical data (such as sobriety tests), disposition, length of sentence, records on each courtroom for control purposes, bonding company information, and alias records. In each category, information is complete. Trial listing data include the number of times the defendant was listed for trial, first date and last date tried. Trial information covers the type of trial, number of days, the name of the judge, date of sentencing, institution to which remanded, amount of fine or restitution, and any court costs.

Since the system can identify any other bills which might be related to a defendant, multiple cases can be tried at the same time. Periodically, police photo file data are reviewed for relevance to cases pending.

Bills of indictment are punched into cards and passed through the system to create the automated criminal files and, as a by-product, to produce grand jury new bill lists, documentation for the quarter sessions clerk, district attorney dockets showing the name, case number, charges, etc., to record all subsequent actions on the docket book, and alphabetical index cards for the quarter sessions clerk. Also produced is information for the police department relating to previous arrests.

Arraignment schedules are produced weekly, identifying defendants incarcerated or awaiting trial and defendants admitted to bail in serious offense cases.

At the present time, no attempt is made to eliminate attorney conflicts, because the time of a criminal case may range from one half hour to more than one month. The system schedules for conference every open case, providing even workloads, and automatically produces defendant subpoenas and attorney notices.

At conferences held for scheduling purposes, an attempt is made to set a trial date satisfactory for all concerned, and blank date subpoenas are provided on which dates and courtroom numbers are entered. The criminal case listings published daily are not on a "top 20" basis. Major cases are scheduled into a "pool" room for courtroom assignment and date, and others are scheduled to a "room certain." The result of this activity shows up in a daily report of conference results. Cases continued are automatically rescheduled for trial by the computer or for further conference if they constitute a major case. Every significant action in a criminal case from arrest to sentencing is recorded in the computer and is available for quick review by court administration.

ATTORNEY REPORTS

There are approximately 6,000 attorneys practicing in the Philadelphia area, and each of them has been assigned a computer number, defendant name, next action date and type, conflict indicator, and other data for each case. In addition, an end run summary provides the number of cases in the system for each attorney and indicates whether any conflict exists in his case load. A clear picture of current workload is provided via the detail list to the attorney and via the summary list to court administration.

Produced daily are reports on bail activity, the following day's trial lists (which often run to 50 copies or more, and are printed on a high-speed printer), the following week's trial lists, and a report of trial results by courtroom. Continuance cases generally are automatically reassigned new trial dates by the system according to judge and room availability. Reassignment lists are produced weekly, along with voluntary defender notices, attorney letters, and subpoenas.

Every day, a room availability list is printed showing all available open dates in the future. Weekly reports list all cases in court term and number sequence, and by defendant in alphabetical sequence. In addition, weekly room control reports indicate other volume and content of the entire scheduled future workload. Monthly and annual reports produced for various state agencies list and summarize by categories deferred indictments—which are primarily fugitive cases with bench warrants issued—deferred sentence cases, and dispositions for the period.

Civil arbitration activities are another new part of the Common Pleas Court, and are also handled automatically. The system provides random, equitable selection of arbitration panels, assignment of cases, preparation of vouchers for panelist payments, and recording of all activity, dispositions and mailings for required notices.

It should be noted that the computer system also incorporates statistics on court-fixed asset inventories and personnel.

With this wealth of information, never before available in current and comprehensive form, it has been possible to analyze case loads outstanding and take action to reduce them. We can now measure a reduction of one to two years in the civil case backlog, with every reason to hope for continued improvement.

It is also possible to project future needs for judges and courtrooms on a realistic basis. It had become evident that building more facilities alone is not a realistic single course of action. Existing facilities must be properly controlled, insuring that they are being used to best advantage, before funds are expended for more building and personnel.

Of major importance is the vastly improved level of communications which has been established for all court-related parties. Communications have long posed a problem in court operations. While the computer system cannot get lawyers into a courtroom, it does provide far better information to attorneys and indicates to the president judge, court administrator, the bar association, and other bodies those areas in which attention is needed in order for the court calendar to be cleared.

FUTURE POTENTIAL

Equally important is the fact that the court is in an excellent position to absorb continuing changes. Task forces now at work analyzing court operations for future improvements are planning for the use of simulation programs to assist in court management decisions.

These plans are part of a vast potential for additional computer applications. The basic system is on hand for expansion into on-line terminal operations, awaiting only the availability of funds. By October 1969 the IBM Model 30 was up-graded to a larger-capacity Model 40, with TV-like visual terminals. Judgment searching, case status, courts and in the central operations center. By January 1970 we will place similar units in the criminal and civil listings offices; the arraignment courtroom; and the offices of the president judge, court administrator, administrative judges, and calendar judges.

This will permit fast retrieval of information at the point where it is needed, and eventually will lead to on-line updating of the central data base from the remote terminals. Judgement searching, case status, courtroom availablity, and other management oriented information will be instantly available.

Additional applications soon to be added, or in the planning stage, and which are not necessarily dependent on terminal operations for implementation, include:

Juvenile Court operations; probation office activities—officer workloads, follow-up on parolees and probationers, restitution accounting and inquiry into probationer status; jury selection; computer-assisted appointment of masters in divorce suits, and of defense counsel in criminal cases; "automated" dockets and indexes for clerk offices in both criminal and civil divisions; domestic relations support order payments; automated title searching.

With the continued active support and involvement of the president judge and administrative judges—who must provide the vision and support essential to success—the Common Pleas Court of Philadelphia will evolve a modern judicial data system geared to help solve the huge range of problems currently faced by the typical urban court.

CONFERENCE REPORT ON H.R. 7491—TAXATION OF NATIONAL BANKS

HON. WRIGHT PATMAN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 10, 1969

Mr. PATMAN. Mr. Speaker, last week the two Houses adopted the conference report on H.R. 7491, to clarify the liability of national banks for certain taxes. In adopting the report on the Senate side, some statements were made to the effect that during the conference, the language contained in the conference report was amended by the addition of two words, and allegedly these two words were "apparently inadvertently omitted from the report." Mr. Speaker, without getting into the details, the words allegedly left out of the report were "the same." The discussion on acceptance of the conference report in the other body went on to say that the Senate conferees agreed—or at least some of them agreed—with this position.

Mr. Speaker, I was most disturbed over this matter for a number of reasons because I, for one, was firm in my recollection that Senator SPARKMAN had stated that Senator BENNETT had requested the insertion of these words—"the same"—in the permanent amendment of section 5219, but after some discussion of this proposal, the proposal was not adopted.

Wishing to be completely sure of my recollection of this matter, I directed the House Banking and Currency staff to search their memory to determine whether or not I was correct in my position.

As a result of my inquiry, I received the following letter signed by Mr. Grasty Crews, assistant counsel in the Office of the Legislative Counsel of the House of Representatives who provided staff assistance to the conference.

In this letter, it should be noted that the staff director of the committee was checked with, the head of the minority staff, a counsel for the commitee, and the senior assistant counsel in the Office of Legislative Counsel of the Senate.

All of these staff people agreed that the conference committee had not adopted the change as indicated in the statement contained in the CONGRESSIONAL RECORD, page 38633 of December 12, 1969, at which point the Senate takes up the conference report on H.R. 7491.

In order to leave no doubt, the Treasury Department was contacted on this matter to determine whether or not the Department made any request for such a change in the legislation. The Deputy General Counsel of the Treasury indicated that if any such requests were made by the Department, he should have known about it and no such request, to his knowledge, had been made.

To conclude, Mr. Speaker, I do not believe that the conference report and legislative language contained therein is in any way in error. The statement of the managers on the conference report and the report itself is, in my opinion, and I believe that of the House conferees, a complete and accurate reflection of the legislative policy agreed upon at the conference.

Mr. Speaker, included along with my remarks is a letter on the subject signed by Mr. Grasty Crews II, assistant counsel in the House Office of the Legislative Counsel:

HOUSE OF REPRESENTATIVES, U.S.
OFFICE OF THE LEGISLATIVE COUNSEL,
Washington, D.C., December 15, 1969.

Hon. WRIGHT PATMAN,
Chairman, Committee on Banking and Currency, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: You have asked for a review of the preparation of and action on House Report No. 91–728 (conference report to accompany H.R. 7491, relating to State Taxation of National Banks), insofar as relevant to the statement of Senate Proxmire, as set forth at page 38633 of the Congressional Record for December 12, 1969, that certain words "were apparently inadvertently omitted from the report," and that Senator Bennett feels that the addition of those words would have clarified the congressional intent.

It is my recollection that after Chairman Sparkman presented to the conferees a draft conference report, he stated that Senator Bennett had requested the insertion of the words "the same" in the permanent amendment of section 5219 so that the section would read as follows:

"For the purposes of any tax law enacted under authority of the United States or any State, a national bank shall be treated the same as a bank organized and existing under the laws of the State or other jurisdiction within which its principal office is located."

There was some discussion of this proposal and there was certainly no objection to the purpose for which it was offered, which was to make it clear, as Senator Proxmire put it in his remarks, that "Congress is expressing no intent about the Federal instrumentality issue concerning national banks." Although the discussion seemed to me to be somewhat inconclusive, I had the impression that the proposal was not adopted. I did not interrupt the conference for a clarification of the matter, because it seemed to me that, for reasons set forth later in this letter, no substantive legal issue was involved.

I did feel, however, that there was enough doubt in my own mind about the actual formal action of the conference that I should clarify the matter while recollections were fresh. Before leaving the room, I therefore expressly raised the question with Mr. John M. Reynolds, the Senior Assistant Counsel in the Office of the Legislative Counsel of the Senate; with Mr. Benet D. Gellman, Counsel to the House Banking and Currency Committee; and with Dr. Paul Nelson, Clerk and Staff Director of the House Committee, all of whom were present throughout the deliberations of the committee of conference. Had there been any disagreement among us, I would have pursued the matter further, but we all had the same impression, which was that the committee had not adopted the proposed change in language. Mr. Reynolds was also of the opinion that no substantive legal issue was involved. On this basis, the report was prepared and filed in the House that same afternoon, Tuesday, December 9, 1969. It was, of course, published in the RECORD for that date.

The House agreed to the conference report on Wednesday afternoon. The first inkling I had of any disagreement over whether the report fairly reflected the action of the committee came on Thursday morning, when one of the members of the House Banking and Currency staff advised me that a member of the Senate Banking Committee staff had said, first, that the committee had adopted the proposal to insert "the same" and, second, that this change was being urged by the Department of the Treasury.

As to the first point, I first consulted Mr. Orman S. Fink, the minority professional staff member of the House Banking and Currency Committee. He was present at the conference and he stated that it was his impression that the commitee had not adopted the change. I also telephoned Mr. John M. Reynolds and he confirmed what he had told me at the conclusion of the conference.

In order to leave no doubt as to the position of the Treasury, I telephoned the Deputy General Counsel, Mr. Roy T. Englert, whom I have known since the days when he was Chief Counsel in the Bureau of the Comptroller of the Currency, and for whose character and legal acumen I have the highest regard. As you know, responsibility for legislative affairs of this type rests with the Office of the General Counsel. Mr. Englert assured me that the Department had not, to his knowledge, made any request for such a change in the legislation. He stated further that Mr. Eggers (the General Counsel) was out of town and that he (Mr. Englert) should have known about it if any such request were made by the Department of the Treasury.

Mr. Englert and I then proceeded to discuss the possible legal effect of the proposed change. It was my view that it would probably make no difference in the meaning, but that if a court were compelled to make a distinction, it might construe the addition of the words "the same" to raise an implication of equality or identity for all purposes. A comparison of the definitions of "as" and "same" given in *Webster's Third New International Dictionary* seems to support this view. In other words, the addition of the words "the same" might have had a legal effect precisely opposed to that which was intended by the conferees. It was my impression that Mr. Englert concurred in this view; in any event, he left no doubt whatever that to the best of his knowledge the Department of the Treasury had not asked and was not asking that this change be made.

Following my conversation with Mr. Englert, I reviewed the entire matter with Dr. Nelson. To summarize, two eminently well qualified and completely independent attorneys had concurred in my original view that the proposed change would, at best, have failed to express with any greater clarity the intent of the Congress. Each member of the House committee staff had independently agreed with the impression of Senate legislative counsel and myself that the committee had taken no action on the proposed change. Under these circumstances, it was the judgment of Dr. Nelson and myself that we ought not to advise you to set in motion the legislative machinery to attempt to effect a change in the enrolled Act.

I deeply regret the development of any misunderstanding in regard to the action taken by a committee of conference. I find it easy to understand how anyone at this conference might have reached a conclusion different from my own in regard to the adoption of Senator Bennett's proposal. Had I been entirely sure about the matter at the time, I would not have felt it necessary to consult with others present as widely and promptly as I did. But regardless of whose recollection or judgment may be most nearly correct about the action of the committee on that proposal, it is my considered opinion that the text of the conference report, as a matter of law, is a faithful reflection of the legislative policy agreed upon at the conference.

Sincerely yours,

GRASTY CREWS II,
Assistant Counsel.

THE AGE OF REVOLUTION

HON. PAUL J. FANNIN

OF ARIZONA

IN THE SENATE OF THE UNITED STATES

Tuesday, December 16, 1969

Mr. FANNIN. Mr. President, in these days of campus unrest, protest, demonstrations, draft-card burning, and the rest, it is well for us to reflect occasionally on the fact that the vast majority of America's young people are hardworking, energetic, devoted to high principles and lofty goals, and willing to make important personal sacrifices to attain these goals.

Illustrative of this is the rapid growth in recent years of the guaranteed student loan programs. Ambitious students all across the land have shown themselves willing to shoulder a portion of their own education costs as they move to equip themselves for their role as tomorrow's leaders.

In this connection, a particularly impressive ceremony was held on December 4 at the Department of Health, Education, and Welfare in Washington. Secretary of Health, Education, and Welfare, Robert H. Finch paid special tribute in this ceremony to United Student Aid Funds, Inc., the Nation's leading private, nonprofit, tax-exempt student loan guarantee organization. The immediate occasion for this ceremony was the

borrowing by a student of the 250 millionth dollar which United Student Aid Funds, Inc., has endorsed—or cosigned for students, if you will—in its 9 years of operation.

Present at the ceremony with Secretary Finch were Under Secretary of the Treasury Charles E. Walker; Allen D. Marshall, president of United Student Aid Funds, Inc.; Miss Jacqueline Curran, the student at Husson College, Bangor, Maine, whose loan this fall put USA Funds' loan volume across the $250 million mark; Mr. Fred Newman, president of the Eastern Trust and Banking Co. of Bangor, the bank which made the loan to Miss Curran; and James Hackett, the loan officer at the Eastern Trust and Banking Co. of Bangor, who personally handled the transaction.

To make low-cost, long-term loans available to deserving students is a truly worthwhile undertaking. Lending institutions, as well as guarantors and the students themselves, are to be commended for the growth of this whole venture. For some thoughtful commentary on this growth and on its future direction, I would cite my colleagues to the remarks made by Mr. Allen D. Marshall, the president of United Student Aid Funds, Inc., before the Sixth National Conference of the Association of Student Governments November 27, 1969, at Atlanta, Ga.

Mr. President, I ask unanimous consent that the comments of Mr. Marshall be printed in the RECORD.

There being no objection, the comments were ordered to be printed in the RECORD, as follows:

SIXTH NATIONAL CONFERENCE ASSOCIATION OF STUDENT GOVERNMENTS

(By A. D. Marshall)

I suspect that on many campuses today Emerson is frequently quoted. He said:

"If there is any period one would desire to be born in—is it not the age of revolution; when the old and the new stand side by side, and admit of being compared; when the energies of all men are searched by fear and hope; when the historic glories of the old can be compensated by the rich possibilities of the new era? This time, like all times, is a very good one, if we but know what to do with it."

Immediately one thinks this applies to changing forms of university governance and to novel teaching experiments, but it applies equally to the financing of higher education for some of the 8 million students now in post-secondary educational institutions. Only one phase, student aid, and the changes made in it in less than a decade, illustrates what I mean for the area with which I am most familiar.

Just about ten years ago a small group of men in Indianapolis decided some means were needed to aid the needy and deserving student in obtaining the necessary money to complete his college education. They commissioned Arthur D. Little & Company to study the problem. Arthur D. Little & Company soon reported back that such a plan was already in operation in Massachusetts and, with some modifications, it could be used nationwide.

Thus was born United Student Aid Funds, Inc. which guaranteed its first bank loan in February 1961.

The principles of this organization were simple. A college would deposit one thousand dollars, usually from funds that it had been lending directly to students, United Student Aid Funds would agree to guarantee $12,500 worth of bank loans to students at that institution. It would agree with the banks to keep an 8% reserve in cash and marketable securities as a guarantee fund.

A student needing aid would consult with the financial aid officer at his college who would review his budget, all the forms of aid available and, if necessary, recommend him to his home town bank for a loan that would be guaranteed.

The loan was not intended to cover all the student's expenses; it provided only the marginal money that was still needed after other sources—family support, his own savings and earnings, scholarships, and grants—had been exhausted. United Student Aid Funds did not and does not feel that it is to the advantage of a student to take on an unnecessary burden of debt. We do feel, however, that a young man or woman is more likely to appreciate his or her education, and perhaps even work harder for it, if he has a stake of his own in it.

The loan was at 6% simple interest which accrued but did not need to be paid during his college course. After graduation he would pay both principle and interest in monthly installments. While a new idea for financing an education, this system had long been used in installment buying. The student paid the loan while he was enjoying its benefits, just as the automobile purchaser does not start his monthly payments until the car is delivered.

The whole procedure involved some sacrifices for everyone; the college lost the interest on its deposit; the banks made a loan at much less than the prevailing interest on installments loans; and the student paid interest over a period of years on money spent for his education.

Notwithstanding these sacrifices, the advantages were so obvious that within a few years nearly 1,000 educational institutions and 10,000 lending institutions were participating, and over 150,000 students had been aided. It might be said the experiment was successful and the sacrifices required had kept the program to its original purpose—aid for the needy and deserving.

The passage of the Higher Education Act of 1965 and subsequent Federal legislation introduced a new element. These acts and the regulations under them practically eliminated the sacrifices. Colleges no longer needed to put up deposits for reserves. The interest rate to banks was raised to 9%. For the great majority of students the interest was paid during their college courses and during subsequent military or other forms of service.

Not only was the element of sacrifice removed, but there was introduced a real incentive to borrow. Guarantee agencies were forbidden to take into consideration the needs of the student and his family. As a matter of fact, the program was advertised as a loan plan for the middle income family.

What has been the result?

After I had finished my testimony before a Congressional Committee a year or two ago the very perceptive Chairman stated:

"I would like to say that the way you have outlined the need versus the want, and the need versus the manipulated demand—I must say to you that with a subsidy on the interest in school and after graduation, that if there is not a needs test, I think any kid that does not apply for such a guaranteed loan is not smart enough to be in college.

"They ought to change their admission standards. I heartily support some kind of need requirement. I think otherwise Congress is going to be rightly charged with creating a situation where we could have a major boondoggle, and the taxpayers would be financing home loans and everything else for fairly well-to-do people."

Of course, what one might have expected has happened. Today loans guaranteed under the program by all agencies, Federal, state and private, total about $2,260,000,000 (two-and-a-quarter billions), and loans are being made at twice the rate they were just a short time ago.

In August 1967, in testifying before a Congressional Committee, I used the estimated enrollment figures given by the Office of Education and said that, if only one-third of the students borrowed $1,000 a year for four years, at the end of 7 or 8 years there would be outstanding 23 billions of dollars in student loans, a quarter of the total consumer credit then outstanding. The annual cost to the taxpayer would be over one billion dollars.

Today we are already well on the way to the situation I described. Thus the change from an opportunity to borrow at some sacrifice to an inducement to borrow is bringing about the increase that was foreseen.

This raises some interesting questions for my generation and for your generation. You may have others.

To what extent should young men and women be encouraged to burden themselves with debt?

Is there real justification for the payment of millions of dollars annually in interest subsidies to families that could borrow in other ways, when there are so many other urgent needs for the taxpayers' money?

My generation will cease to be taxpayers in not too many years. Will your generation willingly assume the tax burden of financing this program, perhaps at the same time you are paying off your own loan?

Would it not be better to make grants to the really needy to cover most of their expenses and provide loans for only their marginal requirements?

These questions do not even cover such basic issues as the effect of billions of dollars in student loans on increasing the inflationary forces still at large.

These are some of the questions with which we are faced. The effect of programs apparently for your immediate benefit may not be to your advantage long-range.

However, don't ever consider money spent for your education wasted. Years ago Benjamin Franklin in "Poor Richard's Almanac" said: "If a man pour his purse into his head no one can take it from him."

DR. CHESTER D. BRADLEY

HON. THOMAS N. DOWNING

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. DOWNING. Mr. Speaker, December 14, 1969, was a day of significance in my district. It marked the 20th anniversary of the birth of an idea which led to the establishment of the Fort Monroe Casemate Museum. One of the participants 20 years ago, the late Col. Paul Goode, then the post commander at Fort Monroe, has gone on to his reward. The other, Dr. Chester D. Bradley, received the Army's Outstanding Civilian Service Award in ceremonies on the anniversary date last Sunday. The award was presented by Col. Henry L. Gordner, the present commander at Fort Monroe, and was signed by Gen. James K. Woolnough, commanding general, U.S. Continental

Army Command, whose headquarters is located on the historic post. The citation reads:

Dr. Bradley distinguished himself by truly meritorious service in the establishment and development of the Fort Monroe Casemate Museum during the period 12 December 1949 to 26 November 1969. Dr. Bradley has made the history of Fort Monroe his personal avocation for over twenty-five years. Often traveling abroad at his personal expense, he devoted much time to researching, writing and preparing historical displays depicting the history of Fort Monroe. Dr. Bradley's continuous efforts and selfless devotion indicate his true interest in his country and its people, and reflect great credit upon himself, the United States Army, and this Nation.

As is frequently the case, it is impossible for any such citation to tell the entire story. A far greater representation of Dr. Bradley's role in the conception and development of the museum is presented in the nomination for the Outstanding Civilian Service Award as it was forwarded to the commanding general by Colonel Gordner.

The material follows:

NOMINATION FOR OUTSTANDING CIVILIAN SERVICE AWARD

1. Dr. Chester D. Bradley, M.D., is nominated for the Outstanding Civilian Service Award for his truly meritorious service in the establishment of the Fort Monroe Casemate Museum.

2. Dr. Bradley was instrumental in the founding of the Museum which was officially established in 1951; however, his untiring and enthusiastic efforts date from 1949. The Fort Monroe Casemate Museum is recognized as an Installation Museum under appropriate Army regulations. It was founded officially in 1951 by the Post Commander and Dr. Bradley, a resident of the Peninsula who had developed an intense historical interest in Fort Monroe and the important role it has played in the Nation's history.

3. Dr. Bradley has made the history of Fort Monroe his personal avocation for over 25 years. He has devoted much time to researching, writing, and preparing historical displays depicting the history of Fort Monroe. Often traveling abroad at his personal expense, he secured new material by visiting many foreign museums, gaining ideas to improve the quality and character of the Museum exhibits and establishing both national and international interest. He has interviewed the descendants of countless people who have had significant experiences at Fort Monroe. Dr. Bradley located the personal papers of General Simon Bernard, the French General on Napoleon's staff who designed Fort Monroe, and brought the papers to the United States on loan for microfilming. He has compiled and assembled all of the historical material and collections which are now on display at the Museum. Because of his expert knowledge concerning this material, he was able to analyze, catalog, and assemble it into meaningful and educational exhibits.

4. Additionally, Dr. Bradley has written several monographs concerning Fort Monroe. His works include:

(a) "Robert E. Lee At Fort Monroe."
(b) "Black Hawk at Fort Monroe."
(c) "Edgar Allen Poe at Fort Monroe."
(d) "General Simon Bernard—Aide to Napoleon, Designer of Fort Monroe".
(e) "Is It a Fort or a Fortress?"
(f) "Fort Monroe in the Civil War."
(g) "A Short History of the Civil War."
(h) "U. S. Grant Comes to Fort Monroe."
(i) "Old Point Comfort: America's Greatest Bastion."
(j) "The Fanny: First Aircraft Carrier (1861)".
(k) "The Monitor and the Merrimack."
(l) "On to Richmond: General McClellan's Peninsula Campaign."
(m) "Abraham Lincoln at the Hampton Roads Peace Conference, 1865."

Dr. Bradley has also contributed numerous articles concerning Fort Monroe to various historical professional journals. These include "Abraham Lincoln's Campaign Against the Merrimack" which appeared in the Illinois States Journal of History; "Dr. Craven and the Captivity of Jefferson Davis at Fort Monroe" which appeared in the Virginia Medical Monthly, and "Jefferson Davis in Prison" which appeared in an issue of Manuscripts, the quarterly publication of the Manuscript Society. Dr. Bradley is recognized across the country as the expert with respect to Fort Monroe and the Virginia Peninsula during the Civil War period. He is a member of the American Historical Association.

5. In 1968 Dr. Bradley retired from medical practice and became the full-salaried curator at the Casemate Museum, having the responsibility for all modification of buildings, researching and planning, and advising the Commanding Officer, Fort Monroe, of his findings and recommendations. Under Dr. Bradley's personal guidance and direction, the Museum has grown rapidly but soundly as historical collections of relevance and merit have been located, assembled, cataloged, and displayed. Last year more than 70,000 people visited the Museum. At present, the Museum consists of six casemates, including the Monitor and Merrimack Casemate, where the epic battle between the two ironclads is recounted, complete with scale models of the two craft involved, histories of their construction and development, and items of interest concerning their commanders and crew; the Jefferson Davis Casemate where the story of the capture and confinement of the President of the Confederate States of America is told in the very cell where he was held prisoner; and the Old Fort Monroe Casemate where the history of the Fort and its more historically important activities and personages is told in a series of historical collections, photographs, drawings, and other items. The Jefferson Davis Casemate and Museum was restored to the appearance of originality in 1968. This project was undertaken and accomplished primarily because of Dr. Bradley's enthusiasm and dedication to the project.

6. Without Dr. Bradley's untiring, unselfish, and mostly uncompensated personal efforts in this endeavor, it is reasonable to state that the Fort Monroe Casemate Museum would never have attained the significance and reputation it enjoys. Dr. Bradley's dedication to his position and his accomplishments as both official and unofficial Museum Curator are worthy of the highest praise. Dr. Bradley's continuous efforts and valuable contributions to the Casemate Museum and Fort Monroe indicate his true extreme interest in this country and its people and reflect great credit upon himself, the United States Army, and this Nation.

7. Investigation discloses the absence of any information requiring action under appropriate security regulations.

8. Based on the foregoing, recommend approval of the Outstanding Civilian Service Award for Dr. Chester D. Bradley, M.D.

HENRY L. GORDNER,
Colonel, Infantry Commanding.

Dr. Chester D. Bradley is a truly remarkable man. His interest in the history of Fort Monroe was sparked by his appreciation of the care provided by an Army physician, Dr. John J. Craven, who was charged with the medical care of Jefferson Davis when the former President of the Confederacy was imprisoned at Fort Monroe in 1865. Dr. Bradley carefully researched the life and career of Dr. Craven and frequently told the story before local organizations. It was such a talk which brought him to the attention of Colonel Goode.

At the time his interest in the history of Fort Monroe began, Dr. Bradley was a practicing obstetrician and gynecologist. There is no way for a man in such a profession to predict the demands on his time, and Dr. Bradley eventually tired of having the arrival of newborn babes interfere with what had started as a hobby. He retired from his active practice to take a staff position at a State hospital in order to have more time to devote to that hobby. He later joined the staff of the Veterans' Administration Hospital at Hampton. All of this kept him physically close to the museum and enabled him to spend practically every waking moment away from hospital duty hard at work on his research or at the museum.

No community could ask for a more dedicated citizen and no segment of our Nation's history could expect a more hard-working advocate.

The presentation of the award caught Dr. Bradley completely by surprise. His response, however, was typical. Colonel Gordner pinned the metal to his jacket and then presented him with a framed copy of the citation suggesting that he might like to hang it at home. Dr. Bradley smiled and said:

I will hang it here in the museum.

He then went on to remark that it was not necessary to give him an award; after all, he had only been doing "what I enjoy doing."

LETTER OPPOSING THE MORATORIUM FROM A FATHER WHO LOST A SON IN VIETNAM

HON. STROM THURMOND

OF SOUTH CAROLINA

IN THE SENATE OF THE UNITED STATES

Tuesday, December 16, 1969

Mr. THURMOND. Mr. President, it was a real inspiration to me to read a letter from a father who lost a son in Vietnam. His response to the moratorium demonstrators and war protesters represents the true patriotism, loyalty, courage, and determination of the American people.

Pfc. Gregory M. Thompson, of Las Vegas, Nev., was killed in Vietnam on May 17, 1967. He was awarded the Silver Star posthumously for heroism in ground combat.

His father Malcolm Thompson, was so outraged over the moratorium, that he wrote a letter to the Las Vegas Review Journal. It is a masterpiece of devotion and dedication to our country. He condemned the protesters for reading the names of our servicemen who lost their lives for our Nation in Vietnam. The State newspaper of Columbia, S.C., reprinted this magnificent letter by a sad father who spoke out against the agitators.

I am so strongly impressed with Mr. Thompson's letter that I shall quote a significant paragraph:

When they read the name of Gregory Mal-

colm Thompson, let them realize that they are proving before the world the truth of the oft-repeated Communist claim that many Americans have become soft, decadent and yielding to any determined force which opposes them.

I commend this letter to all those who are advocating surrender and peace at any price. As I have said many times, the American people will not accept defeat and humiliation. They will not agree to discard the sacrifice of American blood for a hollow diplomatic agreement. However, Mr. Thompson gives deep meaning and substance to this view that few statements could match.

Mr. President, I ask unanimous consent that the letter be printed in the Extensions of Remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WHEN THEY READ HIS NAME: A SAD FATHER SPEAKS OUT

(NOTE.—The letter, giving an entirely different view of the present moratorium craze, was written by the father of Pfc. Gregory M. Thompson, an 18-year-old Las Vegas (Nev.) high school graduate who was killed May 17, 1967, in Vietnam. It is reprinted from the Las Vegas Review Journal.)

When the peace demonstrators read my son's name, let them know how he felt about the Vietnam war, and how the parents who shaped him feel about it.

It is we, the parents, who said goodbye to him when he went away to fight—not the peace agitators.

It is we, the parents, who wrote long, anxious letters to him during his three months almost continuous combat—not the agitators.

It is the ones who saw his body returned in a flag-draped coffin who first should be heard—not the protesters.

These transparent propagandists were not there to see my son buried, nor do they accompany me on my trips to lay flowers on his grave.

My son was killed while fighting for his country.

America cannot be permitted to perpetually persuade its citizens to instill in their sons a sense of patriotism, loyalty and a determination to defend the oppressed, and then, after the sons have died suddenly change her mind and yield to those who killed them.

Most of the peace demonstrations and namereading ceremonies across this nation are an obvious propaganda device designed to influence the President of the United States into surrendering South Vietnam to an enemy which admittedly and openly seeks to conquer it by any and all means.

When they read my son's name to advocate peace at any price—the price being defeat—let them remember that he whose name they read did not surrender.

When these pretentious mourners read my son's name, let them realize that their grief would be better served if applied to the Viet Cong whose flag they wave even as they burn the one which graced my son's casket. Let them apply their bogus sorrow to those aggressors felled by my son as he won his posthumous Silver Star for heroism in ground combat.

And when they read the name of my son, let them know that he advocated an increase in the bombing of the ammunition depots in North Vietnam—not a cessation so that his enemy would receive unlimited war supplies with which to kill him.

When they read the name of Gregory Malcom Thompson, let them realize that they are proving before the world the truth of the oft-repeated Communist claim that many Americans have become soft, decadent and yielding to any determined force which opposes them.

And when these weak, gullible ones read his name in their avowed pursuit of peace, let them remember that a peace purchased at the price of surrender is but a brief Munich-type peace lasting only until the aggressor's appetite demands more victims.

Finally, when these hypocrites read the list of the dead who defended South Vietnam, let them know that they have reached the ultimate low in the world-record of human infamy, in that they willfully and cunningly utter a dead man's name to achieve the defeat of the cause for which he died.

MALCOLM THOMPSON.

YOUTH ADVISERS

HON. GEORGE A. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. GOODLING. Mr. Speaker, someone once, said, "Youth will have its day," and I would like to report that this prophecy presently is coming true in the State of Pennsylvania, especially in the congressional district I represent where youth participation in community affairs is on a fast-rising curve.

Today's problems are manifold, diverse, and complex. The elders of the communities welcome this new ally. Youth has boundless energy, and its vision is sharp, attributes which can combine to exert a new effective force on today's problems. And as youth becomes fundamentally acquainted with the problems of today, it will become eminently equipped to cope with greater problems tomorrow.

An article commenting on youth advisers recently appeared in the December 13, 1969, issue of the Harrisburg Patriot. Because this article provides a perspective on the enterprise of youth in Pennsylvania's community affairs, I submit it to the CONGRESSIONAL RECORD to call attention to one of the contributions that youth is making to our society today:

YOUTH ADVISERS—THEY HAVE A PLACE IN GOVERNMENT

Youth participation in community government is growing in Pennsylvania—particularly in Central Pennsylvania.

From the capital city Gov. Raymond Shafer has appointed six youth advisers to serve with various state bodies. Mayor-elect Harold Swenson of Harrisburg says he is appointing a Youth Advisory Board. And in York the county Parks and Recreation Board has become the first in the state to name a Youth Liaison Board. On learning of this action, Gov. Shafer wrote the York board that "your concept is wonderful."

The eight members of this board are juniors or seniors in the county high schools. They represent the 4-H clubs, the United Fund, the White House Conference on Youth and Children, and Junior Achievement. At their first meeting they recommended eliminating the "liaison" from the name, adding "Just make it a Youth Board."

The youngsters have plenty of energy and vision. Already they have joined forces with a group of Spring Grove High School girls in a campaign to beautify York County. They know that wildlife and trees are being destroyed and that air and water are being polluted by careless and apathetic persons of all ages—and they don't like it.

That our young people show impatience in serving as advisers or on "liaison" committees is understandable. They are impatient for action, if not for power. And they fear that the adults in government will not let the "under 25" generation advise them.

We believe their fears are groundless. We think that those "oldsters" who are now legally and properly ensconced in office are eager to know what the younger generation thinks and wants. Serving with their elders, forgetting the title or ranks which may of necessity be bestowed upon them now, will be the quickest way of obtaining the qualifications which will entitle them—sooner than they think, perhaps—to move up front where the action is.

YAHYA KHAN MEANS BUSINESS

HON. ROBERT L. F. SIKES

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. SIKES. Mr. Speaker, I am pleased to submit for printing in the CONGRESSIONAL RECORD an important interpretive editorial from the Christian Science Monitor. It is entitled "Yahya Khan Means Business." The article follows:

YAHYA KHAN MEANS BUISNESS

Pakistan is something of a miracle. In population it is the fifth largest country in the world. Yet before it was carved out of British India in 1947 it had no identity as a unified political entity of any kind. Gandhi's and Nehru's India inherited the central machinery of government in the subcontinent. The Pakistanis had to build up an administration from scratch.

Quite apart from the difficulties presented by such a challenge under normal circumstances, Pakistan had to deal with the added complication of knitting together politically two territories physically a thousand miles apart and differing in nearly everything but their common religion of Islam.

The country's first decade of life saw its civilian politicians, with arduous labor and no little intrigue, striving to give it a constitutional framework of government and a viable economy. They partly succeeded—at least in the sense that after ten years Pakistan had enough independent vigor and identity to belie those pessimists who thought it was too artificial a creation to last. But corruption and personal ambitions clogged the machinery and hampered growth. The result was the intervention of the military (by coup) in 1958 and the installation of authoritarian government under Field-Marshal Ayub Khan.

The following ten years were very much Ayub's decade. While he succeeded in enhancing Pakistan's international identity abroad, he failed—for all his paternal and honorable efforts at home—to meet the main grievances of his fellow countrymen. The politically articulate felt more and more stifled. And the Bengalis of East Pakistan felt more and more a colonial outpost of West Pakistan. The result was the upheaval of last June which forced Marshal Ayub Khan from the scene and left General Yahya Khan, commander-in-chief of the Army, in charge.

Many thought that the latter would give Pakistan more of the same authoritarian military government and domination of the rest by Punjabis and Pathans from the West. But to his credit General Yahya Khan has now announced a crisp timetable for elec-

tions throughout the country on a one-man, one-vote basis and the drafting of a new Constitution which should give the Bengalis of East Pakistan virtual autonomy and a voice in national affairs at last commensurate with their numbers. In doing this, General Yahya Khan is honorably living up to his promises. Simultaneously he has put the civilian politicians on notice that they had better live up to their professions. And indeed, they had better.

CBW TREATY

HON. JOHN DELLENBACK

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. DELLENBACK. Mr. Speaker, the President has resubmitted for the consideration of the Senate the Geneva Protocol of 1925 which prohibits the first use of chemical and biological weapons. The 16 of us who, on November 3, presented to the House a study entitled "CBW and National Security" are heartened by the President's action.

The concern about CBW is not confined to the Congress, but has also been expressed by respected civic organizations. In October, the League of Women Voters of the United States began to prepare an article on CBW for its newsletter, The National Voter. This publication, released December 15, with a circulation of over 160,000, advocates ratification of the Geneva Protocol. I would like to bring the perspectives set forth by the League of Women Voters to the attention of my colleagues.

The article follows:

CHEMICAL AND BIOLOGICAL WEAPONS—PRESSURE INTENSIFIES TO BAN THEIR USE OR MANUFACTURE, AND TO ABOLISH ALL STOCKPILES

There is a chance that 1970 will be the year the US joins some 65 other countries that have ratified the 1925 Geneva Protocol, which prohibits the first use in war of chemical and biological weapons. Ironically, although the US proposed and signed the Protocol—and in 1966 co-sponsored a UN resolution calling for the strict observance of its principles and objectives—the Senate has never ratified it. The US is the only nuclear power—and except for Japan, the only major industrial nation—that has not.

Concern about CBW has grown in the US during the past two years as the extent of CBW research and development has become known. Because the C and B arsenal includes mass-destruction weapons of a particularly insidious nature, other countries throughout the world are deeply disturbed by present C and B practices. The issue is expected by some to dominate the disarmament talks in Geneva this year, and it has high priority in administration and congressional circles. Hearings in the House Subcommittee on National Security Policy began on Nov. 18.

SCIENTIFIC REPORTS SEEM UNREAL

There is an air of unreality about CBW—"an eerie, creepy feeling," as Sen. Gale McGee said during Senate Foreign Relations Committee hearings in April. To understand the distinctions between the two classes of weapons and the nature of CBW risks, it is necessary to overcome reactions of horror evoked by scientific reports.

By definition, chemical warfare uses toxic chemical agents—gas, liquid, or solid—to affect humans, animals, or plants. Chemical agents include nerve gases which are lethal, quick-acting, and hard to detect and may be dispensed in spray or liquid forms—a tiny drop of one type on the skin will cause death. This was the agent that killed 6000 sheep in Utah in 1968. There are also blister gases, such as the mustard gas of World War I, which generally incapacitate rather than kill; temporarily incapacitating agents, which interfere with normal mental processes; and so-called riot-control agents. These include ordinary tear gas, "super tear gas" (causes nausea as well as irritation to eyes, nose, lungs and throat), and even stronger riot-control agents—all of which may be lethal under certain conditions. Chemical agents are considered to be tactical weapons, especially for nuclear powers, because of their instantaneous effect on victims.

Biological weapons differ in several ways from chemical weapons. They employ living organisms and their toxic products to kill, damage, or incapacitate through disease. B weapons weigh less than C weapons and may be delivered over a wider area. While much specific information about B weapons is classified, the general principles of how they operate are known. Effective means of controlling and treating large-scale disease spread by them is not known. B weapons are considered to be strategic weapons because of the delay between application and effect—that is, because there is an incubation period before disease appears.

C and B weapons are unpredictable, unreliable and difficult to control. This is particularly true of biological aerosol-type weapons because their effectiveness—and the ability to control them—is affected by poorly understood factors of resistance to infection as well as uncertainties of meteorological and atmospheric conditions. The fact that some bacteriological agents can be carried by travelers, migratory birds or animals over great distances adds to the uncertainties about their use.

CBW CAN'T DESTROY A FACTORY

Unlike other agents of mass-destruction, C and B weapons attack only living matter; their ultimate targets are people. They cannot be used to destroy a factory or a missile, but they can conceivably affect the balance of nature in an irreparable way. Their chief human victims are likely to be civilians, who would not be provided with protective devices given to military forces.

For these and other reasons the value of C and B weapons as a deterrent—one of the arguments advanced in their favor—has been questioned. Since they would leave a nuclear retaliatory capability intact, they would be highly inappropriate, if not useless, as a major strategic threat among nuclear powers, for whom they would be an added expense and hazard. For non-nuclear nations, however, they have some appeal as strategic weapons despite the fact that C and B proliferation would inevitably reduce general security for all.

One argument that has been advanced by some who favor the use of C and B weapons is that they will make war more humane. This is a matter that has been debated by technical experts. Dr. Matthew Meselson, Harvard professor of biology and consultant to the US Arms Control and Disarmament Agency, refuted this claim in his testimony before the Senate Foreign Relations Committee last April. He contended instead that they risk making war more savage.

In the first place, he said, it is naive to think that only non-lethal agents would be used. Moreover, he asserted, non-lethal chemical weapons would be used to enhance the lethal capabilities of other weapons—a charge that has been made concerning the use of tear gas in the Vietnam war as well as in World War I. Above all, he is convinced that the use of non-lethal weapons would set the stage for—and probably trigger—the use in war of more deadly chemical and biological weapons, and therefore urged that all such agents be banned.

EXPERTS REPORT TO UN

A similar conclusion was reached by the international group of experts which—with US participation—prepared a report for UN Secretary-General U Thant in accordance with a General Assembly resolution of 1968. The UN report, issued in July 1969, called for "the earliest effective elimination of chemical and bacteriological (biological) weapons." Accordingly, when he issued the report the Secretary-General urged, 1) a renewal of the appeal to all states to accede to the 1925 Geneva Protocol; 2) an affirmation that *all* chemical and biological agents be prohibited; and 3) agreement by all countries to halt the development, production and stockpiling of all chemical and biological agents for purposes of war, and to eliminate them from the arsenal of weapons.

US policy on chemical and biological weapons was somewhat ambiguous in the 1950's and 1960's, and the use of chemical agents in Vietnam has increased the inconsistencies. In June, 1969, President Nixon appointed a special study group to undertake the most comprehensive review that has ever been made of this country's CBW policies. The urgency of the need for review was highlighted by congressional and other public inquiries following several accidents and alarms related to C and B research, development and training.

PRESIDENT NIXON'S STATEMENT

On the basis of the study group's recommendations, the President said on November 25.

"As to our chemical warfare program, the United States: Reaffirms its oft-repeated renunciation of the first use of lethal chemical weapons; extends this renunciation to the first use of incapacitating chemicals . . . .

"The US shall [also] renounce the use of lethal biological agents and weapons, and all other methods of biological warfare. The US will confine its biological research to defensive measures such as immunization and safety measures. The DOD [Department of Defense] has been asked to make recommendations as to the disposal of existing stocks of bacteriological weapons."

A massive effort to inform the public and promote discussion on CBW matters is required after the years of secrecy that have shrouded the subject. The reported change by Secretary of Defense Laird from a position defending the value of both C and B deterrents to one which favors eliminating the production of biological agents will carry weight. It may also open the way to orderly debate of comprehensive CBW controls.

It is important that the US be able to present its new CBW position when the question comes up for discussion again in the UN. The debate will be shaped by earlier treaties, resolutions and working papers dating back to the Hague Gas Declaration of 1899 and including, of course, the 1925 Protocol and the Secretary-General's 1969 report.

Several new proposals have recently been offered. They are working papers only, representing negotiating positions which will probably be modified in the treaty-making process. Among the more recent international proposals is a British draft treaty aimed at "reinforcing" the 1925 Geneva Protocol by prohibiting biological methods of warfare and the production for hostile use of biological agents.

There is a Swedish proposal to declare that CBW is contrary to international law, and

Canada has recommended further study of the subject as well as commendation for previous UN stands. The USSR has proposed a ban on development, production, and stockpiling of C and B weapons, but—like the British—the Soviets leave unsolved the problem of inspection. The British draft treaty has raised other objections based on the fear that by separating the B-war and C-war issues it may strengthen the potential use of C-weapons. The Canadian resolution does little substantially to advance CBW control and the Swedish proposal introduces legal complexities about the force of customary law.

INTERNATIONAL CONTROL IS THE GOAL

Ratification of the Geneva Protocol is felt by legal and scientific experts to be the minimum and necessary first steps for the US in moving toward international control of CBW. Then it can join other nations in considering the merits and weaknesses of other proposals, and in studying whatever technical and legal problems must be overcome.

William Foster, former director of the Arms Control and Disarmament Agency, has urged US ratification as "the next logical step for us to take," and calls as well for full US support of the British proposal. This, he says, "would enable us to divest ourselves of a useless and pernicious liability." These are essential steps, in his view, to limiting the deadliness of the arsenals of the world.

AMENDMENTS TO THE FOOD STAMP ACT OF 1964

HON. FRANK THOMPSON, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. THOMPSON of New Jersey. Mr. Speaker, for several months, the Congress has been working on a food stamp program that will adequately meet the nutrition needs of our Nation's low-income households.

On September 24, the Senate approved a proposal based on amendments offered by, among others, Senator GEORGE MCGOVERN. This program offers free stamps for families with less than $60 monthly income and increased the fiscal 1970 authorization from its present $340 million to $1.25 billion.

Another change incorporated in Senator MCGOVERN's amendment is one that extends this food stamp program to the Commonwealth of Puerto Rico, the Virgin Islands, Guam, and the Trust Territory of the Pacific Islands.

I am herewith offering into the RECORD a memorandum sent to me by Hon. Rafael Hernandez Colon, President of the Senate, Commonwealth of Puerto Rico. This memorandum effectively justifies extension of the food stamp program to our fellow citizens in Puerto Rico.

Since the House Agriculture Committee is presently considering various proposals for continuing the food stamp program, I commend this memorandum and urge that the House insure availability of this needed program to Puerto Rico, the Virgin Islands, Guam, and the Trust Territory of the Pacific Islands.

The memorandum follows:

MEMORANDUM

SAN JUAN, PUERTO RICO,
December 1, 1969.

From: Rafael Harnández Colón, President of the Senate, Commonwealth of Puerto Rico.

To: Representative FRANK THOMPSON, JR.

Subject: S. 2547 (Amendments to the Food Stamp Act of 1964).

I strongly support the provision of S 2547, as approved by the United States Senate, which extends to Puerto Rico the Federal Food Stamp Program. This is a measure that will do justice to the majority of the United States citizens in Puerto Rico who are now facing nutritional deprivation.

Puerto Rico has made in the last two decades considerable progress in the development of a modern, high-productivity economy, capable of providing, by our people's own effort, a satisfactory level of living to all Puerto Ricans. We are, however, a long way from our goal. Per capita personal income is still less than 60 per cent of the state with the lowest per capita personal income. Poverty—and its concomitant, limited educational levels—is at the roots of Puerto Rico's malnutrition problem.

This problem is made worse, in comparison with the continental United States, by food price differentials. Puerto Rico buys from the United States over 75 per cent of the foodstuff here consumed. High maritime freight rates and other factors contribute to make food prices—as well as those for many other goods and services—generally higher than the prices prevailing in the mainland, for the same items.

Economic growth, if permitted to continue at the rapid rate of recent years, will eventually enable us to solve our economic woes by our own efforts. But the solution of our food problem cannot wait. We must provide *now* for the more than one third of our population which is ill nourished. The Federal Direct Food Distribution Program, at present in operation here, is indeed a help. But, it is severely limited both in the proportion of the needy who are eligible and in the variety and quality of the items distributed. Extension to Puerto Rico of the Food Stamp Program will enable us to considerably reduce hunger and malnutrition now.

Appealing to its sense of justice and its concern for the people's welfare, I urge the United States House of Representatives to extend to low income Puerto Ricans the benefits of the Food Stamp Program, made available by the existing legislation to their fellow citizens throughout the United States, by approving S 2547.

A CHRISTMAS CAROL IN HARLEM

HON. LLOYD MEEDS

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. MEEDS. Mr. Speaker, these are the festive, year-ending days when the snow swirls, the tinsel glimmers, the small lights sparkle, and young thoughts are swept up in the raptures of Christmas.

But for Walter Vandermeer, of Harlem, Christmas would be like any other time. Ugly. Joyless. Cold without warmth.

Walter was 12 years old on December 1. Two weeks later he died from an overdose of heroin.

There are other Walters in Harlem, in New York, and in dozens of American cities. They are being torn apart by a system so ravaging, so cruel as to defy understanding by those of us in the white, affluent world of Christmas cakes, heaped-up presents, and overfed Santa Clauses.

We in the House can massage our consciences with memories of having passed a drug abuse education bill, an antipoverty bill, a housing bill, an education bill. But it is not enough to drive out the demons of discomfort. It will not bring back Walter Vandermeer or make Christmas any brighter for the suffering people of this country.

No; we are all rushing headlong toward disintegration by indifference. Christmas is a time to look outward, to think about the human condition. Unless it is to continue just as a momentary impulse, we in the Congress must pass the programs and appropriate the funds that are commensurate with the awesome and brutal conditions that snuffed out the life of Walter Vandermeer.

Mr. Speaker, under unanimous consent, I include in the RECORD at this point an article in today's issue of the New York Times:

BOY 12, DIES OF HEROIN DOSE IN HARLEM BATHROOM—CITY DOCTOR CALLS HIM THE YOUNGEST VICTIM—ONE OF BIG FAMILY WAS PUSHER

(By Barbara Campbell)

Walter Vandermeer, 12 years old, died Sunday morning in a locked bathroom in Harlem of an overdose of heroin. He was the youngest person to die from a heroin overdose, according to city medical officials, and had been taking heroin for perhaps two years.

Dr. Michael Baden, associate city medical examiner, said yesterday that the number of children and teen-agers dying from heroin overdoses had increased as much as 300 per cent in the last year.

Neighborhood children, according to Dr. Baden, knew Walter as a successful seller of drugs who sold heroin to support his growing habit.

The boy, who was 12 years old Dec. 1, was found Sunday afternoon in the second-floor common bathroom at 310 West 117th Street, around the corner from his home.

EQUIPMENT AT HIS SIDE

He had entered the bathroom about midnight Saturday night and locked himself in to take drugs, Dr. Baden said. Two glassine envelopes that had contained heroin; a syringe, a needle and a bottle cap, used to cook heroin, were found at his side by the police.

Mrs. Elinor Williams, a resident of the building, found his body at 4 P.M. Sunday after she had forced the lock on the bathroom door. The boy was wearing a Snoopy sweatshirt with the inscription on the back: "Watch out for me, I want to bite somebody to release my tension."

Walter's mother, Mrs. Lilly Price, interviewed in the crowded four-room apartment of a friend at 371 West 116th Street, said she had not known that Walter was taking drugs.

Mrs. Price, a welfare recipient who receives $412 a month, had moved to her temporary home with several of her 10 children, including Walter, a month ago after she was evicted from her six-room apartment for nonpayment of rent.

She said she had last seen Walter at 10 P.M. Saturday night when he left the apart-

ment and promised to bring back a Sunday newspaper.

Mrs. Price, 45, did not report Walter missing when he failed to return home Saturday night. She assumed he was staying with one of his friends.

Mrs. Price said that she had seen no sign that Walter was a heroin addict. Dr. Baden reported that the boy's body bore no marks from unclean needles but that it was still possible that he had been addicted to heroin for some time.

Dr. Baden said that Walter had been arrested for possession of drugs.

Mrs. Price, who said that Walter's father was deported to British Guiana shortly after the boy was born in 1957, also said that she could not say for sure whether Walter had been attending school for the last two years.

But the boy's godmother, Mrs. Barbara Banks, who lives at 305 West 117th Street, said that Walter had not attended school in a "couple of years." He had been expelled from Public School 76 when he was nine years old, she said.

"His mother took him to court quite some time ago," she said. "He had been having trouble. She was supposed to take him to a psychiatric clinic, but she never followed through.

"The boy was starved for attention and affection. It just got to the place where he just roamed the streets."

JUST LIKE A LITTLE HUSTLER

What Walter found in the streets, Mrs. Banks said, were friends who introduced him to heroin. "The crowd he was with—men on the avenue let him hang on the streets . . . just like a little hustler," said Mrs. Banks.

About 50 children between the ages of 14 and 16 died this year from overdoses of heroin, Dr. Baden said. Last year there were no deaths of children under 15.

The doctor said that the number of young children and teenagers becoming addicted to heroin would continue to rise.

"Its a reflection of increased use of heroin in the adolescent age group," he said. "One very important factor is the peer-group pressure. Lots of kids start using heroin because friends are using it. Using heroin is beginning to spread among the young like smoking marijuana."

About 800 heroin addicts of all ages died this year from overdoses, according to Dr. Baden. More than 200 of them were 19 and younger. The number of such deaths among teenagers has risen threefold from last year, when 72 of 700 heroin deaths were among individuals 19 and younger.

"SESAME STREET" AND THE FUTURE OF AMERICAN EDUCATION

HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. BRADEMAS. Mr. Speaker, I would like to call my colleagues' attention to an article by Carl Rowan which appeared in the December 15 edition of the St. Louis Globe-Democrat.

Mr. Rowan discusses the potential of "Sesame Street," the new television program for preschool children produced under the auspices of the Children's Television Workshop. In Mr. Rowan's words:

"Sesame Street" is one of the most important programs since TV was invented . . . because if these youngsters can be taught effectively through 'the tube' we may be able to break the vicious circle that lets poverty and ignorance perpetuate themselves generation after generation in certain families.

Mr. Speaker, the subcommittee which I chaired was recently privileged to see a segment of "Sesame Street" during our hearings on the Comprehensive Preschool Education and Child Day Care Act of 1969. Like Mr. Rowan, we were impressed with the possibilities for this imaginative program to make real inroads into the problem of providing intellectual stimulation to very young children in this country. I would like to commend the program to my colleagues and to parents throughout the Nation.

At this point I insert Mr. Rowan's article in the RECORD:

CAN TV BRIDGE LEARNING GAP?

(By Carl T. Rowan)

WASHINGTON.—The other evening I got to thinking about how education is the greatest of all liberating forces, and I suddenly realized that, before me, no direct member of my family had had a day of college training.

Neither mother nor father nor grandparents nor any ancestor going back through all their generations on these shores had even finished high school.

Yet, like millions of other American youngsters, my two sons assume they are going to college the way they assume they will eat and breathe over the next five years. And nothing occupies their thoughts or consumes their energies these days more than the question of how to get admitted to which college.

What got me to thinking about this transition from a time when higher training is beyond thought in a family to a time when higher education is valued, assumed, and pursued?

Television, believe it or not. A television program that isn't likely to boggle Mr. Nielsen's ratings or become THE topic of conversation at anybody's cocktail party.

I was thinking about "Sesame Street," a new experiment in educational television aimed at pre-schoolers. This program may tell us whether some 12 million three-, four-, and five-year-olds can be effectively taught by television.

That makes "Sesame Street" one of the most important programs, since tv was invented, because if these youngsters can be taught effectively through "the tube" we may be able to break the vicious circle that lets poverty and ignorance perpetuate themselves generation after generation in certain families.

No one knows exactly why one child is highly motivated educationally and another is not. No one can say with certainty what factors of environment, heredity, affluence, opportunity, or whatever combine to make learning a matter of highest value in a family or a community.

But the experts are now pretty sure that, in the learning process, the early years are critical.

According to University of Chicago psychologist Benjamin Bloom, who assessed a thousand studies of child development, half of all growth in human intelligence takes place from birth to age four and another 30 per cent occurs between ages four and eight.

Nowhere does this have greater meaning than among disadvantaged children. Maya Pines, author of "Revolution in Learning," reports that "by the age of five or six slum children trail so far behind middle-class children that from an educational point of view they are already remedial cases."

Despite this, few three- and four-year-olds in the United States receive any schooling, and only half the nation's school districts have kindergarten programs.

There have been only rare attempts to reach pre-schoolers on a mass basis, the most notable being the highly-touted project Head Start. But it affects only a small fraction of the potential audience—and at a large cost.

This is where "Sesame Street" comes in. Financed by the United States Office of Education, the Carnegie Corporation, and Ford Foundation, it is an attempt to reach the kiddie crowd on a limited budget ($8 million to research and produce the first 26-week season).

The one-hour, five-times-a-week shows are a thoroughly planned, researched, and evaluated blend of education and entertainment, Puppets, story reading, animated cartoons, fast-action films, repetition and groovy music are among techniques used to teach youngsters and hold their interest at the same time.

The program is designed to appeal to all youngsters, but its special aim, according to Executive Director Mrs. John Ganz Cooney, is "to narrow the academic achievement gap between disadvantaged and middle-class children."

To this end, efforts are being made to tie "Sesame Street" into other programs for the poor such as day-care centers and Project Head Start.

The success or failure of "Sesame Street" will do a lot to determine how eager Congress becomes to put large sums into efforts to find new ways to help children bridge the educational gap.

H.R. 8170

HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. McCLOSKEY. Mr. Speaker, the National Federation of Independent Business has the largest membership of any business organization in the United States, numbering over 272,000 small businessmen.

In a period where inflation and high interest rates are combining to put immense pressure on business in general and the small businessman in particular, the federation monitors pending legislation and sends questionnaires to its members on proposals which are deemed particularly pertinent to small business.

One such bill before the House is H.R. 8170, proposing that social security recipients be entitled to retain full benefits while earning up to $4,800 per year.

The federation's membership voted, by a margin of nearly 4 to 1, to support H.R. 8170 for the reasons set forth in the following statement dated December 15, 1969:

There's not much security in a Social Security system which penalizes the elderly who try to supplement their pensions to combat inflation. This opinion emerges from a poll of the nation's independent business owners on a proposal to lift the ceiling on elderly persons' earnings.

Under the so-called Social Security "retirement test", a beneficiary can earn only $140 a month ($1,680 a year) in wages before seeing his or her Social Security benefits reduced. Many recipients are not able

to live on current benefits, averaging $100 a month, but are prevented from productive, even part-time, work by the penalty provision.

Many of the oldsters protest that they are entitled to full benefits because they paid into the fund for years, and persons with rental, dividend and other non-wage income are not penalized by reduced benefits.

President Nixon has proposed to raise the earnings test to $1,800 and reduce the amount forfeited when earnings exceed $2,800.

But the nation's independent business owners want Congress to go considerably farther. Legislation by Rep. Paul (Pete) McCloskey, Jr., of California, to permit earnings of $4,800 a year won endorsement from 76 percent of the businessmen polled by the National Federation of Independent Business.

Only 20 percent oppose the measure and 4 percent withhold their opinion.

Because of complaints, the "retirement test" was raised from $1,500 to $1,680 by the last Congress, but in view of rising cost of living and the problems faced by persons with fixed incomes, most businessmen believe a major change is necessary and overdue.

The Social Security Administration has long opposed such liberalization because of the added "cost"—money which is now withheld—amounting to several billion a year. But the Administration recently predicted a huge, growing surplus in Social Security old age, survivors and disability reserves by 1973, making possible the President's recommendation for higher benefits without an increase in taxes.

Most businessmen apparently see little equity in the present earnings limitation, when the well-to-do can collect full benefits even if their investment income runs well into the thousands.

Many small businessmen who would like to hire senior citizens for part-time or temporary work find Social Security recipients unable to justify working when their benefits will be cut back. Earning just $60 a week will reduce an old age benefit by $840 a year under the formula ($1 forfeit for each $2 earned over $1,680 and a dollar-for-dollar reduction for earnings over $2,880.).

Since the government has estimated that an elderly couple with limited needs, living outside metropolitan areas, needs more than $3,400 a year for a modest standard of living, and since the average Social Security benefit is considerably less than this, the case for liberalizing the earnings limitation is strong.

STANDARDIZE THE MAIL

HON. ARNOLD OLSEN

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. OLSEN. Mr. Speaker, as I said last week and, in fact, for several weeks past, whether the Post Office continues to operate as a Government bureau or becomes a Government corporation, no organization will handle the varied and staggering volume of mail in years to come without standardization, sophisticated mechanization, and extra charges on nonstandard, nonmachinable pieces.

For years I have been urging the Post Office to accelerate its program for research and engineering that would lead to standardization. Yet no such program standards have ever been forthcoming. And now, to my dismay, I learn that a legislative program outlining standardization will not ever be presented to Congress prior to the first session of the 92d Congress—and that is in 1971. More and more it is a case of the Post Office doing "too little, too late."

For a while, following the passage of my bill to create a sixth Assistant Postmaster General in charge of research and engineering, I was encouraged that appropriations for this purpose were more than tripled and that the engineering people were moved from the lowest rungs of the postal hierarchy to a par with the other Assistant Postmaster Generals. I was encouraged by the numerous reports on progress under the first Assistant Postmaster for research and engineering, Dr. Leo Packer. Since Dr. Packer's departure, this research program seems to have again been deemphasized and relegated to the dark corners of the Department, while the top brass of the Post Office conducts interviews and travels about, at the expense of taxpayer, vocalizing on the many-faceted merits of the Postal Corporation

Again, I iterate, Mr. Speaker, that the most imperative need in the Post Office today is that of standardization of the mail—and a penalty in postage for pieces that are mailed that do not conform to standard sizes.

DAILY SURVEILLANCE SHEET, 1987, FROM A NATIONAL DATA BANK

HON. CORNELIUS E. GALLAGHER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. GALLAGHER. Mr. Speaker, many quite serious critiques of the suggested National Data Bank have come to my attention since my Special Subcommittee on Invasion of Privacy brought the concept to public attention in 1966. Fortunately, I think, it is also the subject of several humorous treatments.

For example, Bob and Ray, the widely renowned and justly famed satirists, described how a National Data Bank could be used to "get" almost anybody. Their fine article has been reprinted as an appendix to Dr. Jerry Rosenberg's recently published and extremely complete description of the controversy surrounding the Bank, "The Death of Privacy."

Another example in this genre is contained in the trade publication, Computers and Automation, of October 1969. Mr. Dennie Van Tassel is the head programer at San Jose State College in California. He has recently projected what the daily surveillance sheet from a national data bank might look like in 1987. Let me point out that this is satire: Mr. Van Tassel is viewing the future with alarm, not pointing with pride to his own past.

Mr. Speaker, the war against potentially disastrous uses of the computer continues to be waged on many fronts. I am delighted to insert at this point in the RECORD, Mr. Van Tassel's provocative fantasy. I hope that when 1987 rolls around, this will not be considered as an accurate prediction; but one must be compelled to wonder. After all, 1987 is just 3 short years after 1984:

[From Computers and Automation, October 1969]

DAILY SURVEILLANCE SHEET, 1987, FROM A NATIONWIDE DATA BANK

The "Daily Surveillance Sheet" below is offered as some food for thought to anyone concerned with the establishment of the proposed "National Data Bank". Hopefully, it will help illustrate that *everyone* should be concerned.

National data bank daily surveillance sheet, confidential, July 11, 1987

Subject. Dennie van Tassel, San Jose State College, male, age 38, married, programmer.

Purchases:

Wall Street Journal	.10
Breakfast	1.65
Gasoline	3.00
Phone (328–1826)	.10
Phone (308–7928)	.10
Phone (421–1931)	.10
Bank (cash withdrawal)	120.00
Lunch	2.00
Cocktail	1.00
Lingerie	21.85
Phone (369–2436)	.35
Bourbon	8.27
Newspaper	.10

COMPUTER ANALYSIS

Owns stock (90 per cent probability).

Heavy starch breakfast. Probably overweight.

Bought 3.00 dollars gasoline. Owns VW. So far this week he has bought 12.00 dollars worth of gas. Obviously doing something else besides just driving the 9 miles to work.

Bought gasoline at 7.57. Safe to assume he was late to work.

Phone No. 328–1826 belongs to Shady Lane—Shady was arrested for bookmaking in 1972.

Phone No. 308–7928. Expensive men's barber—Specializes in bald men or hair styling.

Phone No. 421–1931. Reservations for Las Vegas (without wife). Third trip this year to Las Vegas (without wife). Will scan file to see if anyone else has gone to Las Vegas at the same time and compare to his phone call numbers.

Withdrew 120.00 dollars cash. Very unusual since all legal purchases can be made using the National Social Security Credit Card. Cash usually only used for illegal purchases. It was previously recommended that all cash be outlawed as soon as it becomes politically possible.

Drinks during his lunch.

Bought very expensive lingerie. Not his wife's size.

Phone No. 369–2436. Miss Sweet Locks.

Purchased expensive bottle of bourbon. He has purchased 5 bottles of bourbon in the last 30 days. Either heavy drinker or much entertaining.

OVERALL ANALYSIS

Left work at 4.00, since he purchased the bourbon 1 mile from his job at 4.10. (opposite direction from his house.)

Bought newspaper at 6.30 near his house. Unaccountable 2½ hours. Made 3 purchases today from young blondes. (Statistical 1 chance in 78.) Therefore probably has weakness for young blondes.

PERSONAL ANNOUNCEMENT

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. CONYERS. Mr. Speaker, previous commitments in my district unavoidably

prevented my voting on rollcall 323. Had I been present to vote on H.R. 15095, the Social Security Amendments of 1969, I would have voted "yea."

HOUSE CONCURRENT RESOLUTION 454

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 15, 1969

Mr. DERWINSKI. Mr. Speaker, I am pleased to join in support of House Concurrent Resolution 454, calling for the humane treatment and release of American prisoners of war held by the North Vietnamese and the National Liberation Front. I have also cosponsored other resolutions for this purpose.

Together with other Members I join in calling upon the North Vietnamese Communist dictatorship to specifically comply with the Geneva Convention provisions pertaining to POW's. They clearly have failed to comply with the provisions providing for identification of prisoners, free exchange of mail between prisoners and their families, proper and impartial inspection of prisoner of war camps, and release of seriously ill or injured persons.

The conduct of the North Vietnam Communists in their treatment of American POW's has properly been described as barbaric and uncivilized.

I commend Secretary of Defense Laird for the efforts he has instigated to bring the spotlight of world attention to bear upon this issue, hopefully to provide proper treatment of POW's.

I have kept in constant contact with the Defense Department relative to servicemen from my district and neighboring Illinois areas who are listed as missing in action or known to be POW's.

It is imperative that we continue our efforts through all possible channels, including world public opinion, so that our POW's in North Vietnam receive the treatment to which they are entitled under international law. I regret that the United Nations has failed to act on behalf of our POW's. It must be observed that the world body remains paralyzed as a result of opposition by Communist governments to any undertaking that does not fit into the Communist scheme of things.

Mr. Speaker, the parents, wives, and children of our POW's must also be considered. The inhumane policies of the North Vietnam Communists must not be allowed to continue. We do have the leverage in world diplomatic circles to bring sufficient pressure to bear upon the dictators of North Vietnam to abide by the Geneva convention in the treatment of American prisoners of war.

President Nixon has dramatically used his office in cooperation with wives of our prisoners of war in the effort to bring effective world pressure to bear upon the Communists so that they would abide by the Geneva Convention. It is most appropriate that the House of Representatives add its voice to this humanitarian plea.

PRESERVATION OF OUR ENVIRONMENT

HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. KASTENMEIER. Mr. Speaker, as we enter a new decade one of the most crucial tasks this Nation, along with the rest of the world, will have to take up is the preservation of our environment. The growing recognition of the enormity of this problem by scientists around the world has, unfortunately, not been matched by equal concern on the part of those in positions of political and economic leadership. All the other problems besetting us pale into insignificance when we carefully consider the implications of the dire warnings of the world scientific community. Fundamentally, what is at stake is the continuation of human life on this earth and the preservation of man as a species.

The continued plunder of our natural resources, the increased fouling of the very air we breathe, and the pollution of our water supplies is inexorably leading us to our doom unless these processes of self-destruction are reversed. I commend to the attention of my colleagues the following article by Anthony Lewis which appeared in the New York Times of December 15. In his article, Mr. Lewis describes just a few of the "specialized examples of how we are destroying ourselves." These demonstrate only a few of the dangers to the continued existence of man on this planet. They also highlight the irony of man reaching for the stars at the same time that he is preparing his own grave back on earth. The article follows:

NOT WITH A BANG BUT A GASP

(By Anthony Lewis)

BRUSSELS.—A man who is characteristically uninformed on matters scientific was making conversation at dinner the other night with a leading European biologist. He asked how seriously he should take the new public concern about the environment. Smiling, the biologist replied: "I suppose we have between 35 and 100 years before the end of life on earth."

The ordinary citizen is probably unaware of the extent to which such apocalyptic views are coming to be held in the scientific community. An impressive indication of the feelings has just been given in the British Broadcasting Corporation's Reith Lectures by Dr. Frank Fraser Darling of the Conservation Foundation, Washington, D.C.

He took part recently, Dr. Darling said, in a discussion of conservation by experts in such fields as medicine, anthropology and architecture. They talked for a day and a half, but quite early on they "came round to a sense of impending tragedy."

"Basically it was caused by the population problem," Dr. Darling said: "None of us could see that the world would escape the horrors of famine on a large scale. But it seemed that the very large catastrophe to which we were heading would not happen as a result of any one cause, but as a culmination of several factors—famine, war, pestilence, pollution."

PROPHECIES OF DOOM

The doomsday prophets give various specialized examples of how we are destroying ourselves.

Barry Commoner, professor of botany at Washington University, St. Louis, has a grim theory on the effect of man's increasing use of nitrate fertilizers to increase agricultural productivity. Adding artificial nitrates, he points out, tends to reduce the natural production of nitrogen compounds in soil. The more fertilizer used over the years, therefore, the more is needed.

But artificial nitrates, and phosphates, run off into rivers and dramatically encourage the growth of algae. These in turn use up the oxygen in the water, making it unfit for fish and other animals. Professor Commoner's conclusion is that within fifty years the United States will face a horrible choice: It will either have to cut down on the use of artificial fertilizers, drastically reducing agricultural output, or use so much fertilizer as to cause uncontrollable water pollution.

Paul Ehrlic, professor of biology at Stanford University, has made a number of frighteningly convincing prophecies. One is that competition for food and raw materials is going to become savage among the nations as populations grow. He says that American industrial plans alone envision use of nearly all the non-Communist world's mineral reserves by the year 2000.

Then there is the atmosphere. People and engines are using up oxygen at an alarming rate: one trans-Atlantic jet burns 35 tons. We are voraciously cutting down the forests that convert carbon dioxide to oxygen, and DDT may be having an impact on the ocean's micro-organisms that similarly produce oxygen. One day, suddenly, the world's billions of creatures may literally be struggling for a last breath.

THE HEATING PROBLEM

The increasing carbon dioxide in the air gradually warms the oceans and could, it is feared, eventually melt the polar ice caps at a rate fast enough to flood the coasts of our continents. Daniel Patrick Moynihan, counselor to President Nixon, warned here this week that the atmosphere's carbon dioxide content would grow 25 per cent by the year 2000.

Professor Ehrlich believes the heating problem is so grave that by the 21st century we shall have to prohibit the use of any fuel for transportation. If men are still here, that is.

When one understands that this is not the talk of cranks, the reaction is semireligious: wonder at the tiny concerns of race and nation that still divide us. It all raises the ancient question: Will man ever have the political skill to match his emotional and intellectual power?

There are beginning political efforts to face the ecological consequences. Mr. Moynihan was here for one, NATO's new Committee on Challenges of Modern Society. It is pathetic groping so far, but there is some hope in the signs that young people everywhere are deeply concerned.

The thought of doom is difficult for anyone to take in, intellectually. It is so large that the individual tends to feel helpless. But individual concern for the preservation of life, starting at the humblest local level in resistance to some new assault on our surroundings, may be the only means to a larger political response.

Like Dr. Darling in his discussion group, we have on our consciences the knowledge that we are "among the fortunate, living in a still beautiful world."

AN OPTIMISTIC LOOK AT PACIFICATION IN VIETNAM

HON. WILLIAM S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. BROOMFIELD. Mr. Speaker, those of us who support the President's policy in Vietnam realize that its ultimate success hinges on the ability of the Vietnamese to assume the major burden of the conflict. In this regard, there have been a number of encouraging signs in recent weeks. I was privileged to receive an especially optimistic report from Mr. Richard Hretz, a resident of my congressional district and a Deputy provincial senior adviser with the U.S. Agency for International Development, who has just returned from Vietnam. I call my colleagues attention to the following article which appeared in the Royal Oak, Mich., Daily Tribune, based on an interview by Mr. Hretz:

NIXON "PACIFICATION" WORKING, SAYS VISITING VIET ADVISER

(By Evelyn Dysarz)

In the South Vietnamese twilight, a U.S. official watched distant flames engulf hillside hamlets.

The fires, set by Viet Cong to terrorize the mountain folk of northern Phouc Long province, also illuminated the problems facing former-Detroiter Richard Hretz. His job was to develop the economic, social and political fabric of South Vietnam despite the war.

"In my last five or six months we had almost got the problem licked," he said. "The people were coming to us for advice rather than us going to them.

"The 'pacification' program has been going very well since Nixon took over. There's been a change of emphasis from the (American) ambassador on down.

"The new name of the game is to advise the Vietnamese, but let them decide and do it. Before we would decide and build whatever was needed."

Hretz told of his two-year stay in Vietnam when he brought his wife and six children to visit her parents, Mr. and Mrs. Charles W. Lynch of Royal Oak.

Hretz is a deputy provincial senior adviser with the U.S. Agency for International Development (AID) in Vietnam. While there, his wife and children, then ranging in age from three months to nine years, live in Bangkok, Thailand.

"The normal things we would do in peacetime, such as building schools and establishing a sound political base and economic growth, we have to do under war conditions," said the 40-year-old Hretz.

"We were also responsible for training of villagers for defense of their village."

American military, Vietnamese and American civilians made up the AID program in Vietnam, he said.

TEACH TO HELP SELF

Under the "pacification" program, the officials also advised the Vietnamese how to provide public works services for themselves.

AID gave each village the equivalent of $8,000 after all village officials were elected and the village's defense, called Regional Forces, formed, he said. Use of the money, which could buy fertilizer for a growing season or finance water wells, was left up to the villagers.

"It took up to three months to convince some elected chiefs they could use the money freely," he said. "Some didn't want to spend the money because of their tremendous fear of failure, of losing face."

Two Vietnam provinces where he was stationed, both in the northern part of the country, provide studies in contrast.

FLAT FARMLAND

While in the province of Long Khang during the last part of his two-year stint, "enemy activity dropped off drastically," he said. "We were able to provide 100 per cent protection to the population" of that flat farmland area, he said.

The province, populated by Catholics who fled from North Vietnam in 1954, was 95 per cent self-sufficient, he said. Giant strides in schools, roads and the planting of a high-yield hybrid rice were made in the strongly anti-Communist province, he said.

Viet Cong activity fell off for two reasons, said Hretz. One was the introduction of the 4,000 soldiers in the 199th Light Infantry Brigade. The other comes from the attitude of Viet Cong who believe they are "winning the war on the streets of the U.S. although losing it in Vietnam. They believe they will get their goal anyway," he said.

MOUNTAIN AREA

Before coming to Long Khang, Hretz was stationed in 1968 in Phouc Long province, the mountainous home of the Montagnard tribes. There he watched the fires burn peasant villages.

South Vietnamese control of the northern province consisted of four city enclaves which were surrounded by mountains, lush "four-tier" thick jungles and Viet Cong. Helicopters connected the friendly dots on the provincial map.

In Phouc Long, said Hretz, the "struggle was to stay alive and protect the people." Ninety per cent of the population huddled into the four cities, he said, and depended on welfare for food and clothing.

BARELY SCRATCHED

"If ever there is peace, Vietnam would be a wonderful place for economic development. We've barely scratched the surface now."

With peace, Hretz sees the U.S. combat soldier leaving and the military adviser staying. "The people really must deal with the Viet Cong themselves. It's a local problem. The Viet Cong would have to fit into the political fabric or be controlled legally."

If given a free choice, Hretz thinks the South Vietnamese will form some type of democracy. They believe in the basic self-determination, he said. There would be no self-determination if the National Liberation Front ran the country, he said, but rather a "Stalinist" type of political orthodoxy.

BUDDHIST ORIENTED

"The people have a Buddhist-oriented mind which is very hard to understand," said Hretz. "They are very practical. They will accept the best they can achieve now. What they can take today, they will, and wait for tomorrow for the rest. But they never give up their ideals."

Hretz said, therefore, the Viet Cong would probably allow themselves to live under a democratic government and bide their time.

CAN ANYONE RUN A CITY?

HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. WOLFF. Mr. Speaker, while dismay mounts over the deterioration of the Nation's inner cities, the mayors who must handle the problems generated by this deterioration have had to bear a massive amount of criticism. In many cases, the criticism is leveled at these administrators with little consideration given to a rather looming question: "Can anyone run a city?"

Mr. Gus Tyler, a most gifted and perceptive writer, a close friend of mine for many years, took a most interesting and informative approach to this question not too long ago. Mr. Tyler, assistant president of the International Ladies Garment Workers Union and author of "The Political Imperative: The Corporate Character of Unions," presented an article which I feel is extremely insightful.

Since I feel that each one of us here, and virtually every American citizen has a stake in the future of our cities, I would like to extend my remarks to include Gus Tyler's article from the Saturday Review in the RECORD:

CAN ANYONE RUN A CITY?

(By Gus Tyler)

Can anyone run a city? For scores of candidates who have run for municipal office across the nation this week, the reply obviously is a rhetorical yes. But if we are to judge by the experiences of many mayors whose terms have brought nothing but failure and despair, the answer must be no. "Our association has had a tremendous casualty list in the past year," noted Terry D. Schrunk, mayor of Portland, Oregon, and president of the U.S. Conference of Mayors. "When we went home from Chicago in 1968, we had designated thirty-nine mayors to sit in places of leadership. . . . Today, nearly half of them are either out of office or going out . . . most of them by their own decision not to run again." Since that statement, two of the best mayors in the country—Jerome P. Cavanagh of Detroit and Richard C. Lee of New Haven—have chosen not to run again.

Why do mayors want out? Because, says Mayor Joseph M. Barr of Pittsburgh, "the problems are almost insurmountable. Any mayor who's not frustrated is not thinking." Thomas G. Currigan, former mayor of Denver, having chucked it all in mid-term, says he hopes "to heaven the cities are not ungovernable, [but] there are some frightening aspects that would lead one to at least think along these lines." The scholarly Mayor Arthur Naftalin of Minneapolis adds his testimony: "Increasingly, the central city is unable to meet its problems. The fragmentation of authority is such that there isn't much a city can decide anymore: it can't deal effectively with education or housing."

Above all, the city cannot handle race. Cavanagh, Naftalin, and Lee—dedicated liberal doers all—were riot victims. Mayor A. W. Sorensen of Omaha had to confess that after he'd "gone through three-and-a-half years in this racial business," he'd had it.

Although frictions over race relations often ignite urban explosives, the cities of America—and the world—are proving ungovernable even where they are ethnically homogeneous. Tokyo is in hara-kiri, though racially pure. U Thant, in a statement to the U.N.'s Economic and Social Council, presented the urban problem as world-wide: "In many countries the housing situation . . . verges on disaster. . . . Throughout the developing world, the city is failing badly."

What is the universal malady of cities? The disease is density. Where cities foresaw density and planned accordingly, the situation is bad but tolerable. Where exploding populations hit unready urban areas, they are in disaster. Where ethnic and political conflict add further disorder, the disease appears terminal.

Some naturalists, in the age of urban crisis, have begun to study density as a disease. Crowded rats grow bigger adrenals, pouring out their juices in fear and fury. Crammed cats go through a "Fascist" transformation, with a "despot" at the top, "pariahs" at the bottom, and a general malaise in the community, where the cats, according to P. Leyhausen, "seldom relax, they never look at ease, and there is continuous hissing, growling, and even fighting."

How dense are the cities? The seven out of every ten Americans who live in cities occupy only 1 per cent of the total land area of the country. In the central city the situation is tighter, and in the inner core it is tightest. If we all lived as crushed as the blacks in Harlem, the total population of America could be squeezed into three of the five boroughs of New York City.

This density is, in part, a product of total population explosion. At some point the whole Earth will be as crowded as Harlem—or worse—unless we control births. But, right now, our deformity is due less to overall population than to the lopsided way in which we grow. In the 1950s, half of all the counties in the U.S. actually lost population; in the 1960s, four states lost population. Where did these people go? Into cities and metropolitan states. By the year 2000, we will have an additional 100 million Americans, almost all of whom will end up in the metropolitan areas.

The flow of the population from soil to city has been underway for more than a century, turning what was once a rural nation into an urban one by the early 1900s. Likewise, the flow from city to suburb has been underway for almost half a century. "We shall solve the city problem by leaving the city," advised Henry Ford in a high-minded blurb for his flivver. But, in the past decade, the flow has become a flood. Modern know-how dispossessed millions of farmers, setting in motion a mass migration of ten million Americans from rural, often backward, heavily black and Southern counties to the cities. They carried with them all the upset of the uprooted, with its inherent ethnic and economic conflict. American cities, like Roman civilization, were hit by tidal waves of modern Vandals. Under the impact of this new rural-push/urban-pull, distressed city dwellers started to move—then to run—out. Hence, the newest demographic dynamic; urban-push and suburban-pull. In the 1940s, half the metropolitan increase was in the suburbs; in the 1950s, it was two-thirds; in the 1960s, the central cities stopped growing while the suburbs boomed.

Not only people left the central city; but jobs, too, thereby creating a whole new set of economic and logistic problems. Industrial plants (the traditional economic ladder for new ethnic populations) began to flee the city in search of space for factories with modern horizontal layouts. Between 1945 and 1965, 63 per cent of all new industrial building took place outside the core. At present, 75 to 80 per cent of new jobs in trade and industry are situated on the metropolitan fringe. In the New York metropolitan area from 1951 to 1965, 127,753 new jobs were located in the city while more than three times that number (387,873) were located in the suburbs. In the Philadelphia metropolis, the city lost 49,461 jobs, while the suburbs gained 215,296. For the blue-collar worker who could afford to move to the suburbs or who could commute (usually by car) there were jobs. For those who were stuck in the city, the alternatives were work in small competitive plants hungry for cheap labor and no work at all.

Ironically, the worthwhile jobs that did locate in the cities were precisely those most unsuited for people of the inner core, namely, white collar clerical, administrative, and executive positions. These jobs locate in high-rise office buildings with their vertical complexes of cubicles, drawing to them the more affluent employees who live in the outskirts and suburbs.

This disallocation of employment, calling for daily commuter migrations, has helped turn the automobile from a solution into a problem as central cities have become stricken with auto-immobility; in midtown New York, the vehicular pace has been reduced from 11.5 mph in 1907 to 6 mph in 1963. To break the traffic jam, cities have built highways, garages, and parking lots that eat up valuable (once taxable) space in their busy downtowns: 55 per cent of the land in central Los Angeles, 50 per cent in Atlanta, 40 per cent in Boston, 30 per cent in Denver. All these "improvements," however, encourage more cars to come and go, leaving the central city poorer, not better.

Autos produce auto-intoxication: poisoning of the air. While the car is not the only offender (industry causes about 18 per cent of pollution; electric generators, 12 per cent; space heaters 6 per cent; refuse disposal, 2.5 per cent), it is the main menace spewing forth 60 per cent of all the atmospheric filth. In 1966, a temperature inversion in New York City—fatefully coinciding with a national conference on air pollution—brought on eighty deaths. In 1952, in London, 4,000 people died during a similar atmospheric phenomenon.

The auto also helped to kill mass transit, the rational solution to the commuter problem. The auto drained railroads of passengers; to make up the loss, the railroads boosted fares; as fares went up, more passengers turned to autos; faced with bankruptcy, lines fell behind in upkeep, driving passengers to anger and more autos. Between 1950 and 1963, a dozen lines quit the passenger business; of the 500 intercity trains still in operation, fifty have applied to the ICC for discontinuance. Meanwhile, many treat their passengers as if they were freight.

Regional planners saw this coming two generations ago and proposed networks of mass transportation. But the auto put together its own lobby to decide otherwise: auto manufacturers, oil companies, road builders, and politicians who depend heavily on the construction industry for campaign contributions.

The auto is even failing in its traditional weekend role as the means to get away. On a hot August weekend this year, Jones Beach had to close down for a full hour, because 60,000 cars tried to get into parking lots with a capacity of 24,000. The cars moved on to the Robert Moses State Park and so jammed the 6,000-car lot there as to force a two-hour shutdown.

Overcrowding of the recreation spots is due not only to more people with more cars but to the pollution of waters by the dumping of garbage—another by-product of metropolitan density.

Viewed in the overall, our larger metropolises with their urban and suburban areas are repeating the gloomy evolution of our larger cities. When Greater New York was composed of Manhattan (then New York) and the four surrounding boroughs, the idea was to establish a balanced city: a crowded center surrounded by villages and farms. In the end, all New York became citified. Likewise, the entire metropolitan area is becoming urbanized with the suburbanite increasingly caught up in the city tangle.

The flow from city to suburb does not, surprisingly, relieve crowding within the central city, even in those cases where the city population is no longer growing. The same number of people—especially in the poor areas—have fewer places to live. In recent years, some 12,000 buildings that once housed about 60,000 families in New York City have been abandoned, with tenants being dispossessed by derelicts and rats; 3,000 more buildings are expected to be abandoned this year. The story of these buildings, in a city such as New York, reads like a Kafkaesque comedy. For the city to tear down even one of these menaces involves two to four years of red tape; to get possession of the land takes anther two to four years. Meanwhile, the wrecks are inhabited by human wrecks preparing their meals over Sterno cans that regularly set fire to the buildings. By law, the fire department is then charged with the responsibility of risking men's lives to put out the fire, which they usually can do. However, when the flames get out of hand, other worthy buildings are gutted, leaving whole blocks of charred skeletons—victims of the quiet riot.

Other dwellings are being torn down by private builders to make way for high-rise luxury apartments and commercial structures. *Public* action has destroyed more housing than has been built in all federally aided programs. As a result, the crowded are more crowded than ever. Rehabilitation instead of renewal doesn't work. New York City tried it only to discover that rehabilitation costs $38 a square foot—a little *more* than new luxury housing.

The result of all this housing decay and destruction (plus FHA money to encourage more affluent whites to move to the suburbs) has been, says the National Commission on Urban Problems, "to intensify racial and economic stratification of America's urban areas."

While ghetto cores turn into ghost towns, the ghetto fringes, flare out. The crime that oozes through the sores of the diseased slum chases away old neighbors, a few of whom can make it to the suburbs; the rest seek refuge in the "urban villages" of the low-income whites. Cities become denser and tenser than they were. In the process, these populous centers of civilization become—like Europe during the Dark Ages—the bloody soil on which armed towns wage their inevitable wars over a street, a building, a hole in the wall. Amid this troubled terrain, the free-lance criminal adds to the anarchy.

All these problems (plus welfare, schooling, and militant unions of municipal employees) hit the mayors at a time when, according to the National Commission on Urban Problems, "there is a crisis of urban government finance . . . rooted in conditions that will not disappear but threaten to grow and spread rapidly." The "roots" of the "crisis"? The mayor starts with a historic heavy debt burden. His power to tax and borrow is often tethered by a rural-minded state legislature. He has lost many of the city's wealthy payers to the suburbs. His levies on property (small homes) and sales are prodding Mr. Middle to a tax revolt. The bigger (richer) the city is, the worse off it is. As population increases, per capita cost of running a city goes up—not down: density makes for frictions that demand expensive social lubricants. Municipalities of 100,000 to 299,000 spend $14.60 per person on police; those of 300,000 to 490,000 spend $18.33; and those of 500,000 to one million spend $21.88. New York City spends $39.83. On hospitalization, the first two categories spend $5 to $8 per person; those over 500,000 spend $12.54; New York spends $55.19.

Expanding the economy of a city does not solve the problem; it makes it worse. Several scholarly studies have come up with this piece of empiric pessimism: if the gross income of a city goes up 100 per cent, revenue rises only 90 per cent, and expenditures rise 110 per cent. Consequently, when a city's economy grows, the city's budget is in a worse fix than before. This diseconomy of bigness and richness applies even when cities merely limit themselves to prior levels of services. But cities, unable to cling to this inadequate past, have had to step up services to meet the rising expectations of city dwellers.

The easy out for a mayor is to demand

that the federal coffers take over cost or hand over money. But is that the real answer? The federal income tax as presently levied falls most heavily on an already embittered middle class—our alienated majority. Unable to push this group any harder and unwilling to "soak the rich," an administration, such as President Nixon's, comes up with revenue-sharing toothpicks with which to shore up mountains. Nixon has proposed half a billion for next year and $5-billion by 1975, while urban experts see a need for $20- to $50-billion each year for the next decade. A Senate committee headed by Senator Abe Ribicoff calls for a cool trillion.

But even if a trillion were forthcoming, it might be unable to do the job. To build, a city must rebuild: bulldoze buildings, redirect highways, clear for mass transportation, remake streets—a tough task. But even tougher, a city must bulldoze people who are rigidified in resistant economic and political enclaves. The total undertaking could be more difficult than resurrecting a Phoenix that was already nothing but a heap of ashes.

What powers does a mayor bring to these complex problems? Very few. Many cities have a weak mayor setup, making him little more than a figurehead. If he has power, he lacks money. If he has power and money, he must find real—not symbolic—solutions to problems in the context of a density that turns "successes" into failures. If a mayor can, miraculously, come up with comprehensive plans, they will have to include a region far greater than the central city where he reigns.

A mayor must try to do all this in an era of political retribalism, when communities are demanding more, not less, say over the governance of their little neighborhoods. In this hour, when regional government is needed to cope with the many problems of the metropolitan area as a unity, the popular mood is to break up and return power to those warring factions—racial, economic, religious, geographic—that have in numerous cases turned a city into a no man's land.

Is there then no hope? There is—if we putter less within present cities and start planning a national push-pull to decongest urban America. Our answer is not in new mayors but in new cities; not in urban renewal but in urban "newal," to use planner Charles Abrams' felicitous word.

We cannot juggle the 70 per cent of the American people around on 1 per cent of the land area to solve the urban mess. We are compelled to think in terms of new towns and new cities planned for placement and structure by public action with public funds. "All of the urbanologists agree," reported *Time* amidst the 1967 riot months, "that one of the most important ways of saving cities is simply to have more cities." The National Committee on Urban Growth Policy proposed this summer that the federal government embark on a program to create 110 new cities (100 having a population of 100,000, and ten even larger) over the next three decades. At an earlier time, the Advisory Commission on Intergovernmental Relations proposed a national policy on urban growth, to use our vast untouched stock of land to "increase, rather than diminish Americans' choices of places and environments," to counteract our present "diseconomics of scale involved in continuing urban concentration, the locational mismatch of jobs and people, the connection between urban and rural poverty problems, and urban sprawl."

New towns would set up a new dynamic. In the central cities, decongestion could lead to real urban renewal, starting with the clearing of the ghost blocks where nobody lives and ending with open spaces or even some of those dreamy "cities within a city." The new settlements could be proving grounds for all those exciting ideas of city planners whose proposals have been frustrated by present structures—physical and political. "Obsolete practices such as standard zoning, parking on the street, school busing, on-street loading, and highway clutter could all be planned out of a new city," notes William E. Finley in the Urban Growth report. These new towns (cities) could bring jobs, medicine, education, and culture to the ghost towns in rural America, located in the counties that have lost population—and income—in the past decades. Finally, a half-century project for new urban areas would pick up the slack in employment when America, hopefully, runs out of wars to fight.

The cost would be great, but no greater than haphazard private developments that will pop up Topsy-like to accommodate the added 100 million people who will crowd America by the year 2000. Right now we grow expensively by horizontal or vertical accretion. We sprawl onto costly ground, bought up by speculators and builders looking for a fast buck. Under a national plan, the federal government could buy up a store of ground in removed places at low cost or use present government lands. Where private developers reach out for vertical space, they erect towers whose building costs go up geometrically with every additional story. On the other hand, as city planners have been pointing out for a couple of decades, "it has been proved over and over again by such builders as Levitt, Burns, and Bohannon" that efficient mass production of low-risers "can and do produce better and cheaper houses." Cliff dwellings cost more than split-levels.

The idea of new towns is not untested. "There is little precedent in this country, but ample precedent abroad," notes the Committee on Urban Growth. "Great Britain, France, the Netherlands, the Scandinavian countries—all have taken a direct hand in land and population development in the face of urbanization, and all can point to examples of orderly growth that contrast sharply with the American metropolitan ooze." To the extent that the U.S. has created new communities it has done so as by-products: Norris, Tennessee, was built for TVA to house men working on a dam; Los Alamos, Oak Ridge, and Hanford were built for the Atomic Energy Commission "to isolate its highly secret operations."

What then is the obstacle to this new-cities idea? It runs contrary to the traditional wisdom that a) where cities are located, they should be located, and b) that the future ought to be left to private enterprise. Both thoughts are a hangover from a hang-up with laissez faire, a Panglossian notion that what is, is best.

The fact is, however, that past reasons for locating cities no longer hold—at least, not to the same extent. Once cities grew up at rural crossroads; later at the meeting of waters; still later at railroad junctions; then near sources of raw material. But today, as city planner Edgardo Contini testified before a Congressional committee, these reasons are obsolete. "Recent technological and transportation trends—synthesis rather than extraction of materials, atomic rather than hydroelectric or thermoelectric power, air rather than rail transportation—all tend to expand the opportunities for location of urban settlements." Despite this, the old cities, by sheer weight of existence, become a magnetic force drawing deadly densities.

Furthermore, concluded Mr. Contini and a host of others, "the scale of the new cities program is too overwhelming for private initiative alone to sustain, and its purposes and implications are too relevant to the country's future to be relinquished to the profit motive alone." The report of the Urban Growth Committee stresses the limited impact of new towns put up by private developers such as Columbia, Maryland and Reston, Virginia. "They are, and will be, in the first place, few in number, serving only a tiny fraction of total population growth. A new town is a 'patient' investment, requiring large outlays long before returns begin; it is thus a non-competitive investment in a tight money market. Land in town-size amounts is hard to find and assemble without public powers of eminent domain. Privately developed new towns, moreover, by definition must serve the market, which tends to fill them with housing for middle- to upper-income families rather than the poor."

The choice before America is really not between new cities and old. Population pressure will force outward expansion. But by present drift, this will be unplanned accretion—plotted for quick profit rather than public need. What is needed is national concern for the commonwealth in the location and design of new cities: a kind of inner space program.

VETERANS DAY IN WOODBRIDGE, N.J.

HON. EDWARD J. PATTEN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. PATTEN. Mr. Speaker, the Veterans Day ceremony on November 11, 1969, honoring the 300th anniversary of Woodbridge Township in New Jersey will long be remembered. Woodbridge has a population of 110,000, and the Veterans Alliance under Comdr. John Keitel really outdid themselves.

The festivities were covered by the National Broadcasting System and received much attention in the press throughout the metropolitan area. My good friend, the Honorable Joseph Nemyo, president of the municipal council, was master of ceremonies, and of course, the Honorable Dr. Ralph P. Barone, mayor of Woodbridge, was on hand for the ceremony which included a history of the new memorial park by Mr. Herbert Blitch, liaison officer with the Veterans Alliance. The dedication of the park was then conducted by Mr. Frank Murphy, director of parks and recreation for Woodbridge, who was assisted by Mayor Barone and Capt. Jack H. Jacobs. This park will certainly add to the beauty of this city with its recreation area and the beautiful water fountain. This fountain, surrounded by a circle of flags, is indeed a fitting tribute to our veterans.

The program was further enhanced by the music of the Woodbridge Senior High School Band under the able leadership of Casimir Urbanski. Any town would have been proud to have these young people represent them.

One high spot of the ceremonies was the honors paid to Capt. Jack H. Jacobs, who received the Congressional Medal of Honor at the White House in a ceremony on October 9. I was thrilled to take part in the presentations to Captain Jacobs by reading the citation issued by President Nixon praising Jacobs for his "conspicuous gallantry and intrepidity in action at the risk of his life." The grateful residents and organizations of Woodbridge further honored this young man

by presenting him with a new 1970 automobile and a check for $1,200 to close out his student loan. The captain had graduated from Rutgers—the State University in 1966.

Rabbi Harold Richtman and members of his Congregation Beth Sholom of Iselin, N.J., shared in the honors to Captain Jacobs by dedicating a religious school in his honor.

This was indeed a fitting Veterans Day celebration for the 300th birthday of Woodbridge Township. It will be an occasion long remembered by the proud citizens of this community.

WELCOME TREND

HON. BARRY M. GOLDWATER, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. GOLDWATER. Mr. Speaker, last week the House actually approved the OEO program. I wish to draw attention to Senator GEORGE MURPHY's amendment to the war on poverty bill which I think is appropo to bring government closer to the people. I submit, for the RECORD, an editorial from the Los Angeles Herald Examiner of December 15, which I think very well describes the situation surrounding the Murphy amendment. The editorial is as follows:

WELCOME TREND

Sen. George Murphy's amendment to the War on Poverty bill is giving liberals the jitters. Because legal aid provisions of the anti-poverty program have strayed far from the Act's original intent of giving legal assistance to the poor and indigent, Murphy successfully added an amendment which would give governors the power to veto, in whole or in part, legal service projects within their states.

Now the House of Representatives is considering expanding the Murphy amendment to permit governors to veto other aspects of the War on Poverty programs in their states.

Murphy objects to the use of federal tax dollars to file costly and complex lawsuits to advance ideologies which the taxpayers of California must pay to defend.

Among these is a lawsuit arising from the Venice Beach "live-in" last spring. Tax dollars are financing that suit against the Los Angeles Police Department, and tax dollars, in turn, must be used to finance the defense.

Another local example of this "double squeeze" on taxpayers is a lawsuit filed to block redevelopment of the canals in Venice. Taxpayers will foot the huge legal costs on both sides of the case.

In case after case, the poor and indigent are used merely as impersonal instruments to try to effect so-called law reform.

There are other instances of the misuse of funds. For example, the legal aid filed for an injunction to force a school to close so that its students could participate in a Vietnam War moratorium march. Certainly this has nothing to do with the poor and indigent.

Some feel that if the Murphy amendment is extended, the War on Poverty program will die. It is an expected bureaucratic cry.

But the governor of a state is closer to the situation than a bureaucrat dispensing tax dollars from Washington. If a governor feels federal funds are being wasted, he will be doing his nation a service by vetoing such largess for his state.

If the poverty program fails because the money isn't helping eliminate poverty, the program is to blame, not the governor who vetoes it.

Murphy's amendment is a welcome trend to bring government closer to the people.

DECISION ON THIRD AIRPORT FOR CHICAGO SOON

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. DERWINSKI. Mr. Speaker, a major decision soon must be made involving a third airport to serve the Chicago Metropolitan area and the site has been the subject of tremendous speculation. Mayor Richard J. Daley is reported to favor construction of an airport in Lake Michigan.

Personally, I believe the third Chicago area airport should be located in present wide-open space located southwest of Cook County in Will County, Ill. However, it is not my intention to emphasize my opinion but rather to insert into the RECORD an editorial carried over WIND Radio—Chicago—on Wednesday, December 10, which effectively points out the pitfalls of the proposed Lake Michigan site:

THE THIRD AIRPORT

(By Philip E. Nolan)

There is increased speculation that the decision has already been made as to where Chicago's third airport will be located. Word is the powers that be want it on Lake Michigan. WIND thinks this is precisely the wrong place.

The idea, apparently, is to construct the airport 8½ miles out in the Lake off 55th Street. It requires little imagination to see this creates more problems than solutions. To name a few: interference with traffic patterns at O'Hare and Midway and the shutdown of Meigs Field. Fog and general weather conditions and the fact that such a location would create the grand champion traffic problem of all time on the South Outer Drive.

A major jumbo jet airport 8½ miles from the Lakefront will bring noise, pollution and disruption to this irreplaceable, natural resource. The Lake is already threatened with extinction by pollution. It doesn't need any additional threats.

Airports are a fact of modern life. Chicago's third airport belongs on land located as far from population centers as possible with swift public transportation available. Before the Lake Plan can be approved, it must be okehed by Chicago City Planners, the airlines and the Federal Aviation Agency. More important perhaps, it requires federal money, because landing fees won't provide enough revenue. That's your answer.

If you oppose building the airport on the Lake, write to Mayor Daley, Senator Percy and Governor Ogilvie. They have the power to block this plan. Convenience, necessity, or economics mean absolutely nothing when compared to our environment. Once that is gone, no amount of money in the world will bring it back.

WIND opposes the construction of an airport on the Lake.

JAMES A. FARLEY

HON. JAMES J. DELANEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. DELANEY. Mr. Speaker, the Honorable James A. Farley, chairman of the board of the Coca-Cola Export Corp., and former Postmaster General of the United States, has contributed significantly over the years to the dynamic development of this Nation. An astute and intimate Presidential adviser, and a preeminent political tactician, his role in history is secure.

I think my colleagues might find of interest some footnotes to history contributed by "Genial Jim" Farley, which were outlined in three recent articles concerning him. Under leave to extend my remarks, the articles by Bill Rives, of the Denton, Tex., Record-Chronicle; another from the Spring Valley, N.Y., News-Leader-Independent; and a third by Celestine Sibley, of the Atlanta Journal and Constitution, follow:

[From the Denton (Tex.) Record-Chronicle, Oct. 1, 1969]

JAMES A. FARLEY

(By Bill Rives)

It was difficult to believe the man was 81 years old—James A. Farley—standing there with an almost military bearing, clear-eyed, alert, responsive, showing a keen sense of humor and an irresistible charm.

Jim Farley is generally considered to be the most successful political manager in history. He was the floor general when the Democratic National Convention nominated Franklin D. Roosevelt the first time.

And he was national Democratic chairman in two campaigns.

Farley finally broke with Roosevelt after FDR decided to run for a third term and also decided to purge party members who opposed his views.

At a dinner Monday night in Hubbard Hall, Farley told a number of anecdotes and revealed interesting personal items. He said "I could talk all night," and the enthralled dinner guests would have been happy if he had done so.

Farley was a business man-politician. He still is, but not, of course, to the degree he once was. He was in Denton to visit his granddaughter, Carole Montgomery, a freshman student at Texas Woman's University.

Farley recalled that in 1939, when the Nazis were on their rise to power in Germany, he was talking in Warsaw to the Polish foreign minister, Josef Beck.

Farley said he asked the minister "if I may be so indiscreet, I'd like to ask you a question. What do you think of Hitler?"

The minister said "The question is not indiscreet, but the answer would be."

Recalling the days when he was postmaster general, Farley said he once poured a can of Carnation milk on the cornerstone of a post office at Oconomowoc, Wis., where there is a Carnation plant.

In his rambling remarks and answers to questions, Farley recounted the names of the universities from which he had received honorary degrees. It sounded like a travelogue of the United States, and the number added up to an astounding 25.

This wasn't bad for a fellow who got his high school diploma only a few months ago.

Farley said he was valedictorian in his class of 1905 in Stony Point, New York.

There were only three in the class, Miss

Norma Bower, Miss Edna Goetchlus and myself.

In those days it was necessary to have at least eight counts in Mathematics and eight counts in English, first and second year. The person who checked my second year in English examination marked my paper down from seventy-eight which was over the passing grade to seventy-three which prevented me from receiving my Regents' diploma that year.

Some months ago Farley saw Education Commissioner James V. Allen, Jr., who was then Commissioner of Education of the State of New York, "I told him I had a bone to pick with him, and related my story."

Several months later Farley received a call from Commissioner Allen advising him that the present Board of Regents had decided to give him a diploma, and they made a personal visit to his business office and presented it to him. "Today" he said "the diploma is in the library of the James A. Farley Junior High School, named for me in my home town of Stony Point."

Farley said he thinks the New York Times is the greatest newspaper in the world, "although I do seriously disagree with much of their editorial policy."

One time in Memphis, when he was urging the people of Tennessee to appeal to the members of their legislature to vote for the repeal of the 18th Amendment his walk took him past the downtown post office. He stopped and decided to look around inside. It was evening but there were a couple of windows open.

Farley went up to one of the windows and said "I'm Jim Farley. I'd like to look around the post office."

The postal clerk turned and muttered to a fellow worker: "Some damfool named Jim Farley wants to look around the post office."

His associates told him he would lose his job because of his reference to him, but Farley laughed out loud about it and assured the man his job was safe.

[From the Spring Valley (N.Y.) News/Leader/Independent, Oct. 29, 1969]

FARLEY SEES FIGHT FOR POSTAL REFORM

Spry and active for his 81 years, former Postmaster General James A. Farley returned to Rockland County for the second time in two weeks to present a self-portrait to the Rockland Historical Society.

The painting was hung in a place of honor in the old colonial home on Kings Highway which serves as the Society's headquarters and museum.

Although Farley came solely to present the painting, an alert News/Leader/Independent reporter persuaded FDR's post office head to comment on the proposals now before Congress to convert the postal system to corporate ownership. Farley didn't think much of the idea.

"If the Congress gives the Post Office more money for new buildings and new equipment that they need, I feel the post office system can be improved from within the government."

Many post office buildings in Rockland County were constructed with P.W.A. funds and bear Farley's name on their plaques.

MONEY A PROBLEM

According to Farley, money is a problem for the post office today, while during the Depression funds were available. "I was able to get a sufficient amount of money appropriated to the post office system," Farley said, "Since then the appropriations have dropped." He blames the drying up of funds on defense requirements which of necessity soaks up as much money as possible from Congress."

"The Army Engineers have the strongest lobby in Washington," Farley says, and a vast amount of money is appropriated through their efforts." The Congress is under a lot of pressure from defense—this tends to leave out appropriations for the Post Office.

Farley predicts quite a struggle ahead for the proponents of HR 11750, the radical reform bill which places the post office in the hands of a board of directors, operating with the mandate to make all classes of service pay their own way. "I think its going to be quite a struggle," he said.

Farley glanced for a moment at the portrait of a much younger, dapper fellow in a double-breasted suit staring at him from the canvas.

"I don't recognize that man at all," he said.

[From the Atlanta Journal and Constitution, Nov. 16, 1969]

BIG JIM FARLEY: HE REVEALS NEW DETAILS OF THE ROOSEVELT RIFT

(By Celestine Sibley)

Big Jim Farley received his high school diploma a few months ago.

He was thrilled because he's been feeling wistful about not having it since 1905 when he was valedictorian in a class of three at Stony Point, N.Y., High School. It also eased explanations to his three children and 10 grandchildren.

So he framed the diploma and showed it around, having his picture taken with it several times. But in the end Mr. Farley didn't hang it either in his apartment in the Waldorf-Astoria Hotel or in the Madison Avenue office where he holds forth as chairman of the board of The Coca-Cola Export Corporation.

There wasn't room, what with an 81-year accumulation of other things—pictures of presidents and governors and the like—and 25 honorary degrees from the nation's leading colleges and universities.

"They named the new Stony Point junior high school for me—the James A. Farley Junior High School," Mr. Farley related. "So I gave them my diploma."

The belated acquisition of that diploma is one of many small, warm details of living that keep the big—6 feet 2 inches—Irishman, who has been known as America's "Mr. Democrat" for 50 years, happy and optimistic through another Republican administration. (He's also sustained by the conviction that the Republicans are in for a short run to be succeeded in due season by either Hubert Humphrey or Edmund Muskie.)

He salts his conversation with anecdotes and he chuckled with pleasure as he related the diploma anecdote recently.

"I was sitting next to James E. Allen Jr. at some honorary degree-giving a year ago last March," he recalled. "He was head of the Board of Regents of New York at that time. Now he's President Nixon's U.S. commissioner of education. I told him I had a bone to pick with him."

The "bone" was that back in 1905 when young Jim Farley was preparing to deliver his valedictory address for the senior class, "two girls and myself," at Stony Point High, the board of regents reduced his grade in English by several points, rendering him ineligible for a diploma. He made the speech and felt "graduated" but he has never been able to explain the lack of a diploma to his education-minded young.

He related this to Mr. Allen mostly in fun but to his surprise and delight a few months ago the diploma arrived.

Without a doubt the new U.S. commissioner of education was as delighted with the press which the deferred diploma got as was the recipient, for "Genial Jim" Farley is a man who has a natural deftness, an ease with other human beings that win him friends wherever he goes. I know because a few weeks ago I mentioned Mr. Farley's days as postmaster general almost in passing in a column about a couple of lost packages.

Right away he wrote me a brief but graceful little thank-you note, to be followed with other notes as friends sent him more clippings and Rep. James J. Delaney of New York had the column read into the CONGRESSIONAL RECORD. In substance, Mr. Farley seemed pleased because the column "brought back memories of those never-to-be-forgotten years that I served as postmaster general." He promised to call me on the next of his thrice-a-year visits to Atlanta—and he did the day he arrived in town to attend the Coca-Cola bottlers convention.

"Then it's true, that legend about you, that you never forget a name?" I asked Mr. Farley.

He smiled. "I don't know about 'never,' " he said. "I'm interested in remembering names of people, I suppose. And I feel that I have been blessed with a pretty good memory."

Did he remember the names of the hundreds of soft drink bottlers he saw at the convention?

"I didn't know them all," he countered. "Many times the bottler would be a new man but I usually knew his hometown and somebody there he would know."

One of the famous stories about Big Jim's memory is told of the first Franklin D. Roosevelt campaign when he made a whistle stop tour of the West, talking from the rear platform of a train. Mr. Farley was his campaign manager and at the end of one of Mr. Roosevelt's speeches somebody in the crowd, according to the story, yelled, "Hello, Jim!" and Big Jim yelled back, "Hello, Frank!" making a friend for life of a local citizen who had been bragging that he "knew" Jim Farley.

I asked Mr. Farley about the story.

"It's true," he said. "I had been getting letters from a fellow who worked as a railway mail clerk between Salt Lake City and San Francisco. The Literary Digest was conducting a poll on the presidential election and this clerk would read the postcards and tell me what they said."

Mr. Farley paused and shook his head. "He shouldn't have done it," he said. "But he did."

On that Western campaign swing with the future President, Mr. Farley hadn't thought much about his railway clerk pen pal until he saw a mail train pull up on another track and stop. When he heard that "Hello, Jim!" he couldn't see where the voice came from, he knew he wouldn't know the face if he saw it, so he "took a wild chance and said, 'Hello, Frank!' " hoping it was the mail clerk.

"Mr. Roosevelt asked me who it was," Mr. Farley remembered. "I told him what I've told you. He said, 'If you guessed right you'll be hearing from that fellow.' And I did."

Frank wrote a delighted thank-you. He had been bragging to his friends that he knew Jim Farley and the "Hello, Frank" had proved it. But the next communication wasn't so happy. The Roosevelt landslide, contrary to the Literary Digest's poll findings, resulted in the folding of that magazine and subsequently in the appointment of Big Jim Farley as postmaster general. The day Mr. Farley entered his new office he found a letter on the desk beginning, "Dear Jim, you've got to help me."

His railway clerk informant had been found out—a reader of and reporter on postcards. Disciplinary action was ordered but since his actions involved the brand-new postmaster general his superiors thought Mr. Farley should be consulted.

"It was very decent of them," said Mr. Farley wryly.

Being new in office he sought all the advice he could get from experienced hands and however they worked the problem out, "Frank" was relieved and sure his friend "Jim" had saved his hide. He continued to stay in touch, even after both he and Big Jim

had departed the postal service. He even asked Mr. Farley to help him get a post-retirement job, which he did, continuing to receive his "Dear Jim" letters until Frank's death.

It was the kind of loyalty people attribute to Mr. Farley and I asked him about that quality.

"If you haven't the virtue of loyalty you haven't anything," he said emphatically. "You owe loyalty first to your church, whatever it is, then to your family, your business and your party. Loyalty and truth are the most valuable attributes you can possess and you're not entitled to any credit for them."

Even after his famous third-term split with President Roosevelt, Mr. Farley remained loyal in what he considered the important sense. He opposed Roosevelt to the point of allowing his own name to be placed in nomination at the convention and when Roosevelt was nominated he resigned his post as postmaster general and national chairman of the Democratic Party. But he supported the party's nominee.

Asked if the split ruined their long-standing personal friendship, Mr. Farley let his eyes rest reflectively on the wall opposite the window in his suite at the Regency and sighed heavily.

"Yes," he said sadly. "It did. We were never close again."

After a moment's silence he resumed, "You know Mr. Roosevelt was really a superstitious man. At the end of both his previous campaigns Roosevelt and I had ridden to Madison Square Garden with him for his final speech. We hadn't been in touch on the 1940 campaign but as it was closing the President called me and asked me if I would go to the Garden with him on that last night. I said, 'You know I will.'"

Mr. Farley met the President's train and together they rode to Madison Square Garden and mounted the platform side by side. The audience went wild.

Although he has written a book and magazine articles about the now-famous rift with President Roosevelt, Mr. Farley said he had never before told of the time when the President summoned him back from Chicago to tell him he was going to run for the third term.

"When we were alone I called him 'Boss' and I said to him then, 'Boss, you knew this before. You could have told me before I went to Chicago.' He called me Shamus, which is Irish for James. He said, 'Shamus, I told you when I could.'"

Mr. Farley said people later said he wanted to be president himself but that was not true. He had believed Mr. Roosevelt would support Tennessean Cordell Hull.

"Shamus" Farley was "born a Democrat," the son of a Grassy Point, N.Y., Irish Democrat who was killed by a horse when James was 9 years old. All the poor people in town, laborers in the brickyards along the Hudson Rover, Irish and Italian, were Democrats. Ten per cent of the population, the professional people and more affluent farmers, were Republicans.

"I believed that what I have seen proven throughout the years—that the Democratic Party was the party most concerned with the great mass of people," Mr. Farley said. "There isn't much doubt that the Democrats are responsible for more beneficial legislation for all the elements in our country, laborers of all kinds, farmers, poor people who are seeking a better education."

Shortly after his father died Mr. Farley's mother scraped together $1,500 and bought a grocery store with a saloon attached as a means of earning money to rear her six children. James worked in the saloon.

"I tapped many a keg of beer," he said, "cleaned many a bottle with buckshot."

But he never drank—or smoked.

"When I was confirmed at the age of 12 (in the Roman Catholic Church) I took a pledge that I wouldn't drink or smoke until I was 21," he said. "By the time I was 21 I was taking an interest in politics, working in my election district, and my mother persuaded me that drinking or smoking should be passed up then. It sounds corny but I did promise my mother."

Mr. Farley is still strongly bound by family ties and family considerations. His wife, the former Elizabeth Finnegan, to whom he was married in 1920, died in 1955 and he has not remarried but continues to live in their Waldorf-Astoria apartment. His son and two daughters and their 10 children are close to him, calling him every Sunday night ("Collect!") to visit. When he travels abroad, as he does nearly every year, he likes to have at least one of his college-age grandchildren with him.

He doesn't feel particularly slowed down by the fact that he was 81 years old last May 30.

For exercise he walks "unless I'm in a hurry" and works, going to his Madison Avenue office every morning at 9 o'clock and working until 5 or 5:30 p.m. every weekday and dropping by for a while on Saturday morning.

And he remains generally cheerful and optimistic about the state of the world. The country will probably never face another depression like that he and President Roosevelt fought shoulder-to-shoulder, he thinks.

"We have ways of taking charge of depressions and recessions now—agencies and tools that we didn't know anything about before."

The war in Vietnam "overshadows everything," he thinks, and that and inflation may be the things that give "Mr. Nixon his moment of truth" in 1972.

A VOTE TO EASE THE TRANSIT PROBLEM

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. BIAGGI. Mr. Speaker, I give my wholehearted support to H.R. 14646, a bill designed to improve commuter passenger service between New York City and New Haven, Conn.

While much more remains to be done, I believe H.R. 14646 is a step in the right direction. In my own district, transit facilities are badly lacking for residents of the north Bronx and for those living in large apartment complexes known as Parkchester and Co-Op City.

Enactment of this bill paves the way for the formation of a Connecticut-New York interstate compact that would provide railroad passenger service on the lines of the former New Haven Railroad, now Penn Central, between New York City and New Haven, Conn. It also would provide possibilities for future transportation facilities to alleviate the pressing problem of inadequate rapid transit between cities as well as between boroughs within New York City. The compact would combine the Metropolitan Transportation Authority of New York and the Connecticut Transportation Authority as an intergovernmental agency.

The compact agencies would be authorized to acquire ownership of the railroad's assets or the right to use those assets as may be necessary for the continuation and improvement of passenger service. Further, the compact agencies would be authorized to apply for Federal, State, or local financial aid to supplement funds available to them for the operation of passenger service.

I regard H.R. 14646 as a worthy piece of legislation because it expresses an awareness of the commuter problem and proposes remedies for residents living in some sections of both New York City and Connecticut. It is my hope that we continue to tackle this problem in the future so that we relieve the burden for as many commuters as possible.

BANKING INSTITUTION EVALUATES PUBLIC PROGRAM

HON. WILLIAM H. AYRES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. AYRES. Mr. Speaker, one of our major problems as legislators is securing unbiased evaluations of existing programs. While the Government spends vast sums for this purpose, too often we find that these departmental appraisals do not give us the entire picture.

I was, therefore, very pleased to see that one of America's greatest financial institutions, the First National City Bank of New York, through its public affairs committee, had directed its regional economics section to review public education in New York City. The entire cost of this survey and its publication was defrayed by the bank.

Mr. Thomas R. Wilcox, vice chairman of the First National City Bank, is very knowledgeable about governmental affairs. Through his chairmanship of the bank's public affairs committee he has directed its noted economists in evaluating our existing systems. Last year, this outstanding civic leader, had prepared a very valuable review of the antipoverty program.

These two reports were under the guidance of First National Bank's Vice President Jac Friedgut, a noted economist. Mr. Friedgut is a masters graduate of the Woodrow Wilson School of Public Affairs at Princeton. The study on public education was prepared principally by Economist Rosalind Landes.

While this review is one referring to New York City, I believe that many of its findings would be of value to most other metropolitan areas.

I noted the following quotation from the report that should be quite thought provoking to all of us concerned with educational needs:

Expenditures for each school include the amount of City and State money allocated to the school (exclusive of funds for capital improvements) and money from Federal aid, primarily funds under Title I and other provisions of the Elementary and Secondary Education Act. Per capita costs in the 150 schools with enrollments 90 per cent or more black and Puerto Rican averaged $839 in 1967–68, ranging from a low of $529 per pupil to a high of $1,560.

Regardless of the variations in socioeconomic characteristics of the students in these 150 schools, there is no statistical correlation between the aggregate amounts of money spent per pupil and the improvement in reading scores from one year to the next. In other words, in these 150 schools, preliminary

evidence does not appear to indicate that an expenditure of one amount is any more effective in changing a pupil's level of achievement than an expenditure of another.

The lack of correlation in black/Puerto Rican schools between changes in achievement and the absolute level of quantitative factors such as higher-salaried experienced teachers or school equipment (as indicated by per capita cost figures) raises the question of whether or not continued indiscriminate funding of these items will in and of itself necessarily increase educational output proportionately.

An interesting case in point is the More Effective Schools (MES). These schools offer a particularly intensive combination of resources to prevent and compensate for academic failure. Like Special Service schools, additional teachers and equipment are supplied, although to a much greater extent. The 21 schools in the MES program (to be increased to 31 by the new United Federation of Teachers contract) provide a host of supportive and innovative services to the children. For example, class size is reduced to a maximum of 15 in kindergarten and the first grade, 20 in the second grade, and 22 in grades three through six. Extra teachers are made available as well as guidance and medical services. The objectives of MES are to enhance.

The First National City Bank report stressed the importance of high quality school principals and states that those principals with outstanding records should be given discretionary incentive funds for their schools.

I am hopeful that other financial institutions and industries might follow this very fine example of civic responsibility. With their great economists and financial experts, they can be of valuable service to the youth of this Nation.

The American Banker in a recent article by William Zimmerman points this out.

The article follows:

[From the American Banker, Nov. 25, 1969]

BUSINESS HAS THE BIGGEST STAKE IN IMPROVING QUALITY OF PUBLIC EDUCATION, FNCB SAYS

(By William Zimmerman)

NEW YORK.—Business must undergo a radical change in its role in the educational system because it has the most to lose or gain by the quality of the schools, First National City Bank stated Monday.

In a 40-page study on public education in New York City—prepared as part of the bank's continuing exploration of urban problems—FNCB calls for a two-pronged approach by business in regard to schools: to assist in the application of business methods to school problems and to establish a "link between the high schools and the world of work."

"Such an involvement, at a minimum, might consist of career guidance, placement assistance, and some measure of work-study programs," according to the study.

The bank observes that up to this point the major orientation of business in the high schools has been to assist in vocational education programs which emphasize preparing students for blue-collar jobs.

However, the problem posed by the changing structure of the economy of New York—and increasingly, those of other cities in the nation—is that blue-collar jobs increasingly are becoming obsolete.

"It would seem to make sense to reorient our concept of vocational education more towards white-collar training rather than some of the conventional manual skills," the study noted.

At a press briefing Monday, Jac Friedgut, vice president in charge of the bank's regional economics section, noted that "we'd like to see the emphasis, as far as vocational training is concerned, shift from shop courses, such as woodworking or metal working" to courses in which students learned to work the "best" and newest business machine equipment.

The study calls for different industry groups, such as banks, estate, insurance and accountants, to devise specific educational programs "where appropriate, jointly with the public school authorities for high school vocational training. This would involve joint planning on curriculum, training of teachers by business and mutual exposure. The specific programs would have to be on a scale relevant to the anticipated employment needs of the various industries.

As an example Mr. Friedgut suggested that a group, such as the brokerage industry, that needs more people might formulate a program with the New York City Board of Education or local governing school boards to satisfy their manpower needs.

Industry people who can explain brokerage transactions could go to the schools to tell the student what being a broker is all about, and help give direction to those students who might be inclined to go into the industry, rather than on to college.

"The essence of the whole idea is to establish a link between what the youngster is doing with himself in the high school and what type of job opportunity he has once he completes his education," the report said.

In commenting on the need for business methods to be applied to school problems, the study pointed out that one task would be to devise the most efficient allocation of classroom time and space so as to minimize school overcrowding. Another work area would be to help schools institute better budgeting procedures.

Mr Friedgut reported that in the city, a group of 24 chief executives of major businesses are working with the Economic Development Council of New York City on a task force to involve businesses in school problems. Pilot projects are under way at two high schools, he noted, in which "we and others make people available to develop programs" in employment counseling and curriculum planning for vocational-type courses.

In addition, one school needs additional space, and the group is providing it with information on how to assemble real estate property on an advantageous basis, Mr. Freidgut said.

He observed that it is the bank's experience from working with hardcore unemployed individuals that it must provide the basic arithmetic and language skills that should have been developed in the class rooms. Asked if businesses should consider forming schools of their own, Mr. Friedgut noted the possibility exists that industry could be competitors of schools.

He pointed to an idea being explored by the Office of Economic Opportunity in which a "model demonstration grant" would be given in the form of coupons to the parents of children. The coupons could be redeemed at those places where the parents believed they could get the best education for their children. Under such a program, business, in effect, could compete with the schools for the Federal funds, the banker said.

The study, prepared principally by Mrs. Rosalind Landes, research associate within the regional economics section, is expected to be sent to 10,000 to 12,000 corporations, city council members, central and local boards of education, educators and city, state and Federal government people.

Other studies on urban problems prepared by the section include Metropolis New York, An Economic Survey,, and Poverty and Economic Development in New York City. Others are in preparation on housing, health and hospitals and transportation, Mrs. Landes said.

I commend the First National City Bank for this most valuable report. I feel certain that it will be of interest to my colleagues.

OF COLLEGE FOOTBALL AND SPORTSMANSHIP

HON. GRAHAM PURCELL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. PURCELL. Mr. Speaker, as all of us know, one of the greatest college football games in history was played on December 6 in Fayetteville, Ark. This tense battle between Texas and Arkansas was surely one of the most exciting contests on record—a most fitting conclusion for college football's 100th year.

In an article in the Dallas Times Herald of December 10, Felix McKnight offers some insights into the game which I want to share with my colleagues. As he observes, this hard fought, yet cleanly played game speaks well for the teams, the coaches, and the fans.

As humble winners and gracious losers, the Longhorns and Razorbacks represent what all Americans look for in great competitors.

The article follows:

TWAS A GOOD DAY—FOR A CHANGE

It was a magnificent day; just like all fall Saturdays used to be. It was clean, decent air America was breathing—for a change.

Suddenly there was no turmoil, no crime, no demonstration, no demands, no Vietnam protests and smears, no tawdry outcries to foul the good air.

It stayed that way for three hours—from the foothills and ridges of Fayetteville, Ark., where it all originated, to millions of homes.

No phony outsiders with their two-bit protests and sit-ins could crash this party. Nor could they invade 50 million television screens. If they had, they would have been hooted out of the place.

Not once did the television cameras turn away from the Texas-Arkansas football epic to focus on a bunch of stringy misfits encamped on a nearby hill to protest whatever they were protesting.

College football washed all the grime off the national face for those precious hours . . . and it just might have been one of the best things to happen to us in years.

Decent youngsters, about the most intelligent generation we have spawned, hollered to hoarseness over a game—not just against something. Out on the field were the two best college football teams in the land—and not a single unsportsmanlike conduct penalty was called in one of the tensest hours of grid history.

And smack in the midst of the youngsters in the stands sat the President of the United States. No special box seat; just there with the fans and as cranked up as they were.

Billy Graham started the good day with a prayer. Just the right words for a nation to ponder.

And at game's end two superb leaders of young men—Darrell Royal and Frank Broyles—stood in solitude in their dressing rooms and led prayers with their squads. Totally unaware of national television that recorded the moving moment, both prayed for God's guidance.

Coach Broyles, his most magnificent hour snatched away in the closing moments, stood like a steel rod in the silence of the Arkansas dressing room, closed his eyes and thanked God for the likes of the young men on his team. It was very normal for Frank Broyles; he is a national leader of The Fellowship of Christian Athletes.

Next door, just as Coach Royal's Longhorns concluded, in unison. The Lord's Prayer, President Nixon was swept into the middle of the nation's No. 1 team and finally was heard over the chaos.

He was just another fan, proudly telling them like a good grandstand quarterback that between halves, on network television, he had predicted that both teams would score in the second half and that Arkansas had better beware of Texas' throttled offense.

The President, who had been catching flak from Penn State supporters for days after announcing he would give the Texas-Arkansas winner a presidential plaque denoting national collegiate football supremacy, made good on his word. And he reaffirmed his belief that Texas truly is the national champion. He moved into the somber silence of the Arkansas dressing room, clasped coach Broyles' hand and addressed "you magnificent men"—reminding that he had been in their position.

"I've lost some close ones . . . and it isn't easy . . ."

The stunned Razorbacks respectfully sought a presidential handshake and thanked him for taking the time to come down and watch their game.

He departed by helicopter in the cold rain and the crowds started melting into the foothills. It was a homey, decent day for Americans. And all over a game; something we had almost forgotten.

Off the field Darrell Royal and Frank Broyles are extremely close personal friends. Their families are close because they believe in the same things. All good.

Both are fine golfers and off season tear into each other on the golf course for a minimum 45 holes per day, when time permits. Competitors, these two great coaches, in the grandest sense. And leaders of men.

The good day came to a close in a perfect frame.

Coach Frank Broyles, father of six, walked out of a bleak stadium holding the hands of twin daughters, aged 11.

And, you know . . . his head was high. So was most of America's on the clear day it had been seeking, for a change.

A PRAYER: "FOR MY CONGRESSMAN"

HON. JOHN E. HUNT

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. HUNT. Mr. Speaker, a close personal friend of mine and pastor of The First Presbyterian Church at Woodbury Heights, N.J., the Reverend James E. Powl, has graciously brought to my attention a personal prayer which I commend to all my colleagues. At this late hour of the first session of the 91st Congress and, in fact, throughout the course of our congressional duties the year round, it is a prayer of inspiration to which we should pay more than lip service. Likewise, it is a prayer to which each of our constituents might subscribe in their daily devotions as a constant reminder that we as men are not infallible:

FOR MY CONGRESSMAN

(By Walter L. Cook)

I pray, O God, of righteousness, for my much-abused and little-praised congressman. There have been times when I joined a chorus of critics in harsh judgment of him. Deliver me from hypocrisy of demanding a higher integrity of him, my representative, than I demand of myself.

Now I ask that Thou wilt keep him true to the convictions he expressed before his election. Grant that the nobility of his words may be matched by the quality of his acts. Bestow upon him keen insight, sound judgment, and the willingness to act according to the mandate of a healthy and enlightened conscience. Endue him with such courage and firmness of purpose that he will be able to stand for his principles in the face of the strongest opposition. In Christ's Name. Amen.

THE STATES' RIGHT TO OBSTRUCT

HON. WILLIAM F. RYAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. RYAN. Mr. Speaker, under the rubric of the "New Federalism," the administration talks about "returning Government to the people." The States would, ideally, become leaders in meeting and solving our domestic ills.

As I have made clear by my opposition to the administration's substitute for the extension of the Voting Rights Act of 1965, and by my opposition to the Ayres substitute economic opportunity act bill, which would have turned control of the Federal antipoverty program over to the States, I regard the concept of New Federalism as an abdication of Federal responsibility, not an initiation of remedy. Instead of remedying our domestic ills, some States seek to perpetuate them. And no State has been able to come close to solving them.

I commend to my colleagues a perceptive article by John A. Hamilton, a member of the editorial board of the New York Times, which appeared in the December 15, 1969, edition of the New York Times:

THE STATES' RIGHT TO OBSTRUCT

(By John A. Hamilton)

Governor Claude Kirk of Florida, a big, hulking man, rose slowly from his seat at the Collier County schoolhouse hearing on hunger. Face flushed, eyes narrowing, he stabbed the air with the pointer he had used in presenting charts and graphic material to the Senate Select Committee on Nutrition and Human Needs and insisted that the States continue to play an important role in the administration of any Federal food program.

The committee's hearing had followed its tour of nearby migrant labor camps. Out on the flat, sandy land where the sun burned down on tiny, windowless shacks, migrant farm workers had told committee members that they sometimes did not have enough to eat.

Florida was one of seven states refusing to participate in the Federal food stamp program which enables the poor to purchase at discount prices stamps redeemable for groceries at stores. A state's refusal bars all localities from participation. Collier County was one of several hundred across the country also refusing to participate in the surplus commodity program under which surplus agricultural products are distributed free to needy families.

Thus, the poor of Collier County, migrants who helped feed the nation, were denied the benefits of food programs otherwise available to them.

Senator Javits of New York, a member of the committee, had visited the labor camps and seen the privation. At the hearing, he sharply questioned state and local officials.

"We want to give the state every opportunity," he replied to Governor Kirk, "but not to allow the thing not to be done."

PROGRAM OF ABDICATION

This exchange took place several months ago, but it is relevant to several pieces of legislation being considered by Congress now and to the general thrust of the Nixon Administration's domestic program. It is a program of abdication under a banner of "New Federalism." To surrender power, funds and programs to the states may not revitalize the states but only weaken Federal commitments.

Consider *hunger*. The select committee's food stamp bill would have brought meaningful aid to the needy and required the Department of Agriculture to provide food programs in those states and localities without them. The Administration opposed this bill. It apparently does not want a Federal agency to override the obstruction of a state or locality. Last week, in response to Administration objections after the bill had passed the Senate, a House panel rejected it.

Voting rights. Rather than seek a simple extension of the present voting rights law, which has proved extremely effective in preventing discrimination against Negroes in the South, the Administration succeeded in getting the House to adopt a substitute last week. In diluting Federal power over registration and voting, it permits the states to erect new subterfuges and barriers. Civil rights leaders term the House vote a "cataclysmic defeat."

Antipoverty efforts. Although the Administration sought an extension of the O.E.O. legislation, opponents of antipoverty efforts introduced a crippling amendment giving states control over funds and programs vital to urban areas. Republican House Minority Leader Gerald Ford favored the amendment and President Nixon urged O.E.O. Director Donald Rumsfeld to work out an "accommodation" with him.

The amendment was finally defeated and Federal leverage in an expanded antipoverty effort was preserved, but only because of the persistence of Democratic liberals, supported initially by a mere handful of Republican defectors.

It may be natural for a Republican President to favor the states over the cities when most of the cities remain dominated by Democrats and most of the states (32 of the 50) are in the hands of Republican Governors. Too, there was a time when states served as engines of change and innovation and as centers of life.

"OBSTACLES TO PROGRESS"

But now, unfortunately, states often serve as drag anchors on activity, as "obstacles to progress" in the view of Cleveland's Mayor Carl Stokes. Sometimes they refuse to participate in Federal programs essential to the urban welfare, or then deny cities needed powers of self-government, or shortchange them fiscally.

President Nixon, it should be said, holds a different view.

"For a long time," he recently told the National Governors Conference, "the phrase 'states' rights' was often used as an escape from responsibility—as a way of avoiding a problem, rather than of meeting a problem. But that time has passed."

Has it, though?

HUNGER IN AMERICA

HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. WOLFF. Mr. Speaker, earlier this month Washington was the scene of a conference dedicated to the problem of hunger in the United States. Those who came to the conference represented a wide variety of backgrounds, views and considerations. Nevertheless, the issue at hand—the appalling hunger midst plenty which still exists—was considered from many angles.

During this conference, in one of the many panel discussions which went on, two doctors, Dr. Anthony Conte and Dr. Arnold Schaeffer presented a proposal which I feel offers a most innovative approach to how the Nation's affluent persons can truly help in the crusade against hunger. I, therefore, would like to extend my remarks to include this proposal in the RECORD:

FOOD BANK U.S.A.

The White House Conference on Food, Nutrition and Health has attempted to create an ambitious program to stamp out hunger in America. Yet, it also has raised a question which deserves considerable consideration "Are we unintentionally creating a class of 'forgotten Americans.' "

The paradox of 60 million Americans eating too much while 20 million Americans are without enough to eat has awakened the conscience of all Americans. They want to respond. They want to participate. They want to share.

We have seen the positive accomplishments of American public's participation in national goals. The CARE program, The March of Dimes, Aid to Biafra are only a few examples of how citizen participation has brought help to those in most unfortunate circumstances. But what about hunger in America? How can those more fortunate help in this problem.

The answer may well lie with the establishment of a Food Bank USA, a program designed to help the millions who day in and day out know nothing but hunger.

Who would participate?

The housewife who wants to lose a few pounds to get into a new dress can give meaning to that weight loss by mailing to Food Bank U.S.A. a dollar for every lb. of weight taken off.

The smoker who quits smoking can contribute the cost of cigarettes he would have smoked in a day, week, month or year.

The laborer as well as the businessman can equally participate. So can the children who see pictures of a starving child and want to help that child with their pennies, nickles and dimes.

In effect, Food Bank USA would be a vehicle that would permit each American to participate, respond, and remedy this paradox of acute hunger midst plenty.

Food Bank USA with national headquarters would become the trustee of funds solicited through these appeals and other sources such as annual Thanksgiving appeal.

In turn, the collected funds would be used to purchase food stamps for the poor with delivery earmarked by the government for families who fall outside minimum eligibility requirements. It would also give the government funds to supplement the Federal program of free and reduced meals for needy children. It would, in short, be used for programs in food, hunger and nutrition with the following two goals in mind:

(1) increase in funding of these programs.

(2) ultimately, supplying sufficient funds so that the Federal role in this food for the poor would no longer be necessary.

There are, admittedly, groups which are currently aiding the poor in their battle against hunger. For the most part however this is being done on a sectional basis.

The task is too immense and the need too urgent for leaving it on a sectional level. A national approach is necessary. Consequently, Food Bank USA could prove to be a vital instrument in unifying the fight against hunger.

Composed of citizens, some of national prominence, it would be run on a volunteer basis. Each American would be eligible for participating, and I would hope that Mrs. Richard Nixon, who has expressed considerable interest in volunteer projects would agree to serve on the Board of Directors of this program.

STOP CUTTHROAT IMPORTS THREATENING AMERICAN SHOE INDUSTRY

HON. PHILIP J. PHILBIN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. PHILBIN. Mr. Speaker, I am greatly concerned about a recent report issued by the well-known, highly respected, able executive vice president of the New England Footwear Association, Mr. Maxwell Field, touching on decreased employment and increased unemployment in the New England shoe industry, stemming largely from sharp increases in foreign imports.

Mr. Field points out that the 6 months total of these imports coming into the United States were equal to 37 percent of the U.S. shoe production, an almost unbelievable statistic.

In the first half of 1969, foreign footwear—nonrubber—increased sharply to a total of 108 million pairs, up 12 percent in pairs, and 29 percent in dollar value.

During the same period U.S. shoe production declined 12 percent—an ominous sign.

While I have been greatly concerned for a long period of time over the impact of rising foreign, shoe imports upon the American shoe economy, these latest figures revealed by Mr. Field's study are startling, and constitute both an augury and a warning, not only to the industry, but to the owners and workers who are engaged in it, and depend upon it for their livelihood.

Unfortunately, the employment of shoe workers declined in this period by 9 percent in New England from 79,000 to 72,-100.

It is a curious, but not surprising, fact that actual declines in employment were much greater in those States and cities where there is a heavy concentration of women's shoe manufacturers, thus tracing the growth and effect of growing women's shoe imports.

In Massachusetts alone, unemployment compensation claims increased 42 percent, and the figures in Maine and New Hampshire show similar decline in the employment of shoe workers.

Moreover, in some communities largely dependent on shoe factory earnings, the loss has been reflected in retail sales, and the decrease in the number of shoes made has caused a loss to Maine and New England transportation firms for the year 1968 of over $3.9 million.

Some Maine shoebox manufacturers have dropped their workload in recent months by 40 to 50 percent.

Shoe factories have shut down, unemployment claims have increased, so that in March of 1969, 35 percent of all claims for unemployment in the State of New Hampshire were attributed to the shoe industry. In April of this year 59 percent were attributed to this industry and in May 58 percent, this, in spite of the fact that this season of the year usually has peak employment in this industry.

In a word, while all other industries, without exception, show comparable figures moving in the opposite, upward direction, and increasing substantially, the shoe industry shows a sharp drop in average weekly wages from 1968 to 1969, and a sharp drop in hours worked for the same period.

Even the textile industry, another pathetic victim of cheap foreign imports, has shown a slight gain in average weekly earnings in this period.

It is time, I think, that concern should turn to alarm with respect to the dangerous, harmful, injurious effects of foreign shoe imports upon our New England shoe economy and as well upon the national shoe economy. It is incredible that a nation like ours, acknowledged leader in so many fields, should purposely pass and tolerate a law that wreaks such terrible damage upon our economy and our workers.

Some have attempted to rationalize this situation in explanation, or in favor, of rising shoe imports, but any such rationalization must include the stern warning that all is not well in the shoe industry, due to the steadily increasing, cutthroat competition from abroad being allowed to enter this Nation and compete with our great shoe industry, upon which so many people depend to maintain themselves and their families.

Various cure-alls have been suggested for this condition, and various half-way solutions and ineffective panaceas have been suggested or promised to check imports and save the shoe industry.

Some say that the industry is operating at the highest prosperity level ever and, relatively, this may be part true.

But the fact is also true that this industry and its workers are being hammered and hammered mercilessly by the flood of cheap goods coming from several large shoe manufacturing countries overseas—not only leather, but rubber and fabricated shoes—coming into the United States in such quantities as to threaten the shoe industry with chaos and destruction unless these imports are cut or substantially reduced in the near future.

The time for talk, conferences, promises, cha cha, and inadequate stopgap panaceas is long past.

The need now is for some vigorous, well-considered, fair, effective action, not designed to damage or abolish trade with other nations, but to bring realism, commonsense and real two-way foreign trade to reality, so that it cannot be said that foreign trade is a one-way street, wherein this Nation permits some

nations to load up our markets with cheaply produced shoes that no factory in this country could possibly compete with on the one hand, and on the other, furnishing grants, loans, marketing advice, and low-tariff barriers that permit these cheap goods to come into this country in large volumes, undermining prosperous, American industries and the high standards of skillful American workers, the best in the world.

Nor has it been my view that expedients solely involving voluntary agreements for rigging up quotas, inadequate tariffs and the like could be materially effective for stopping the flood of cheap shoes, or other cheap imports.

The basic, organic law, in this case, the Trade Act of 1961, must be drastically amended, so that these stultifying, insidious, destructive imports are barred, and so that fair, reasonable measures are adopted that will save the American shoe industry, and other industries similarly beset, and insure a simple, easy functioning rule of law that will keep down injurious imports in the shoe industry and other industries.

Mr. Speaker, this is the time to move, to take up this battle for justice and equity and decent treatment for the shoe business, the shoe industry, and the shoe workers and the American public, being trapped and mulcted by inferior, cheaply made foreign shoes.

If further delays occur in tackling and settling this problem, the overall shoe industy cannot help but suffer discouraging and shocking, deteriorative effects.

I hope that the shoe factory owners, distributors and the shoe workers will inaugurate and press these efforts themselves, and see to it that proper legislation is prepared and introduced that will accomplish the results required to serve the shoe industry, as well as other industries suffering from unfair, foreign competition undermining and weakening the American economy.

I am strongly pledged to assist in all efforts that are made along these lines, and hope that the shoe industry, as well as its many friends in Congress, will get on the ball, and start moving with real determination to amend existing law, so that great industry and its workers will not be swamped by a projecting deluge of cheap products flooding our markets, weakening and liquidating our industries and putting millions of people out of work.

It is time to act.

STANDARD CONDUCT RULES FOR OFFICIALS

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. DERWINSKI. Mr. Speaker, the Park Forest, Ill., Reporter, an independ- jacent communities in south Cook and ent weekly serving Park Forest and ad- Will Counties, Ill., has acquired a reputation for energetic and independent editorial policy.

Clearly in keeping with this reputation is the following editorial carried in the Wednesday, December 10, edition discussing the standards for public officials:

STANDARD CONDUCT RULES FOR OFFICIALS

It is interesting to note, in the aftermath of Clement F. Haynsworth's rejected nomination to the United States Supreme Court, that only six members of the 17-member Senate Judiciary Committee, which reported out the nomination, have made financial statements as extensive as those they demanded of Haynsworth.

The situation is an example of the double standard which occurs when lawmakers fail to apply to themselves the same criteria by which they judged Haynsworth.

Financial disclosure rules which were adopted last year by both Houses of Congress disclosed some bits of interesting information—such as the fact that 61 House members own stock in firms with major defense contracts.

But the new rules require much less than full financial disclosure. In fact, members of the Senate need make public only political contributions and fees for writings or public appearances. The full financial statements are kept under lock and key—with more elaborate security precautions than the government's top secret documents.

Two members of the Senate Judiciary Committee which fought the Haynsworth appointment have made only partial disclosure of their own financial dealings. They are Sen. Birch Bayh (D.-Ind.) and Senator Robert P. Griffin (R.-Mich.). Two others who opposed the appointment have made no disclosure at all and Senator Edward M. Kennedy (D-Mass.).

Sen. Charles Percy, who was one of 17 Republican senators who voted against Haynsworth, is pushing legislation which would require full financial disclosure by legislators, candidates and their principal aides. He also has asked President Nixon to name an ethics commission to examine the whole matter of ethical questions.

We feel that both the new legislation and the idea for the commission are worthy of public support.

Those who seek public office owe it to the public to make a serious effort to establish standard rules of behavior.

NIX SUPPORTS COMPARABLE LEAVE POLICY FOR FEDERAL SEAFARING PERSONNEL

HON. ROBERT N. C. NIX

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. NIX. Mr. Speaker, I have today introduced a bill which will update Public Law 89–747, which sets the leave policy for Federal seafaring personnel at a rate not to exceed 2 days for each 30-day calendar period on extended voyages. Today, that is not enough leave time.

Today, seamen in private industry receive 90 days' leave. The Federal service must be at least competitive with private industry and I believe this is a necessary measure.

Very often we neglect in national policy what is the basis of all good government—stable and happy families. When men are away from home for long periods of time their families need them for extended periods of time at home.

I want to thank Mr. Fish and Mr. Simkins of the AFL–CIO Maritime Committee for bringing this matter to my attention. I believe that they represent a fine organization under the leadership of Joseph Curran, Thomas Gleason, and Hoyt S. Haddock.

THE DRAFT LOTTERY SYSTEM

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. OTTINGER. Mr. Speaker, Public Law 91–124 authorized a system of random selection for the draft. Young men eligible for military service under this new system will be inducted beginning in January.

To assist my constituents in fully understanding this new system and in making their personal plans, I am inserting herewith, for inclusion in the RECORD, a fact sheet and some pertinent questions and answers on the lottery system:

FACT SHEET ON NEW SELECTIVE SERVICE INDUCTION PROCEDURES

BACKGROUND

President Nixon, under the authority vested in him by the Selective Service Act of 1967, as amended by Public Law 91–124 of November 26, 1969, has issued a proclamation and an executive order which directs the implementation of important changes in draft policy and procedures.

The purpose of this fact sheet is to identify these major changes in draft procedures and briefly discuss their implementation.

MAJOR CHANGES IN DRAFT POLICY AND PROCEDURES

1. The "First Priority Selection Group" during 1970

President Nixon has directed that during Calendar Year 1970 the "first priority selection group" from which inductees will be selected will consist of all registrants who were born on or after January 1, 1944, and on or before December 31, 1950, and who are classified I–A or I–A–O.

Stated another way, during Calendar Year 1970, the "first priority selection group" available for selection for induction will consist of those registrants who had attained their 19th birth date *prior* to January 1, 1970, and those registrants over age 19 who will not attain their 26th birth date *prior* to January 1, 1970, provided they are classified I–A or I–A–O.

It is important to note, however, that if a registrant in this age group (19 through 25) attains his 26th birth date during Calendar Year 1970 *before* his number has been reached by his local draft board for induction, he will be transferred out of this "first priority selection group" into a lower priority group of registrants not normally available for induction. Liability for induction of such registrants over age 26 will then, for practical purposes, be eliminated except in those instances in which the registrant has been deferred by reason of graduate student training in one of the health specialties and therefore subject to possible induction until age 35 under the so-called Doctor Draft.

On the other hand, any such registrant whose random sequence number has been reached and who would have been ordered to report for induction except for delays due to a personal appearance, appeal, preinduction examination, reclassification, or otherwise, shall, if and when found acceptable, and when such delay is concluded, be ordered to report for induction next after de-

linquents and volunteers, even if the year in which he otherwise would have been ordered to report has ended, and even if (in cases of extended liability) he has attained his 26th birth date.

2. The "First Priority Selection Group" during calendar year 1971 and later years

The "first priority selection group" during Calendar Year 1971 and each subsequent year thereafter, will consist of:

(a) Registrants who prior to January 1 of each such calendar year have attained the age of 19 but not of 20 years and are in Class I–A or I–A–O; and

(b) Those registrants who prior to January 1 of each such calendar year have attained the age of 19 but not of 26 years, and who had not previously been fully exposed to vulnerability for actual induction in the "first priority selection group" (by reason of a student deferment or otherwise).

"Full" exposure is considered to have occurred if the registrant was in the "first priority selection group" on December 31 of the calendar year and his random sequence number had not been reached by that date.

Thus, during Calendar Year 1971 and in subsequent years, the "first priority selection group" will consist of registrants in their 19th year of age and those other registrants age 20 through 25, not previously fully exposed to induction by reason of deferment or otherwise.

3. Order of call for inductees

Under previous draft selection procedures, registrants within the age group 19 to 26 who were classified I–A or I–A–O and otherwise available for induction were ordered for induction on the basis of the "oldest first system." Thus, the birth rate of registrants in the "pool" established their sequential order of call.

President Nixon has now changed this procedure by instituting a random system of selection (authorized by Public Law 91–124 of November 26, 1969). The random selection procedure, as implemented by the Selective Service System, will determine the order in which registrants in any available "pool" will be ordered first for induction.

The system now adopted by the Director of Selective Service results in a scrambling of dates of birth of each registrant and the substitution of a randomly-arrived-at sequential number for each registrant.

A national lottery was held at Selective Service Headquarters in Washington, D.C. on Monday, December 1, 1969, which established the sequence of numbers which will be observed by each local board in ordering registrants for induction from its available manpower pool.

The order of induction for registrants (ages 19 through 25) in the "first priority selection group" during 1970 has been established as follows:

RANDOM SELECTION SEQUENCE 1970

	Jan.	Feb.	Mar.	Apr.	May	June	Jul.	Aug.	Sep.	Oct.	Nov.	Dec.
1	305	086	108	032	330	249	093	111	225	359	019	129
2	159	144	029	271	298	228	350	045	161	125	034	328
3	251	297	267	083	040	301	115	261	049	244	348	157
4	215	210	275	081	276	020	279	145	232	202	266	165
5	101	214	293	269	364	028	188	054	082	024	310	056
6	224	347	139	253	155	110	327	114	006	087	076	010
7	306	091	122	147	035	085	050	168	008	234	051	012
8	199	181	213	312	321	366	013	048	184	283	097	105
9	194	338	317	219	197	335	227	106	263	342	080	043
10	325	216	323	218	065	206	284	021	071	220	282	041
11	329	150	136	014	037	134	248	324	158	237	046	039
12	221	068	300	346	133	272	015	142	242	072	066	314
13	318	152	259	124	295	069	042	307	175	138	126	163
14	238	004	354	231	178	356	331	198	001	294	127	026
15	017	089	169	273	130	180	322	102	113	171	131	320
16	121	212	166	148	055	274	120	044	207	254	107	096
17	235	189	033	260	112	073	098	154	255	288	143	304
18	140	292	332	090	278	341	190	141	246	005	146	128
19	058	025	200	336	075	104	227	311	177	241	203	240
20	280	302	239	345	183	360	187	344	063	192	185	135
21	186	363	334	062	250	060	027	291	204	243	156	070
22	337	290	265	316	326	247	153	339	160	117	009	053
23	118	057	256	252	319	109	172	116	119	201	182	162
24	059	236	258	002	031	358	023	036	195	196	230	095
25	052	179	343	351	361	137	067	286	149	176	132	084
26	092	365	170	340	357	022	303	245	018	007	309	173
27	355	205	268	074	296	064	289	352	233	264	047	078
28	077	299	223	262	308	222	088	167	257	094	281	123
29	349	285	362	191	226	353	270	061	151	229	099	016
30	164	.....	217	208	103	209	287	333	315	038	174	003
31	211	.....	030	.....	313	.....	193	011	.....	079	.....	100

Since it is probable that in many instances local boards will have more than one registrant with the same "number" for induction by reason of their having the same birth date, their sequence of induction will be determined by the first letter of their names (last name and, if necessary, first name), which have also been arrived at in a random sequence established by a supplemental drawing which also was conducted at Selective Service Headquarters on December 1, 1969. The sequence of this alphabetical drawing for Calendar Year 1970 is as follows:

1	J	14	C
2	G	15	F
3	D	16	I
4	X	17	K
5	N	18	H
6	O	19	S
7	Z	20	L
8	T	21	M
9	W	22	A
10	P	23	R
11	Q	24	E
12	Y	25	B
13	U	26	V

The relative sequence established for all registrants, ages 19 through 25, as reflected in the number assigned to their birth date, will remain with the registrant permanently. Thus, despite the fact that a new "lottery" will be held each year for young men attaining age 19 on or after January 1, 1970, 1971, 1972, 1973, et cetera, these subsequent annual lotteries will not have any effect on registrants previously lotteried.

Stated another way, once a registrant receives a lottery number to establish his sequence for possible induction, he retains that number permanently, regardless of the calendar year during which he is actually exposed to induction.

4. Transfer of a registrant from the "First Priority Selection Group" to a lower priority selection group

A question may be raised as to the period of time which a registrant must spend in the "first priority selection group" in order to discharge his prime liability for induction. Generally speaking, registrants will remain in the "first priority selection group" during the entire calendar year of exposure, i.e., from January 1 to December 31. However, because of a possible deferred status, a registrant may only spend a relatively short period of time before the end of the calendar year in this "first priority selection group" as a registrant classified I–A or I–A–O and available for induction; therefore, the regulations issued by the President indicate that only those registrants who are in the "first priority selection group" on December 31 of the year of their exposure and whose random sequence number had *not* been reached by that date, shall be assigned to a priority group which is immediately below the "first priority selection group".

Stated another way, a *deferred* registrant (one not classified I–A or I–A–O) will remain liable for transfer back to the "first priority selection group" during any given calendar year until such time as he has had the maximum possible exposure to induction by virtue of having been in the "first priority selection group" on the last day of the calendar year and providing that his particular sequence number had *not* been reached by that date.

SUMMARY

The changes in draft policy announced by President Nixon and implemented by the Director of Selective Service make no changes in the manner in which young men are required to *register* for the draft at age 18; nor do they change existing law or regulations concerning the manner in which these registrants are subsequently *classified* by their local draft boards.

The changes merely involve the manner in which registrants are *selected* and the time frame of their *vulnerability*.

During Calendar Year 1970 the ages of registrants who have maximum vulnerability for induction will range from 19 through 25. Thus during Calendar Year 1970, the only marked difference between the existing system heretofore observed by Selective Service, and the new system which will be placed into effect on January 1, 1970, relates to the manner in which these young men who are classified I–A or I–A–O and are available for induction are to be *selected* for induction. The existing system simply required that the "oldest first" in the pool be ordered for induction, the oldest first being determined on the basis of the registrant's birth date.

The new system selects registrants for induction on the basis of the sequential number assigned to the individual registrants in lieu of his birth date. As previously explained, the sequential number assigned to each registrant is one arrived at by "random selection". This number will establish the individual registrant's relative order of call.

Calendar Year 1970 is therefore a transitional period during which the Selective Service System hopes to move into the final phase of its announced policy to reduce the period of uncertainty facing young men as regards the draft from the present 19 to 26 year period down to the 19–20 year period.

The period of transition, i.e., Calendar Year 1970, is necessary so as to ensure that registrants above age 20 and below age 26 who have been given a deferred status will be given some exposure to the draft.

Beginning with Calendar Year 1971, the new system will become fully effective. At that time, the "first priority selection group" will then consist primarily of registrants ages 19 to 20 and those older registrants under age 26 who had not previously been "fully" exposed to the draft.

RANDOM SELECTION QUESTIONS AND ANSWERS

Question. Explain the drawing under the recently amended Selective Service Act.

Answer. On December 1, there was a drawing in Washington of 366 closed capsules in each of which was a slip of paper on which was written a month and day of the year, for example, May 2, June 1, etc. The order in which these capsules were drawn determines

the relative position in the national random sequence of registrants born on all the dates of the year including February 29. As September 14 was drawn first, all men born on September 14 are No. 1 in the national random sequence. As June 8 was drawn last, all men with that birthday are No. 366 in the national random sequence.

Question. How will the sequence be used by local boards?

Answer. Each local board will assign numbers to its registrants who are in I–A or who become I–A in accord with the national sequence. Some local boards may not have at any one time men with birthdays on every day. In such a case the local board would go to the next number. For instance, it might call numbers 1 through 5, then 7 and 8 because it had no men whose birthdays were on the day drawn sixth in the drawing.

Question. Why is there a drawing of the alphabet?

Answer. This drawing randomized the alphabet so that in case a local board had two or more men with the same birthday and was required to order one but not all of them for a call, it has a way to determine which comes first, second, etc., by applying the random alphabet to the names. In the drawing of December 1, 1969, the letter "J" was drawn first. So men whose names begin with "J" would be called first by the local board among men with the same number from the birthday drawing.

Question. Does everybody get a number out of the first lottery?

Answer. No—the first drawing will determine the random sequence number only for those men who prior to January 1, 1970, had attained age 19, and not 26.

Besides that, the number in which his birthday is drawn will not mean anything until he is classified I–A or I–A–O. Some men in the group who eventually will get a number out of the first drawing may not become I–A until next year or later. In that case, his number will determine his order in the national sequence in use that year. For example, if his birthday is drawn No. 80, and he is now deferred for college, but loses his college deferment in June 1971, he will be No. 80 in the national random sequence in use that year.

Question. How do new 19-year-olds get a number?

Answer. Before the end of 1970, a drawing of the 365 days of the year will be held. This drawing will determine the national random sequence to be used in 1971. The only registrants who would look to that drawing to determine where they stand in the national random sequence are those who turned 19 during 1970.

Question. How do you use more than one drawing?

Answer. The date of November 9, was drawn No. 80 in the first lottery. This may be the number of a man who was in college during 1970, but graduated and lost his deferment in June 1971.

The date of September 11 may be drawn No. 80 in the next lottery. A man born on September 11 who was available in 1971 would be No. 80 in the random order. So would the first man whose birthday of November 9 was drawn No. 80 a year earlier. If both men were in the same local board they would be called on the same call or if one, but not both were required, the random alphabet would determine which one went first.

Question. Doesn't the registrant who is in college most of the year have an advantage over the one who can't go to college and is in I–A throughout the year?

Answer. No. The key in both cases is whether his random sequence number is reached in his local board. If the random sequence number has been reached in the case of a registrant who becomes I–A late in the year, he will be inducted as soon as appeals, examinations and so forth, are concluded, even though the year has ended. There is no way he can gain an advantage by delaying his actual induction through time required for personal appearance, appeals, examination and other processing *if his random sequence number has been reached.*

Question. What about the registrant who loses a deferment or exemption just before age 26?

Answer. This is like the case in the previous question. If his number has been or is reached, and he loses his deferment just before his 26th birthday, he will, if his deferment extended his liability to age 35 as most do, be inducted at the end of all the processing steps—if he remains in Class 1–A or 1–A–O and is qualified, even though he has turned 26 during this period of delay.

Question. How does this system help a registrant know with more certainty his chances of serving?

Answer. First of all, his period of greatest vulnerability is one year, rather than seven.

Second, the order in which his birthday is drawn will tell him where he stands in the national random selection sequence. If his birthday is drawn early he knows that when he is classified I–A and found acceptable, he is almost certain to be called. He can plan his career to accommodate that possibility.

If his birthday is drawn near the end, he has relative certainty he may not be called short of unusual circumstances.

He can plan accordingly.

For the registrant whose birthday is drawn in the middle range it is not so clear, but in any event the system will give much greater certainty than is possible under the former system.

Question. Will registrants now postponed be in the random selection?

Answer. No. The postponed registrant has already been ordered for induction under the old system and will be inducted when the postponement ends.

Question. Can a man whose birthday is drawn early in the drawing still join the Reserve?

Answer. Yes. Just as now, he can join a Reserve Unit any time before the induction order is issued.

Question. What about volunteering for active duty?

Answer. The policy is to authorize enlistment for active duty at any time up to the day of induction.

Question. What is the situation of a registrant who is in I–A for the first part of the year, but enters college in September and requests and gets a student deferment?

Answer. If his random sequence number has not been reached, he goes out of the group to return when no longer deferred to the current group. If his random sequence number *has* been reached, but he has not been issued an order to report for induction, the local board may defer him for college and he would then reenter the selection group in the year he again lost his deferment.

Question. Does the lottery affect existing deferment and exemption policies?

Answer. Existing deferment and exemption policies are not affected by virtue of the lottery system.

Question. How does the lottery affect the liability of those subject to call as physicians and dentists?

Answer. Physicians and dentists are called on special calls, normally after age 26, and have extended liability to age 35 because of previous deferment as a student. Their call to service under this special call would therefore not be different from what is under present policies.

GUARANTEED STUDENT LOAN PROGRAM

HON. PHILIP J. PHILBIN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. PHILBIN. Mr. Speaker, I am greatly concerned about the current status of student loans. Thousands and thousands of students have been facing most difficult problems this year trying to get loans to start, continue, or finish their education.

In all too many instances, these applicants have been disappointed, either because the banks state that they do not have money to make these loans, or it is against current policy, or they are not in the business of handling student loans, because under current interest rates they are unprofitable.

The pending bill tends in a measure to correct that situation. In a sense, it constitutes a subsidy to the banks for making such loans, but the situation is emergent, and must be taken care of as best Congress can take care of it on a temporary basis at this time.

However, it is very clear that more effective, sweeping, permanent legislation is required before many worthy, aspiring students in this country can be accommodated and helped. It is clear to me that the banks do not want to handle this kind of business without government subsidy, and that the Government itself must take some affirmative action, either by changing the criteria of loans under the National Defense Education Act, or permitting HEW to make these loans at low interest rates. This situation is urgent. Further delay or equivocation would be gross disregard of the interests of our young students and this must never be said of this House.

The fact is that all these aspiring students whose parents are not able to assist in financing their college educations, in full, must be provided for.

It is really totally unwarranted, as well as uncalled for, and in many respects very dangerous that in our great, powerful, rich country, where fine, outstanding boys and girls are turned away from the doors of our colleges merely because they cannot get ordinary loans to finance their higher education.

This is something that the Congress must definitely provide for, not by meager, paltry, temporary palliatives, but if necessary, by direct, adequate, well-financed legislation that will insure that no worthy boy or girl in this country will be deprived of an education, because they or their family cannot borrow the money to put them through college.

Many of these young folks that I know personally are working their way through college. But with rapidly increasing costs of living and expenses, they are not able to make the grade without substantial, outside help in the form of loans, and this is where the great Congress of the United States comes in—we must meet

this critical contingency in American educational life, so that our aspiring young people can be helped, sustained, supported, and encouraged by having available to them the means of inaugurating or continuing their higher education.

After all, these young people will be the leaders of the future upon whom this great, growing Nation must depend to lead and to steer it through the crucial times ahead, when it will be faced with great problems that will determine whether freedom can be preserved, or whether the United States, like other great nations of past history will fall prey to the ravages and injustices of absolute systems of government replacing our democratic patterns, which will convert our people, students included, into vassals of the radical, police state.

Whatever the future holds for this great Nation, and I confidently believe it holds much, this Congress must do its part now to make sure that the Government will not nonchalantly turn its back upon the young people of this country in the hour of their great need, when they are seeking, working, and struggling to fit themselves educationally, and in every other way, to cope with the problems of the future, and to furnish the vigorous, astute, enlightened, and courageous leadership that will be required to maintain and preserve our democratic system, and the liberties of the individual, which we in this country prize so greatly and have always protected and retained, if necessary, with our blood and our lives.

I propose to take strong, unequivocal action to provide adequate loans at reasonable, low-interest rates to worthy students that qualify for them. Congress must no longer permit current, educational loan inadequacies to exist in this prosperous, free Nation. I urge Congress to act forthwith to help our fine, deserving, young students. No generation was ever brighter, more promising, or more deserving, and we must see to it that they receive all the help they need and deserve.

DR. EARL LEROY WOOD HONORED BY THE PRESIDENT

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. RODINO. Mr. Speaker, Dr. Earl Wood, one of Newark's most public-spirited citizens, a man who has spent a lifetime serving his patients and the community at large, has received a well-deserved certificate of appreciation from President Nixon for his outstanding service on the Newark Selective Service Appeal Board No. 1. This award was recently presented to Dr. Wood by Col. Joseph T. Avella, State selective service director.

A recent Newark Evening News article follows:

Colonel Avella presented a certificate of appreciation to Dr. Wood in commemoration of his years of service, signed by President Nixon, Selective Service head Gen. Louis B. Hershey and Gov. Hughes. Others who praised Dr. Wood's contributions included Samuel J. Kaufman, chairman of the panel, who presented him a plaque.

Dr. Wood, who is 75, was active as a surgeon-specialist in Newark 30 years before retiring in 1957. A native of Chester, Pa., he was reared in Newark and served in the medical corps of both World Wars and maintained a private practice here until his retirement.

A former member of many professional medical societies, Dr. Wood was an officer of the Essex County Medical Society, a member of the American Academy of Otolaryngology, the American College of Surgeons, the American Medical Association and the Academy of Medicine of Northern New Jersey.

Dr. Wood also served as a member of the Society of Surgeons of New Jersey, the Order of Founders and Patriots of America, the Society of Colonial Wars, the University of Pennsylvania Club of New York and the Essex County Country Club. He has one son, Dr. Francis A. Wood of Newark and lives with his wife, the former Flora H. Assmann, at 225 Ballantine Parkway in Newark.

FEDERAL REVENUE SHARING

HON. WILLIAM F. RYAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. RYAN. Mr. Speaker, the Nixon administration visualizes Federal revenue sharing as the catalyst by which the States are to become the initiators of bold new programs and the solvers of old problems. I have very serious doubts about the ability of the States to do now, or in the future, what they have been unable to do in the past. The problems of urban decay, limited employment, and educational opportunity, and inadequate housing, income, and nutrition are multiplying. They are becoming less manageable, not more amenable to 50 fragmented efforts by 50 State administrations.

As an article in the New Republic of October 4 by Prof. Louis Fisher, of Queens College, notes, intrinsic to the administration's concept is abnegation of Federal responsibility by distribution of Federal funds without reservation of Federal controls. Since anticity bias characterizes many State legislatures, whether rural or suburban controlled, the urban ghettos would continue to decay; the urban schools would continue to fester; the urban poor would continue to suffer.

I commend Professor Fisher's article, which follows, to my colleagues. I also endorse his conclusions: the Federal Government should "assume the entire cost of welfare, increase aid to education, and bring grant in aid programs up to authorized levels."

The article follows:

A CAUTIONARY WORD: FEDERAL REVENUE SHARING

(By Louis Fisher)

When congressmen ask their constituents, "Do you think the federal government should return a portion of its revenues to the states to enable them to solve more of their own problems?" 70 to 80 percent say yes. This response rests on a misconception: that revenue sharing will provide a painless source of funds. When the question is worded more honestly, the results are a little different. "Should federal income taxes be increased over federal needs to provide for tax sharing with states?" one legislator asked. 93 percent answered no.

It is a curious notion that the federal government should *begin* sharing some of its revenue with the states. Where do we suppose the money goes now—to the District of Columbia? Guam, perhaps? of course the government shares its revenue with the states. Grants-in-aid tripled during the Eisenhower years, and tripled again under the Kennedy-Johnson Administrations. Every congressional district benefits from some kind of military installation or defense contract, or public works project. It is facile to argue that "cities need financial relief; revenue sharing provides financial relief; therefore, cities need revenue sharing." The merits of revenue sharing have to be compared with other forms of financial relief: expanded grant-in-aid programs, federal assumption of welfare costs, or direct federal subsidies for municipal bonds.

What distinguishes revenue sharing is not tax relief or "sharing," which is so much flim-flam, but the distribution of federal funds without federal controls. Here are the thorns: local autonomy versus national goals, decentralization versus federal responsibility. In his proposal to share federal dollars with state and local governments (beginning with a modest $500 million in fiscal 1971 but holding out the promise of $5 billion a year by fiscal 1976), Mr. Nixon has opted for local autonomy and decentralization; no strings attached. Funds would be allocated on the basis of population with an adjustment for local tax effort.

Previous advocates of revenue sharing will not be entirely happy with this plan. Walter Heller has urged controls to make sure, for example, that states abide by the anti-discrimination provisions of the 1964 Civil Rights Act; he would also prohibit use of revenue-sharing funds for highways, already financed by a separate trust fund. Rep. Henry Reuss (D, Wis.) would make revenue sharing conditional approval of modernization plans for state governments. Other legislators have suggested limiting revenue-sharing funds to health education and welfare or giving special supplements to poorer states.

On the third of last month, the National Governors Conference proposed two more qualifications: taking account of the difficulty Western states have in increasing their tax effort, because of the large amount of nontaxable federal property in their states; and, using some of the revenue-sharing funds expected by local governments for regional projects. Thus even if a majority of congressmen favored revenue sharing, they might remain sharply divided over a concrete proposal.

It is argued that states invigorated by revenue sharing can function once again as "little laboratories" of social and economic innovation notwithstanding their irresponsibility in matters of personal liberties, reapportionment, procedural safeguards and racial discrimination. I find it hard to imaging a renaissance of responsibility in state legislatures, though I know the President believes his plan will help "to restore strength and vigor to local and state governments; to shift the balance of political power from Washington and back to the country and the people." This "back to the people" nostrum is one means of sidestepping federal responsibilities, asking the states to do what they can not or will not. How can New York unsnarl its transportation system, on the ground and in the air, without federally-supported mass transit along the Eastern seaboard? What can one state, say Ohio, do about the fouling and slow death of Lake Erie?

If revenue sharing survives these con-

ceptual infirmities, it must then tangle with Wilbur Mills, chairman of the House Ways and Means Committee, who objects to the federal government collecting money and not supervising how it is spent. For those who want a share in federal revenue, he offers matching responsibility for sharing the federal debt, a bargain the states find unappealing.

Cities have been particularly apprehensive about revenue sharing. It is said that state insensitivity to urban problems is being overcome as a result of reapportionment decisions, but the anti-city bias of state legislatures isn't dead yet. And if seniority and committee chairmanships go on being pocketed by state legislatures from rural areas, it may never be. Moreover, reapportionment is likely to shift power not to central cities but to suburbs. John Lindsay's criticism of his state's budget as "anti-urban" suggests it is premature to say that state government, even in progressive New York, is sympathetic to big-city problems.

To allay the fears of mayors, it is pointed out that states now set aside the bulk of their revenue for education, health, and welfare, and that this would continue under revenue sharing, to the cities' benefit. Mr. Nixon says, "one can reasonably expect that education, which consistently takes over two-fifths of all state and local general revenues, will be the major beneficiary" of revenue-sharing funds. What I want to know is not whether states support education, but how they support it. In rejecting, this past January, a proposal to shift from specific support of compensatory education to general block grants for education, the National Advisory Council on the Education of Disadvantaged Children concluded that "any changes that would further shift the responsibility to the states for distributing education funds would—in many states and possibly in all—diminish the impact of this necessary investment in the education of disadvantaged children." State distribution of funds, it said, "rarely, if ever, favors those sections of the state with the greatest concentration and number of educationally deprived children—the central cities."

Since we can't trust the states to distribute funds on the basis of need, it has been suggested that a certain portion of revenue-sharing funds be given directly to local governments. Mayors feel more comfortable with this "pass through" approach, but it still would not guarantee that federal funds will go where they should. Take Wisconsin. The pass-through formula is generous here (half of state revenue earmarked for municipalities). Nevertheless, Senator William Proxmire points out that it's the prosperous cities that make out best: "They get the share of the income tax they pay, and cities like Milwaukee that earnestly, desperately need it do not get it." What we need is not funds distributed on the basis of population and tax effort, but a formula that recognizes the cities' special financial problem, a problem due partly to a concentration of the aged and poor who require expensive services, and to the large number of nonresidents who rely on urban services.

The executive director of the US Conference of Mayors, John Gunther, has expressed dismay over the lack of city representation throughout the Nixon Administration. His suspicions were reinforced by the handling of federal funds for law enforcement assistance. Planning grants were released by the Justice Department to the states, with the understanding that priority would be given to major urban and metropolitan areas with high crime rates. But a study by the National League of Cities revealed that funds were being used to create "third levels of bureaucracy as a matter of state administrative convenience." Philadelphia, which accounted for almost 25 percent of the serious crimes in the state, got less than 10 percent of Pennsylvania's planning grants. Other mayors have complained that states are distributing funds to rural, urban and suburban areas on a per capita basis, regardless of crime rates.

Naturally then, large cities should find it more to their advantage to press Congress for an expansion of direct federal grants. Federal aid to New York City climbed from $578 million in 1967 to $768 million last year, and passed the $1 billion mark in fiscal 1969. This is the kind of revenue sharing that helps. Federal grants to all metropolitan areas rose from $5.6 billion in 1964 to $16.7 billion scheduled for fiscal 1970, an increase from 55 to 57 percent of total federal grants. In his April budget review, Mr. Nixon noted that federal aid to state and local governments will increase by $3.5 billion in fiscal 1970, of which the urban share is $2.8 billion, a hefty 80 percent.

One of the earlier rationales for revenue sharing was the idea of "fiscal drag." It was predicted that federal receipts would eventually outpace federal spending and produce an annual "fiscal dividend" of some $6 to $7 billion. If left unspent and used to retire the national debt, economic growth would be retarded. The remedy: distribute the dividends among the states.

The dividend never appeared because of Vietnam. Then hopes were revived last December by Charles Schultze, former budget director under President Johnson. Schultze predicted a federal dividend of $8 billion by fiscal 1971 and almost $40 billion by fiscal 1974! Tax reduction will consume some of this dividend and if inflationary pressures dictate a budget surplus for the next few years, say $5 billion a year, this must be deducted from any anticipated dividend. And if inflation subsides, the Administration is apparently committed to a budget surplus as a means of directing investment into mortgage funds, helping relieve the depressed housing market.

Other assumptions by Schultze—a cease-fire in Vietnam early in 1969 (withdrawal completed within twelve months) and a stretch-out and deferral of new weapons systems—are shaky. Vietnam drags on while Schultze has since emphasized that his projections for military spending were on the conservative side. If the Nixon Administration proceeds with the Safeguard ABM system ($11 billion and up), the AMSA manned bomber ($12 billion up), a volunteer army ($4 to $17 billion), and if testing and deployment of MIRVs sparks a new arms race, the prospect for a fiscal dividend disappears again. The peace dividend need not be, in Patrick Moynihan's language, as "evanescent" as the morning haze over Southern California, provided Congress can keep a lid on military spending. In that case, funds will be available for home consumption.

Certainly there is no reason to worry about "fiscal drag." Shortly before leaving office, President Johnson received a special cabinet report on post-Vietnam investment possibilities. Full funding of existing domestic programs would cost $6 billion more a year than we're spending. Expansion of existing programs and new programs would run another $40 billion, while "more ambitious, new proposals" (such as negative income tax and guaranteed jobs) push spending even higher.

Studies of the past eight months suggest that these projections may be on the low side. The Budget Bureau recently estimated that an adequate diet for the poor would require an additional $2.9 billion a year. Senator Charles Goodell and others have proposed that the federal government assume the entire cost of welfare, adding $10 to $15 billion to federal spending. The 1970 budget for compensatory education was almost $2 billion below authorized levels and $3 and $4 billion less than recomemnded by private studies. Mr. Nixon's "commitment to the first five years of life" requires more generous funding for hunger, welfare and education than he has recommended thus far.

Rep. Edward Koch (D, N.Y.) has attracted over a hundred co-sponsors for his mass transit bill, calling a $10 billion expenditure over the next four years. That's minimum. Federal contributions to the expanded rapid transit system in Washington, D.C. alone will run about $1.3 billion; costs of the high-speed trains between Boston and Washington are far higher. Mass transit in New York City and Chicago over the next decade may cost in excess of $4 billion. At the present rate of production Secretary Romney predicts that over the next decade we will fall more than 10 million units short of our 1968 commitment for 26 million housing units. Municipal hospitals are threatening to close because of too lean budgets and the backlog of present needs in hospital modernization stands at more than $10.7 billion. Mr. Nixon acknowledged July 10 that unless federal action is taken within the next two to three years, "we will have a breakdown in our medical care system which could have consequences affecting millions of people throughout this country."

Estimates of what it will take to cleanse the nation's waters over the next five years go as high as $29 billion. The cost of containing air pollution is put at another $16 billion. A recent federal study on thermal pollution estimates at $1.8 billion the effort needed in this area over the next five years.

Instead of dabbling with revenue sharing, Congress should assist state and local governments in a more forthright manner: assume the entire cost of welfare, increase aid to education, and bring grant in aid programs up to authorized levels. This would take the strain off state and city budgets, releasing more funds for problems of a local nature. It is time to commit the funds needed for our undernourished public sector and ignore the siren call of revenue sharing.

WORKING MODELS FOR URBAN REDEVELOPMENT

HON. ABNER J. MIKVA

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 15, 1969

Mr. MIKVA. Mr. Speaker, the problem of revitalizing our decaying urban centers troubles all of us. Daily, we struggle to find effective ways to halt urban blight and initiate urban progress. The problem is so complex that many people have despaired of finding any workable solutions.

In light of these complex problems, I believe that my colleagues would be interested in the remarks of Mr. Ronald Grzywinski, vice chairman of the board of the Hyde Park Bank & Trust Co. Mr. Grzywinski recently addressed the Urban Coalition in Chicago on how to redevelop our cities. His address reveals a depth of understanding about this most perplexing problem.

Mr. Grzywinski explains how the bank which he represents has enabled minority businessman to found and to develop business enterprises. Though it is a relatively small institution, Hyde Park Bank & Trust has been a leader in backing up its rhetoric with action. Based on his work with the bank and other urban activities, Mr. Grzywinski sets forth some viable models for combining capital, talent, and community in the crucial effort of redeveloping urban America.

Mr. Grzywinski's timely remarks follow:

I have been asked to speak on the activities of the Urban Development Division at the Hyde Park Bank. I will do so briefly, and then turn to the broader and deeper problems of total urban economic development with which I am concerned at the Adlai Stevenson Institute.

The Hyde Park Bank is a small to medium size institution. At year-end it had total assets of $60.8 million and employed approximately 125 persons. By comparison, the Chase Manhattan Bank, second largest in the nation, had total year-end resources of $19.3 billion; approximately 315 times as large. The bank is located in the Hyde Park-Kenwood Community, approximately six miles south of downtown Chicago and the home of the University of Chicago. The community of 50,000 population is liberally oriented, racially integrated, affluent, but economically segregated. Majority ownership of the bank is through a holding company whose stock is concentrated in the hands of community residents and bank management. Illinois law prohibits branch banking.

The Urban Development Division was established in the spring of 1968, with an operating budget of $20,000 to carry it through year-end. Its primary purpose was to extend credit to black entrepreneurs for business establishment or expansion. At the time no Chicago area bank was internally organized specifically to finance and counsel minority businessmen. The Urban Development Division initially was staffed by two non-bankers hired from outside the bank. Milton Davis, formerly employed by the University of Chicago, and for three years president of the Chicago Chapter of CORE, was named director. He is now a vice president of the bank.

Our objectives in establishing the division were three:

First, to make credit available at competitive interest rates through conventional banking channels to credit-worthy black businessmen.

Second, to demonstrate to the banking community that, with appropriate diligence, counseling, and selectivity, loans to black businessmen are not categorically an unmanageable or extraordinary risk.

Third, to finance our urban development activities without sacrificing bank earnings.

To accomplish this third objective the Urban Development Division solicits deposits from major corporations, churches, government units, and philanthropic organizations which would not normally do business at a small, outlying bank. We pay the same rate of interest on their time deposits and provide the same level of service for their demand account as any other bank, but apply a major portion of our earnings on their deposit against the extraordinary expenses incurred in counseling, processing, and servicing a portfolio of loans to inexperienced, small businessmen.

To date, the Urban Development Division has made loans in excess of $1.4 million to approximately 55 businesses. At month end 2 loans were delinquent with no loss anticipated; one loan of $1,500 has been charged off, but recovery has begun and should be completed within four months. The division is supported by deposits totaling $4.6 million (8.5% of the bank total), from 54 different entities. Nineteen of the corporations are listed on the New York Stock Exchange. The full time staff has grown to five, including a fellow assigned by the Robert Kennedy Memorial. The earnings allocation on supporting deposits not only recovered the bank's initial $20,000 investment, but has completely offset the division's increased operating expenses. Activities have broadened to include the financing of community owned, profit oriented businesses and low income housing projects. The community objective is to use the profits from these businesses to finance such community projects as day care and medical care centers, manpower training facilities, supplemental police protection, sidewalk lighting, and other community needs.

Our experience has taught us several lessons:

First: The availability and use of competent counseling is as important as credit in the success of an inexperienced entrepreneur.

Second: The bank staff must have deep rapport with its clientele; a genuine feeling and understanding for the problem of black deprivation; a commitment to work together; a willingness to spend the required time looking at each credit application as it is presented, knowing in advance that many will not be bankable, but that many must be reviewed to find the viable few. Having found a promising proposition, it must be worked through to completion by exploring all the alternative financing methods. This attitude reflects a philosophical commitment to the concept of change, within and through the existing system.

Third: Fundamental credit principles must be adhered to, but with an understanding of the distinction between principle and practice. As an example, the borrower must not be allowed to become sloppy or careless in meeting loan repayment due dates, but if his business is experiencing sound and accelerated growth, or if his credit needs were legitimately underestimated, we must find ways to increase his credit supply. Also, if the credit report reveals a past history of judgments on an otherwise qualified prospective borrower, the application is not automatically denied. These judgments are investigated with the understanding that unscrupulous and exploitive merchants have often used the judgment device to force uninformed people to continue patronizing their outlets for shoddy, overpriced merchandise. We also believe that the equity to start a business sometimes may not be financially measurable; instead it might include the borrower's work experience and other personal achievements.

Fourth: Senior management must be totally committed to success. Because urban development programs are innovative, experience is lacking and failures are magnified.

Fifth: When cooperation with government agencies is required, the business leader must understand the constraints and tradition under which a public servant labors. Innovative and creative interpretations of federal regulations have not been the historical route to rich rewards. Under Bob Dwyer, and earlier, Tom Gause, the Chicago office of the Small Business Administration has moved from timid, sincere reservation to quick, cooperative responsiveness.

Sixth: Because it has senior management commitment, independent funding through supporting deposits, and the ability to clearly measure successes and failures, the staff of the Urban Development Division feels in has a mandate to plow ahead, to innovate, and to thoughtfully explore the ways in which the bank's resources can be brought to bear on the problem of inner city development.

I will turn now to some general ideas about urban economic development. The majority of this audience already knows that economic injustice and suffering are the rule rather than the exception for millions of black Americans who are unable or unwilling to move out of the nation's ghettos. It is not necessary to recount here how much deprivation manifests itself in housing, in employment, in education, in personal welfare, and safety. It is well known, at least in scope, if not in depth and intensity, to even the most casual reader of the popular press.

During the past several years, the federal government has spent vast sums attempting to remedy one or another facet of the problem, but without the urgent priority of national commitment. Foundations, commissions, some universities and other organizations have prepared volumes of detailed and heavily foot-noted analyses of the problem; some few have recommended specific action and some fewer yet have themselves acted. More recently business has begun to involve itself. However, it is my observation that all these activities, all these programs taken separately, have produced little or no visible effect. They have been a tonic, a band aid on a cancer, an attempt to treat each speckled, smallpoxed, symptom rather than the body ravaged with disease.

Urban redevelopment is a complex task requiring sophisticated planning, specialization, financing, and organization. It requires a system approach to problem solving. It requires the building of new teams of planners, financiers, executive implementors, political relations experts, and entrepreneurs. It requires the belief that there is no one best way to solve a problem, but rather many good ways. It requires bold new ideas, bold action, and bold men.

Urban redevelopment requires three basic elements: capital to seed the regenerative process; talent to intelligently do the seeding; and community control to point out the fertile ground, protect the seedlings, and harvest the fruits to be shared.

If we look around the nation today we can find many successful urban development programs. In Boston, Eastern Gas and Fuel Associates took the leading private role in a massive housing rehabilitation program. Using incentives currently available in FHA housing legislation, the company was able to combine low equity investment, depreciation, and the market potential of new gas customers to earn a profit which was large enough to assign key executives to the task. In Chicago, the Kate Maremont Foundation in partnership with the Woodlawn Organization just held its grand opening for a new low-rise, 500 unit housing project. Their community owned shopping center is under construction and, along with several community owned businesses, will contain a food supermarket owned jointly with a major food retailer.

In several cities, such major corporations as Xerox, IBM, Kodak, Aerojet General and others have assisted in establishing new ghetto based manufacturing facilities. The Rev. Leon Sullivan, starting in Philadelphia, has now established over ninety Opportunities Industrialization Centers which draw on existing Dept. of Labor grants, channeled through business corporations, to train people, helping them "to grow self confident through mastering new work skills." In California, Arcata Investment Company has started a minority group Small Business Investment Company to generate equity investments and credit in the urban ghettos. On November 6th, eighteen sponsors, including such giants as Prudential Insurance and Phillips Petroleum announced their intentions to operate similar SBICs. Commercial banks around the country are now beginning to extend urban development credit.

The purpose of the preceding recitation has been only to show that scattered models are not lacking for successful and often profitable urban development in such key areas as housing, education, job creation, equity investment, and wealth building. But as I stated earlier, all these activities are disjointed. They usually attack only a single facet, of a great need, within a single ghetto community. Truly, band aids on a cancer! The need today is to draw on the experience of these models and combine these separate and diverse efforts into a concerted, systems-oriented attack on the problem.

How do we proceed? I suggest the following:

First: The neighborhood or community is the most logical unit for development. It is manageable; the people are usually organized into a community association possess-

ing common complaints and goals for health, education, welfare, and safety. A community base of development is consistent with the current notion that place should serve residents' needs and not those of outside interests. This concept is a response to the lack of participation, the frustrated sense of powerlessness among minorities. Deteriorated housing exists within specific communities; medical, recreational, and day care needs exist within specific communities; the unemployed and underemployed are real people, not just statistics, and they live in specific communities. Urban communities have an identity, a sense of being. They are no different from the thousands of self-governing, often smaller, suburban communities we all know, except that the citizens are usually black and usually poor.

Second: The federal government has neither the talent nor the experience to effectively manage and implement an innovative, major systems project. During the past two decades, such programs for research, development, and construction have been contracted out to private industry and institutions which have developed internal systems capabilities. The ghetto economy has an inordinate need for credit, capital infusion, and wealth creation. As Ted Cross has pointed out: "The great talent of the government to achieve political and social change—and indeed its vast economic power as the largest bank in the world, must not be confused with its meager ability for the job of building production and marketing skills—and blending these skills with credit and risk capital for the creation of wealth." Moreover, when government is not leading, is not remedying a clearly understood and acknowledged social problem of staggering proportions, those of us who are deeply concerned, who are morally committed to the righteousness of social economic justice, and who perceive the ultimate wrath of failure, must not throw up our hands and say there is nothing we can do until the government enacts a viable program. The stakes are too high.

Third: More than any other institution, big business, mature industry as Galbraith says, not only possesses the resources and ability to do the job, but should also have the highest motivation. Financial bigness is one measure of potential capability. As an example of how big business is financially qualified to muster the necessary talents and resources, it is worth noting that several of the nation's largest corporations each have annual gross revenues which far exceed those of any single state. The revenue of General Motors is approximately eight times that of New York State and slightly less than 1/5 of the federal government. On the other hand, it is also worth noting that, while all business involvement in ghetto development has been infinitesimal in relation to need, Cross pointed out that the most creative urban projects have originated with entrepreneurial organizations, often dominated by a creative businessman skilled in taking risks and in entering seemingly unpredictable market situations. These are companies that are highly innovative and successful, constantly seeking new opportunities.

Business should be fully involved in developing the ghetto, not only because it represents earnings and manpower creation opportunities, but because the public expects business to become involved. There is a growing public reaction against big business based on the feeling that business is exploitive and not developmental, that it is eminently powerful but undemocratic. If big business does not respond to the desires and aspirations of the public which provides its revenues, if it fails to employ its vast resources in leading the way to social economic justice, it first will be cut off from a supply of talent, the non-self-generating factor of production, and ultimately will be subject to growing pressure for increased legislative control. If business and other institutions do not become more responsive and attuned to the just demands of society, we soon will see the formation of new, white-collar unions. These unions will not seek increased personal remuneration; instead, they will try to apply internal corporate and institutional pressure to achieve broad-based social objectives. They will demand personal sabbaticals at full pay, in order to apply the talents of industrial experience to solving the problems of poverty. They will systematically withhold educated talent from socially unresponsive institutions. And they will publicize data ranking the developmental attitudes of industrial and educational institutions competing for the same talent.

However, if farsighted business management does intend to involve itself, if the visionaries intend to commit their institutions, they must learn that business must first *earn the right* to participate in this great challenge of the 20th century. The record for selfless business development has been so dismal that big business is not trusted by the young people or by the urban community leaders; it is thought to be hypocritical, insincere, and inconsiderate of the public interest.

What can the Urban Coalition do? To answer that, let us look at the strengths and assets of the Coalition:

First: The Urban Coalition is founded on the principle of coalition. It is held in high but perhaps fading esteem by both established institutions and the leaders of the poor. As Mr. Gardner remarked at a White House dinner this past June, "The Coalition is a unique organization, bringing together diverse elements of American life."

Second: Because of its stature, the Urban Coalition should be capable of raising far more money to rebuild America than its present annual budget of $4.4 million. However, to do so, the Coalition will need a concrete plan with specifically identified goals and objectives.

Third: Because of studies such as that presented here today by Bill Kaye, and because of its field experience in various cities, the Coalition should be a comprehensive repository of acquired skills and knowledge on urban problems around the county.

In view of these assets, I suggest that the Urban Coalition redirect its major thrust along the following lines:

1. That it select six to twelve urban ghetto communities from around the country which are reasonably well organized, possess a clear understanding of their community needs, and are willing to participate in a massive community development project.

2. That the Coalition then invite several major business and educational institutions to submit bid proposals for each of the target communities. The proposals would recognize the right of community control, and would spell out in specific detail the goals, plan of action, scope of work, method of organization, financing, talent resources, and ownership sharing concepts which the institution would use in a systematic redevelopment of the community, recognizing not only the corporate need for profit, but the community's need to possess a self-generating source of profits and talent to finance and operate a variety of necessary or supplementary local social services, such as medical and day care, recreation, education, etc.

3. The Coalition would then award a development contract of sufficient size to allow that institution with the best proposal in each community to assemble staff and begin operation. In effect, the Coalition award would provide all or a portion of the risk capital required to begin the regenerative process. Thereafter, with private financing and government grants for existing programs, this type of comprehensive, systems oriented rebuilding process should be self generating. Ideally, the Coalition's initial investment would be returned over the long term from housing and business profits.

Obviously there is no guarantee that this approach will work, but there is evidence to show that it works in other applications. We cannot wait; the time for waiting has passed. We cannot go slow; we have been doing that for too long. Whole generations of Americans have been born poor and have died poor as the United States moved slowly. The Urban Coalition still has the opportunity to mold the common faith that our urban problems can be solved, but it must move. The proposal just presented allows for innovative approaches to urban problem solving. It would release the creative talents of American industry and education on our most wretched national problem.

This past spring my wife and I visited the beautiful and ancient city of Bath in southwestern England. As we were touring The Royal Cresent, a residential area of great beauty and architectural unity, we came upon this graffiti which I think is worthy of our continuing reflection: "The city is dying—look to your heads."

BUFFALO LABOR MOVEMENT'S ROLE IN CULTURAL ACTIVITIES

HON. THADDEUS J. DULSKI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. DULSKI. Mr. Speaker, my home city of Buffalo, N.Y., is one of four cities where the AFL–CIO is sponsoring demonstration arts projects aimed at seeking increased participation and involvement in the arts by labor union members and their families.

Buffalo was selected as a test city in cooperation with the National Endowment for the Arts. A labor-arts organizational structure has been created and significant experimental projects are underway to pursue this basic objective. The salary of the Buffalo coordinator has been provided by the New York State Council of the Arts.

One of the early encouraging signs in Buffalo was the role of the Buffalo AFL–CIO Council in helping to save the Buffalo Philharmonic Orchestra. Faced with overwhelming obligations, there was a proposal—later aborted—to merge the Buffalo orchestra with the Rochester Philharmonic Orchestra.

The council added its full backing to public support for the orchestra and later set up a fund to help solve the orchestra's fiscal plight.

Just a few days ago, for the first time in the orchestra's history, a labor official was named to the orchestra's board of directors. He is George L. Wessel, president of the Buffalo AFL–CIO Council.

Commenting upon the labor-arts project and its relationship to the orchestra, Mr. Wessel said:

The labor movement today has more leisure time. The idea of the project is to acquaint our membership with cultural organizations like the Buffalo Philharmonic.

Although the pilot project has yet to do anything specific with the orchestra, there is a special "Salute to Labor" pops concert planned in January or February. The concert will be free for the union membership, and is intended to stimulate interest in live orchestral music.

POTENTIAL AUDIENCE

It is up to us—the Buffalo Council of the AFL–CIO—to educate our own people,"

Wessel said. "I think there is a potential audience in the labor force, but we have to acquaint them with the orchestra. We have to get them out of their homes and away from their TV sets.

In further elaboration of what is being done in Buffalo in connection with the Labor-Arts project, I include with my remarks two stories from local newspapers:

[From the Buffalo (N.Y.) Courier-Express, Nov. 3, 1968]

PROJECT TO ENRICH UNIONISTS IS TESTED

(By Joseph P. Ritz)

Don't be too surprised if your barber starts talking about the impressionist versus the realistic school of painting the next time you get a haircut. It's all part of an effort by the AFL–CIO to upgrade the cultural lives of its members.

Buffalo is one of the four test cities chosen a year ago for a two-year Demonstration Arts Project to determine whether the unions can succeed in enriching the lives of its members.

If it succeeds, presumably, programs similar to the ones in the demonstration cities will be tried nationally.

Although it was announced last year, the program was not kicked off locally until last June and a paid union official to head the program was not picked until September.

HEAD START IN BUFFALO

Harlowe Dean, national co-ordinating consultant for the program, told The Courier-Express last week, "The program is further along in Buffalo than in the other cities," principally, he explained, because it is the first city to hire a full-time coordinator. (The other cities involved in the demonstration are New York City, Minneapolis and Louisville.)

The co-ordinator, Robert J. Jarnot a high school teacher of business law until this fall, "is doing a darn good job," according to Dean.

The main thrust of the local program is to interest union members in attending the community's chief cultural offerings: such as plays at the Studio Arena Theater, concerts at Kleinhans Music Hall, performances at The Ballet Center of Buffalo.

Actually, chances are that your barber may not get down to talking about the nitty-gritty of the art world, but Jarnot has sent flyers to all union barbers in the area asking them to talk up a series of art lectures at the Albright-Knox Gallery being held this month and next, intended to introduce the public to the fundamentals of art.

PROFESSIONAL GROUPS LATER

Later, Jarnot hopes to have professional theatrical groups act in union halls and bring the Erie County and Buffalo Public Library's bookmobiles to labor meetings.

One of the things that the AFL–CIO hopes to achieve by its program is the creation of artistic works for the working man.

This brings up the question of whether a playwright or composer can write for the blue collar worker without lowering his artistic standards. That fact is, as anyone familiar with the arts is aware, great works of music and drama which have survived the test of time from Oedipus Rex to Hamlet were written for the common man of their era.

One suggestion as to why the AFL–CIO is spending so much effort and money to bring culture into the life of its members is that having gotten so much leisure time for its members in the form of shorter work weeks, holidays and vacations, it feels responsible for how they use it.

IMPROVING OPPORTUNITIES

In its official explanation of why it was creating the project, the AFL–CIO itself declared it was "concerned not only with bettering the working conditions of employes, but with improving their opportunities to share in the benefits which their labor produces."

This interest in cultural affairs by labor is no doubt beneficial both to the community and to the union members. But it also reflects a loss of spirit and spontaneity and unity of purpose which labor had in its adverse early days.

For music and art and drama and dance should make a statement. There was a time when the labor had something to say and it said it and in consequence added to American culture.

Those were the days when Joe Hill, Pete Seeger and Woody Guthrie were writing and singing songs which echoed in union halls across America. When "This Land Is Your Land" and "Solidarity Forever" meant as much to the union movement as "We Shall Overcome" and "If I Had a Hammer" does to the civil rights movement.

It's been a long time since songs were sung in union halls or in picket lines. But when they were, they contributed something to the cultural life of the nation.

[From the Buffalo (N.Y.) Evening News, June 14, 1969]

LABOR COMMENT—WILL PHILHARMONIC BE LABOR'S NEW LOVE LOST?

(By Ed Kelly)

For the area, AFL–CIO, which only recently began wading into the Niagara Frontier's pool of culture, it's now sink or swim.

To change the metaphor George Wessel, president of the central labor organization, put it this way the other day: "Only last September, organized labor in this community committed itself to the arts. Now the bomb's dropped."

The "bomb"—of major concern to all segments of the community, not just to labor—is the threat to the continued existence of the Buffalo Philharmonic Orchestra. The orchestra surely is one of the frontier's principal cultural assets, and certainly one which must be protected stoutly by labor if the latter's commitment to the arts counts for anything.

The commitment is real. Ten months ago the national AFL–CIO selected Buffalo as one of the four pilot cities (New York, Minneapolis and Louisville are the others) for establishment of a Demonstration Arts Project.

TWO-YEAR TEST

The DAP program is a two-year test aimed at interesting today's worker in activities which can give him a better understanding of the world in which he lives, and at assisting the cultural efforts of a community by broadening their bases of support.

The Buffalo project, directed by the Buffalo AFL–CIO Council, is co-ordinated by Bob Jarnot, a Teachers' Union member on leave from South Park High.

Under Jarnot, Wessel and others, links have been established between unions and such cultural resources as the Philharmonic Orchestra, the Studio Arena Theater, the Ballet Center of Buffalo, Melody Fair, the Albright-Knox Art Gallery and the Buffalo & Erie County Public Library.

Thosuands of brochures promoting the orchestra and the Studio Arena have been circulated among unionists. Placards promoting future performances have been posted in plant locker rooms, union halls, and on shop bulletin boards.

FIRST CONCERTS CONVINCE

Many a union member has attended a play or concert for the first time in his life. And liked it so much, he's returned. Again and again.

The orchestra held an "open" rehearsal for workers and their families. And is planning another. All around the area, union workers' children are hearing special orchestra performances. And loving them. And telling their parents about them.

Now, as Wessel puts it, has come the "bomb"—the disclosure that, because of financial difficulty, merger of the Buffalo and Rochester Philharmonic Orchestras is under study.

For labor, and the community, this is the crunch.

Foremost among the protesters are the Buffalo orchestra's own musicians. A Players Committee to save the orchestra has sprang up, led by 35-year-old Rodney Pierce. As he carries his Save-the-Philharmonic message about town, he's become as talented a persuader as he is an oboeist.

CONCERN FOR PHILHARMONIC

The Buffalo AFL–CIO Council has two reasons—both formidable—for doing all in its power to help save the orchestra.

The first is its commitment to the arts through the Demonstration Arts Project, which has focused a national eye on labor here. The second (perhaps even more compelling to some unionists than the first), is the traditional obligation most unionists feel to come to the aid of fellow unionists who are in a bind.

The musicians who make up the Buffalo Philharmonic Orchestra are 100 per cent union. They belong to the American Federation of Musicians (AFL–CIO), most of them through membership in the AFM's Buffalo Musicians Association, Local 92. The local is an affiliate of the Buffalo AFL–CIO Council.

With the future of the orchestra threatened, so is the future, and therefore livelihood, of the 87 union musicians who comprise it. This is a predicament which unionists everywhere can understand, sympathize with and want to do something about.

LABOR'S FIGHT, OPPORTUNITY

Rodney Pierce puts the crisis bluntly: "This is labor's fight," he tells union audiences, "and labor's opportunity.

"We aren't asking you to help just because we're members of a union, but also because you're members of this community, and the Philharmonic makes up a huge segment of our civic pride and civic identity."

The crisis already has established deep rapport—for the first time here—between the union musician and the rest of the labor movement. Each realizes the other belongs to it. Rodney Pierce's invitations to address union meetings are pyramiding.

The Buffalo AFL–CIO Council, embarking on a Save the Symphony (SOS) drive, hopes to move individual union members and individual unions to give emergency—and later regular—financial assistance to the orchestra. And, above all, to press the managements, with whom they bargain collectively, to do likewise, and in generous measure.

"We bargain with these companies," says Wessel. "We know the avenues of approach to them. It's up to us to impress on them that they as employers, just as we as employes, have an obligation to aid and enrich the community in which all of us work and live."

Ironically, one eventual aim of the AFL–CIO's Demonstration Arts Project is to enable a unionist to enjoy his leisure more fully. Right now, girding to help save the Philharmonic, leisure is something Wessel, Jarnot, Pierce et al. will find in short supply.

DESCRIPTION OF PROPOSED IMPORT-CEILING LEGISLATION

HON. PHILIP J. PHILBIN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. PHILBIN. Mr. Speaker, almost every day industries are closing in this country due to cutthroat competition from abroad. This makes proposed trade regulations of critical importance.

The proposed trade legislation is designed to provide domestic industry, agriculture, and labor with a remedy against the adverse effects of an undue rise in imports on industrial growth, employment, and profits. It is, in effect, an escape clause, revised to assure the actual availability of a remedy to industries that have suffered or stand to suffer serious injury from rising imports.

The legislation is therefore not open to any industry unless imports have made a serious market penetration.

The bill lays down two sets of criteria for determination of the question of serious injury or a threat thereof. One is for use when sufficient statistical evidence is available for the Tariff Commission to determine what share of the market—that is, of domestic consumption—is supplied by imports. The other is to be followed when the statistical evidence is not good enough to permit the calculation of the share of the domestic market being supplied by imports.

In the first of these two instances, which is to say, where the share of the market supplied by imports can be determined, a 10-percent penetration of the market will be interpreted as representing serious injury if absolute imports have doubled since 1960. A threat of serious injury, on the other hand, will be assumed if not less than a 7½-percent penetration has been made by imports.

The year from which to measure the trend of imports in terms of the share of the market—penetration—supplied by them is 1960, or the 10 most recent years, whichever is less.

In either approach, any industry, labor union, or trade association alleging serious injury would file a petition before the Tariff Commission, even as in the past under the escape clause or for adjustment assistance. The Tariff Commission would make a preliminary survey to determine whether available statistics make it possible to determine the share of domestic consumption supplied by imports—market penetration. Should this result affirmatively the Commission would proceed to determine the share of domestic consumption supplied by imports since 1960, as just stated.

If the available statistics were inadequate to make possible such a finding, the Commission would nevertheless proceed to make a finding with respect to injury, but under different guidelines. The bill under these circumstances calls for an examination of the probable adverse effects of rising imports on growth of the industry, expansion of the industry, level of profits, and the trend of employment.

Upon a finding of serious injury or a threat thereof the Commission would in this type of proceeding recommend an increase in duty to the President or an import limitation, that in its judgment would prevent or remedy the injury. The duty could not be placed at a level higher than 25 percent of the 1930 rate; and no quantitative limitation—import quota—could reduce imports below the average of the 2 most recent years.

If the President were opposed to putting the Commission's recommendation into effect he would send his reasons to Congress, and if either House by a majority vote of those present and voting sustained him within 90 days, the Commission's recommendation would be set aside. Otherwise it would be put into effect.

IMPORT CEILINGS AND QUANTITATIVE LIMITATIONS

The most distinctive part of the legislation lies in those cases in which the share of the market supplied by imports can be determined. In those cases the Tariff Commission would determine the level of imports that could be admitted into the country without going so far as to impose administrative limitations on them, and this level would be the ceiling. Only if imports subsequently should break through such ceiling in their upward surge would an administrative limitation be imposed. This need not happen if the exporting countries took care to avoid it.

It is thought that in most instances in which injury from imports occurs or threatens, statistical evidence of the share of domestic consumption supplied by the imports is adequate. The Commission could then proceed on the basis of recommending ceilings to the President instead of recommending a tariff increase, if the facts developed in hearings and investigation demonstrated deep enough a market penetration by imports to justify an affirmative finding for a ceiling under the criteria laid down in the law.

The President would proclaim such ceilings upon a finding by the Tariff Commission of the share of domestic consumption supplied by imports of the product or article in question if this share were above the 10-percent penetration level, thus meeting the criteria of a serious injury—7½ percent in the case of a threat of serious injury.

The Commission would thereafter keep the President informed of the trend of imports in terms of the share of domestic consumption supplied by them, in all instances in which a ceiling had been proclaimed. Should imports fail to rise above the ceiling level no actual administrative quantitative limitation would be established. Only if imports should rise above the ceiling for a period of 6 consecutive months—that is, above 50 percent of the ceiling for a whole year—would the President impose the limitation.

By controlling their exports to this country, the foreign countries could avoid triggering the imposition of an administrative quantitative limitation—import quota. If after such a limitation were imposed imports for a whole calendar year should fall below the ceiling, the President would rescind the administrative quantitative limitation—import quota.

The ceiling for each article for which one had been established would be revised each year to adjust the quantity to any increase or decrease in domestic consumption, thus permitting imports to grow in proportion to the dometsic consumption of the article. This proportion might be 10 percent, 12 percent, 20 percent, or whatever had been found by the Tariff Commission to be the ceiling as prescribed in the law for the particular level in each case according to the extent of market penetration.

No quantitative limitation would remain in effect over 5 years if it were imposed upon a finding of serious injury, and not over 3 years if it were imposed upon a finding of a threat of serious injury. After a year subsequent to the ending of the quantitative limitation, the industry in question could petition the Tariff Commission for a new ceiling.

NEW CONCEPT

The concept of a ceiling on the share of the market that would be available to imports is relatively new. The further provision that imports would be allowed to expand as domestic consumption might expand introduces a flexibility into quantitative limitations on imports that is very rare and would go far to remove the usual objection to import quotas on the ground that they would place trade in a straitjacket. Indeed a further element of flexibility is introduced by allowing an interval of a year or more for reestablishment of a new ceiling, after 3 or 5 years.

The principal virtues of the proposal lie in the limited nature of the cutback in the level of imports if any; the avoidance of an actual administrative limitation on imports if the exporting countries do not trigger one; the exclusion of industries that have not experienced injury from increased imports arising subsequent to a tariff reduction or reductions under one or more trade agreements, and the flexibility already mentioned.

As an effective remedy for injury from trade agreements concessions with a minimum of objectionable features the proposed approach would be unique.

One thing is certain: If some action is not taken before long, increasing imports will work such serious damage to the American economy, already plagued by high interest rates, high pressures, high prices sparking high wage demands, and serious inflationary pressures, that the country could well face a real crisis, deflated, depressed conditions in industry and severe employment, and the loss of prosperity conditions in the country. Let us be mindful of that danger.

This kind of development could gravely affect the working people of our country, our industrial structure, our national revenues, or tax and fiscal position, and create for us grave, additional problems which, added to the ones we already have, could very adversely affect the standards of living, and the future well-being of every person in the country.

The pending remedial bills are moderate, reasonable, and provide administrative measures and safeguards that we could effectively use to protect our economy against injurious, foreign competition.

Certainly something must be done as speedily as possible to provide realistic, workable controls over imports that are threatening much of our economic structure.

POW'S AT CHRISTMASTIME—WHAT ARE WE DOING FOR THEM?

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 16, 1969

Mr. RARICK. Mr. Speaker, 25 years ago this morning I was taken prisoner by the German Army in the initial assault of what history records as the Battle of the Bulge. This military operation, which cost 80,000 U.S. casualties was a complete surprise attack only because of Soviet betrayal of Allied forces in the West—see my remarks of September 29, 1969, at page 27565 of the daily CONGRESSIONAL RECORD.

How well I remember those bleak and lonely days—some without food, and seldom with adequate shelter.

I remember Christmas of 1944 all too well—locked with other American soldiers in a cattle car being transported farther behind the German lines. The train itself was constantly subject to air attack by our own planes, and properly so.

That Christmas there was neither food nor water. The cold was so bitter that survival itself depended upon constant movement and inner strength.

Then, just a month later, I recall vividly my 21st birthday—in a prison compound, with its armed guards, its barbed wire, the dogs, and still the bitter cold. But by that time we had been contacted by the International Red Cross, our names had been recorded, and our next of kin had been notified of our whereabouts and welfare.

There are other Americans who will spend this Christmas of 1969 as prisoners—prisoners of war in a country which is so barbaric and uncivilized that it lacks the human decency to abide by the Geneva protocol to which it subscribed, and to allow the families of these men to know that they are alive, let alone the nature of their health.

As a former prisoner of war in Europe, I know all too well the desolate feeling of loneliness in imprisonment. However, those of us held prisoner in Europe never experienced total despair. We were confident that our countrymen at home supported us 100 percent; that we were not forgotten and that the leaders of our Government would never rest until we were freed and restored to our homeland. We knew that never in the history of the United States had Americans ever been deserted by their country.

We could hear the sounds of military action from our troops, the distant rumblings of artillery, the frequent bombing of the enemy in his base of operations, and we knew America had the will and the positive leadership to win. But most of all our morale was bolstered with the confidence that we would never be abandoned or deserted by our country. As prisoners of war in Europe, we were always heartened and reassured by the knowledge that freedom was only a matter of time.

Life in a prison camp in Germany was not pleasant—no man takes pleasure at the loss of his freedom—but as prisoners of war held by a civilized Christian nation we were at least treated within the minimum standards—with isolated exceptions—prescribed by the Geneva Convention. Further, we were captives of a nation which had not made it their national policy to mistreat prisoners of war.

How much more dismal and grim the condition of our men held captive in North Vietnam, Korea, and China. They can detect no evidence of attack on their captors. They hear no falling bombs, no advancing artillery, no evidence of impending rescue. Their only contact with the outside world is through enemy propaganda. And in that propaganda they hear and see films of leaders of their own country, supporting the position of the enemy and referring to their activities as war crimes.

They are used as trading material by the enemy's "dear American friends" in this country. Now that old-line Communist apologist Cyrus Eaton has returned from Hanoi loud in his praise of the reasonable and peaceful attitude of the Hanoi government, and its real friendship toward the American people, it certainly can be expected that the Reds will use their trading position to permit their friends here in the United States to release another few names—probably of air and naval officers—who are being held in North Vietnam.

Unless we end the hostilities in Vietnam in such a manner that we can physically recover all of our men—and this means victory—we can expect that little pieces of news of their identity and welfare will leak out from time to time for years, when it serves the Communist purpose.

This week, I received a Christmas greeting from a former enemy—a German officer—who writes that he is spending his 25th Christmas as a captive in a prisoner of war camp in Europe. All but forgotten by the world, and sustained only by the hope that his former enemies may one day show him mercy and restore him to freedom, he is totally at the mercy of the victors.

His nation was vanquished in World War II, and his extended imprisonment brings home all too well what fate is in store for a nation's fighting men held captive when it fails to win their restoration. They remain forever at the mercy of the enemy.

It is because of this tragic lesson from past wars, and my own personal travail as a prisoner of war, that I have raised my voice again and again on behalf of the Americans now held in Vietnam by the ruthless Communists.

If we withdraw or surrender in Vietnam, neither these imprisoned fighting men nor their loved ones will have any hope. They are entitled to the same measure of devotion from their government and countrymen which they demonstrated in loyaly performing their duties in combat.

I include a copy of the Christmas greeting referred to and several pertinent newsclippings relating to the Battle of the Bulge and the Soviet betrayal, as well as the current dilemma of our prisoners in Vietnam, in my remarks:

GAETA, ITALY,
December 9, 1969.

Mr. JOHN R. RARICK,
House of Representatives,
Washington, D.C.

DEAR MR. RARICK: As the Christmas-season approaches, I make use of that occasion to wish you a merry Christmas and a happy new Year!

In the last time happened something what is of some importance in connection with my case. On November 12 my Austrian lawyer had a conference with the State Secretary of the Austrian Federal Chancellor (Prime-Minister) at Vienna. Result: the official intervention by the Austrian government to the Italian government in favour of my release will be made still before X-mas in relation to my 25th Christmas as prisoner of war.—The moment for such an official intervention is favourable at present, because the Austro-Italian friction over South-Tyrol borderland has been overcome: firstly through the exception of the "packet" (proposals by the Italian government to the South-Tyrol people) by the South-Tyrolian-peoples-party; and secondly by means of the recent meeting of the Austrian and Italian Foreign Ministers at Kopenhagen (other meetings will follow), so that now has taken place a "détente" between Rome and Vienna.

I am further on hopeful that all the efforts of my Protection Power and of my lawyers will be successful one day. Therefore, I shall pass in high spirits another Christmas as prisoner of war in Italy.

With cordial regards,

Sincerely yours,

MAJ. WALTER REDER.

[From the Christian Science Monitor, Dec. 16, 1969]

GERMAN SAYS STALIN WITHHELD BATTLE OF BULGE SECRET DATA

NEW YORK.—A retired German officer says former Soviet Premier Stalin withheld secret information from the United States and Great Britain about Hitler's plan for Battle of the Bulge counterattack, Time magazine reports in its current edition.

The result, Time says, was to prevent the Western allies from reaching Berlin before the Russians.

Quoting Hasso von Manteuffel, leader of the 5th Panzer Division, one of the spearheads in the battle, Time said:

Had Hitler been persuaded to call off his attack, Europe might have followed a different course. According to General Manteuffel, Stalin knew all about Wacht am Rein (Watch on the Rhine), the German code name for the counterattack through a security leak in German headquarters. He said nothing to his allies.

"Instead he waited until the German offensive was spent, then sent the Red Army dashing across Eastern Europe a month after the Ardennes battle began. Stalin apparently was aware that the last 200,000 members of the German army's strategic reserve were among the men committed to the Ardennes. Had those reserves been available for the Eastern Front, they might have stopped or delayed the Russians.

"U.S. soldiers, as a result, might have met the Russian troops at the Oder instead of on the Elbe, 125 miles farther west. The British would have reached the German rocket base at Peenemunde before the Russians captured its secrets. U.S. and British columns would have been first into Berlin. Moreover, the Russians would have lost the psychological advantage they have exploited throughout Eastern Europe by billing themselves as the true conquerors of the Third Reich."

The Battle of the Bulge, one of the war's costliest battles, took a toll of 8,000 American and 27,000 German soldiers. It began on the morning of Dec. 16, 1944, 25 years ago this week.

[From Time magazine, Dec. 19, 1969]

HITLER'S LAST GREAT GAMBLE

It began midsummer 1944 as a dream in the mind of Adolf Hitler. By late autumn, Wehrmacht planners had transformed the dream into battle orders. Hitler proposed to regain the offensive by deploying Germany's last reserves to smash through a lightly held sector of the Belgian front. His panzers would entrap as many as 30 U.S. and British divisions, capture the strategic supply port of Antwerp, and perhaps end the war in the West with a negotiated peace. Hitler thought of it as another Dunkirk and code-named it *"Wacht am Rhein* [Watch on the Rhine]." Allied archives would later refer to "the Battle of the Ardennes." To men who were there when the offensive began 25 years ago this week, it was "the breakthrough" or "the Battle of the Bulge"—and a time of sheer nightmare.

TWO-DAY RUSH

Today, historians describe the battle as Hitler's last great gamble, and German generals who survived the war as one of his great blunders. In interviews with several of those generals, Time's Bonn Bureau Chief Benjamin Cate learned how they sought to alter *der Führer's* plan, and how the postwar history of Europe might have changed had they succeeded.

One of the generals is Hasso von Manteuffel, who in 1944 led the Fifth Panzer Army, one of the two spearheads of the battle. Manteuffel, 72, now lives in quiet retirement near Munich. He told Cate how he and other officers under Field Marshal Gerd von Rundstedt, Commander in Chief West, protested that Hitler had set an impossible timetable by ordering a two-day rush to the Meuse, 50 miles distant. *"Das ist unwiderruflich* [This is irrevocable]," said General Alfred Jodl, Chief of Operations at supreme headquarters, slamming his fist on a conference table. Manteuffel, a dedicated bridge player, suggested that Hitler was trying for a *grosser Schlag,* a grand slam. Why not, he proposed to Jodl, settle instead for a more attainable *kleiner Schlag,* or little slam, by advancing only as far as Liège? Jodl was unmoved.

Hitler promised 300,000 troops for the attack and strong Luftwaffe support. Manteuffel recalls that during one seven-hour meeting, Hitler asked Reichsmarschall Hermann Göring how many planes he could provide. "Three thousand," Göring said instantly. "You know Göring," Hitler said to Manteuffel. "I think we shall have 2,000." The actual count was about 900.

Hitler had a strong reason for not accepting the opinions of his generals. As Siegfried Westphal, Rundstedt's chief of staff and now a steel executive, told Cate: "The generals had been wrong about both Czechoslovakia and Poland. None of us believed that such blitz campaigns were possible. Even in France, the German military predicted that the campaign would last much more than six weeks. Hitler was proved right, and ever afterward he followed his own judgment. Naturally, France was the last time he was right."

Had Hitler been persuaded to call off his attack, Europe might have followed a different course. According to Manteuffel, Stalin knew all about *Wacht am Rhein* through a security leak in German headquarters. He said nothing to his allies. Instead, he waited until the German offensive was spent, then sent the Red Army dashing across Eastern Europe a month after the Ardennes battle began. Stalin was apparently aware that the last 200,000 members of the German army's strategic reserve were among the men committed to the Ardennes. Had those reserves been available for the Eastern Front, they might have stopped or delayed the Russians. U.S. soldiers, as a result, might have met Russian troops at the Oder instead of on the Elbe, 125 miles farther west. The British would have reached the German rocket base at Peenemünde before the Russians captured its secrets. U.S. and British columns would have been first into Berlin. Moreover, the Russians would have lost the psychological advantage they have exploited throughout Eastern Europe by billing themselves as the true conquerors of the Third Reich.

QUICK REACTION

Hitler, however, could not be swayed. On the morning of Dec. 16, 1944, German artillery shattered the darkness before dawn and shook the snow-covered pines with a massed barrage. Four U.S. divisions, stretched thin along an 88-mile front, were overwhelmed. U.S. intelligence was unaware that Rundstedt had tucked 26 divisions, 1,800 armored vehicles and 2,000 pieces of artillery in the snowy groves of the Schnee Eifel, waiting for *"Null-Uhr* [zero hour]."

Stunned at first, U.S. troops quickly recovered. By doggedly holding St.-Vith and encircled Bastogne, they prevented the Germans from widening their front. Within three days, Allied Commander Dwight Eisenhower had 500,000 men en route toward the breakthrough. On Jan. 9, Hitler himself conceded failure. He had lost 27,000 killed, 38,000 wounded and 16,000 prisoners. At least 600 tanks had been destroyed. The U.S. had lost 8,000 dead, 48,000 wounded and 21,000 prisoners. Within a month the bulge had disappeared. Within two, the Allies were across the Rhine and racing through Germany.

[From the Washington (D.C.) Sunday Star, Dec. 7, 1969]

UNITED STATES IN DIFFICULT SPOT ON POW'S HELD BY REDS

(By Henry Bradsher)

The resolution calls for humane treatment of U.S. prisoners in North Vietnam and their release.

Hanoi says they are being treated humanely, but will not be released until all U.S. forces are out of Vietnam.

American officials—and former prisoners of the North Vietnamesse—say the treatment is the barbaric opposite of humane. So they go on trying to do something to help the prisoners.

The resolution which the House Foreign Affairs Committee approved Thursday is one small part of that effort. It seeks to focus public opinion in the United States and abroad on the plight of the prisoners.

But North Vietnam has seemed insensitive to the opinion of those countries which have accepted and supported U.S. efforts to obtain better treatment for the prisoners. It has been supported in its attitude by several Communist countries, although the ineffective weight of world opinion is on the American side.

The fact facing the U.S. government is that there is nothing it can do about the prisoners. They are, officials feel, being held as hostages for a price that this country will not pay—an abrupt pullout from South Vietnam.

The North Vietnamese insistence on the withdrawal of all U.S. forces before the prisoners will be released is more categoric than Hanoi's position on other aspects of a peace settlement.

The Nixon administration talks of eventually being able to withdraw combat forces, but leaving some support troops in Vietnam. Nothing official has suggested that all U.S. forces will leave within the foreseeable future.

According to the latest available figures, there are up to 1,339 U.S. prisoners in North Vietnam or in Communist hands in South Vietnam or Laos.

The Pentagon lists 323 servicemen missing and 70 believed captured in South Vietnam, and 443 missing and 341 believed captured in North Vietnam. Most of the former were ground troops, the latter airmen.

In Laos, 160 Americans are missing and two are presumed captured. Although not publicly acknowledged to be fighting in Laos, the United States has advisory forces there and makes aerial attacks.

ROGERS' EFFORTS

Most public attention has been on the airmen shot down during U.S. raids on North Vietnam from 1965 to 1968. But American statements on prisoner problems have usually applied to all the imprisoned servicemen.

Secretary of State William P. Rogers has several times sought to focus attention on the situation.

On June 5 he opened a news conference with a statement asking for humane treatment and the right for impartial observers to visit North Vietnamese prison camps. "I believe that any sign of good faith by the other side in this matter would provide encouragement for our negotiations in Paris," Rogers said.

Aides refused to explain just what Rogers meant by that, but there was no response and discouragement deepened in Paris.

Again in July, Rogers denounced Hanoi's "inhumane and inexcusable" attitude in a carefully calculated show of temper that got the desired attention from the American press but no improvement.

The administration then decided to have Lt. Robert Frishman, one of the few prisoners released by the Communists, tell his harrowing story.

American prisoners in North Vietnam, he said Sept. 2, are subject to "solitary confinement, forced statements, living in a cage for three years, being put in straps, not being allowed to sleep or eat, removal of fingernails, being hung from a ceiling having an infected arm which was almost lost, not receiving medical care, and being dragged along the ground with a broken leg."

By what officials insist was coincidence, there appeared to be a new wave of administration publicity for the prisoners' case last month. It began with a presidential proclamation of Nov. 9 as a Day of Concern.

Two deputy assistant secretaries, William H. Sullivan from the State Department and Dennis Doolin from Defense, testified before a House Foreign Affairs subcommittee which was considering the prisoner resolution.

"We are simply asking the Communists to live up to their own statements" that the prisoners have been treated "humanely" and "leniently," Sullivan said.

He noted that Hanoi has refused to abide by the 1949 Geneva convention on treatment of prisoners of war, denying it applies. "We have sought to avoid fruitless legal contention on this subject," Sullivan said, "because what is at stake here is the treatment and welfare and very survival of personnel who are helpless in the hands of the enemy."

U.N. APPEAL

The same week, the U.S. representative in the U.N. Political Committee appealed for proper treatment of the prisoners. It was the strongest presentation on the subject yet made to the United Nations, and some Communist nations plus Algeria and Cuba denied that it was a proper U.N. subject.

They also denied what the representative, Mrs. Rita E. Hauser, called a chilling record of prisoner treatment.

These statements brought several angry statements from Hanoi. It reiterated the "correct attitude and humanitarian policy" of North Vietnam and insisted the prisoners were war criminals, unentitled to Geneva Convention protection.

In fact, the official Hanoi newspaper Nhan Dan said, the prisoners come under "the principles laid down by the Nuremberg tribunal." It tried Nazi German war criminals after World War II.

Hanoi has not, however, repeated the threats it was making in the summer of 1966 to hold war crimes trials for the airmen who bombed North Vietnam.

The threats led to a storm of international

protests from the Pope and governments. Hanoi then "set aside" plans for trials but continued to emphasize a war crimes theme talking about the prisoners.

There was reason to believe that friends of Hanoi, possibly including U.S. leftists and the Soviet Union, advised that trials would not be helpful for the Communist cause.

Throughout U.S. efforts on behalf of prisoners, a main theme has been simply getting an accurate list of who is being held. A secretive regime in other ways, North Vietnam has refused to give this information directly.

Possible as a result of some consciousness of public pressures. Hanoi has made some names available indirectly. David Dellinger, an antiwar leader, came up recently with five previously unreported names of prisoners, and he has said he has an emissary en route to Hanoi for more names, possibly by Christmas.

The wives of missing servicemen who have appealed directly to North Vietnamese representatives in Paris for information, however, have received nothing so far but promises.

Some of them continue to sit anxiously by their mailboxes. But Hanoi has failed to show any more consideration for them than for the prisoners themselves.

CONVERSE COLLEGE GOVERNMENT INSTITUTE

HON. STROM THURMOND

OF SOUTH CAROLINA

IN THE SENATE OF THE UNITED STATES

Wednesday, December 17, 1969

Mr. THURMOND. Mr. President, I invite attention to a statement by Dr. Fred Dixon, of Spartanburg, S.C., concerning the support and awareness of public education. Dr. Dixon, a fine and patriotic citizen of our State, has spent a lifetime working for good government. He is a retired U.S. Air Force colonel who has achieved many military recognitions, the former chairman and founder of the political science department of Converse College in Spartanburg, a civic leader, and a dedicated American.

Dr. Dixon is the director of the S & H Foundation Institute on State and Local Government and Constitutional Revision, which was made possible through the funds of this foundation. Converse College, one of the finest higher educational institutions in our State, has benefited greatly from these funds and the able direction of Dr. Dixon. Dr. Dixon is a concerned educator and his words will be of interest to everyone.

Mr. President, I ask unanimous consent that Dr. Dixon's statement be included in the Extensions of Remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

A FOUNDATION CONTRIBUTES TO THE FURTHERING OF HIGHER EDUCATION

In June of this year Converse College, a four-year liberal arts college for women, located in Spartanburg, South Carolina received a grant of $2,000 from the S & H Foundation, sponsored by the Sperry and Hutchinson Company for the purpose of supporting an Institute on State and Local Government and Constitutional Revision.

This grant enabled the College to offer free of charge to teachers of the Social Sciences in Junior and Senior High Schools, students of Converse and of three other colleges in the city, faculty members of these institutions, and to the general public a series of eight sessions presenting the fundamentals of good government at the state and local levels. No program of this kind had previously been presented in the community, nor in the State, as far as is known. Without the grant it would have been impossible to offer this program.

The Institute was supported by leading government officials and outstanding political figures from around the State. Several outstanding academic experts also participated to contribute the underlying theoretical concepts as to the nature of good government and the requirements and problems involved in achieving it.

Each session was attended by an average of thirty five or more teachers from Spartanburg and Greenville Counties plus an additional fifty to seventy five interested students and citizens. The opportunity to attend this Institute and to participate in the question and answer periods which were a part of the format has undoubtedly provided a big contribution to the understanding of good government. Through the participation of the teachers this influence will extend to an uncounted number of students in the public schools.

Condensed versions of each program have been recorded on video tape as a public service by WSPA–TV and will be broadcast in a series of eight weekly programs a little later in the year. It is anticipated, too, that these tapes will be made available free to the Educational TV service in the State. Through this medium the impact of the Institute should be felt throughout the public school system not only for the near future but also possibly in years to come.

The contribution of the S & H Foundation is an example of the beneficial results which a public-spirited foundation can make to a furthering of public education and awareness. In view of some adverse comments which are made from time to time regarding foundations it is believed that the commendable activities of the S & H Foundation should be noted and appreciated.

The Lectureship Program, of which the Institute was a part, is one phase of the S & H Foundation's regular Program of Aid to Education. Under this program, 329 grants to 277 schools have been made over the past nine years.

In regard to the Converse College Institute the Spartanburg Herald-Journal, a local paper, commented editorially, "Anyone who participates in these discussions will be well prepared to help determine the future nature of South Carolina government."

BRIDGING THE GENERATION GAP IN HELENA, MONT.

HON. LEE METCALF

OF MONTANA

IN THE SENATE OF THE UNITED STATES

Wednesday, December 17, 1969

Mr. METCALF. Mr. President, the term "generation gap" is one that we hear very frequently. All too often when our children disagree with us as parents and adults we attribute the cause of the misunderstanding to this "gap."

The existence of this gap has its virtues. It provides the stimulation for many of our youths to question constructively our actions and to seek recognition as individuals. As parents and adults, however, it is our responsibility to attempt to bridge this gap and explain to our children why we think as we do.

A distinguished jurist in Montana, Judge Lester Loble, is bridging this gap in the juvenile court in Helena. For years, Judge Loble has had an advisory committee of adults who meet privately with the juvenile and his parents and then informally advise the judge. Judge Loble has now added 12 "juveniles" from Carroll College, Helena High, and Broadwater County High School to this advisory committee.

The Helena, Mont., Independent Record of December 9 contained an article about Judge Loble's advisory committee of adults and juveniles. This innovation is said to be a first among the Nation's juvenile courts, and I think it merits the attention of the Senate.

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, af follows:

A FIRST FOR LOBLE: JUVENILES GO TO COURT—BUT TO ADVISE

(By Dave Earley)

Sometimes a juvenile court has to make the "lesser of two bad choices . . ."

That is the conclusion expressed by several area "juveniles" after recently finding themselves on the other side of the bench, right up there with the judge, pondering the solution of two current juvenile cases.

It took three weeks of questioning, soul-searching, and trial-and-error. And at the end a decision which may have been a foregone, though unhappy, conclusion: "But I don't know what else we could have done."

The "juveniles" are 12 Carroll College, Helena High and Broadwater County High School students recently added to Judge Lester H. Loble's nine-adult-member juvenile court committee.

STUDENT LEADERS

They are drawn from among student body leaders and it is probable that this was their first acquaintance with juvenile court. In any event, it was a new experience for the committee.

Seating juveniles on the local advisory panel is said to be a "first" among the nation's juvenile courts and it is no surprise that the step was taken by Judge Loble.

The veteran jurist authored Montana's Lobel Law, which took certain classes of juvenile proceedings out of their former masked, "Star Chamber" status, making them public, with both press and parents invited.

JUSTICE DEPARTMENT INTERESTED

And so it is fitting that this latest innovation should occur in the Loble court. And it is no surprise that Sen. Mike Mansfield, a Congressional committee and the Justice Department have expressed interest in the new idea, and have asked to be kept informed of developments.

Judge Loble has in the past drawn considerable fire from certain of his juvenile court judicial brethren about the country. Openly voiced arguments have centered greatly around minute disquisition over this or that statistic—whether or not open court for juveniles has reduced the so-called juvenile problem.

KEEPING THE PUBLIC INFORMED

The real crux of the question, however, has been and continues to be whether society is to be informed as to what is happening to its younger members. And it remains to be seen whether this latest "offense" to the time-honored isolation of our juvenile courts—introducing young members of society themselves to the decision making process—will raise further ire.

But Helena's ground-breaking Judge has acquired considerable protective scar tissue over the years, and at the conclusion of the recent session he seemed far more interested in the response and reaction of this new "juveniles" than in (possible) more shot and shell from liberal critics.

And a sampling of opinion among the new committee members reveals enthusiasm for the idea and something else: a suddenly deepened appreciation of just how difficult juvenile problems can be—for adults.

TWO AUTO THEFT CASES

Briefly the facts of the two connected cases considered during the recent session are as follows: two auto thefts, one engineered by three boys and the other by three girls, all ranging in age from 13- to 15-years-old.

After the first session one of the boys, a 15-year-old with an extensive background of trouble, was summarily sent to Pine Hills School in Miles City.

After testimony, and private questioning by the committee of a rancher-uncle from near Havre, the other two boys were released to his custody.

Two of the girls were released to supervision of the local probation office, to continue their schooling in Helena public schools, and the third was released to the custody of a grandmother in Harlem, to attend school there.

CHAIN OF EVENTS

During the next weekend the following events occurred: one of the girls, a 14-year-old, got drunk at home. When her mother returned at about 3 a.m. she found herself locked out, and pelted with bottles thrown out through the windows.

And a day later the two boys in Havre stole a car, picked up the girl in Harlem, drove to Helena and then Great Falls, consecutively stealing three more cars with attendant breakage, and subsequently found themselves back in county jail.

In Part II of the current session Judge Loble and his committee concurred in committing two boys and two girls to correctional institutions. Net result: five committed, one apparently yet doing well on probation.

About the first decision . . .

EVERYONE LOST

"They were right in recommending leniency. I agreed with them that we had to try. We all lost, including our young defendants," said the judge.

"That first time we had to give them the chance," says Jeannie Christie, 17, Broadwater County High. "It's so sad they had to get back into trouble . . . if we could only have put them, somehow, in a good home . . ."

"Yes, I felt we were choosing the lesser of two bad choices," says Janet Harrell, 17, Helena High, "Miles City, or right back to the environment which led them into this trouble to begin with . . .

NEED HELP EARLIER

"But, then, I don't know whether a simple change of homes would help at this point . . . if we could only help them at an earlier age . . ."

"That's the trouble," sighs Jim Flanagan, adult member of the panel representing Catholic Charities, "we have to deal with them now."

"Really, you can't even say we had a choice," comments Lary Richtmeyer, 17, Broadwater County High. "As Janet said, somehow it reveals society's apathetic viewpoint . . . solving these problems by action in court . . . there should be something else, I don't know . . ."

Christie: "I think the court, this court brings it to the attention of the public . . ."

NEED SOMEONE TO IDOLIZE

Harrell: "I think, one thing, these youngsters need somebody to idolize, we all do—our parents, other adults . . . it's not just telling us what to do, lecturing, but setting an example, and because we idolize them we emulate them . . . these kids seem to have no one to copy but the ones who seem glamorous because they steal cars and do other things like that."

Richtmeyer: "Maybe they just don't know how to enjoy themselves. Our schools are sometimes at fault, maybe. Some of us are always busy with school activities, I never seem to have any spare time before about 10 o'clock at night . . . but those in the background get bored . . . maybe they get into this kind of trouble just as a challenge, to do something . . ."

Harrell: "Gee, I wish I had time to even say 'There's nothing to do . . .' "

How do you feel about the juvenile committee, and being members of it?

SERVES DUAL PURPOSE

Richtmeyer: "I'm all for it and think it serves a dual purpose. The adults learn from hearing our viewpoints. And we gain . . . learn many things about adults, the reasons for the things they do . . ."

Christie: "Oh, definitely. But it's not only the experience for us . . . I think it gives those kids a different attitude about the court . . . they come in expecting a lecture: 'How bad I've been . . .' "

Harrell: "Remember that one girl? She said she hadn't realized she'd been wrong until she saw us . . . maybe they feel its only a matter of kids against adults, until . . ."

Christie: "Yes, until they see us there and realize that not all young people feel angry and, say, let off steam by stealing a car . . ."

Harrell: ". . . we can tell them, sometimes we feel that way too . . ."

Richtmeyer: '. . . we're young people, too, and we're interested.

"And having us on the committee has stirred up a lot of interest in the school. Both Jeannie and I have been asked several times to give talks."

Christie: "It's the same at Helena High, other kids stop us in the halls and ask us what it's like, what's going on . . ."

Harrell: "Maybe we'll learn something, those of us on the committee and our classmates, about juvenile problems . . ."

THE NEW MOBILIZATION COMMITTEE

HON. WILLIAM M. COLMER

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. COLMER. Mr. Speaker, for the information of the membership of the House, and in order that it might receive wider publicity, I am herewith inserting in the RECORD a copy of a statement released by our able and distinguished colleague, RICHARD H. ICHORD, cataloging some recent activities of the New Mobilization Committee.

In this day of the New Left, it would seem that subversive organizations are more active than in any time since the creation of this young Republic emboldened by the sympathetic response in some areas and the judiciary. They are more and more determined, apparently, to destroy our form of government.

Mr. Speaker, I think the Congress and the country are fortunate in having, as the head of the House Committee on Internal Security, a man of the character and caliber of our colleague, Congressman DICK ICHORD. With no desire for the headlines, this sound and dedicated man conducts the affairs of this committee effectively and with dignity. He devotes many extra hours, as of necessity he must, to the task of trying to keep the country advised of the activities of these subversive organizations.

The following press release is indicative:

STATEMENT BY RICHARD H. ICHORD

WASHINGTON, D.C.—What was labeled as a weekend "teach-in" at Case Western Reserve University in Cleveland, December 13–14, was, in fact, a secret conference of the steering committee of the New Mobilization Committee to End the War in Vietnam to plan a 1970 winter-spring offensive on the so-called power structure of the people and government of the United States.

This was disclosed today by Rep. Richard H. Ichord (D-Mo.) based on information obtained by investigators for the House Committee on Internal Security of which Ichord is Chairman.

The staff report noted that the New Mobe meeting was closed to the press and public.

New Mobe leaders, following Saturday workshops on a wide-ranging list of subjects they consider to be ripe for attack, devoted Sunday to concentrating on an agenda narrowing the field to three major areas for future activity.

The first was categorized by New Mobe as the issue of "repression" and it was suggested that January and February be dedicated to building a propaganda assault based on the New Left contention that all who oppose the U.S. Government's position on Vietnam are being "repressed." It was also recommended that New Mobe back up a Black Panther demand that the United Nations investigate the alleged genocide of Panther members by police and other law enforcement personnel.

Organization of self-styled "people's juries" to conduct mock trials designed to show New Left conspirators and demonstrators as innocent and the Federal Government as the guilty party are also under consideration, as well as New Mobe support for members of the U.S. armed forces who are accused, tried or punished for opposing the war in Vietnam and for civilians who aid deserters and draft dodgers.

A second campaign, tentatively contemplated for early spring, was discussed in detail and would deal with taxes used to finance America's defense expenditures and industry's profits from making the material of war.

According to the agenda, this might include the organization of strikes and picketing of food stores to protest inflationary prices caused by expenditures for our military operations in Vietnam; group demonstrations against paying Federal income taxes to finance anything but aid to poor people; urging G.I.'s to turn back their savings bonds, and a variety of demonstrations against industries manufacturing military equipment, including disruptions of stockholders' meetings of such corporations.

A third area considered would deal with persuading draftees to resist on grounds they could not participate in war crimes. This—it was strongly urged—could feature protest demonstrations at a number of military bases on Good Friday (March 27) and Memorial Day in collaboration with anti-war sympathizers among uniformed U.S. military personnel.

As far as Committee investigators could determine, plans were not considered for centrally located actions such as the "moratorium" in Washington November 15, 1969. Instead, it appears the New Mobe leadership is more interested in coordinating simultaneous efforts in some 250 U.S. cities on a broad front of agitation.

Prominent among the more than 100 New Mobe-New Left leaders attending the Cleveland conference were men like Sidney Peck, national co-chairman of New Mobe and the former Wisconsin State Committee of the Communist Party, U.S.A.; Sidney Lens, former leader of the Revolutionary Workers League; Rennie Davis, one of the organizers of the violent demonstrations that occurred during the 1968 Democratic National Convention in Chicago; Arthur Waskow of the

Leftist-oriented Institute for Policy Studies, and many others identified with elements of the New Left movement.

The groundwork for the December meeting was laid on November 22 at a meeting in downtown Washington when New Mobe's executive committee gathered to make an assessment of their "moratorium" campaign. Minutes of that meeting reveal that New Mobe received a number of inquiries from the news media for information about their future plans. However, the executive committee decided a "decision on any such plans would be made at the Steering Committee meeting in December."

Committee investigators reported that at the November meeting, David Dellinger—one of New Mobe's eight national co-chairmen and a man who has described himself publicly as a "non-Soviet" style Communist, offered a three-point proposal for the future of the organization.

This proposal not only called for a steering committee meeting December 13–14 but also advocated the establishment of task forces to "develop program ideas which could then be discussed in depth in workshops at the Steering Committee meeting."

This proposal was adopted—an indication of Dellinger's influence on New Mobe—and task forces were set up to deal with such subjects as "G.I.'s", "Tax Refusal," "Repression and Political Prisoners", "Conspiracy", "the Draft", and "Economic Boycott".

Virtually word for word, the Dellinger list comprised the agenda for the Saturday workshops at the Cleveland meeting in December.

Chairman Ichord said the Committee staff report indicated that while New Mobe will continue its campaign to force an immediate withdrawal of American troops from Vietnam under such slogan banners as "Stop the War!", "Stop the War Machinery!", "Stop the Death Machine!", the broadened range of attack on the so-called "power structure" of the U.S. will, in Sidney Peck's stated view, cause the major political emphasis of the anti-war movement to be directed as exposing "the relationship between the racist, genecidal character of the war machine in Vietnam and the death-dealing aspects of that same machinery in the destruction of the environmental ecology at home."

Arthur Waskow, who admits a "gut preference for disorder," told the conferees in Cleveland that he believes New Mobe is the most important force on the Left now that Student for a Democratic Society, in his opinion, is collapsing. He said this would be particularly the case if college and high school students can be enlisted in New Mobe's activities.

Waskow declared that aside from anti-war actions, the New Mobe should "give a Left direction to the country" by devoting more attention to numerous domestic problems ranging from hunger to medical care, inadequate housing, air and water pollution, and any conditions viewed as irritants to the middle class and working class in America.

He concluded: "The anti-war movement, as such, no longer needs the Mobilization (except perhaps to set dates and name focal points of action). The country, however, needs and wants an intelligent Left. That need is the one the Mobe should now fulfill."

Peck told the conferees that Arthur Waskow, Stewart Meacham of the American Friends Service Committee and he were asked to draft plans for a mass national action next spring. He declared that New Mobe wants "a general work stoppage (political general strike) in New York, Detroit, and either San Francisco or Los Angeles, with a sympathetic strike or moratorium demonstrations in every city in the country, including a special call to Federal employees in major Governmental offices in Washington, D.C."

The Committee staff reports the likelihood that a further national organizing conference of New Mobe to implement a detailed program of protests will be held in the near future.

SOCIAL SECURITY RISE

HON. HASTINGS KEITH

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. KEITH. Mr. Speaker, the 15-percent across-the-board increase in social security benefits as it has just passed the House is a much-needed step in the right direction. When one considers that the cost of living has risen 9.1 percent since the last social security rise in February of 1968, and that the benefits we are now voting will not take effect until next April, then the rightness of our vote becomes obvious.

As Chairman MILLS of the Ways and Means Committee has pointed out, this measure is only a beginning, not the end, of our consideration of the social security system. Mr. MILLS has promised to undertake an extensive review of all aspects of social security—disability insurance, hospital insurance, supplementary hospital benefits, and others—and report a comprehensive reform bill to the House next March.

Among the measures to which I hope the committee will give careful consideration is one which I, along with many of my colleagues, have long advocated. It calls for a standard cost-of-living increase in social security benefits, to be applied automatically—as they generally are to civil service and military retirement benefits. Certainly, our senior citizens should not be forced to bear the brunt of inflation, by living on fixed income when wages and prices for the rest of our society are rising. Raising their social security benefits to meet the rising cost of living is not generosity—it is only fairness, and I hope that the Ways and Means Committee will recognize this in their deliberations next year.

For now, however, I applaud the step we have taken—remembering, as I say, that it is only the first of many that we must take to give our senior citizens what they deserve. Yesterday's vote, if accepted by the Senate, will do much to improve the lot of our retired citizens. The average benefit paid to a retired worker would rise from $100 to $116 a month. For a married couple, benefits would rise from $170 to $196 a month. Average widows benefits would rise from $88 to $100 monthly. A disabled worker's benefits would rise from $113 to $130 a month. And a widow with two children would find her social security check rising from $254 to $292 a month.

Some 25 million people would benefit from the increases provided in this bill.

It is, let me reiterate, a beginning to what I hope will be an extensive revamping our entire social security system. But this bill is a good beginning, and I am glad to support it.

COMMITTEE ON THE ENVIRONMENT

HON. JOHN M. ZWACH

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. ZWACH. Mr. Speaker, I thank my distinguished colleagues for the support they have given me in proposing a Committee on the Environment. It is now my hope that the Rules Committee will hold hearings on this proposal as soon as its schedule allows. Time is of the essence in this matter because if Congress begins the push for a better environment without the necessary committee framework and professional expertise, it may never assert its proper role in this area which becomes more important to all Americans with each passing day.

HOUSE OF REPRESENTATIVES—*Thursday, December 18, 1969*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Glory to God in the highest and on earth peace among men of good will.—Luke 2: 14.

Our Heavenly Father, who hast come into this world of darkness to bring light, into this world of worry to bring peace, and into this world of fear to bring faith, may Thy blessing be upon us and upon each one of our homes this Advent season. Do Thou lead us as we seek earnestly to be worthy followers of Thy wholesome way.

Make our feet to walk along the road to Bethlehem where we may give due honor and praise to Thee whose love gave us Christmas Day. May we so make room for Thee in all our hearts that we may live at peace with one another and in good will with all Thy family.

In the spirit of Him whose birthday we celebrate we pray. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed, with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 14794. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending June 30, 1970, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 14794) entitled "An act

making appropriations for the Department of Transportation and related agencies for the fiscal year ending June 30, 1970, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. STENNIS, Mr. MAGNUSON, Mr. PASTORE, Mr. BIBLE, Mr. CASE, Mrs. SMITH, and Mr. ALLOTT to be the conferees on the part of the Senate.

APPOINTMENT OF CONFEREES ON H.R. 14794, DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS, 1970

Mr. BOLAND. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 14794) making appropriations for the Department of Transportation and related agencies for the fiscal year ending June 30, 1970, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts? The Chair hears none, and appoints the following conferees: Messrs. BOLAND, MCFALL, YATES, MAHON, MINSHALL, CONTE, and BOW.

PERMISSION FOR HOUSE MANAGERS TO FILE CONFERENCE REPORT ON H.R. 14794, DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS, 1970

Mr. BOLAND. Mr. Speaker, I ask unanimous consent that the managers on the part of the House may have until midnight tonight to file a conference report on the bill (H.R. 14794) making appropriations for the Department of Transportation and related agencies for the fiscal year ending June 30, 1970.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

PERMISSION FOR HOUSE MANAGERS TO FILE CONFERENCE REPORT ON H.R. 14751, MILITARY CONSTRUCTION APPROPRIATIONS, 1970

Mr. SIKES. Mr. Speaker, I ask unanimous consent that the managers on the part of the House may have until midnight tonight to file a conference report on the bill, H.R. 14751, making appropriations for military construction for the Department of Defense for the fiscal year ending June 30, 1970, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

REQUEST FOR CONFERENCE ON DEPARTMENTS OF LABOR, AND HEALTH, EDUCATION, AND WELFARE, AND RELATED AGENCIES APPROPRIATIONS, 1970

Mr. FLOOD. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill, H.R. 13111, making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1970, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference requested by the Senate.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

Mr. CONTE. Mr. Speaker, reserving the right to object, I would like to direct a question to someone on the minority side who will be handling this bill. My question is with respect to the so-called Whitten amendment which the gentleman from California (Mr. COHELAN) and I fought, which was passed by this branch by a very close vote, and which has been amended in the Senate.

Should this conference committee not go along with the so-called Scott amendment amending the Whitten amendment, I would like to know whether the right to make a motion to recommit the bill with instructions will be given to me, or to someone of like thinking or whether this motion to recommit will be taken away from us again as it was on the agricultural bill.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Illinois.

Mr. MICHEL. Mr. Speaker, if I may respond to the gentleman from Massachusetts, I think this is rather a unique question, for such a request to be made at this particular time.

I would point out to the gentleman from Massachusetts that the gentleman from Illinois has no real strong feelings one way or another on the issue but when I go into a conference I go there to uphold the position of the House, but we all know that the reason for having a conference is to have some give and take.

As I say, I have no real strong feelings to shut the gentleman from Massachusetts off from any legitimate legislative prerogatives that he might have when the appropriate time comes.

Mr. CONTE. Mr. Speaker, the reason I am doing this, and it may seem out of the ordinary to some of my colleagues, is that I want to be fair about this thing. I do not want to force a rollcall on a motion at this time if we can get some assurances that this right will not be taken away from us later. But I want to make sure that the opportunity will exist for a clear-cut expression by the House on this issue.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Iowa.

Mr. GROSS. Mr. Speaker, I should think, in response to the question asked by the gentleman from Massachusetts, that the distinguished Speaker of the House would be an interested first, second, or third party in this procedure that the gentleman is speaking of. I would think that the Speaker would have something to say about who was recognized.

Mr. CONTE. I am sure that the Speaker will use that prerogative wisely, as he has in the past.

Mr. COHELAN. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I will be glad to yield to my friend, the gentleman from California (Mr. COHELAN).

Mr. COHELAN. I just want to say that I share the feelings of the gentleman from Massachusetts and I commend him for his great effort. I would like to express the hope, however, that the conferees will adopt the Senate amendment and come back to the House so that we can vote on the Labor and HEW appropriations and get home to our districts for the holidays.

I think the expression by the Senate is very clear. I think the House remembers well what happened last year. The Senate was in disagreement and on a floor vote in the House on three separate votes, we adopted the Senate amendment which, in effect, negated the previous action we had taken which, of course, is exactly what some of us hoped for.

Mr. CONTE. Mr. Speaker, I yield to the gentleman from Michigan (Mr. O'HARA).

Mr. O'HARA. Mr. Speaker, I wish to commend the gentleman from Massachusetts for the statement he has made under his reservation.

I agree completely with him. Unless this House can be assured of a clear-cut opportunity to express its will on this matter, when the conference report is brought back, a motion to instruct should be offered. If we cannot get that assurance, I would, and the gentleman does not object to sending the bill to conference at this time, I would see that the gentleman will have an opportunity to prepare that motion and have it ready.

Mr. CONTE. I appreciate that and I appreciate the gentleman's offer.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Mississippi.

Mr. WHITTEN. As the gentleman knows, I am not a member of the committee and I did not hear the gentleman's earlier statement, but I did want to say to the gentleman at this time, I recall that he was very insistent on a committee on which I was a conferee to stand by the House position which we worked for a full month. I just wanted to recall that to the gentleman.

Mr. CONTE. Yes, I do recall that and, as I remarked, I have complimented the gentleman from Mississippi many, many times. The gentleman has had great experience in the practice of the law and he is one of the finest parliamentarians I have ever met. I used to have a professor Mr. O'Keefe in remedies back at Boston College law school, and he would say:

> You know, the only way you are really going to learn law and learn all about evidence is by getting your knuckles rapped in the courtroom.

In this session I have had my knuckles rapped many times. That is why I am on my feet today so that it will not happen again, so I will not have the rug pulled out from under me again.

Mr. WHITTEN. The gentleman is overgenerous as he usually is, but I thank him for the kind statement.

Mr. CONTE. I withdraw my reservation at this time.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania (Mr. FLOOD)?

Mr. O'HARA. Mr. Speaker, I object.

Mr. FLOOD. Mr. Speaker——

The SPEAKER. For what purposes does the gentleman from Pennsylvania (Mr. FLOOD) rise?

Mr. FLOOD. Mr. Speaker, I would offer a motion.

The SPEAKER. The Chair will recognize the gentleman after the 1-minute speeches.

BILLION DOLLAR CHRISTMAS PRESENT

(Mr. PIKE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PIKE. Mr. Speaker, sometime between now and the end of the year the Air Force has promised to give to some happy corporation a multibillion-dollar Christmas present. It is called the F–15. It is my opinion—and I might say I got this opinion from the Armed Forces Journal—that the competition has been, is, and will conclude illegally. It is in violation of section 2271, chapter 135, title 10, of the United States Code, which says in essence that the competitors in any major procurement should be told precisely what weightings should be given to each element in the competition, and further states that these weightings shall not be changed during the competition.

The Air Force says that they do not have to obey this law because it derives from a law which was passed in 1926 and is obsolete. This is the Air Force equivalent of saying rape is okay as long as you do not get prosecuted for it. Ignoring this law—and it is being ignored—allows the Air Force to come up with any winner in any competition that political expediency demands. If the Air Force can flout mandatory provisions of the law and the clearly expressed intention of Congress that contracts shall be awarded only on the basis of merit and military considerations, then perhaps the best thing for us to do at this time of the year is to kneel toward the Pentagon and join in singing, "How silently, how silently, the wondrous gift is given."

INSTRUCT LABOR-HEW CONFEREES ON VOCATIONAL SCHOOL

(Mr. NELSEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NELSEN. Mr. Speaker, now that the conference committee on the Labor-HEW bill is about to proceed, I wish to call to the attention of the conferees on the part of the House that in the division of funds for the technical school and liberal arts college, the original passage of the bill and the report that was submitted provided there would be a division of the proceeds of the endowment of the land-grant funds.

However, HEW has ruled the act did not clearly specify that this should be done. Therefore, there has been some problem.

I am hoping that when the conferees go into session there may be some statement put in on the part of the managers that backs up the original intent of those who have sponsored this legislation. I call the attention of the managers on the part of the House to the fact that I was the author of the bill that established the liberal arts college, the vocational school and authored the legislation that qualified the two schools for land-grant funds.

I feel that I am fully aware of what was legislative intent and I do feel that clarification could be incorporated in a statement by the managers of the conference. The vocational school has done such an outstanding job and deserves our every consideration.

Mr. ADAMS. Mr. Speaker, will the gentleman yield?

Mr. NELSEN. I yield to the gentleman from Washington.

Mr. ADAMS. I commend the gentleman for his remarks. I support what he said. I hope the conferees will do what the gentleman suggests.

SENATE AMENDMENT TO CUT OFF FEDERAL AID TO COLLEGES THAT FAIL TO CURB DISORDERS

(Mr. HUNT asked and was given permission to address the House for 1 minute.)

Mr. HUNT. Mr. Speaker, I was dismayed by the action taken by the other body yesterday to delete a provision added to the Labor-HEW appropriations that would, in effect, suspend Federal funds to colleges and universities whose administrations fail to effectively insure the rights of the majority of students and faculty by not cracking down on those who deliberately instigate disorderly conduct and disrupt the orderly functioning of those institutions.

In view that the vote was only 49 to 43 in favor of this action, I trust the conferees on the part of both bodies will not yield to minority pressure and will restore this provision to put much-needed backbone into those university administrations which are readily inclined to yield to intimidation by those few distraught and radical revolutionaries who would like nothing more than to close down these institutions. So long as public funds are involved, the hard-pressed taxpayer has every right for once to make a demand of his own that his financial stake in this matter is not abused. Mollycoddling adamant dissidents is a quickly passing fad that must yield to the restoration of good old American commonsense in the recognition that reasoning with the unreasonable is a one-sided flop. We ought to speed the demise of this fad.

SEASONS GREETINGS FROM THE 101 AIRBORNE DIVISION AIRMOBILE

(Mr. SCHADEBERG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHADEBERG. Mr. Speaker, I am sure my colleagues would like to read a very brief note I received from a young man from my district. I read without comment for his words speak for themselves:

DECEMBER 12, 1969.

DEAR CONGRESSMAN SCHADEBERG: I'm in hopes that this card finds your family and yourself in good spirits.

Remember in June of 1968 an individual from Racine, Wis. called and asked for assistance getting in the United States Army.

I would like to say once again, thank you for all you've done for me.

You've done more than you'd suspect.

After a tour in Viet Nam and the army, one can't help but be changed.

I've learned more in the last 9½ months over here, than I could in a life time back in the "world."

The simple things of life have so much more meaning to me.

Its changed me for the rest of my life, all for the better.

I wish the people of the world could realize what a precious thing peace is. But, of course, the price of freedom will never be cheap.

I'm proud to have had the chance to serve in Viet Nam under our beautiful stars and stripes.

May we proudly fight for its honor forever.

Sincerely,

STAN CELME.

TROOP WITHDRAWAL

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, I rise to applaud the speech given by President Nixon Monday night. The announced withdrawal of an additional 50,000 troops is indeed encouraging. This brings the total cuts he has initiated to 110,000. I would remind my colleagues, in this regard, that the actual troop strength was 542,000 when President Nixon took office last January.

The President was quite candid, once again, about our lack of success at the negotiating table in Paris. His satisfaction, however, with the progress of Vietnamization was obvious. It reinforced similar enthusiasm shown by our former colleague, Secretary of Defense Mel Laird, on ABC's "Issues and Answers" on December 14.

Now, as many of my colleagues know, I have often been critical of U.S. policy in Vietnam. I will, of course, continue to raise my voice when I feel it is necessary to do so.

But I must say that I am very pleased by the tone, and the substance, of President Nixon's latest remarks. For the first time in many years, our brave young troops are coming home. The withdrawals have begun, and I fervently hope the process will continue until every last one is back with us.

I fully endorse this latest move by the President to extricate us from this conflict.

CEILING ON SPENDING

(Mr. ARENDS asked and was given permission to address the House for 1

minute and to revise and extend his remarks.)

Mr. ARENDS. Mr. Speaker, President Nixon yesterday referred to the ceiling we voted on spending last spring as a "rubber ceiling."

Unfortunately, the President was right. It is elastic.

We voted a ceiling that was only as good as our word and our intentions.

Which apparently are elastic, too.

Every time we have voted appropriations to stretch that ceiling we have also stretched our credibility with the American people.

And that credibility, Mr. Speaker, does not have as much give to it as either our fiscal ceiling or apparently, our solemn intentions.

If we continue ignoring our responsibilities in an effort to buy votes and popularity, at the price of those responsibilities we may find we have also lost our credibility with the American people.

Mr. Speaker, I believe it is time we quit thinking of how we can buy the affections of the people and begin thinking about how we can preserve the economy of our country.

CHRISTMAS GIFTS FROM CAPITOL HILL TO SOLDIERS IN VIETNAM

(Mr. FINDLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FINDLEY. Mr. Speaker, I would like to take this opportunity to thank the many Members of this body and the members of their staffs for the generous support which they have given to the project of sending Christmas gifts from Capitol Hill to soldiers in Vietnam. The cash income has been very good—more than $3,000—but we still have a problem.

The work center for getting the packages together and ready for shipment, the shipment that will be undertaken by air through the generosity of the airlines beginning Saturday morning—is in room 1302 of the Longworth House Office Building which is a subcommittee room of the House Committee on Agriculture. We need some help this afternoon in order to get these packages put together for shipment by air. So if any of you have an extra girl, send her up to that room so we can get the job completed.

AUTHORIZING THE RELEASE OF CERTAIN LAND-USE RESTRICTIONS ON A TRACT OF LAND AT EL PASO, TEX.

Mr. BENNETT. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 12535) to authorize the Secretary of the Army to release certain restrictions on a tract of land heretofore conveyed to the State of Texas in order that such land may be used for the city of El Paso North-South Freeway.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

Mr. GROSS. Mr. Speaker, reserving the right to object, if I remember correctly, this does not call for any expenditures from the Treasury?

Mr. BENNETT. Mr. Speaker, if the gentleman will yield, not a cent.

Mr. GROSS. The use of this land and the land to be taken for this highway purpose will revert to the Federal Government if it ceases to be used for that purpose?

Mr. BENNETT. That is correct.

Mr. GROSS. I thank the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Clerk read the bill, as follows:

H.R. 12535

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Army is authorized and directed to release or modify on behalf of the United States the land use restrictions and reservations applicable to a tract of land, constituting a portion of a 24.25-acre parcel of land in El Paso, Texas, heretofore conveyed for National Guard and military purposes by the United States to the State of Texas by deed dated November 4, 1954 pursuant to the Act of August 30, 1954 (68 Stat. 974), so that such tract, described in section 2 of this Act may be conveyed by the State of Texas to the city of El Paso as a right-of-way for the construction of the El Paso North-South Freeway.

SEC. 2. (a) The land referred to in section 1 of this Act is located in El Paso County, Texas, being 5.975 acres of land, more or less, out and a part of section 21, black 81, township 2, Texas and Pacific Railroad Company Survey, in El Paso County, Texas, and being a portion of the same land described in a Quitclaim Deed from the United States of America to State of Texas dated November 4, 1954, recorded in volume 1206, page 369, deed records of El Paso County, Texas, said 5.975 acres of land being more particularly described by metes and bounds as follows:

Beginning at a point which is the intersection of the proposed westerly right of way line of United States Highway 54 and the south line of Hayes Avenue, said point bears south 88 degrees 05 minutes 03 seconds east, a calculated distance of 1118.74 feet from the southeast corner of the Intersection of Hayes Avenue, and Pollard Street;

thence south 88 degrees 05 minutes 03 seconds east, 120.69 feet along the said south line of Hayes Avenue to the northeast corner of the Texas National Guard, said corner being a point in the Fort Bliss Military Reservation boundary line;

thence south 01 degrees 56 minutes 18 seconds west, 110.75 feet along the said Military Reservation boundary line to a point in the common property line between the Southern Pacific Railroad Company and the Texas National Guard;

thence south 16 degrees 54 minutes 24 seconds west, 846.56 feet along the said common property line to a point which is the southeast corner of the Texas National Guard;

thence north 86 degrees 38 minutes 45 seconds west, 407.07 feet along the south line of the Texas National Guard to a point in the said proposed westerly right-of-way line;

thence north 26 degrees 52 minutes 55 seconds east, 217.95 feet along the said proposed westerly right-of-way line to a point;

thence north 34 degrees 22 minutes 55 seconds east, 260.00 feet along the said proposed westerly right-of-way line to a point;

thence north 30 degrees 32 minutes 55 seconds east, 571.20 feet along the said proposed westerly right-of-way line to the point of beginning, containing an area of 5.975 acres of land, more or less.

(b) The above legal description may be modified, as agreed upon by the Secretary, the State and the city, consistent with any changes in the right-of-way alinement for the freeway, but in no event shall the total area of this tract exceed six acres.

SEC. 3. The release and conveyance authorized herein shall be upon the following terms and conditions:

(a) That the lands described in section 2 above shall be used only for public highway and related purposes, and if such property shall ever cease to be used for such purposes, all right, title, and interest to such property shall revert to the United States, which shall have the immediate right to entry thereon.

(b) That the structures and improvements presently located on, or adversely affected by, the property to be conveyed, shall be replaced in kind and constructed, at the expense of the city of El Paso, on the adjacent remaining lands of the State of Texas: *Provided,* That the plans for such replacement facilities shall first be approved by the State and the Secretary of the Army, and that no structure shall be removed until satisfactory replacement of the same has been made available.

(c) That the relocated replacement structures and facilities shall be subject to the same restrictions, use limitations and reversionary rights of the United States as set forth in the deed of November 4, 1954, to the State of Texas of the lands involved herein.

SEC. 4. The Secretary of the Army is authorized to impose such additional terms and conditions on the release authorized by this Act as he deems appropriate to protect the interests of the United Staets. All expenses for surveys and the preparation and execution of legal documents necessary or appropriate to carry out the provisions of this Act shall be borne by the city of El Paso.

Mr. BENNETT. Mr. Speaker, this bill would authorize the Secretary of the Army, upon certain conditions, to release or modify the land use restrictions as to approximately 6 acres out of a 24.25-acre parcel of land in El Paso, Tex., conveyed by the United States in 1954 to the State of Texas for National Guard and military purposes. The objective is to enable the State to convey this 6-acre tract to the city of El Paso for the construction of the El Paso North-South Freeway.

The lands involved, together with improvements, comprise a National Guard facility and were formerly a part of Fort Bliss. Pursuant to the act of August 30, 1954 (68 Stat. 974), the Secretary of the Army, by deed of November 4, 1954, conveyed this 24.25-acre parcel of land to the State of Texas subject to the conditions that first, the property be used primarily for training the National Guard and other military purposes, and if it ceased to be so used, title would revert to the United States; second, upon a declaration of war or national emergency the United States may reenter and use said property without charge; third, all minerals, oil and gas are reserved to the

United States; and fourth, rights-of-way for roads and utilities to serve other portions of Fort Bliss are also reserved to the United States.

The city of El Paso has requested the State of Texas to convey to it approximately 6 acres of this facility for the construction of the El Paso North-South Freeway. This is a federally assisted project designated as U.S. No. 54 highway. However, by reason of the statutory and deed restrictions, the State is unable to transfer this property for highway purposes.

H.R. 12535 provides the requisite authority for the Secretary of the Army to release the restrictions and reservations upon certain specified conditions: first, the lands conveyed shall be used only for highway and related purposes, and if such use ceases, title shall revert to the United States; second, all improvements affected shall be replaced in kind on the adjacent State land at the expense of the city; third, plans for the replacement structures are to be approved by the State and the Army; fourth, no structure will be removed until a replacement is available; and fifth, replacement facilities shall be subject to the same rights of the United States as in the deed to the State of November 4, 1954.

The Department of the Army considers that the release of the 6-acre tract as provided in H.R. 12535 would not adversely affect National Guard training or future military requirements, also that the proposed freeway will not be incompatible with present or future military requirements. Accordingly, the Department of the Army interposes no objection to the enactment of H.R. 12535.

Mr. WHITE. Mr. Speaker, I represent the 16th District of Texas, which includes Fort Bliss, the area to which H.R. 12535 pertains. This legislation authorizes and directs the Secretary of the Army to release or modify the land-use restrictions on a 5.975-acre tract of land.

This land is in the path of the proposed North-South Freeway through the Fort Bliss Military Reservation. The freeway is a Federal aid project, a part of U.S. Highway 54, beginning at the Mexican border, and proceeding northward through the city of El Paso and the Fort Bliss Military Reservation to the city limits, where it connects with the present U.S. 54.

Because this highway is equally to the interest of our military installation at Fort Bliss and the civilian community, Fort Bliss has conveyed to the State of Texas all of its own land in the area, as authorized under the Federal-aid Highway program. However, there is a 24.25-acre tract, within the Fort Bliss boundaries, which was conveyed to the State of Texas by the United States, on November 4, 1954, pursuant to an act of Congress of August 30, 1954. (68 Stat. 974). The entire tract, outlined in brown on the map, was conveyed to the State with certain restrictions, the pertinent one being that, should the property cease to be used for the training of the National Guard, and for other military purposes, title would revert to the United States.

This smaller area, at the extreme edge of the tract, is the area needed for the freeway. The Texas National Guard is ready to convey this to the State of Texas Highway Department for building the freeway, but is prevented from doing so by the restrictions which state that, when the property ceases to be used for National Guard or military purposes, it shall revert to the United States. My bill would simply remove those restrictions as they pertain to this area of 5.975 acres. The remainder of this area would continue to be used for National Guard training—and the buildings and equipment located on the smaller tract would be removed, at the expense of the State of Texas and the city of El Paso, to the remaining 18 acres of the tract. The Texas National Guard has stated this will be sufficient for its purposes.

Your committee has a favorable report on this bill, from both the Department of the Army, and the General Services Administration. In each case, the Bureau of the Budget reviewed the report, and advise that, from the standpoint of the administration program, there is no objection to the presentation of the favorable report to the committee.

The General Services Administration, in its report, stated that GSA would prefer that the land be conveyed by the Army to the State of Texas under the Federal aid highway program, I would like to report that the legal staff of the Army, and of the city of El Paso and the State of Texas, investigated this possibility and reported that legislation would be necessary. The General Services Administration therefore says it has no objection to H.R. 12535, which accomplishes the desired results.

The State Highway Department of Texas recently completed construction of Interstate 10, running east and west through the city of El Paso. Its effectiveness will be increased greatly if it can be matched with a major north-south traffic artery. Among its many benefits, it will make Fort Bliss a more effective and more desirable post. It will afford the military better access to the city of El Paso, the International Airport, other major highways, and to the various Fort Bliss training facilities to the north and east in New Mexico. It will also serve to strengthen, even further, the excellent relations between the military and civilian populations of our city, a pleasant relationship which has now existed for 120 years.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ADJUSTING THE LEGISLATIVE JURISDICTION OVER LANDS, ETHAN ALLEN, AND UNDERHILL, VT.

Mr. BENNETT. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 59) to authorize the Secretary of the Army to adjust the legislative jurisdiction exercised by the United States over lands within the Army National Guard facility, Ethan Allen, and the U.S. Army Materiel Command Firing Range, Underhill, Vt.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

Mr. GROSS. Mr. Speaker, reserving the right to object, am I correct in assuming that there will be no cost to the Federal Government by virtue of the enactment of this legislation and that there will be no loss of property; that is, by way of reversion to any subdivision of government in the State of Vermont?

Mr. BENNETT. The gentleman is precisely correct.

Mr. GROSS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 59

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provisions of law, the Secretary of the Army may, at such times as he may deem desirable, relinquish to the State of Vermont all, or such portion as he may deem desirable for relinquishment, of the jurisdiction heretofore acquired by the United States over any land within the Army National Guard Facility, Ethan Allen, and the United States Army Materiel Command Firing Range, Chittenden County, Vermont, reserving to the United States such concurrent or partial jurisdiction as he may deem necessary. Relinquishment of jurisdiction under authority of this Act may be made by filing with the Governor of the State of Vermont a notice of such relinquishment, which shall take effect upon acceptance thereof by the State of Vermont in such manner as its laws may prescribe.

Mr. BENNETT. Mr. Speaker, S. 59 would authorize the Secretary of the Army to adjust jurisdiction now being exercised by the United States over lands within the Army National Guard facility, Ethan Allen, and the U.S. Army Materiel Command Firing Range at Underhill, Vt.

Very simply, this bill would allow State and local officials in Vermont to exercise police jurisdiction over the two military installations.

At the present time, the United States is vested with legislative jurisdiction but neither the military departments nor the U.S. attorney's office located 70 miles away can furnish sufficient staff to provide the necessary police protection. The State and local officials, while willing to do so, are without legal authority to oversee these areas for the reason that exclusive jurisdiction is held by the United States. It is well established that, as long as the United States retains ownership of the subject lands, legislative jurisdiction cannot be revested in the State unless authorized by an act of Congress. It is anticipated that the ability to utilize the combined forces of the Federal, State, and local agencies will result in effective protection and law enforcement in the reservation areas.

This measure is identical to many previous enactments on the same subject with respect to other military reservations all over the United States.

The Senate bill was ordered to be read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BENNETT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks preceding the passage of the last two bills.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

GENERAL LEAVE

Mr. TEAGUE of Texas. Mr. Speaker, I ask unanimous consent that all Members may have 3 legislative days in which to revise and extend their remarks and include tabular material with regard to the veterans' legislation being considered today.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

CARE AND TREATMENT OF VETERANS IN STATE VETERANS' HOMES

Mr. TEAGUE of Texas. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 9334) entitled "An act to amend title 38, United States Code, to promote the care and treatment of veterans in State veterans' homes," with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 3, strike out lines 15, 16, and 17.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. TEAGUE of Texas. Mr. Speaker, this bill which passed the House unanimously on June 2, provided three amendments to the laws involving the care and treatment of veterans in State veterans homes. They first authorized the Administrator to pay each State for an eligible veteran cared for in a State home at the rate of $3.50 per day for domiciliary care, $5 for nursing home care, and $7.50 for hospital care.

The second provision authorized the Administrator on a matching fund basis for a period of 10 years to expend as much as $5 million in 1 year for the purpose of renovating and modernizing existing structures providing hospital and domiciliary care. A similar provision is already in effect for the construction of new nursing care facilities at State homes.

The last provision in the bill involved a change in the ratio of nursing care beds which is now 1½ beds per 1,000 war veteran population in a particular State. The house bill had raised this to three. The Senate deleted that provision so that the ratio remains at 1½. My motion would concur in the Senate amendment, thus leaving the ratio as it is today.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

VETERANS' EDUCATIONAL AMENDMENTS OF 1969

Mr. TEAGUE of Texas. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 11959), entitled "An act to amend chapters 31, 34, and 35 of title 38, United States Code, in order to increase the rates of vocational rehabilitation, educational assistance, and special training allowance paid to eligible veterans and persons under such chapters," with Senate amendments thereto, and consider the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Strike out all after the enacting clause and insert:

That this Act may be cited as the "Veterans Education and Training Assistance Amendments Act of 1969".

TITLE I—INCREASE IN ALLOWANCES FOR EDUCATION AND TRAINING PROGRAMS; AMENDMENTS TO FLIGHT TRAINING AND FARM COOPERATIVE PROGRAMS

SEC. 101. Section 1504(b) of title 38, United States Code, is amended to read as follows:

"(b) The subsistence allowance of a veteran-trainee is to be determined in accordance with the following table, and shall be the monthly amount shown in column II, III, or IV (whichever is applicable as determined by the veteran's dependency status) opposite the appropriate type of training as specified in column I:

"Column I	Column II	Column III	Column IV
Type of training	No dependents	One dependent	Two or more dependents
Institutional:			
Full-time	$160	$219	$255
Three-quarter-time	116	160	189
Half-time	80	109	124
Institutional on-farm, apprentice, or other on-job training: Full-time	138	182	219

Where any full-time trainee has more than two dependents and is not eligible to receive additional compensation as provided by section 315 or section 335 (whichever is applicable) of this title, the subsistence allowance prescribed in Column IV of the foregoing table shall be increased by an additional $7.30 per month for each dependent in excess of two."

SEC. 102. (a) Subsection (a) of section 1677 of title 38, United States Code, is amended by striking out the material preceding clause (1), and inserting in lieu thereof the following:

"(a) The Administrator may approve the pursuit by an eligible veteran of flight training where such training is generally accepted as necessary for the attainment of a recognized vocational objective in the field of aviation or where generally recognized as ancillary to the pursuit of a vocational endeavor other than aviation, subject to the following conditions:".

(b) The last sentence of subsection (b) of section 1677 of such title is amended by striking out "$130" and inserting in lieu thereof "$190".

(c) Section 1677 of such title is further amended by adding at the end thereof a new subsection as follows:

"(c)(1) In any case in which a veteran wishes to pursue a course in flight training under this section but does not possess a valid private pilot's license and has not satisfactorily completed the number of hours of flight instruction required for a private pilot's license, the Administrator is authorized to make a direct loan to such veteran to pursue the flight training required for a private pilot's license.

"(2) Loans made under this subsection may be made in any amount not exceeding $1,000 or 90 per centum of the established charges for tuition and fees which similarly circumstanced nonveterans enrolled in the same flight-training course are required to pay, whichever amount is less; and such loans shall bear interest at a rate determined by the Administrator, but not to exceed 6 per centum per annum.

"(3) Loans made under this section shall be repayable in equal monthly installments over a period of time not to exceed three years commencing (A) upon the failure of the eligible veteran to enter upon a course of training under subsection (a) of this section within one year after obtaining a private pilot's license, or (B) upon failure to satisfactorily complete such a course of training within one year after enrollment in a course of training under subsection (a) of this section.

"(4) Loans made under this section shall be made upon such other terms and conditions as may be prescribed by the Administrator."

SEC. 103. (a) The table (prescribing educational assistance allowance rates for eligible veterans pursuing educational programs on half-time or more basis) contained in paragraph (1) of section 1682(a) of title 38, United States Code, is amended to read as follows:

"Column I	Column II	Column III	Column IV	Column V
Type of program	No dependents	One dependent	Two dependents	More than two dependents
				The amount in column IV, plus the following for each dependent in excess of two
Institutional:				
Full-time	$190	$218	$240	$15
Three-quarter-time	140	162	184	10
Half-time	90	107	119	7
Cooperative	155	177	199	10".

(b) Section 1682(b) of such title is amended by striking out "$130" and inserting in lieu thereof "$190".

(c) Section 1682(c)(2) of such title is amended by striking out "$130" and inserting in lieu thereof "$190".

(d) Section 1682(d) of such title is amended to read as follows:

"(d)(1) An eligible veteran who is enrolled in a 'farm cooperative' training program which provides for institutional and on-farm training and which has been approved by the appropriate State approving agency in accordance with the provisions of paragraph (2) of this subsection shall be eligible to receive an educational assistance allowance as follows: $153 per month, if he has no dependents; $182 per month, if he has one dependent; $211 per month, if he has two dependents; and $10 per month, for each dependent in excess of two.

"(2) The State approving agency may approve a farm cooperative training course when it satisfies the following requirements:

"(A) The course combines organized group instruction in agricultural and related subjects of at least two hundred hours per year (and of at least eight hours each month) at an educational institution, with supervised work experience on a farm or other agricultural establishment; and the course pro-

vides for not less than one hundred hours of individual instruction per year, at least fifty hours of which shall be on a farm or other agricultural establishment (with at least two visits by the instructor to such farm or establishment each month). Such individual instruction shall be given by the instructor responsible for the veteran's institutional instruction and shall include instruction and home-study assignments in the preparation of budgets, inventories, and statements showing the production, use on the farm, and sale of crops, livestock, and livestock products.

"(B) The course is developed with due consideration to the size and character of the farm or other agricultural establishment on which the eligible veteran will receive his supervised work experience and to the need of such eligible veteran, in the type of farming for which he is training, for proficiency in planning, producing, marketing, farm mechanics, conservation of resources, food conservation, farm financing, farming management, and the keeping of farm and home accounts.

"(C) The farm or other agricultural establishment on which the veteran is to receive his supervised work experience shall be of a size and character which will permit instruction in all aspects of the management of the farm or other agricultural establishment of the type for which the eligible veteran is being trained, and will provide the eligible veteran an opportunity to apply the major portion of the farm practices taught in the group instruction part of the course.

"(D) Provision shall be made for certification by the institution and the veteran that the training offered does not repeat or duplicate training previously received by the veteran.

"(E) The institutional on-farm training meets such other fair and reasonable standards as may be established by the State approving agency."

(e) The table (prescribing educational assistance allowance rates for eligible veterans pursuing an apprenticeship or other on-job training) contained in section 1683(b) of such title is amended to read as follows:

"Periods of training	No dependents	One dependent	Two or more dependents
First 6 months	$116	$131	$146
Second 6 months	87	102	116
Third 6 months	58	73	87
Fourth and any succeeding 6-month periods	29	43	58".

SEC. 104. (a) Section 1732(a) of title 38, United States Code, is amended to read as follows:

"(a) The educational assistance allowance on behalf of an eligible person who is pursuing a program of education consisting of institutional courses shall be computed at the rate of (1) $190 per month if pursued on a full-time basis, (2) $140 per month if pursued on a three-quarter-time basis, and (3) $90 per month if pursued on a half-time basis."

(b) Section 1732(b) of such title is amended by striking out "$105" and inserting in lieu thereof "$155".

(c) Section 1742(a) of such title is amended to read as follows:

"(a) While the eligible person is enrolled in and pursuing a full-time course of special restorative training, the parent or guardian shall be entitled to receive on his behalf a special training allowance computed at the basic rate of $190 per month. If the charges for tuition and fees applicable to any such course are more than $59 per calendar month the basic monthly allowance may be increased by the amount that such charges exceed $59 a month, upon election by the parent or guardian of the eligible person to have such person's period of entitlement reduced by one day for each $6.20 that the special training allowance paid exceeds the basic monthly allowance."

SEC. 105. (a) Except as provided in subsections (b) and (c) of this section, the amendments made by this title shall become effective on the first day of the second calendar month which begins after the date of the enactment of this Act.

(b) Section 101, section 102(b), section 103, except subsection (d) thereof, and section 104 of this title shall become effective as of September 1, 1969.

(c) Any veteran enrolled in a farm cooperative course under section 1682(d) of title 38, United States Code, prior to the effective date prescribed in subsection (a) of this section may continue in such course to the end of the current academic year under the same terms and conditions that were in effect prior to such effective date.

TITLE II—SPECIAL ASSISTANCE FOR EDUCATIONALLY DISADVANTAGED VETERANS; PREDISCHARGE EDUCATION PROGRAM; VETERANS' OUTREACH SERVICES PROGRAM; MISCELLANEOUS AMENDMENTS TO VETERANS' AND DEPENDENTS' EDUCATION PROGRAMS

SEC. 201 (a) Subsection (b) of section 1652 of title 38, United States Code, is amended by adding at the end thereof a new sentence as follows: "Such term also means any curriculum of unit courses or subjects pursued at an educational institution which fulfill requirements for the attainment of more than one predetermined and identified educational, professional, or vocational objective if all the objectives pursued are generally recognized as being reasonably related to a single career field."

(b) Subsection (c) of section 1652 of such title is amended to read as follows:

"(c) The term 'educational institution' means any public or private elementary school, secondary school, vocational school, correspondence school, business school, junior college, teachers' college, college, normal school, professional school, university, or scientific or technical institution, or other institution furnishing education for adults."

SEC. 202. (a) Chapter 34 of title 38, United States Code, is amended by—

(1) striking out "section 1678 of this title" in section 1661(c) and inserting "subchapters V and VI of this chapter";

(2) striking out section 1678; and

(3) adding at the end of chapter 34 the following new subchapters:

"SUBCHAPTER V—SPECIAL ASSISTANCE FOR THE EDUCATIONALLY DISADVANTAGED

"§ 1690. Purpose

"It is the purpose of this subchapter (1) to encourage and assist veterans who have academic deficiencies to attain a high school education or its equivalent and to qualify for and pursue courses of higher education, (2) to encourage and assist institutions of higher education and other educational institutions in the development of programs which provide special instruction, counseling, tutorial, and other educational and supplementary assistance to such veterans, and (3) to encourage and assist institutions of higher education and other educational institutions in the development of special educational programs and projects for such veterans.

"§ 1691. Elementary and secondary education and preparatory educational assistance

"(a) In the case of any eligible veteran who—

"(1) has not received a secondary school diploma (or an equivalency certificate) at the time of his discharge or release from active duty, or

"(2) in order to pursue a program of education for which he would otherwise be eligible, needs refresher courses, deficiency courses, or other preparatory or special educational assistance to qualify for admission to an appropriate educational institution,

the Administrator may, without regard to so much of the provisions of section 1671 as prohibit the enrollment of an eligible veteran in a program of education in which he is already qualified, approve the enrollment of such veteran in an appropriate course or courses or other special educational assistance program.

"(b) The Administrator shall pay to an eligible veteran pursuing a course or courses or program pursuant to subsection (a) of this section, an educational assistance allowance as provided in sections 1681 and 1682 of this title; except that (1) no enrollment in adult evening secondary school courses shall be approved in excess of half-time training as defined pursuant to section 1684 of this title; and (2) whenever enrollment in a special educational assistance program cannot feasibly be measured under section 1684, such a program shall be considered full-time training for purposes of this chapter when a minimum of twenty-five net clock hours per week of instruction or other supervised program work is required, and the Administrator shall prescribe the instruction or other work requirements for part-time training for any special educational assistance program.

"§ 1692. Special supplementary assistance

"In the case of any eligible veteran who is enrolled in and pursuing a course of education at an educational institution and who, because of a deficiency in his education or training, needs one or more refresher courses, counseling, tutorial, or remedial assistance, or some other form of special supplementary assistance in order to successfully pursue such course, the Administrator shall, on behalf of the veteran, reimburse the educational institution concerned the reasonable cost of providing such veteran with such special supplementary assistance. The amounts which shall be paid on behalf of an eligible veteran to any educational institution for special supplementary assistance provided him under this subchapter and the terms and conditions under which such assistance shall be provided shall be prescribed in regulations issued by the Administrator after consultation with the Commissioner of Education, but in no event shall the amounts exceed $100 per month on behalf of an eligible veteran.

"§ 1693. Grants and contracts

"(a) To carry out the purposes of this subchapter, the Administrator is authorized, in accordance with regulations issued by him after consultation with the Commissioner of Education, to make grants to and enter into contracts with institutions of higher education and other educational institutions to encourage and assist such institutions to—

"(1) plan and develop programs or projects in connection with the special educational and supplementary assistance programs authorized to be provided to eligible veterans by sections 1691 and 1692 of this title; and

"(2) plan, develop, strengthen, or conduct other special educational programs or projects for eligible veterans, including, but not limited to—

"(A) accelerated and concentrated educational programs;

"(B) educational programs extending beyond the usual period for completion of the course of study at an educational institution; and

"(C) encouraging and training such veterans to pursue public service occupations to meet community needs.

"(b) To carry out the purposes of this subchapter and those of subchapter IV of chapter 3 of this title, the Administrator is authorized, in accordance with regulations issued by him after consultation with appropriate departments and agencies of the Government referred to in section 242(6) of this title, to make grants to and enter into contracts with public and private non-profit organizations for the purpose of providing the outreach services specified in that subchapter to educationally disadvantaged eligible veterans.

"(c) There are authorized to be appropriated to carry out this section $15,000,000 for the fiscal year ending June 30, 1970, and $30,000,000 for the fiscal year ending June 30, 1971.

"§ 1694. Effect on other benefits and on approval requirements

"(a) The benefits received by or on behalf of any veteran under this subchapter shall be paid without charge to any period of entitlement the veteran may have earned pursuant to section 1661(a) of this title and shall in no way affect his eligibility or qualification for benefits under other provisions of this title or under other provisions of law.

"(b) The provisions of sections 1673(d) and 1675 of this title shall not apply in the case of programs provided under sections 1691(a)(2), 1692, and 1693 of this title.

"SUBCHAPTER VI—PREDISCHARGE EDUCATION PROGRAM

"§ 1695. Purpose; definition

"(a) The purpose of this subchapter is to encourage and assist veterans in preparing for their future education, training, or vocation by providing them with an opportunity to enroll in and pursue a program of education or training prior to their discharge or release from active duty with the Armed Forces. The program provided for under this subchapter shall be known as the Predischarge Education Program (PREP).

"(b) For the purposes of this subchapter, the term 'eligible person' means any person serving on active duty with the Armed Forces who (1) has served on active duty not less than twelve consecutive months, and (2) has twelve months or less active duty service remaining prior to the time he is expected to be discharged or released from active duty, as certified to the Administrator by the Secretary concerned.

"§ 1696. Payment of training and education expenses

"(a) The Administrator shall, under such regulations as he shall prescribe jointly with the Secretary of Defense and the Commissioner of Education, pay the education and training expenses for any eligible person who enrolls in and pursues a course of education or training offered by an educational institution if such course of education or training is required for or preparatory to any progam of education or training or any vocation such eligible person intended to pursue after his discharge or release from active duty with the Armed Forces.

"(b) The education and training expenses which the Administrator shall pay under this subchapter on behalf of any eligible person shall include the cost of determining suitability for enrollment, job placement, and career guidance, and books and supplies furnished to the eligible person by the institution. In no event shall the Administrator pay more than $150 per month for any course of education or training pursued by any eligible person.

"(c) The cost of any education or training course paid for by the Administrator under this subchapter shall be paid directly to the educational institution furnishing such course.

"(d) In no event shall education or training expenses be paid on behalf of any eligible person for any period in excess of twelve months.

"§ 1697. Approved education or training courses and institutions

"The Administrator shall pay the expenses of a course of education or training pursued by an eligible person under this subchapter only if such course and the educational institution providing such course have been approved, without regard to sections 1673(d) and 1675 of this title, by the Administrator in accordance with regulations issued jointly by the Administrator, the Secretary of Defense, and the Commissioner of Education.

"§ 1698. Educational and vocational guidance

"The Administrator shall be responsible for arranging for and coordinating educational and vocational guidance and job placement assistance to persons eligible for education and training under this subchapter.

"§ 1699. Effect on educational entitlement and benefits

"(a) Education and training expenses under this subchapter shall be paid without charge to any period of entitlement an eligible person may earn pursuant to section 1661 (a) of this title.

"(b) No person shall be eligible to receive educational benefits under this subchapter for any period for which he is receiving an educational assistance allowance under subchapter IV of this chapter."

(b) The table of sections at the beginning of chapter 34 of title 38, United States Code, is amended by striking out

"1678. Special training for the educationally disadvantaged.";

and by adding at the end thereof the following:

"SUBCHAPTER V—SPECIAL ASSISTANCE FOR THE EDUCATIONALLY DISADVANTAGED

"1690. Purpose.
"1691. Elementary and secondary education and preparatory educational assistance.
"1692. Special supplementary assistance.
"1693. Grants and contracts.
"1694. Effect on other benefits and on approval requirements.

"SUBCHAPTER VI—PREDISCHARGE EDUCATION PROGRAM

"1695. Purpose; definition.
"1696. Payment of training and education expenses.
"1697. Approved education or training courses and institutions.
"1698. Educational and vocational guidance.
"1699. Effect on educational entitlement and benefits."

(c) Section 1681(a) of such title is amended by inserting ", except subchapter VI," immediately after "this chapter".

SEC. 203. (a) Section 1684(a) of title 38, United States Code, is amended by—

(1) striking out "and" after the semicolon in clause (2); and

(2) striking out clause (3) and inserting in lieu thereof the following:

"(3) an academic high school course requiring sixteen units for a full course shall be considered a full-time course when a minimum of four units per year is required. For the purpose of this paragraph, a unit is defined to be not less than one hundred and twenty sixty-minute hours or their equivalent of study in any subject in one academic year; and

"(4) an institutional undergraduate course offered by a college or university on a quarter- or semester-hour basis for which credit is granted toward a standard college degree shall be considered a full-time course when a minimum of fourteen semester hours or its equivalent is required; except that where such college or university certifies, upon the request of the Administrator, that (A) full-time tuition is charged to all undergraduate students carrying a minimum of less than fourteen semester hours or the equivalent thereof, or (B) all undergraduate students carrying a minimum of less than fourteen semester hours or the equivalent thereof are considered to be pursuing a full-time course for other administrative purposes, then such an institutional undergraduate course offered by such college or university with such minimum number of semester hours, for which credit is granted toward a standard college degree, shall be considered a full-time course, but in the event such minimum number of semester hours under (B) is less than twelve hours or the equivalent thereof, then twelve semester hours or the equivalent thereof shall be considered a full-time course.

Notwithstanding the provisions of clause (4), a veteran shall be considered to be pursuing a full-time course at a junior college, college, or university if (A) he is carrying a number of semester hours, or the equivalent thereof, necessary to be considered a full-time course under clause (3), (B) credit is granted toward a standard college degree for not less than half the number of those hours, and (C) he is carrying one or more courses not paid for under section 1692 of this title and for which no credit is granted toward such a degree but which he is required to take because of a deficiency in his education."

(b) Section 1733(a)(3) of such title is amended to read as follows: "(3) an institutional undergraduate course offered by a college or university on a quarter- or semester-hour basis for which credit is granted toward a standard college degree shall be considered a full-time course when a minimum of fourteen semester hours or its equivalent is required; except that where such college or university certifies, upon the request of the Administrator, that (A) full-time tuition is charged to all undergraduate students carrying a minimum of less than fourteen semester hours or the equivalent thereof, or (B) all undergraduate students carrying a minimum of less than fourteen semester hours or the equivalent thereof are considered to be pursuing a full-time course for other administrative purposes, then such an institutional undergraduate course offered by such a college or university with such minimum number of semester hours, for which credit is granted toward a standard college degree, shall be considered a full-time course, but in the event such minimum number of semester hours under clause (B) is less than twelve hours or the equivalent thereof, then twelve semester hours or the equivalent thereof shall be considered a full-time course."

SEC. 204. (a) Chapter 3 of title 38, United States Code, is amended by adding at the end thereof a new subchapter:

"SUBCHAPTER IV—VETERANS OUTREACH SERVICES PROGRAM

"§ 240. Purpose; definition

"(a) The Congress declares that the outreach services program authorized by this subchapter is for the purpose of insuring that all veterans, especially those who have been recently discharged or released from active military, naval, or air service and those who are eligible for readjustment or other benefits and services under laws administered by the Veterans' Administration and other governmental programs, receive personalized educational, vocational, social services, and job placement assistance in order to aid them in applying for and obtaining such benefits and services, in achieving a rapid social and economic readjustment to civilian life, and in obtaining a higher standard of living for themselves and their dependents. The Congress further declares that the outreach services program authorized by this subchapter is for the purpose of charging the Veterans' Administration with the affirmative duty of seeking out eligible

veterans and eligible dependents and providing them with such services through, to the maximum extent possible, one integrated Federal program which utilizes personnel who are able to communicate with and provide such assistance in the most effective and meaningful manner and which places maximum emphasis upon personal contact.

"(b) For the purposes of this subchapter (1) the term 'other governmental programs' shall include all programs under State or local laws as well as all programs under Federal law other than those authorized by this title, and (2) the term 'eligible dependent' shall mean an 'eligible person' as defined in section 1701(a)(1) of this title.

"§ 241. Veterans assistance centers and outreach services

"(a) The Administrator shall establish and maintain veterans assistance centers at such places throughout the United States, its territories, Commonwealths, and possessions, as he determines to be necessary to carry out the purposes of this subchapter, with due regard for the geographic distribution of veterans recently discharged or released from active military, naval, or air service, the special needs of educationally disadvantaged veterans, and the necessity of providing appropriate outreach services in less populated areas.

"(b) Veterans assistance centers shall seek especially to provide the outreach services provided for in this subchapter to educationally disadvantaged veterans and such centers shall, to the maximum practicable extent, be located in communities where large numbers of those veterans reside rather than in Federal or other business-district office buildings.

"(c) Special efforts shall be made to employ at veterans assistance centers veterans who themselves reside in the community served or in similar communities and, where possible, who themselves have received assistance from such centers. Personnel assigned to such centers shall be selected with major regard to their ability to communicate with and provide the outreach services authorized in this subchapter directly to educationally disadvantaged veterans in the most effective and meaningful manner.

"(d) Those outreach services that the Administrator shall provide to all eligible veterans and eligible dependents shall include, but shall not be limited to, the following:

"(1) The distribution of full information regarding all benefits and services to which they may be entitled under laws administered by the Veterans' Administration and to which they are entitled under other governmental programs, including training and manpower programs.

"(2) Arranging for and conducting, to the maximum extent possible, person-to-person interviews to explain and answer questions regarding the programs referred to in paragraph (1), and planning an individual program of education, training, or employment as may be best suited to the eligible veteran or eligible dependent concerned, and, in the case of an eligible veteran, an individual program which will also aid him in making a rapid social and economic readjustment to civilian life.

"(3) Providing job and other appropriate referrals and job placement assistance when appropriate, undertaking especially to match the particular qualifications of an eligible veteran or eligible dependent with an available job, on-job training opportunity, or apprenticeship opportunity which is commensurate with his qualifications or vocational objectives, and, if every effort to locate such an opportunity in his home area reveals no such opportunity, furnishing him with a listing of such opportunities available in other parts of the Nation.

"(4) Providing social and other special services necessary to aid them in obtaining maximum assistance from the benefits and services to which they are entitled.

"(5) Providing aid and assistance in the preparation and presentation of claims under this title and in connection with any other governmental program.

"(6) Maintaining full records of the outreach services offered and conducting periodic followup checks to determine the success of individual assistance provided and the success of the program generally.

"(e)(1) The Administrator shall pay the reasonable travel expenses, including per diem for food and necessary lodging, of any eligible veteran or eligible dependent in connection with any interview of such veteran or dependent with an employer or training or apprenticeship director where such interview results from services provided through the outreach services program. The amount paid to any veteran or dependent under this paragraph as a per diem allowance and for travel expenses shall not exceed the amount authorized for such purposes under the Standardized Government Travel Regulations.

"(2) The Administrator shall pay a reasonable moving allowance to any eligible veteran or eligible dependent who obtains employment or is placed in a training or apprenticeship program as a result of services provided through the outreach services program, if (A) every effort made to locate suitable employment or placement in a training or apprenticeship program in the veteran's or dependent's home area has revealed no such opportunity, (B) a moving allowance or similar relocation assistance is not available under any other existing Federal program, and (C) a moving allowance is not provided as a matter of established policy by the employer or by the training or apprenticeship program in which the veteran or dependent is to participate. Such allowance may include reasonable travel expenses for the veteran or dependent and dependent members of his immediate family; reasonable expenses for moving his personal effects and household goods; and reasonable expenses for lodging for not more than a two-week period while seeking housing in the new location. In no case may the amount paid for moving the personal effects and household goods of a veteran or dependent exceed the maximum amount authorized to be paid pursuant to regulations issued by the President under section 5724 of title 5, United States Code, in connection with the transfer of an employee of the Federal Government.

"(3) The Administrator shall, after consultation with the Secretary of Labor, prescribe regulations to carry out the provisions of this subsection.

"(f) To the maximum extent possible, the Administrator shall begin providing the outreach services authorized in this subchapter to members of the Armed Forces prior to their discharge or release from active duty. Such services shall be provided such members at Army, Navy, and Air Force installations, especially those in foreign countries, pursuant to the authority of section 231 of this title.

"§ 242. Coordination with Federal and other agencies

"In carrying out the purposes of this subchapter, the Administrator shall—

"(1) utilize the facilities and services of any other Federal department or agency pursuant to proper agreement with the Federal department or agency concerned;

"(2) cooperate with and use the services of any State or local governmental agency or recognized national or other organization;

"(3) where appropriate, make referrals to any Federal department or agency or State or local governmental unit or recognized national or other organization;

"(4) at his discretion, make payment to cover the cost of services either in advance or by way of reimbursement as may be provided by agreement with any such Federal department or agency, State or local governmental unit or other organization;

"(5) at his discretion, furnish available space and office facilities for the use of authorized representatives of such governmental unit or other organization providing services under contract or agreement; and

"(6) conduct studies, in consultation and coordination with the Department of Health, Education, and Welfare, the Office of Economic Opportunity, the Department of Defense, the Department of Labor, the Department of Housing and Urban Development, and the Urban Affairs Council, to determine the most effective program design to carry out the purposes of this subchapter with respect to locating educationally disadvantaged veterans and assisting and motivating them to pursue education and training under this title.

"§ 243. Reports to Congress

"The Administrator shall submit to the Congress not later than September 1 and March 1 each year a report on the activities carried out under this subchapter, each report to include (1) an appraisal of the effectiveness of the programs authorized herein and the degree of cooperation received from other Federal departments, agencies, other governmental programs, and service organizations, with particular reference to section 241(d)(6) and 242(6) of this title, and (2) recommendations for the improvement or more effective administration of such programs."

(b) The table of sections at the beginning of chapter 3 of such title is amended by inserting immediately after

"236. Administrative settlement of tort claims arising in foreign countries."

the following:

"SUBCHAPTER IV—VETERANS OUTREACH SERVICES PROGRAM

"240. Purpose; definition.
"241. Veterans assistance centers and outreach services.
"242. Coordination with Federal and other agencies.
"243. Reports to Congress."

SEC. 205. Section 1677(a)(1) of such title is amended by deleting "or must have satisfactorily completed the number of hours of flight training instruction required for a private pilot's license,".

SEC. 206. Section 1681(d) of title 38, United States Code, is amended by inserting below clause (2) the following: "Notwithstanding the foregoing, the Administrator may pay an educational assistance allowance representing the initial payment of an enrollment period, not exceeding one full month, upon receipt of a certificate of enrollment."

SEC. 207. Section 1712 of title 38, United States Code, is amended by—

(1) deleting in subsection (a)(3) the words "first occurs" immediately preceding "(A)" and inserting in lieu thereof "last occurs"; and

(2) adding at the end thereof a new subsection as follows:

"(e) The term 'first finds' as used in this section means the effective date of the rating or date of notification to the veteran from whom eligibility is derived establishing a service-connected total disability permanent in nature, whichever is more advantageous to the eligible person."

SEC. 208. (a) Chapter 35 of title 38, United States Code, is amended by adding at the end of subchapter VI thereof a new section as follows:

"§ 1763. Notification of eligibility

"The Administrator shall notify the parent or guardian of each eligible person defined in

section 1701(a)(1)(A) of this chapter of the educational assistance available to such person under this chapter. Such notification shall be provided not later than the month in which such eligible person attains his thirteenth birthday or as soon thereafter as feasible."

(b) The table of sections at the beginning of chapter 35 of such title is amended by inserting immediately below

"1762. Nonduplication of benefits."

the following:

"1763. Notification of eligibility."

SEC. 209. Chapter 36 of title 38, United States Code, is amended as follows:

(1) by inserting at the end of section 1772 thereof the following new subsection (c):

"(c) In the case of programs of apprenticeship where—

"(1) the standards have been approved by the Secretary of Labor pursuant to section 50a of title 29 as a national apprenticeship program for operation in more than one State, and

"(2) the training establishment is a carrier directly engaged in interstate commerce which provides such training in more than one State,

the Administrator shall act as a 'State approving agency' as such term is used in section 1683(a)(1) of this title and shall be responsible for the approval of all such programs.";

(2) by deleting section 1781 of subchapter II in its entirety and inserting in lieu thereof the following:

"§ 1781. Limitations on educational assistance

"No educational allowance or special training allowance granted under chapter 34 or 35 of this title shall be paid to any eligible person (1) who is on active duty and is pursuing a course of education which is being paid for by the Armed Forces (or by the Department of Health, Education, and Welfare in the case of the Public Health Service); or (2) who is attending a course of education or training paid for under the Government Employees' Training Act and whose full salary is being paid to him while so training."; and

(3) by deleting in the table of sections at the beginning of such chapter the following:

"1781. Nonduplication of benefits."

and inserting in lieu thereof the following:

"1781. Limitations on educational assistance."

SEC. 210. The amendments made by this title shall become effective on the first day of the second calendar month which begins after the date of enactment of this Act, except that the amendments made by section 208 shall become effective July 1, 1970.

Amend the title so as to read: "An Act to amend title 38, United States Code, to increase the rates of vocational rehabilitation, and special training assistance allowances paid to eligible veterans and eligible persons under such title; to improve the flight training and farm cooperative programs; to provide educational assistance to veterans attending elementary school; to provide special assistance to educationally disadvantaged veterans; to provide for a predischarge education program and a veterans' outreach services program; to reduce under certain circumstances the number of semester hours that a veteran must carry in an institutional undergraduate college course in order to qualify for a full-time educational assistance allowance; and for other purposes."

Mr. TEAGUE of Texas (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

MOTION OFFERED BY MR. TEAGUE OF TEXAS

Mr. TEAGUE of Texas. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. TEAGUE of Texas moves that the House concur in the Senate amendments with an amendment, as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Veterans Educational Amendments of 1969".

TITLE I—INCREASE IN EDUCATIONAL AND VOCATIONAL REHABILITATION SUBSISTENCE ALLOWANCES

SEC. 101. Section 1504(b) of title 38, United States Code, is amended to read as follows:

"(b) The subsistence allowance of a veteran-trainee is to be determined in accordance with the following table, and shall be the monthly amount shown in column II, III, or IV (whichever is applicable as determined by the veteran's dependency status) opposite the appropriate type of training as specified in column I:

"Column I	Column II	Column III	Column IV
Type of training	No dependents	One dependent	Two or more dependents
Institutional:			
Full time	$130	$176	$205
Three-quarter time	95	130	153
Half time	65	89	100
Institutional on-farm, apprentice, or other on-job training: Full time	113	148	176

Where any full-time trainee has more than two dependents and is not eligible to receive additional compensation as provided by section 315 or section 335 (whichever is applicable) of this title, the subsistence allowance prescribed in Column IV of the foregoing table shall be increased by an additional $6 per month for each dependent in excess of two."

SEC. 102. Section 1677(b) of title 38, United States Code, is amended by striking out in the last sentence thereof "$130" and inserting in lieu thereof "$170".

SEC. 103. (a) The table (prescribing educational assistance allowance rates for eligible veterans pursuing educational programs on half-time or more basis) contained in paragraph (1) of section 1682(a) of title 38, United States Code, is amended to read as follows:

"Column I	Column II	Column III	Column IV	Column V
Type of program	No dependents	One dependent	Two dependents	More than two dependents
				The amount in column IV, plus the following for each dependent in excess of two
Institutional:				
Full-time	$170	$200	$225	$13
Three-quarter-time	125	149	174	10
Half-time	79	97	110	7
Cooperative	138	162	187	10".

(b) Section 1682(b) of such title is amended by striking out "$130" and inserting in lieu thereof "$170".

(c) Section 1682(c)(2) of such title is amended by striking out "$130" and inserting in lieu thereof "$170".

(d) The table contained in section 1682(d)(2) of such title is amended to read as follows:

"Column I	Column II	Column III	Column IV	Column V
Basis	No dependents	One dependent	Two dependents	More than two dependents
				The amount in Column IV, plus the following for each dependent in excess of two:
Full time	$138	$162	$187	$10
Three-quarter time	99	117	136	7
Half-time	66	78	91	4".

(e) The table (prescribing educational allowance rates for eligible veterans pursuing an apprenticeship or other on-job training) contained in section 1683(b) of such title is amended to read as follows:

"Periods of training	No dependents	One dependent	Two or more dependents
First 6 months	$105	$117	$129
Second 6 months	79	91	103
Third 6 months	53	65	78
Fourth and any succeeding 6-month periods	27	39	52".

SEC. 104. (a) Section 1732(a) of title 38, United States Code, is amended to read as follows:

"(a)(1) The educational assistance allowance on behalf of an eligible person who is pursuing a program of education consisting of institutional courses shall be computed at the rate of (A) $170 per month if pursued on a full-time basis, (B) $125 per month if pursued on a three-quarter-time basis, and (C) $79 per month if pursued on a half-time basis.

"(2) The educational assistance allowance on behalf of an eligible person pursuing a program of education on less than a half-time basis shall be computed at the rate of (A) the established charges for tuition and fees which the institution requires other individuals enrolled in the same program to pay, or (B) $170 per month for a full-time course, whichever is the lesser."

(b) Section 1732(b) of such title is amended by striking out "$105" and inserting in lieu thereof "$138".

(c) Section 1732 of such title is further amended by deleting subsection (c).

(d) Section 1742(a) of such title is amended to read as follows:

"(a) While the eligible person is enrolled in and pursuing a full-time course of special restorative training, the parent or guardian shall be entitled to receive on his behalf a special training allowance computed at the basic rate of $170 per month. If the charges for tuition and fees applicable to any such course are more than $54 per calendar month the basic monthly allowance may be increased by the amount that such charges exceed $54 a month, upon election by the parent or guardian of the eligible person to have such person's period of entitlement reduced by one day for each $5.60 that the special training allowance paid exceeds the basic monthly allowance."

TITLE II—MISCELLANEOUS AMENDMENTS TO VETERANS' AND DEPENDENTS' EDUCATION PROGRAMS

SEC. 201. (a) Subsection (b) of section 1652 of title 38, United States Code, is amended by adding at the end thereof a new sentence as follows: "Such term also means

any curriculum of unit courses or subjects pursued at an educational institution which fulfill requirements for the attainment of more than one predetermined and identified educational, professional, or vocational objective if all the objectives pursued are generally recognized as being reasonably related to a single career field."

(b) Subsection (c) of section 1652 of such title is amended to read as follows:

"(c) The term 'educational institution' means any public or private elementary school, secondary school, vocational school, correspondence school, business school, junior college, teachers' college, college, normal school, professional school, university, or scientific or technical institution, or other institution furnishing education for adults."

SEC. 202. (a) Section 1673(a) of title 38, United States Code, is amended to read as follows:

"(a) The Administrator shall not approve the enrollment of an eligible veteran in—

"(1) any (A) bartending course, or personality development course, or (B) any sales or sales management course which does not provide specialized training within a specific vocational field; or

"(2) any type of course which the Administrator finds to be avocational or recreational in character unless the veteran submits justification showing that the course will be of bona fide use in the pursuit of his present or contemplated business or occupation."

(b) Section 1673 of such title is further amended by adding at the end thereof a new subsection as follows:

"(e) The Administrator shall not approve the enrollment of any eligible veteran in an apprentice or other on the job training program where he finds that by reason of prior training or experience such veteran is performing or is capable of performing the job operations of his objective at the same performance level as the journeyman in the occupation."

SEC. 203. (a) Subsection (a) of section 1677 of title 38, United States Code, is amended by striking out the material preceding clause (1), and inserting in lieu thereof the following:

"(a) The Administrator may approve the pursuit by an eligible veteran of flight training where such training is generally accepted as necessary for the attainment of a recognized vocational objective in the field of aviation or where generally recognized as ancillary to the pursuit of a vocational endeavor other than aviation, subject to the following conditions:".

(b) Section 1677(a)(1) of such title is amended by deleting "or must have satisfactorily completed the number of hours of flight training instruction required for a private pilot's license,".

SEC. 204. Section 1681(d) of title 38, United States Code, is amended by inserting below clause (2) the following: "Notwithstanding the foregoing, the Administrator may pay an educational assistance allowance representing the initial payment of an enrollment period, not exceeding one full month, upon receipt of a certificate of enrollment."

SEC. 205. Section 1682 of title 38, United States Code, is amended by adding at the end thereof a new subsection as follows:

"(e) If a program of education is pursued by an eligible veteran at an institution located in the Republic of the Philippines, the educational assistance allowance computed for such veteran under this section shall be paid at a rate in Philippine pesos equivalent to $0.50 for each dollar."

SEC. 206. Section 1684(a) of title 38, United States Code, is amended by—

(a) striking out "and" after the semicolon in clause (2);

(b) inserting at the end of clause (3) thereof the following:

"Notwithstanding the provisions of clause (3), a veteran shall be considered to be pursuing a full-time course at a junior college, college, or university if (A) he is carrying a number of semester hours, or the equivalent thereof, necessary to be considered a full-time course under clause (3), (B) credit is granted toward a standard college degree for not less than half the number of those hours, and (C) he is carrying one or more courses for which no credit is granted toward such a degree but which he is required to take because of a deficiency in his education; and"; and

(c) adding at the end thereof a new clause (4) as follows:

"(4) an academic high school course requiring sixteen units for a full course shall be considered a full-time course when a minimum of four units per year is required. For the purpose of this clause, a unit is defined to be not less than one hundred and twenty sixty-minute hours or their equivalent of study in any subject in one academic year."

SEC. 207. Section 1712 of title 38, United States Code, is amended by—

(a) deleting in subsection (a)(3) the words "first occurs" immediately preceding "(A)" and inserting in lieu thereof "last occurs"; and

(b) adding at the end thereof a new subsection as follows:

"(c) The term 'first finds' as used in this section means the effective date of the rating or date of notification to the veteran from whom eligibility is devised establishing a service-connected total disability permanent in nature, whichever is more advantageous to the eligible person."

SEC. 208. Section 1723(a) of title 38, United States Code, is amended to read as follows:

"(a) The Administrator shall not approve the enrollment of an eligible person in—

"(1) any (A) bartending course, or personality development course, or (B) any sales or sales management course which does not provide specialized training within a specific vocational field; or

"(2) any type of course which the Administrator finds to be avocational or recreational in character unless the eligible person submits justification showing that the course will be of bona fide use in the pursuit of his present or contemplated business or occupation."

SEC. 209. Section 1732 of title 38, United States Code, is amended by adding at the end thereof a new subsection (d) as follows:

"(d) If a program of education is pursued by an eligible person at an institution located in the Republic of the Philippines, the educational assistance allowance computed for such person under this section shall be paid at a rate in Philippine pesos equivalent to $0.50 for each dollar."

SEC. 210. Section 1772 of title 38, United States Code, is amended by adding at the end thereof a new subsection (c) as follows:

"(c) In the case of programs of apprenticeship where—

"(1) the standards have been approved by the Secretary of Labor pursuant to section 50a of title 29 as a national apprenticeship program for operation in more than one State, and

"(2) the training establishment is a carrier directly engaged in interstate commerce which provides such training in more than one State,

the Administrator shall act as a 'State approving agency' as such term is used in section 1683(a)(1) of this title and shall be responsible for the approval of all such programs."

SEC. 211. Chapter 36 of title 38, United States Code, is amended as follows:

(a) by deleting section 1781 of subchapter 11 in its entirety and inserting in lieu thereof the following:

"§ 1781. Limitations on educational assistance

"No educational allowance or special training allowance granted under chapter 34 or 35 of this title shall be paid to any eligible person (1) who is on active duty and is pursuing a course of education which is being paid for by the Armed Forces (or by the Department of Health, Education, and Welfare in the case of the Public Health Service); or (2) who is attending a course of education or training paid for under the Government Employees' Training Act and whose full salary is being paid to him while so training."; and

(b) by deleting in the table of sections at the beginning of such chapter the following:

"1781. Nonduplication of benefits."

and inserting in lieu thereof the following:

"1781. Limitations on educational assistance."

SEC. 212. (a) Section 504 of the Act of October 15, 1968, entitled "An Act to amend the Public Health Service Act so as to extend and improve the provisions relating to regional medical programs, to extend the authorization of grants for health of migratory agricultural workers, to provide for specialized facilities for alcoholics and narcotic addicts, and for other purposes" is hereby repealed.

(b) Section 506 of the Act of October 16, 1968, entitled "An Act to amend the Higher Education Act of 1965, the National Defense Education Act of 1958, the National Vocational Student Loan Insurance Act of 1965, the Higher Education Facilities Act of 1963, and related Acts" is hereby repealed.

TITLE III—EFFECTIVE DATE

SEC. 301. The amendments made by this Act shall become effective on the first day of the second calendar month which begins after the date of the enactment of this Act.

Amend the title so as to read as follows: "To amend chapters 31, 34, and 35 of title 38, United States Code, in order to increase the rates of vocational rehabilitation, educational assistance, and special training allowance paid to eligible veterans and persons under such chapters; to amend chapters 34, 35, and 36 of such title to make certain improvements in the educational programs for eligible veterans and dependents; and for other purposes."

Mr. TEAGUE of Texas (during the reading). Mr. Speaker, I ask unanimous consent that the amendment to the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. TEAGUE of Texas. Mr. Speaker, the motion which I have made preserves the integrity of the House action while at the same time offering a real basis for compromise with the Senate on a reasonable proposal which will do justice and equity to those involved. I have proposed a slight increase in the rates which now amount to more than a 31.8-percent increase for those taking training under the so-called GI bill of rights and approximately 17 percent for those under the vocational rehabilitation program which have their educational costs paid. I hope that speedy concurrence can be had in the other body and that we can send this proposal to the White House so that the beneficiaries may have this increase at the earliest possible time.

I include the following comparative tabulation:

COMPARATIVE PRINT OF H.R. 11959 AS PASSED HOUSE; H.R. 11959 AS PASSED SENATE; HOUSE SUBSTITUTE AMENDMENT; AND CURRENT LAW

Provision	House-passed version	Senate-passed version	House substitute amendment	Present law
Vocational rehabilitation subsistence rates:

Rates	1st day of 2d calendar month beginning after date of enactment.			Sept. 1, 1969			1st day of 2d calendar month beginning after date of enactment.			Not applicable.		
Notification of children's eligibility	Not applicable			July 1, 1970			No provision			Do.		
All other provisions	1st day of 2d calendar month beginning after date of enactment.			1st day of 2d calendar month beginning after date of enactment.			1st day of 2d calendar month beginning after date of enactment.			Do.		
Farm cooperative: Savings clause	Not applicable			Provision made			No provision			Do.		
Total first Year Cost	($208 million)			($400 million)			($226.25 million)					

Note: (1) H.R. 6808 was passed by the House of Representatives May 19, 1969.
(2) The costs of all itmes through the War orphans, widows and wives education rates column are costed on a first-year basis and therefore are not identical with those shown for fiscal year 1970 on page 69 of Senate Report No. 91-487. All items below that category are for fiscal year 1970 and reflect an effective date of January 1, 1970.

[1] These provisions were contained only in H.R. 6808 as passed by the House and were not included in either the House or Senate passed version of H.R. 11959. The savings which would result from inclusion of the Philippine "peso rate" formula are not reflected in the total first-year cost figures on H.R. 11959, except in the House substitute amendment.

Mr. Speaker, as chairman of the House Veterans' Affairs Committee, I have tried to cooperate with the administration on veterans matters. I fully understand the President's desire to balance the budget and I, too, recognize that the taxpayers cannot make an unlimited commitment to veterans programs. I think my record of responsibility in this field is sufficient evidence to establish my own concern. I have tried to understand the administration's position that the Senate approved 46 percent increase in educational benefits for returning Vietnam veterans was more than the administration wanted, and I understand the Senate has been advised of the possibility of a Presidential veto. It is in an effort to cooperate and avoid a veto that has led me to insist on the House rates with only a small increase, and send this bill back to the Senate.

I should add that the Senate approval of 46 percent is completely understandable if one is to accept the President's own words that the Nation must do more to encourage Vietnam veterans in the educational field. Nevertheless, the later plea for restraint was heard, and we are attempting to cooperate with the administration request. I hope the Senate will accept the House bill and the President will sign it.

This acquiesence to the President's request on educational benefits was done in the spirit of cooperation. However, there is absolutely no basis on which I can go along with the administration actions, which if allowed to stand, will wreck the VA hospital program. The administration policies are undermining the veterans medical program to the point of dangerous dilution in quality. The administration has canceled or delayed needed construction. It has denied needed air conditioning. It has refused funds to staff and operate lifesaving modern equipment already purchased and installed that stands idle while sick and dying veterans are denied the innovative care these facilities can provide.

The Veterans' Administration hospital system has long been considered among the best of Government-operated medical facilities, and this Nation has prided itself in its service to those who have borne the burden of battle. A bipartisan attitude has long prevailed in Congress in the funding of an adequate medical program for America's veterans, and in providing for the educational and housing needs of returning servicemen. We in Congress, of both parties, have always acted in the belief that the finest medical care should be made available to those who served their country in uniform, and especially to those who returned home suffering wounds and service-connected disabilities. The construction program which is being curtailed by the Nixon administration was devised by the Eisenhower administration in cooperation with the Congress.

The present administration has broken that tradition of support for an adequate medical program for our veterans. The actions by the Nixon administration, including the failure of the White House to even respond to urgent pleas to inform the President of the seriousness of the situation, leads me to the irrefutable conclusion that the administration is willing to reduce medical care in VA hospitals to a second class status and to ignore the medical and other pressing needs of returning Vietnam veterans. We are told this is a part of the war on inflation. I take the position that the Vietnam veteran has contributed enough when he fights the shooting war and that he should not be expected to fight the inflation war too, at the expense of his health.

I have sought, through the usual channels and through a personal call to the White House, to bring to the attention of the President the deterioration and serious crisis of the VA medical care program. An earlier effort—a letter to the President of November 18—received a perfunctory acknowledgement, and my latest and most persistent plea, a personal telephone call to the White House requesting a meeting with the President to discuss the problem, has not been acknowledged.

I have waited for a week since the request for a meeting was made. That is sufficient time.

Under present budgetary and personnel ceiling policies of the Nixon administration, the entire VA hospital system faces a very grave crisis. This Congress, recognizing the need, repealed the personnel ceiling, but the administration reimposed it administratively. We are told now that the Bureau of the Budget has approved some additional positions for the VA, but many of these had to be allocated to the offices that administer other benefits. There is also the question as to whether extra funds to support these positions are being allotted.

The modest increase in appropriations for the Veterans' Administration this year was mostly eaten up by pay raises for personnel, and sufficient funds are not being made available for increased costs and increased medical needs combined with the greater demand for these services by the returning Vietnam servicemen.

The present staff-patient ratio throughout the VA hospital system is only 1.5 staff to each patient in general medical hospitals and less than one per patient in psychiatric hospitals. This compares unfavorably with the national staff ratio of 2.72 staff for each patient in general medical communities, State and local government hospitals, and three staff per patient in university and teaching hospitals.

The fiscal 1970 budget submitted by the outgoing administration provided for 4,000 additional medical personnel. Even this number would not have been sufficient to bring the staff-patient ratio to a desirable level, but it would have permitted staffing of the modern equipment in various intensive care units. The Nixon administration cut this request, reduced the budget, and now many of these innovative treatment facilities remain idle, even though Congress restored most of the funds.

The restrictions of the administration have caused some hospital wards and beds to be closed. The Nixon administration veteran policies have brought a curtailment in some hospitals of nursing care programs, a reduction in outpatient drug programs, deferral of medical equipment purchases, deferral of maintenance, reduction in food allowances, decreases in research and—worst of all—lack of sufficient personnel to properly staff hospitals and treat our veterans.

Certainly these administration actions are inconsistent with their words. The administration spokesmen say the Nation faces a medical crisis, and point to the extreme shortage of trained medical personnel. The VA hospital system is the world's largest training system for just those personnel, and the original budget included funds for the expansion of the VA education program in the medical field. Mr. Nixon cut these out. Congress has restored them, and it remains to be seen whether the administration will permit their use. And, if the administration is really serious about training other medical personnel, the VA system can provide the most economical avenue to do just that, and train them adequately.

I do not intend to sit idly by and allow the shortsighted attitude of the administration to destroy a medical program that is not only needed, but absolutely necessary, to give adequate care to veterans.

We cannot in good conscience permit the medical care of our veterans to deteriorate into a second-class operation, and unless the direction is reversed, it is about to do just that under the Nixon administration.

My committee is in the process of accumulating the details of the effects of fund reductions on the various hospitals and I expect to make this information available to Members of the House. A Senate committee is holding hearings now and receiving testimony that underscores the concern I have expressed here. I dislike resorting to reciting detailed cases involving individuals who may not have received the best treatment as a way of demonstrating the conditions that exist, but I certainly will do so if it becomes necessary.

There is not the slightest doubt in my mind that the American public expects its injured servicemen to receive the very best quality medical care and I think the American taxpayer will bear this burden with the same dignity that our soldiers bear the battle, and I serve notice here and now that I intend to exert every effort to bring these facts before President Nixon and his administration, and continue to insist that these obligations be met.

The correspondence referred to follows:

NOVEMBER 18, 1969.

The PRESIDENT,
The White House
Washington, D.C.

DEAR MR. PRESIDENT: On Veterans Day I visited the Washington Veterans Administration Hospital and was pleased to learn that you and Mrs. Nixon had toured some of the wards and greeted many of the patients earlier in the day. I am sure this was a thrilling experience for these patients to have an opportunity to meet their President and America's First Lady.

I am certain, Mr. President, that you were

as impressed as I with this most modern medical facility. The physical plant, which has been immaculately maintained since it was dedicated over four and a half years ago, ranks with the best of our nation's medical facilities. The competence and dedication of the hospital staff is likewise outstanding.

However, Mr. President, under present budgetary and personnel ceiling policies, the Washington VA hospital, like almost every other of the 165 in the VA system is facing a grave crisis. This may not be apparent from a brief Veterans Day visit; but the Veterans Administration is being compelled to attempt to operate a first-class medical care program for America's sick and disabled veterans on a second-class budget and with inadequate and arbitrary personnel limitations.

For example, the Washington VA hospital, which we both visited last Tuesday, is operating with about half the hospital staff of comparable private sector hospitals. Consider these comparisons—

The Washington VA hospital has a staff of 1.48 to each patient.

The current ratio throughout the VA hospital system approximates 1.5 staff to each patient for general medical hospitals and 0.93 for psychiatric hospitals.

Several hundred yards away from the Washington VA hospital is a comparable District of Columbia community medical facility with a staff of 3.3 to each patient.

The national staffing ratio average in general medical community and state and local government hospitals is 2.72.

Recently this Committee conducted a comprehensive survey on all VA hospitals. The survey on the Washington VA hospital revealed that at a minimum it was over two hundred personnel short. Translating this into the needs of one hospital, if it is to be staffed at a minimal acceptable ratio of 2.0 staff to each patient, the Washington VA hospital needs 14 more physicians, 94 more nurses and nursing attendants, 16 more lab and pharmacy personnel, 64 more medical administrative and supply personnel, 3 more social workers, 2 more inhalation therapists, and 10 more maintenance personnel.

This means, Mr. President, that the Veterans Administration, which operates the largest single hospital system in the world, is being forced to operate with about half the personnel-patient ratio of the other modern hospital systems elsewhere in our nation. To compound this problem, there have been large increases in VA hospital workload factors between fiscal year 1968 and fiscal year 1969 as follows:

Workload items	Fiscal year 1968	Fiscal year 1969	Change from fiscal year 1968
Admissions	670,600	689,459	+18,859
Patients treated	787,871	800,012	+12,141
Outpatient visits	6,563,787	6,947,074	+383,287
Dental examinations and treatments	920,781	960,231	+39,450
Patients receiving new prosthetic appliances	363,365	391,645	+28,280
Clinical laboratory work units	78,538,657	85,017,251	+6,478,594
Prescriptions filled	10,530,716	11,782,365	+1,251,649

Despite these soaring workloads, Mr. President, when the revised budget was submitted to the Congress in April, it contained a recommendation that over 4,000 medical personnel be cut from the budget recommended in January. In addition to modest increases to relieve other personnel shortages, the January budget included staffing for over twenty million dollars of already constructed life-preserving and life-prolonging heart, kidney, blind, and other sorely needed intensive care units which were not performing their life-saving missions because of inadequate staffing. A list of these facilities is attached.

Mr. President, both the House and Senate have rejected most of the unwise budget cuts which the Bureau of the Budget recommended in the April revised budget. Funds have been voted by the Congress for FY 1970 to take a modest step forward to increase medical personnel in VA hospitals; to maintain a modest level of construction and modernization for VA hospital facilities; and to increase VA medical education and research which is so urgently needed to help solve America's health manpower crisis. I fervently hope that your Administration will use all the FY 1970 funds appropriated by the Congress for the Veterans Administration. Otherwise, the VA medical program will fall hopelessly behind in its capability to deliver first-class medical care to America's veterans.

A survey of all VA hospitals conducted by this Committee in June 1969 revealed that in order to bring the 166 hospitals up to a minimal acceptable staffing ratio of 2.0 to each patient for general medical hospitals and 1.0 for psychiatric hospitals, over 28,000 additional hospital personnel were needed. Under present pay scales, this would cost approximately $240 million. I am aware that this cannot be realistically accomplished in one fiscal year—but we must move ahead—and I therefore urge your Administration, in planning its 1971 VA budget, to urgently consider the very grave funding and personnel deficiencies which now exist in the Veterans Administration.

I particularly hope that special attention will be given to adequately funding the medical education program in the Veterans Administration. In my opinion the VA has a vast reservoir of resources to help solve the "massive health crisis" which was the subject of your July 10, 1969 press conference. I had written Secretary Finch about this serious medical manpower problem on February 3, 1969; however, to my knowledge little if anything has been done to even plan for the full utilization of these VA resources despite promises from Secretary Finch that the Department of Health, Education and Welfare and the Veterans Administration would confer on this vital matter. By June 5, 1969, to my knowledge, no conference had been held, so I sent a wire to Secretary Finch reminding him of this Committee's interest in this problem in which he had expressed so much concern.

When Dr. Egeberg was appointed Assistant Secretary for Health and Scientific Affairs in July, by telegram and letter I called his attention to the lack of action by the Department of Health, Education and Welfare on my suggestion. In responding to my communications on July 18th, Dr. Egeberg explained that he would not return to Washington until the end of August but he stated: "When I return I shall be in immediate touch with you and with Mr. Johnson, the Administrator of Veterans Affairs, so that we can look into definitive ways to pursue the objectives you propose and which the Secretary (Finch) and I share. I reiterate my complete agreement with your view that something must be done and done quickly about health manpower, and I look forward to talking with you as soon as possible.

As of today, Mr. President, there has been no further contact with me or any member of my staff by anyone in the Department of Health, Education and Welfare or the Veterans Administration concerning this urgent matter which I consider most vital to our nation's future health needs. I cannot begin to tell you just how frustrating and disappointing, this inaction is to me and my colleagues on this Committee who have been responsible for expanding medical education in the Veterans Administration medical program. In 1968 alone, this VA program trained over 10,000 medical students and thousands of other para-medical personnel. With a little ingenuity and proper funding, this program could do so much more to solve the health needs of America's veterans and all mankind.

Mr. President, I have written to you personally because I believe you should be aware of these urgent problems. I respectfully urge you to instruct those in your Administration who are responsible for recommending funding and personnel ceiling policies for our veterans program to give a much higher priority to the programs of the Veterans Administration in the future. With the added demands of the Vietnam war, if these matters are not given immediate attention, I feel that the quality of our veterans program will rapidly deteriorate to a completely unacceptable level.

Sincerely,

OLIN E. TEAGUE,
Chairman.

THE WHITE HOUSE,
Washington, November 20, 1969.

Hon. OLIN E. TEAGUE,
Chairman, Committee on Veterans' Affairs, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: I want to acknowledge receipt of your letter of November 18 to the President detailing the Committee survey on the status of Veterans Administration facilities.

You may be assured that your letter and its careful analysis of this matter will be called to the President's prompt attention and we will be in further contact with you shortly.

With cordial regard.

Sincerely,

WILLIAM E. TIMMONS,
Deputy Assistant to the President.

THE WHITE HOUSE,
Washington, November 24, 1969.

Hon. OLIN E. TEAGUE,
Chairman, Committee on Veterans' Affairs, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: This is in further response to your November 18 letter to the President and to assure you that the information you forwarded will be of assistance as work progresses on preparation of the Fiscal Year 1971 budget.

I have also been asked to let you know that both Dr. H. Martin Engle and Dr. Roger O. Egeberg will be in touch with you to discuss further the man-power training program in which you and your Committee are vitally interested.

With cordial regard.

Sincerely,

WILLIAM E. TIMMONS,
Deputy Assistant to the President.

Mr. BROWN of California. Mr. Speaker, I am happy to see progress here today moving H.R. 11959 toward final enactment. This bill originated in the Education and Training Subcommittee. I am honored to serve as chairman of that subcommittee and wish to express appreciation to my colleagues who are members: Hon. THADDEUS J. DULSKI, Hon. WALTER S. BARING, Hon. W. J. BRYAN DORN, Hon. HENRY HELSTOSKI, Hon. ROMAN C. PUCINSKI, Hon. DON EDWARDS, Hon. EDWARD R. ROYBAL, Hon. SHIRLEY CHISHOLM, Hon. SEYMOUR HALPERN, Hon. JOHN J. DUNCAN, Hon. WILLIAM H. AYRES, Hon. WILLIAM LLOYD SCOTT, Hon. JOHN M. ZWACH, and Hon. ROBERT V. DENNEY.

This bill, H.R. 11959, combines most of the provisions of another bill which our subcommittee reported earlier in the year—H.R. 6808. The Senate merged the

two bills, and there are no basic disagreements between the House and Senate on the major provisions of H.R. 6808. This is the bill that will eliminate the bar against duplicate education payments; that is, it will permit a veteran to receive his educational training allowance and at the same time receive the benefits of other Federal scholarship payments for which he may qualify.

Another provision of H.R. 6808 combined into this bill would redefine the amount of training required for veterans pursuing an accelerated high school course. We have all been greatly concerned about the large number of veterans who have not completed high school and who are not taking advantage of this bill to complete their high school education.

Last year we passed a law which provides that high school training will not be charged against a veteran's entitlement. In other words, he may receive benefits but not use up his entitlement. This bill extends this provision to veterans in elementary level education.

With this provision already in law, the provision of this bill which redefines full-time and part-time loads for high school training is of great importance. Under the present requirement of law, a veteran must attend accelerated high school classes 12½ hours a week to qualify for a full-time allowance. This is excessive since most of these individuals must work full time to support themselves and their families.

Under the provisions of this bill, high school training will be defined on a basis of credits or units similar to the method used for regular high school students. Therefore, two units would be considered as half-time training and on the accelerated basis the veteran would be required to attend only 6 to 8 hours a week and would receive a half-time allowance which under this bill would be $85 for a single man and $100 for a married man. This changed provision will create financial support and, I believe, will make possible the finishing of high school by a great many veterans.

The amendments which we have approved here today will raise education and training allowances about 31 percent. The allowance for a full-time single veteran will be $170 a month and for a married veteran $200 a month. Comparable allowances would be paid for part-time training.

The Senate passed a greater percentage increase, more in line with my own position that I would like to see veterans receive as generous allowances as we can provide. At the same time, I share the concern of the chairman growing out of the President's implied veto threat. We are in a dilemma. We want the highest rate possible for veterans but we do not want a vetoed bill.

The Senate added several other provisions which are of great interest to me. These are the outreach programs, the predischarge program for servicemen, and the program of assistance to educationally disadvantaged. If these proposals are not included in the final version adopted by Congress, I am anxious for my subcommittee to study them intensively. As a cosponsor of H.R. 11959, I am happy to see progress in the House. I hope that differences with the Senate may be reconciled soon and that increased assistance can be signed into law.

The SPEAKER. The question is on the motion offered by the gentleman from Texas.

The motion was agreed to.

The Senate amendments, as amended, were concurred in.

A motion to reconsider was laid on the table.

COAST GUARD RESERVE

Mr. GARMATZ. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 13716) to improve and clarify certain laws affecting the Coast Guard Reserve.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

The Clerk read the bill, as follows:

H.R. 13716

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title 14, United States Code, is amended as follows:

(1) Subsection (b) of section 762 is amended by striking out the words ", but not above the grade of captain".

(2) Section 770 is amended by striking out the figure "795" in both of the places it appears and inserting in lieu thereof, the figure "798"; by redesignating clause "(9)" as "(10)"; and by adding a new clause "(9)" as follows:

"(9) the 'active duty promotion list' is as defined in section 41a of this title."

(3) Section 772 is amended by inserting before the period in the second sentence of subsection (b) the phrase "or because an excess results directly from the operation of mandatory provisions of this or other laws".

(4) Section 774 is amended to read as follows:

"A Reserve officer must be in an active status to be eligible for consideration for promotion and to be promoted under this subchapter. Officers retained in an active status and excluded from promotion by the provisions of section 787 of this title are not eligible for consideration for promotion."

(5) Section 775 is amended by adding a new subsection (f) to read as follows:

"(f) Whenever a selection board is convened to consider officers of the Women's Reserve not serving on active duty, membership of the board shall include, when reasonably available, not less than two members of the Women's Reserve not serving on active duty."

(6) Section 780 is amended—

(A) by amending subsections (c) and (d) to read as follows:

"(c) Each selection board, from among those officers whose names are submitted to it as determined by section 783 of this title, shall recommend for promotion to the next high grade:

"(1) those male officers serving in the grade of lieutenant (junior grade) or above whom it considers to be best qualified;

"(2) those male officers serving in the grade of ensign whom it considers to be fully qualified;

"(3) those officers of the Women's Reserve serving in the grade of lieutenant or below whom it considers to be fully qualified; and

"(5) those officers of the Women's Reserve serving in the grade of lieutenant commander or above whom it considers to be best qualified. The recommendation of a selection board shall be based on comparative fitness for the duties to which officers of the Women's Reserve are normally assigned.

"(d) Before convening a board to recommend officers for promotion to any grade above lieutenant (junior grade), the Secretary shall determine the total number of officers to be selected for promotion to that grade. Unless the Secretary takes action pursuant to the provisions of subsection (c) of section 772 of this subchapter, this number shall be equal to the number of vacancies existing in the grade, plus the number of vacancies estimated for the next twelve months, less the number of officers on the promotion list for that grade."

(B) by adding a new subsection (i) to read as follows:

"(i) Vacancies in all grades shall be filled by the combined total of those officers, male and female, who have been selected for promotion. Selection opportunity for officers of the Women's Reserve to grades above lieutenant commander shall be equivalent to that prescribed for male officers of the same grades. Officers of the Women's Reserve being considered for promotion to the grades of lieutenant commander or below shall be considered and selected in their order of precedence up to the number designated to be selected."

(7) Section 781 is amended to read as follows:

"Officers of the Reserve shall have rank and take precedence in their respective grades among themselves and with officers of the same grade on the active duty promotion list and the permanent commissioned teaching staff in accordance with the dates of rank as stated in their commissions. When Reserve officers and officers on the active duty promotion list or the permanent commissioned teaching staff have the same date of rank in a grade, such officer shall take precedence as determined by the Secretary.

(8) Section 782 is amended—

(A) by amending subsection (a) to read as follows:

"(a) Each officer of the Reserve in an active status not on the active duty promotion list shall be assigned a running mate who shall be the officer of the same grade on the active duty promotion list who is next senior to him in precedence as determined in the manner prescribed in section 781 of this title. Officers who are extra numbers, who have twice failed of selection, or who have not been recommended for continuation under section 289 of this title shall not be assigned as running mates under this section.";

(B) by amending clause (1) of subsection (b) to read as follows:

"(1) If a running mate is promoted from below the promotion zone, is removed from the active duty promotion list, suffers loss of numbers, or fails to qualify for promotion, the new running mate shall be the officer of the same grade on the active duty promotion list who was next senior to the old running mate or if there be no such officer then the most senior officer in that grade on the active duty promotion list. If the old running mate was on a list of selectees for promotion, the new running mate shall be on a list of selectees.";

(C) by amending clause (2) of subsection (b) by striking the words "of the regular Coast Guard, exclusive of extra numbers," and inserting in lieu thereof the words "on the active duty promotion list.";

(D) by amending clause (3) of subsection (b) to read as follows:

"(3) If an officer of the Reserve is considered for promotion at approximately the same time as his running mate and fails of selection, fails to qualify for promotion after selection, or declines an appointment after having been selected for promotion and his running mate is promoted, the new run-

ning mate shall be the next senior officer remaining in the same grade on the active duty promotion list whose name is not on a list of selectees and who is eligible for consideration for promotion.";

(E) by amending clause (4) of subsection (b) to read as follows:

"(4) If an officer of the Reserve was not considered for promotion at approximately the same time as his running mate, and the Reserve officer subsequently is considered and fails of selection or fails to qualify for promotion, such failure shall be deemed to have occurred at the same time as his running mate was considered. His new running mate shall be the next senior officer remaining in the same grade on the active duty promotion list whose name was not on a list of selectees at the time the original running mate was selected.";

(F) by adding a clause (5) to subsection (b) to read as follows:

"(5) In any situation not expressely covered by this subsection or where the assignment of a running mate would result in an inequitable change in precedence, the Secretary may assign an appropriate running mate to effect the intent of this section that no unjust benefit or detriment will result to any officer from the operation of this section.";

(G) by adding a clause (6) to subsection (b) to read as follows:

"(6) A Reserve officer on the active duty promotion list shall become the running mate of all the inactive duty Reserve officers who are junior to him and had a running mate in common with him at the time of his being placed on the active duty promotion list."; and

(H) by adding a subsection (c) to read as follows:

"(c) The Secretary is authorized to adjust, as necessary, the dates of rank of Reserve officers not on active duty so that the dates will correspond with those of the running mates assigned to them in accordance with the provisions of this section. However, the dates of rank of those Reserve officers whose names are on a list of selectees for promotion to the next higher grade at the time of enactment of this subsection, shall not be adjusted until such time as the officers have been promoted. If overpayments of pay and allowances will have resulted from the adjustment of dates of rank, such overpayments shall not be subject to recoupment."

(9) Section 784 is amended by designating the existing section as subsection (a) and by adding a new subsection (b) as follows:

"(b) Notwithstanding any other provision of law, a Reserve rear admiral shall become entitled to the pay and allowances of the upper half for duty performed from the date his running mate becomes so entitled."

(10) Section 787 is amended—

(A) by striking out the first sentence in subsection (a) and inserting in lieu thereof the sentence "Officers of the Women's Reserve in the grades of lieutenant (junior grade) and lieutenant failing of selection for promotion to the next higher grade, and all other Reserve officers after failing of selection for promotion to the next higher grade for a second time, may be retained in or eliminated from an active status in the discretion of the Secretary.";

(B) by striking out the word "Other" in the second sentence and inserting in lieu thereof the word "Those";

(C) by striking out the words between "officers" and "shall" in the second sentence and inserting in lieu thereof the words "who are not retained in an active status"; and

(D) by striking the column heading "Total commissioned service years" and inserting in lieu thereof the heading "Total years of commissioned service".

(11) Section 790 is amended—

(A) by deleting the words "or her" after the word "his";

(B) by deleting the words "in the Regular Coast Guard" after the word "mate";

(C) by deleting the word "Regular" before the words "running mate" in the two places they appear; and

(D) by deleting the words "in the Regular service" after the word "mate" in subsection (a).

(12) Section 791 is amended to read as follows:

"(a) While serving on active duty other than active duty for training, or other than for duty on a board, a Reserve officer shall not be eligible for consideration for promotion or for promotion under the provisions of this subchapter. Such an officer shall be considered for promotion and promoted pursuant to appropriate provisions contained elsewhere in this title. If so promoted, such an officer shall be considered as having been promoted under this subchapter and shall be considered as an extra number in the grade to which promoted for the purpose of grade distribution prescribed in this subchapter and shall not be counted in such distribution until he is released from active duty.

"(b) Notwithstanding provisions of subsection (a) of this section a Reserve officer who, at the time he reports for active duty has been recommended for promotion to the next higher grade under the provisions of this subchapter, shall be promoted to such grade subject to the same conditions as though selected under provisions of law applicable to a Reserve officer serving on active duty.

"(c) A Reserve officer who, at the time he is released from active duty, has been recommended for promotion to the next higher grade under provisions of law applicable to a Reserve officer serving on active duty, shall be promoted to such grade subject to the same conditions as though selected under provisions of this subchapter.

"(d) A failure of selection for promotion to the next higher grade shall be counted for all purposes regardless of whether it occurred under the provisions of this subchapter or under other provisions of law."

(13) The following new sections are added:

"§ 796. Failure of selection for promotion

"(a) A Reserve officer, other than an officer serving in the grade of captain, who is, or is senior to, the junior officer in the promotion zone established for his grade, fails of selection if he is not selected for promotion by the selection board which considered him, or if having been recommended for promotion by the board, his name is thereafter removed from the report of the board by the President.

"(b) An officer shall not be considered to have failed of selection if he was not considered by a selection board because of administrative error. If he is selected by the next succeeding selection board after the error is discovered and is promoted, he shall be given the date of rank and precedence that he would have held if he had been recommended for promotion by the selection board which would have considered him but for the error.

"(c) Those officers of the Women's Reserve in the grades of lieutenant and lieutenant (junior grade) who are junior to the last officer selected by a board pursuant to subsection (i) of section 780 of this title shall not be considered to have failed of selection, and the names of such officers shall be submitted to the next ensuing selection board.

"§ 797. Promotion; acceptance; oath of office

"(a) An officer who has been appointed under the provisions of this subchapter is considered to have accepted such appointment unless delivery of the appointment cannot be effected.

"(b) An officer who has served continuously since he subscribed to the oath of office prescribed in section 3331 of title 5, United States Code, is not required to take a new oath upon his appointment in a higher grade.

"§ 798. Rear admiral; maximum service in grade

"A Reserve rear admiral, unless retained in or removed from an active status under other provisions of law, shall be removed from an active status on the date he completes five years of service in the permanent grade of rear admiral."

SEC. 2. (a) Reserve officers in each grade who have been recommended as qualified for promotion under laws and regulations in effect the day before the effective date of this Act but not promoted to the grade for which they were recommended shall be placed on a list in the order of their precedence, an they shall be promoted as if they had been selected for promotion in the approved report of a selection board convened under the provisions of title 14, United States Code, as amended by this Act.

(b) Reserve officers who have failed of selection for promotion to the next higher grade under laws and regulations in effect the day before the effective date of this Act shall be deemed to have failed of selection for promotion to the next higher grade under the provisions of title 14, United States Code, as amended by this Act.

(c) The enactment of this Act does not terminate the appointment of any officer.

With the following committee amendment:

On page 4, following line 19, insert the following:

"Notwithstanding any other provision of law, Reserve officers shall not lose precedence when transferred from the Reserve promotion list to the actice duty promotion list or vice versa nor shall their dates of rank be changed due to such transfers.

"Reserve officers, when on the active duty promotion list, shall be promoted in the same manner as are other officers on the active duty promotion list regardless of the length of their active duty service."

The committee amendment was agreed to.

Mr. GARMATZ. Mr. Speaker, some 5 years ago, the committee reported and the House enacted a bill to transform the promotion practices of Coast Guard Regulars to conform to that of the other armed services by substituting a best qualified for a fully qualified system. The same problems that justified such a move with respect to the Regulars now exists with respect to Reserves and that is a bulge arising out of the many commissions granted during World War II years.

The present system among the Reserves reduces the opportunity for promotion and has a bad effect on the quality of officer material available from that source.

This bill would provide a system identical with that of the other armed services and identical to that utilized for the Coast Guard Regulars which has proven so effective during the past 5 years.

I strongly urge its enactment.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CALL OF THE HOUSE

Mr. COHELAN. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. ALBERT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 337]

Abbitt	Fulton, Tenn.	Podell
Andrews, Ala.	Fuqua	Powell
Ashley	Giaimo	Purcell
Baring	Goldwater	Reifel
Barrett	Green, Pa.	Rivers
Bolling	Gubser	Rooney, Pa.
Cahill	Hall	St. Onge
Celler	Hanna	Scheuer
Chisholm	Hébert	Sisk
Clay	Kirwan	Skubitz
Conyers	Kluczynski	Taft
Coughlin	Lipscomb	Tunney
Cunningham	Long, La.	Van Deerlin
Dawson	Martin	Whalley
Diggs	Moss	Wiggins
Fascell	Pelly	
Ford, Gerald R.	Pepper	

The SPEAKER. On this rollcall 383 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

CONFERENCE REPORT ON H.R. 15090, DEPARTMENT OF DEFENSE APPROPRIATIONS, 1970

Mr. MAHON. Mr. Speaker, I call up the conference report on the bill (H.R. 15090) making appropriations for the Department of Defense for the fiscal year ending June 30, 1970, and for other purposes, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of December 17, 1969.)

Mr. MAHON. Mr. Speaker, this is the conference report on the Defense appropriation bill for the fiscal year which ends June 30, 1970.

The bill passed the House on December 8, 1969, and passed the other body on December 15, 1969. The conference report provides $69,640,568,000. This is below the House bill by $319,480,000, and is above the Senate bill by $317,912,000.

Mr. Speaker, I ask unanimous consent to revise and extend my remarks, so as to better explain in detail the content of the conference agreement.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. MAHON. Mr. Speaker, the bill is not radically different from the form in which it passed the House. It does provide a cut in defense spending this year of about $3 billion, and does provide a $5,637,632,000 reduction in appropriations. Extensive detail appears in the reports of the two Houses and in the floor debate here on December 8, 1969. A summary of the actions of the two Houses compared with the budget and last year's appropriations follow:

DEFENSE APPROPRIATION BILL, 1970

SUMMARY OF APPROPRIATIONS

Item	1969 appropriation (NOA)	1970 revised budget estimate (NOA)	Passed House	Passed Senate	Conference action	Conference action compared with— 1969 appropriation	Revised budget estimate	House	Senate
Title I, military personnel	$21,427,103,427	21,641,900,000	21,057,200,000	20,831,300,000	20,834,800,000	−592,303,427	−807,100,000	−222,400,000	+3,500,000
Title II, retired military personnel	2,450,000,000	2,735,000,000	2,735,000,000	2,735,000,000	2,735,000,000	+285,000,000			
Title III, operation and maintenance	22,355,818,000	21,792,100,000	20,878,100,000	20,920,441,000	[1] 20,860,100,000	−1,495,718,000	−932,000,000	−18,000,000	−60,341,000
Title IV, procurement	20,619,500,000	20,886,800,000	18,092,148,000	17,454,818,000	17,841,848,000	−2,777,652,000	−3,044,952,000	−250,300,000	+387,030,000
Title V, research development test and evaluation	7,549,828,000	8,222,400,000	7,197,600,000	7,381,097,000	7,368,820,000	−181,008,000	−853,580,000	+171,220,000	−12,277,000
Total	74,402,249,427	75,278,200,000	69,960,048,000	69,322,656,000	69,640,568,000	−4,761,681,427	−5,637,632,000	−319,480,000	+317,912,000
Distribution by organizational component:									
Army	24,473,208,223	23,955,300,000	22,348,000,000	22,109,361,000	[1] 22,134,020,000	−2,339,188,223	−1,821,280,000	−213,980,000	+24,659,000
Navy	20,698,463,204	22,804,000,000	20,809,548,000	20,535,469,000	[1] 20,802,248,000	+103,784,796	−2,001,752,000	−7,300,000	+266,779,000

Defense agencies	1,721,754,000	1,824,466,000	1,707,866,000	1,698,666,000	1,700,666,000	−21,088,000	−123,800,000	−7,200,000	+2,000,000
Retired military personnel	2,450,000,000	2,735,000,000	2,735,000,000	2,735,000,000	2,735,000,000	+285,000,000			
Total	74,402,249,427	75,278,200,000	69,960,048,000	69,322,656,000	69,640,568,000	−4,761,681,427	−5,637,632,000	−319,480,000	+317,912,000

[1] Prior balances transferred to fiscal year 1966.

I would now like to highlight the significant differences between the report of the conferees and the bill as passed by the house.

MILITARY PERSONNEL

With respect to military personnel, the conference report is $222,400,000 below the House bill. This reduction is in consonance with the additional troop withdrawal from Vietnam announced by the President on Monday evening, December 15.

OPERATION AND MAINTENANCE

The conferees agreed to provide for the funding of International Military Headquarters in the Defense appropriation bill rather than in the Foreign Operations appropriation. This supports the position taken in the House version of the Defense bill and is in accord with the budget proposal of the Department of Defense. This arrangement should provide the Department a better management position.

It was agreed that the training of Navy and Air Force helicopter pilots in fixed-wing aircraft was an unnecessary expense. The Army does not follow this practice and the conferees agreed that the Navy and Air Force should discontinue fixed-wing aircraft training for helicopter pilots by December 31, 1970.

PROCUREMENT

The conferees agreed to a Senate reduction of $10,000,000 in the MBT–70 Main Battle Tank program.

The $8,500,000 proposed by the Senate for advance procurement of F–14 fighter aircraft in fiscal year 1971 was deleted. As proposed originally in the House, no funds are provided committing the Congress to the support of production runs of F–14 aircraft. The conferees provided funds for three additional test aircraft in the Navy's R.D.T. & E. appropriation, as proposed by the Senate.

The conferees provided $354,700,000 for the conversion of four Polaris submarines to the Poseidon configuration instead of six conversions as proposed by the House and two conversions, and four related overhauls, as proposed by the Senate.

A total of $110,000,000 was provided in advance procurement funding for new construction of five SSN–688 class high-speed submarines in fiscal year 1971, instead of $90,000,000 for four such submarines as proposed by the Senate.

The Navy was provided a total of $126,300,000 for the MK–48 torpedo program, as proposed by the Senate. This amount is $27,800,000 more than was proposed by the House.

The conferees agreed to the funding of $10,000,000 for the procurement of the Air Force's Short Range Attack Missile—SRAM—as proposed by the Senate.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

The conferees strongly urge the discontinuance of the Army's Project Mallard, an international program for the development of a tactical communications system for the field armies of the four participating countries. It was also agreed that two other communications systems be discontinued.

A total of $8,000,000 was provided for the Navy's Condor air-to-surface missile, and $100,000,000 was provided for the

Underwater Long-range Missile System, both as proposed by the Senate.

The conferees agreed to provide $2,000,000 for the development of the A–X close air support aircraft for the Air Force, as proposed by the Senate.

GENERAL PROVISIONS

The conferees agreed to the language of the House bill with respect to certain payments in connection with international military headquarters. In addition, the conferees adopted the Senate language (a) limiting availability of multiyear appropriations, and (b) prohibiting the use of funds to finance the introduction of U.S. ground combat troops into Laos and Thailand.

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from New York, Mr. Stratton.

Mr. STRATTON. Mr. Speaker, I thank the gentleman from Texas for yielding to me. It was my understanding that the conference report included a reference to the language that appeared earlier in the authorization conference report, and which was also referred to in the defense appropriation bill as it passed the House, with respect to $20 million of the money appropriated for research and development for the Army to be expended exclusively for further research on the use of the Shillelagh antitank missile in an infantry mode, looking toward its possible use in place of the Tow antitank missile, rather than developing two missiles for this purpose.

Mr. Speaker, I do not see this reference in either the section on missiles and aircraft for the Army, or in the R. & D. for the Army, and I wonder if the chairman, the gentleman from Texas, could enlighten me as to the actual decision within the conference committee on that point?

Mr. SIKES. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Florida.

Mr. SIKES. Mr. Speaker, I think I may be able to help clarify this situation for the distinguished gentleman from New York.

This was not an item that was in conference. I believe the gentleman from New York has reference to permissive language that was carried in the Senate report, which would have made it possible for the Shillelagh testing to continue. Since the item was not in controversy and was not before the conference, the language of the Senate report would prevail, and the situation would be the same as set forth in the Senate report.

Mr. STRATTON. It is my understanding that the Senate language in the report on their appropriation bill—and I am not sure of this, but it is my understanding—actually deleted any reference to the expenditure of any funds for this Shillelagh testing, on the ground that there had been specific authorization for that item. But the decision of the authorization conference report was that that item was to come out of the overall research and development funding for the Army. I had been most anxious that any language should not prevail in this conference report that would prevent the Army from carrying out these tests.

If such language were to prevail in the conference report, then the Army would be unable to continue this testing of the Shillelagh, antitank missile in the ground mode, looking toward ultimate savings in the future as a result of having just one missile in the Army for antitank purposes instead of two.

Mr. MAHON. As chairman of the conference, I would say it is my understanding that the Army would be permitted to continue with the testing of the Shillelagh as a weapon for ground forces.

Mr. STRATTON. May I ask the chairman of the committee to say whether it would be his interpretation that these remarks and our interchange here today indicate not only permission to the Army to do this testing, but also the desire of the committee and of the House, if the conference report is adopted, that that testing should continue.

Mr. MAHON. I believe that would be a fair statement.

Mr. MINSHALL. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the gentleman.

Mr. MINSHALL. Mr. Speaker, I would like to point out to my friend, the gentleman from New York, that the Senate report on page 111, at the bottom of the page, talking about the Shillelagh problem says:

> The House bill does not provide funds for this purpose. The committee has no objection to the use of a reasonable amount to investigate the feasibility of this proposal. However, no additional funds have been provided for this purpose. The initiation of a full-scale development program for this proposal is to be considered as a matter of special interest.

Mr. STRATTON. I want to thank my friend, the gentleman from Ohio, for pointing that out. My only query was whether this language permits the Army, in fact encourages the Army, to continue this testing. It was the intention of the authorization conference committee that the Army should take these funds out of the overall research and development funds appropriated to them, and they would decide which other program they wanted to take the money from.

Mr. MINSHALL. I think it is quite clear that that is the intention, that they should go ahead.

Mr. MAHON. I think it would be true that while the committee of conference does not encourage the Army to take such steps, there is nothing to prevent the Army from initiating this kind of step in seeking the concurrence of the appropriate committees.

Mr. STRATTON. Mr. Speaker, I thank the gentleman and appreciate his helping in making this legislative history.

Mr. MINSHALL. Mr. Speaker, I have no further requests for time on this side. I would like to point out that this was a very good conference. I think the position of the House has been well maintained, and I heartily endorse the conference report.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the gentleman.

Mr. YATES. Did the Senate make any changes in the appropriation for Safeguard ABM?

Mr. MAHON. No changes are in the bill. The bill contains over $700 million for the Safeguard ABM program.

Mr. YATES. That is still going forward?

Mr. MAHON. Yes.

Mr. YATES. I thank the gentleman.

Mr. MAHON. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore (Mr. DONOHUE). The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 8: Page 7, line 2, insert: "*Provided*, That not to exceed $142,165,000, in the aggregate of the unobligated balances of appropriations made under this head for prior fiscal years, and subsequently withdrawn under the Act of July 25, 1956 (31 U.S.C. 701), may be restored and transferred to the appropriation account under this head for fiscal year 1966."

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 8 and concur therein.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 10: Page 8, line 20, insert: "*Provided*, That not to exceed $66,000,000, in the aggregate of unobligated balances of appropriations made under this head for prior fiscal years, and subsequently withdrawn under the Act of July 25, 1956 (31 U.S.C. 701), may be restored and transferred to the appropriation account under this head for the fiscal year 1966."

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 10 and concur therein.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 11: Page 9, line 15, insert: ": *Provided*, That not to exceed $2,500,000, in the aggregate of unobligated balances of appropriations made under this head for prior fiscal years, and subsequently withdrawn under the Act of July 25, 1956 (31 U.S.C. 701), may be restored and transferred to the appropriation account under this head for the fiscal year 1966.

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 11 and concur therein.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

Mr. MAHON. Mr. Speaker, I ask unanimous consent that amendments in dis

agreement numbered 20, 22, 24, 26, 27, 29, 31, 33, 34, 36, 38, 40 and 41 be considered en bloc.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read as follows:

Senate amendment No. 20: Page 16, line 3, strike out: "for obligation until June 30, 1972" and insert "until expended."

Senate amendment No. 22: Page 16, line 18, strike out: "for obligation until June 30, 1972" and insert: "until expended."

Senate amendment No. 24: Page 17, line 7, strike out: "for obligation until June 30, 1974" and insert "until expended."

Senate amendment No. 26: Page 18, line 8, strike out: "for obligation until June 30, 1972" and insert: "until expended."

Senate amendment No. 27: Page 18, line 18, strike out: "for obligation until June 30, 1972" and insert: "until expended."

Senate amendment No. 29: Page 19, line 14, strike out: "for obligation until June 30, 1972," and insert: "until expended."

Senate amendment No. 31: Page 20, line 8, strike out: "for obligation until June 30, 1972" and insert: "until expended."

Senate amendment No. 33: Page 20, line 25, strike out: "for obligation until June 30, 1972" and insert "until expended."

Senate amendment No. 34: Page 21, line 14, strike out: "for obligation until June 30, 1972" and insert: "until expended."

Senate amendment No. 36: Page 21, line 25, strike out: "for obligation until June 30, 1971," and insert: "until expended."

Senate amendment No. 38: Page 22, line 7, strike out: "for obligation until June 30, 1971" and insert: "until expended."

Senate amendment No. 40: Page 22, line 15, strike out: "for obligation until June 30, 1971" and insert: "until expended."

Senate amendment No. 41: Page 22, line 25, strike out: "for obligation until June 30, 1971" and insert: "until expended;".

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendments of the Senate numbered 20, 22, 24, 26, 27, 29, 31, 33, 34, 36, 38, 40, and 41 and concur therein.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 43: Page 44, line 9: Strike out:

"SEC. 642. Appropriations heretofore made available for Procurement of Equipment and Missiles, Army; Procurement of Aircraft and Missiles; Navy; Other Procurement, Navy; Procurement, Marine Corps; Aircraft Procurement, Air Force; Missile Procurement, Air Force; Other Procurement, Air Force; and Procurement, Defense Agencies shall not be available for obligation after June 30, 1972. Appropriations heretofore made available for Shipbuilding and Conversion, Navy, shall not be available for obligation after June 30, 1974. Appropriations heretofore made available under the headings Research, Development, Test, and Evaluation, Army; Research, Development, Test and Evaluation, Navy Research, Development, Test, and Evaluation, Air Force; and Research, Development, Test, and Evaluation, Defense Agencies shall not be available for obligation after June 30, 1971.

And insert:

"SEC. 642. (a) Amounts, as determined by the Secretary of Defense and approved by the Director of the Bureau of the Budget, of any appropriations of the Department of Defense available for procurement (except Shipbuilding and Conversion, Navy) which (1) will remain unobligated as of the close of any fiscal year for which estimates are submitted and (2) which have been available for obligation for three or more fiscal years, shall be proposed for rescission.

"(b) Amounts, as determined by the Secretary of Defense and approved by the Director of the Bureau of the Budget, of any appropriations of the Department of Defense available for Shipbuilding which (1) will remain unobligated as of the close of any fiscal year for which estimates are submitted and (2) which have been available for obligation for five or more fiscal years, shall be proposed for rescission.

"(c) Amounts, as determined by the Secretary of Defense and approved by the Director of the Bureau of the Budget, of any appropriations of the Department of Defense available for research, development, test and evaluation (except Emergency Fund, Defense) which (1) will remain unobligated as of the close of any fiscal year for which estimates are submitted and (2) which have been available for obligation for two or more fiscal years, shall be proposed for recission."

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 43 and concur therein.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 44: Page 45, line 23, insert:

"SEC. 643. In line with the expressed intention of the President of the United States, none of the funds appropriated by this Act shall be used to finance the introduction of American ground combat troops into Laos or Thailand."

MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MAHON moves that the House recede from its disagreement to the amendment of the Senate numbered 44 and concur therein.

The motion was agreed to.

A motion to reconsider the vote by which action was taken on the conference report and on the several motions was laid on the table.

GENERAL LEAVE

Mr. MAHON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the Defense appropriation bill, just passed, and I ask unanimous consent that all Members may be permitted to revise and extend their remarks on the conference report in connection with the Defense appropriation bill just passed and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

EXECUTIVE PROTECTIVE SERVICE

Mr. DELANEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 754 and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 754

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R 14944) to authorize an adequate force for the protection of the Executive Mansion and foreign embassies, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Works, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER. The gentleman from New York is recognized for 1 hour.

Mr. DELANEY. Mr. Speaker, I yield 30 minutes to the gentleman from Tennessee (Mr. QUILLEN), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 754 provides an open rule with 1 hour of general debate for consideration of H.R. 14944 to authorize an adequate force for the protection of the Executive Mansion and foreign embassies, and for other purposes.

The purpose of H.R. 14944 is to enable the President to meet his constitutional responsibility to assure to the duly accredited representatives of foreign governments to the United States, at the seat of government, the security of person and property that the laws of this Nation assure to its own citizens.

There are 117 diplomatic missions in Washington, D.C., and the immediately surrounding area. At the present time, the protection of foreign embassies is a responsibility of the Metropolitan Police Department. Over the past 4 years incidents at embassies and crime involving diplomatic personnel have shown a marked increase and the foreign diplomatic corps has constantly complained to the Department of State concerning disturbances, harassment, and the high incidence of crime involving foreign embassies and their employees. Ambassadors and other high diplomatic officials have demanded that the National Government fulfill its obligation to maintain the security of foreign diplomatic missions located in this country.

The demands upon the Metropolitan Police Department in carrying out its citywide responsibilty to the general public for law enforcement and protection are already overwhelming and they cannot provide the necessary protection. The State Department has no security personnel even remotely qualified to meet the needs involved.

The White House Police, who are under the supervision of the Director of the Secret Service, are uniquely qualified by training and the responsibilities already assigned to them under existing

law to meet this need. Their assignment to embassy protection will center responsibility in the Federal Government, where it belongs.

H.R. 14944 will change the name of the White House Police to Executive Protective Service, which more adequately describes the functions already assigned to it as well as the function to be added here. In addition, the legislation will extend the jurisdictional area within which the Service may function to the metropolitan area surrounding the city of Washington itself. Some embassies are already located outside the city limits, and it may reasonably be assumed that other embassies will so locate in the future. To carry out its function, the Service must be able to protect these embassies as well as those located within the city proper.

In order for the Service to adequately carry out its additional authority, the number of personnel assigned to it will be increased from the present 250 to not more than 850.

Mr. Speaker, I urge the adoption of House Resolution 754 in order that H.R. 14944 may be considered.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 754 provides for 1 hour of general debate under an open rule on H.R. 14944. As the gentleman from New York (Mr. DELANEY) has ably stated, the purpose of the bill is to provide increased protection to the foreign diplomatic missions accredited to the President.

There are now 117 diplomatic missions in the Washington area. In the past few years the incidence of crimes involving diplomatic personnel have greatly increased, and this fact has been brought to the personal attention of the President. In response, he has requested this legislation.

The bill reconstitutes the White House Police as the Executive Protective Service. The authorized strength is increased from 250 to 850. The force will continue to be a part of the Department of the Treasury under the direct supervision of the Director of the Secret Service.

The jurisdiction of the Executive Protective Service will extend to the Metropolitan Washington area, where the accredited foreign diplomatic missions are located. Additionally, the President may authorize protection for diplomatic personnel at places outside of Washington, but within the United States, its territories, and possessions on a case-by-case basis as he deems necessary.

The committee report stresses that local police efforts to combat crime and to carry out normal and regular duties in connection with diplomatic personnel are not superseded by this legislation. The bill seeks to insure adequate protection from such events as demonstrations or other large disturbances occurring at or near foreign diplomatic missions. Local police departments throughout the country will continue to be responsible for the protection of consular missions and traveling diplomatic personnel as a normal and regular part of their responsibilities in this field.

There are no minority views. The Department of the Treasury and the Department of State support the legislation.

Mr. Speaker, at this time I yield 10 minutes to the gentleman from Virginia (Mr. BROYHILL).

Mr. BROYHILL of Virginia. Mr. Speaker, I rise in support of the rule and the legislation, H.R. 14944, which it would make in order, which would increase the White House Police force from 250 to 850.

I do so with great reluctance, Mr. Speaker, because I am ashamed as I believe every Member of this House must be ashamed, to have to admit to the world that the Capital City of the United States of America is unsafe.

The strength of our Government and the foreign governments we deal with depends largely on the protection and freedom we provide the leaders of those governments in carrying out their duties. Good government cannot exist if it has to operate in fear or amidst gunfire. It cannot exist if its leaders live in peril or lose their lives by acts of wanton radicals or psychopathic gun toters.

Unfortunately, the legislation we are considering here today does not merely, as the committee report states, assure to the duly accredited representatives of foreign governments to the United States, at the seat of government, the security of person and property that the laws of this Nation assure its own citizens. What it really does is assure the representatives of foreign governments protection it does not and cannot assure the residents of the District of Columbia or any other visitors to the Nation's Capital at this time.

The committee acknowledges that the need for expanding the protective forces for diplomatic officials has arisen because of the marked increase in incidents at embassies and crime involving diplomatic personnel. It hastens to add that the fact that necessary protection cannot be provided here is not an adverse reflection on the Metropolitan Police Department. I emphatically agree. The Metropolitan Police Department is one of the finest and best trained in the country. So why do we not face it, Mr. Speaker. If the Metropolitan Police Department was receiving the full support of the legislative and executive branches of our Government it deserves, we would today simply be adding additional manpower to that Department, if necessary, rather than attempting to build up another department responsible to the Secretary of the Treasury to do the job.

We are told that the expanded force, called the Executive Protective Service, will not be expected to provide full protection for embassy personnel, but that it will supplement protection now provided by the Metropolitan Police Department. There is no question among any of us, I am sure, about the need for additional protection, but this seems to me to be a piecemeal approach which cannot solve the real problem in the Nation's Capital.

I am concerned, Mr. Speaker, that we may, by including the protection of diplomatic personnel in the duties of the force, weaken rather than strengthen the protection we now provide the President of the United States and the Executive family. Where would they draw the line, Mr. Speaker, if riots broke out at several embassies simultaneously throughout the city and suburbs? Would they guarantee that a maximum security force remained at the White House and with the President at all times, or would they, finding all quiet at the White House, make the mistake of leaving it relatively unprotected and vulnerable while the security force was racing into all parts of the city?

I might point out that the Treasury Department expressed the same concern that I am expressing here now during their testimony in hearings conducted by the House Committee on the District of Columbia last year in an effort to solve the same problem we are talking about now. This is the problem of fragmented police protection in the District of Columbia. Do you realize that we have seven police departments operating here? We have the White House Police, the Park Police, the Metropolitan Police, the Capitol Police, the Zoo Police, the Supreme Court Police, and the Airport Police. Last year we considered legislation that would merge the first five police departments I mentioned under one commission appointed by the Congress so that we could coordinate the training and recruiting and services of protection that must be provided by these police departments with particular concern and acknowledgement of the Federal responsibility to provide protection for the foreign embassies as well as our national leaders and the American citizens and the citizens of the District of Columbia. However, here is what the Treasury representative said during those hearings last year on what I say is essentially the same problem.

The White House Police force protects the White House, Executive Offices and grounds, and the President and his immediate family. The Secretary of the Treasury is charged with the supervision of the force and he has delegated his functions to the Director of the Secret Service as it has the statutory responsibility for protection of the Chief Executive and his immediate family.

The responsibilities of the White House Polices are interwoven with those of the Treasury Department and particularly the Secret Service in every aspect of its operation and administration. To fragment the direction and supervision of the existing protective system could compromise the effective coordination of the efforts of the Secret Service and the White House Police to guarantee the physical security of the President of the United States.

The White House Police force is a highly specialized unit whose duties are related to the physical security of the Chief Executive, his family, and certain property as defined by statute. Their responsibilities are not as broad as those of the municipal police force. The officers receive special training from the Secret Service in addition to basic police training. Once on board they work under experienced senior personnel carrying out their functions as a security force under the most trying circumstances.

Mr. Speaker, what has caused the Treasury Department to change its concern about exclusive protection of the President of the United States and the Executive family?

How can we explain to our fellow Americans that we must, by special legislation, protect the occupants of the Russian Embassy, yet have no similar obligation to protect the American tourist who stops at the Statler down the street? Can we urge them to bring their children to visit their Nation's Capital, then tell them that because they are Americans we cannot guarantee them safety while here? Surely if we can protect the "rights" of criminals and killers we can find some means of guarding American citizens as well as our national leaders and those who visit us from foreign lands against their criminal acts.

This bill is an indictment of the Government of the United States, Mr. Speaker. It acknowledges that we are incapable of providing protection under the present system in the District of Columbia, then seeks to insure protection for foreign diplomatic personnel alone by augmenting a force under the executive branch. Every Member of this House must know that it will not provide a lasting solution or even the protection it seeks to provide. And I again say we ought to be ashamed to pass a bill to protect residents of other lands while admitting that we cannot protect Americans in their Nation's Capital.

Mr. QUILLEN. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Iowa (Mr. GROSS).

Mr. GROSS. Mr. Speaker, the gentleman from Virginia (Mr. BROYHILL) has raised some highly interesting questions that deserve to be answered before this debate is over.

Mr. Speaker, I am struck by the fact that the report accompanying the bill contains not a single communication from any agency of the Government in behalf of this bill. The report conforms to the Ramseyer rule, but it does not contain a single recommendation from any department or agency of Government that ought to be interested in what is involved here, and that is the addition of 600 police officers to the Secret Service force, and the cost of this increase.

Now, I wonder if the committee during the consideration of this legislation took into consideration the number of police on the Metropolitan Police force and all the other law enforcement officers in the District of Columbia?

I will put it this way: What is the authorized strength of the Metropolitan Police force? Can the gentleman in charge of this bill, the gentleman from Illinois (Mr. GRAY), give me any information?

Mr. GRAY. Mr. Speaker, will the gentleman from Iowa yield?

Mr. GROSS. Yes, of course, I will yield to the gentleman from Illinois.

Mr. GRAY. Mr. Speaker, there are about 5,000 and there are 800 vacancies now in the District of Columbia Police force, and they are trying desperately to find them, and they are not, and therefore we do not feel we can rely upon the District of Columbia to give them the protection the President wants.

I will be glad to explain this in detail when I speak.

Mr. GROSS. How it is planned to recruit 600 more for the Secret Service for the purpose of policing foreign embassies if the Metropolitan Police force apparently is having difficulty in recruiting up to 5,100 police in the District of Columbia?

Mr. GRAY. Will the gentleman yield further?

Mr. GROSS. I yield to the gentleman from Illinois.

Mr. GRAY. Mr. Speaker, I have a letter here dated December 16, 1969, from the very distinguished Director of the U.S. Secret Service, James J. Riley, who will be in charge of this Executive Protection Service if it is authorized by this act, who says here that the service plans a massive recruitment effort throughout the country, using the facilities of its 70 field offices of the U.S. Secret Service.

We are also considering the suggestion made by the Civil Service Commission to provide for lateral entry of experienced policemen from other cities above the rank of private. Other sources of recruitment will be explored, including the Civil Service Commission, interagency efforts, and recruitment teams which will visit colleges and military transition centers throughout the country.

I would say that, although there are about 800 vacancies on the Metropolitan Police force, I think the attractiveness of being a member of the White House protective force would possibly be more enticing to other people from other parts of the country to come here. And the Chief of the Secret Service felt in his testimony before our committee that he would have no trouble recruiting the 600 additional men.

Mr. GROSS. Will the Secret Service be permitted to recruit in the Southern States?

Mr. GRAY. All over the United States where the Secret Service has 70 field offices, and that certainly does include the South.

Mr. GROSS. The gentleman is aware, is he not, that roadblocks have been thrown up against the Metropolitan Police carrying on recruiting in the Southern States?

Mr. GRAY. Will the gentleman yield further?

Mr. GROSS. What makes the Secret Service police any different than the Metropolitan force? Is the gentleman saying that the pay is going to be better in the Secret Service police force, or that it will have better uniforms and other equipment? What is going to be the attraction that brings recruits to the Secret Service whereas the Metropolitan Police force cannot get them?

Mr. GRAY. Mr. Speaker, will the gentleman yield further?

Mr. GROSS. I yield further to the gentleman from Illinois.

Mr. GRAY. First of all, the salaries will be identical with the District of Columbia Police, but this is not a Secret Service police force. I might have been misunderstood a moment ago. The Chief of the Secret Service will be in charge of the force, but the direct supervision will be the Chief of the White House Police, and the name of the police force will be the Executive Protective Service. We changed it from the White House Police force to the Executive Protective Service in order to avoid any embarrassment on the part of the President if some type of situation developed at one of the embassies, and we did not want anyone to say that it was the President's police there. So we changed the name to the Executive Protective Service, and it will be under the supervision of the Secret Service, but these people will not be hired as Secret Service employees.

Mr. GROSS. I think the gentleman from Illinois will agree with me that one of the things we do best around here is to devise euphemistic titles for bills, and promote many enterprises with the most euphemistic descriptions that we can give them.

Mr. GRAY. If the gentleman will yield further, I am glad we do something well.

Mr. GROSS. That is a dubious accomplishment, I would say to the gentleman, for often it is not only misleading; it is deceiving. I am not saying that is true in this case, necessarily.

Mr. GRAY. The gentleman makes a valid point. There is no question about it.

Mr. GROSS. Let me ask the gentleman this question, since there is not one word in the report about it: What is the cost of this new constabulary?

Mr. GRAY. Mr. Speaker, will the gentleman yield further?

Mr. GROSS. I yield further to the gentleman from Illinois.

Mr. GRAY. Mr. Speaker, in reply to the gentleman from Iowa, I would say that if we do not use any of the District of Columbia Police, and we recruit the entire 600 additional personnel, it would cost approximately $1 million per year. However, the bill would authorize using the District of Columbia Police and the Park Service Police, plus the fact that I want to make this very clear, that if we are now using the total of 600 people to protect the 117 embassies, and so forth, and we relieve them of that responsibility to go back to other District of Columbia duties, if we have a vacancy of 800 we really envision that this change cannot cost anything because if we hire an additional 800 police that is going to cost $1 million.

The SPEAKER pro tempore. The time of the gentleman from Iowa (Mr. GROSS) has expired.

Mr. QUILLEN. Mr. Speaker, I yield 5 additional minutes to the gentleman from Iowa.

Mr. GRAY. Mr. Speaker, will the gentleman yield further?

Mr. GROSS. I yield to the gentleman.

Mr. GRAY. Mr. Speaker, I wanted to point out that if we use the people who are now protecting the embassies for the District of Columbia Police in place of the 800 authorized, there will be no additional cost. But if we do not relieve any

of the District Police, then the total cost of the bill would be a $1 million a year.

But as I said, I am sure when we relieve the people who are now protecting the missions in Washington for the District of Columbia Police, this will preclude the necessity of hiring additional District Police, which as I have said will not cost any additional money.

Mr. GROSS. Is the gentleman saying, "relieve the District Police?"

Mr. GRAY. Yes.

Mr. GROSS. What do you mean by—relieve the District Police?"

Mr. GRAY. If the gentleman will yield further, let me give just a brief explanation.

The gentleman from New York knows of the particular instance that happened down at the Russian Embassy recently where some type of fight or holdup occurred across the street from the Embassy. They had three District Police guarding the Russian Embassy and asked them to come in and intervene. They said, "No, we cannot, we have to stay here."

If we have a protective force in this case, protecting the Russian Embassy, that would relieve those three policemen who are now there for District of Columbia work. Then, as I said, we will not have to hire three additional District Police.

Mr. GROSS. The gentleman does not think for one moment does he, nor can he give the slightest assurance that the Metropolitan Police force will not recruit, if it can find the men, up to the 5,100 police that is their maximum authorized strength? He is not saying that as an attempt to justify these 600 additions to the Secret Service police force?

Mr. BROYHILL of Virginia. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman.

Mr. BROYHILL of Virginia. I want to say first of all, getting back to the question that the gentleman raised first, that the difficulty of recruiting these additional policemen is under the existing law and regulations pursuant to that law, that the recruits come exclusively from the Metropolitan Police Department and the Park Police.

I think under the law they could use the civil service procedures in recruiting. They will have to do that in order to get the additional—what is it—the 500 or 600 additional men they will need, because we cannot get them to work for the Metropolitan Police Department. Because the primary reason being the police department does not have the support of the communities that they are serving.

So possibly by putting them under the Secret Service, these recruits or potential recruits that they will have the support, so to speak, of the people they serve and then they can get to work.

Second, insofar as this being in lieu of the 850 vacancies that they have now, this police force is intended, and the gentleman from Illinois I think will agree with this, to provide additional protection for these embassies and the normal protection that is provided for the rest of the American people, which is not sufficient, so it will have in the final analysis the additional numbers of policemen appointed.

Mr. GRAY. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman.

Mr. GRAY. I want to make the record very clear to my distinguished friend, the gentleman from Virginia, that this is not an additional overlapping force. This is in lieu of the policemen now being employed by the District of Columbia Police Department. This is very clear and the Chief of the Secret Service and those who testified before our committee, and I want to make the record very clear in that respect.

Mr. GROSS. Let me say to the gentleman that I am concerned about the enforcement of law and order in the District of Columbia, including the embassies.

I am not interested in an elite police force to protect the embassies to the exclusion of homes and businesses in the District of Columbia. And I am particularly concerned for the women in the District of Columbia, who are being attacked and raped on the streets by day and night.

This is where we ought to center our first attention—not upon the embassies.

Someone said a while ago that the embassies were moving out of the District of Columbia into the countryside, somewhere beyond the District of Columbia and therefore out of the jurisdiction of the Metropolitan Police force.

Are they actually moving out? If so, why are they moving out? Why? Will this new police force, this new Secret Service police force, be used to protect the International Monetary Fund's new country club just beyond the District of Columbia in Maryland? Are they going to be authorized to wet-nurse members of the new golf and country club for the International Monetary Fund and the World Bank, as well as the embassies? There are a lot of questions in connection with this subject that ought to be answered and more justification than we have had for this bill.

Mr. RARICK. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Louisiana.

Mr. RARICK. I thank the gentleman for yielding. I certainly support the bill. I believe in law and order. I wonder if the gentleman has seen the afternoon Washington Daily News, which carries a front-page story of the nightmares in the District of Columbia schools, and the recently announced plan to station National Guard officers in the various public education facilities in the District of Columbia to protect the children.

I feel we should provide the necessary protection for those at our Nation's Capital conducting business with our Government. As Congressmen, we recognize Washington is intended to be a Federal city, a neutral city, which should be safe for the representatives of our people to meet and legislate for our Nation. Yet, I tell the gentleman that I am unable to live in our Nation's Capital because I happen to be a southerner. I have no feeling of security here in Washington, if anything I feel intimidated by the environment. Yet, I do not find anyone offering me police protection. I support this legislation which I feel is born of necessity, but I question this solution.

I leave this question with my distinguished colleague. Where can it be shown that crime has been effectively controlled by the mere increase in the number of police officers?

Mr. GROSS. I thank the gentleman for his observation. Let me say that we already have more police per capita in the District of Columbia than in any other city in the world, without the addition of 600 to protect the embassies.

Mr. KYL. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Iowa.

Mr. KYL. The authorized strength of the Metropolitan Police force has been 4,100 men. It apparently will be 5,100. At this time there are 3,868 men on the force. Recruiting is easier than it has been.

Mr. GROSS. Whatever it is, I am told that we have more policemen in the District of Columbia per capita than in any other city of the world. Is that disputable?

The SPEAKER pro tempore. The time of the gentleman from Iowa has expired.

Mr. QUILLEN. Mr. Speaker, I have no further requests for time. I reserve the balance of my time.

Mr. DELANEY. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. GRAY. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 14944) to authorize an adequate force for the protection of the Executive Mansion and foreign embassies, and for other purposes.

The SPEAKER pro tempore (Mr. FLYNT). The question is on the motion offered by the gentleman from Illinois.

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 14944, with Mr. DANIELS of New Jersey in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Illinois (Mr. GRAY) will be recognized for 30 minutes, and the gentleman from Florida (Mr. CRAMER) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Illinois, Mr. GRAY.

Mr. GRAY. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, 194 years ago our forefathers met a few miles from Washington to plan the future and destiny of our great country. During this period we have grown to become the greatest and the

most powerful nation on the face of the earth, primarily because we have worked in unison here in this country and because of our friendships abroad, our friendships with the other nations trading with this great country.

Mr. Chairman, there are more diplomatic missions in Washington, D.C., than in any other country of the world. We have a total of 117 foreign governments doing business and operating embassies and chanceries in our Nation's Capital. We are faced today with a great paradox: We have the most beautiful and the most wonderful Capital in the world, but we also have one that is rampant with crime, with the highest crime rate of any place I know of.

Mr. Chairman, it is indeed unfortunate that freedom loving people cannot come to visit and discuss their future and the destinies of the people of this country and around the world without fear of being mugged or robbed or encountering some type of demonstration or burning or other acts of violence.

It was with this feeling that our President, your President, and my President, requested the House Committee on Public Works to establish a separate police force, to be known as the Executive Protective Service, to be able to insure that the people who are representing foreign governments in Washington, D.C., would be protected and that they could go about their business without fear.

That is the sole purpose of the legislation now before us. This would merely change the name of the White House Police force to the Executive Protective Service and simply increase the complement of 250 men to a total of 850, or an increase of 600.

This new force would be under the direct supervision of the very distinguished Director of the U.S. Secret Service, Mr. James Rowley, and the distinguished Chief of the White House Police force.

We have heard a great deal of talk here and discussion under the rule about crime in the District of Columbia. As I said earlier in my remarks, crime is rampant here. There has been a 300-percent increase in crime in Washington in the past 7½ years, but I submit to the Members that this is the responsibility of the Committee on the District of Columbia and of the District of Columbia Police.

I would say to my very distinguished friend, the gentleman from Virginia, if he feels the District of Columbia Police force is not adequate, then that committee should come forth with some additional legislation, as we are doing here. But this bill is for the protection of the embassies, chanceries, and the White House here in the District of Columbia. Our committee has nothing to do with the Metropolitan Police force.

The figure of 5,100 for the District of Columbia Police was given to me by the Appropriations Committee, and that is the most recent authorization. The gentleman from Iowa (Mr. KYL), referred to the figure of 4,100, but that is the old authorization. I merely point that out to indicate that the District of Columbia Police force is enlarging and I hope we can bring some hope of clearing away the clouds of uncertainty about protection in the Nation's Capital and bring back some sunshine and hope and peace to this city of approximately 3 million in the Washington area plus the approximately 18 million who visit here each year of which approximately 3 million are foreign visitors.

To get back to the bill before us, this would say to the President: You have the manpower to establish motorized patrols and you have the manpower to station sentries at our 117 missions, and you have the general authorization under the direction of the Secret Service to go anywhere in the United States to a foreign mission and give protection if there was advance intelligence that there was going to be trouble in one of those missions or embassies in the United States.

The Constitution gives this responsibility to the President. Furthermore, in 1963 all of our chiefs of missions gathered in Vienna, Austria, and they signed a pact. We were a signatory to this pact.

Article 40 of such pact says that the receiving state shall treat consular officers with due respect and shall take all appropriate steps to prevent any attack on their person, freedom, or dignity.

So the President is coming here not only with a personal feeling but also a responsibility to the 117 missions, that we give them the utmost and the ultimate in protection.

As was pointed out in the colloquy I had earlier with the gentleman from Iowa (Mr. GROSS), the total cost of this bill should not exceed $1 million the first year if we recruited all of these officers and kept all of the District of Columbia Police who are now protecting the embassies. But I feel that by relieving a lot of the officers who are now protecting the 117 missions this will preclude the necessity for recruiting additional District of Columbia Police, and thereby save some money.

Even if it did cost more, we would then be able to give the protection afforded by the Vienna Conference, and the protection we expect for our people in foreign countries.

I repeat that: the protection we expect for our people in foreign countries. As the Members know, we have reciprocal agreements, under which we expect protection by foreign governments around the world. If we are going to expect that type of service overseas we certainly have to give that type of protection at home.

I, for one, am willing to give this responsibility to the President, to give him the tools with which to carry out his responsibility. I hope this House will pass this bill without one dissenting vote today and say to the President, "We are sorry to see the large crime rate in Washington, District of Columbia, but we are for doing something about it. We are not giving it lipservice. We are protecting the embassies. We hope the District of Columbia Police can do their duty, so that we can protect all citizens."

Mr. FALLON. Mr. Chairman, will the gentleman yield?

Mr. GRAY. I yield to my distinguished chairman.

Mr. FALLON. I thank the gentleman for yielding. I should like to ask the gentleman a question.

Is it not true that during the hearings it was brought out the President under his constitutional authority has a duty to assure these people safety and dignity in our country?

Mr. GRAY. The gentleman is eminently correct. I go one step further and state that we signed a pact at Vienna, Austria, in 1963, with all other foreign governments who have missions here, that we would do this, that we would go beyond the constitutional responsibility of the President.

We have personally told these people, by signing with them, we would give them that protection. My distinguished chairman is eminently correct.

Mr. BROYHILL of Virginia. Mr. Chairman, will the gentleman yield?

Mr. GRAY. I yield to the distinguished gentleman from Virginia.

Mr. BROYHILL of Virginia. The gentleman stated earlier that if we felt the Metropolitan Police force was not adequate we should come out with legislation to make it adequate. I do not think it is adequate. The reason why it is not adequate is because we have not been able to obtain sufficient recruitment. The reason why we have not been able to obtain sufficient recruitment is because the Metropolitan Police Department does not have the backing of the people they serve.

I promise the gentleman that we have considered legislation in the House Committee on the District of Columbia. It will be embraced in the President's crime bill, to bring the Metropolitan Police Department and the other departments under a single commissioner.

In the meantime, I agree with the gentleman that we have to do something to provide necessary protection for these foreign embassies. I regret that we have to use this piecemeal approach. We cannot get recruits necessary to provide protection unless we recruit them under some situation where the recruits are assured they will have the support of the people for whom they work.

Mr. GRAY. I appreciate the remarks of the gentleman from Virginia.

What I had reference to a moment ago, when I was talking about the Committee on the District of Columbia, is the fact that our Committee on Public Works does not have the police jurisdiction. I did not mean to impugn the motives of the gentleman from Virginia when I made that statement. I merely point out we do not have the authority to bring out a District of Columbia police bill. We are acting under our authority here to protect public buildings and grounds. This comes under the subcommittee which I have the honor to chair, the Subcommittee on Public Buildings and Grounds, because the White House and other property is under our jurisdiction. But the police of the District of Columbia are not.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GRAY. Mr. Chairman, I yield myself 5 additional minutes for the purpose of answering any questions.

I now yield to my distinguished friend from California.

Mr. ANDERSON of California. Mr. Chairman, I thank the gentleman for yielding to me.

Earlier the gentleman mentioned the inability of the Metropolitan Police Department to recruit and that there were some 600 positions that it had not been able to fill at the present time. This would make an additional 600 police that would have to be recruited from the Metropolitan Police and the Park Police. What assurance do we have if these additional 600 members of this Executive Protective Service have to be recruited from the Metropolitan Police force or the Park Service, that it will not jeopardize the Metropolitan Police further?

Mr. GRAY. The gentleman from California raises a very good point, and I am glad he did, because inadvertently I omitted commenting on it when I made my initial remarks.

I have before me a letter dated December 16, 1969, from the Chief of the Secret Service, Mr. Rowley, and I would like to quote a part of that letter:

It is important to note that before an officer would be transferred to the Executive Protective Service—

He would have to be released by the Metropolitan Police Department or the Park Police—

Meaning that he cannot voluntarily transfer into this new force.

So if the Metropolitan Police Department is having trouble recruiting and feels that they cannot release officers from the District responsibilities to go into the new force, then the individual officer would be precluded from joining up with the new force without written permission from the Metropolitan Police or the Park Police.

Mr. ANDERSON of California. Will the gentleman yield further?

Mr. GRAY. Yes.

Mr. ANDERSON of California. My understanding is they cannot get them any place else. They can only recruit them from the Metropolitan Police and the Park Service.

Mr. CRAMER. Mr. Chairman, will the gentleman yield on that point?

Mr. GRAY. Yes. I yield to the gentleman.

Mr. CRAMER. The committee was concerned, as the gentleman knows, because he served on it, with this aspect of diluting the District of Columbia Police. So we wrote into the report on page 3 the following language which appears at the bottom of the third paragraph:

The direction of the Executive Protective Service will be a responsibility of the Director of the U.S. Secret Service, and it is contemplated that the members of the Service will be recruited under the civil service laws and regulations on a nationwide basis. It is not anticipated that the local police forces of the metropolitan area will be a primary source of recruitment.

Section 205 of title III specifically provides for such recruitment outside of the District of Columbia.

So what we are really trying to do is something that has to be done, namely, get the emphasis on recruiting from outside of the District of Columbia rather than diluting and weakening the District of Columbia Police, which has been done in the past.

Mr. GRAY. The gentleman from Florida is eminently correct. I might add to that the fact that 70 field offices of the Secret Service will be utilized throughout the United States to recruit people, and it will be a little more enticing, I believe, than the beat on 14th Street. I do not think they will have any trouble recruiting officers from all over the United States.

I yield to my friend from Iowa (Mr. GROSS).

Mr. GROSS. What is the average pay? The gentleman gave us the figure of $1 million annual cost for the 600 additions to the Secret Service. What would be the average pay? Surely the committee ascertained this when the witnesses were before them.

Mr. GRAY. The pay would be identical, as well as the authority, with that of the District of Columbia Police, and the starting salary now is a little over $7,000 per year, I believe.

Mr. GROSS. It is $7,000 a year?

Mr. GRAY. Yes.

Mr. GROSS. The $1 million per year cost would cover training, uniforms, equipment, motor cars, and all that goes with it. Is that correct?

Mr. GRAY. That was the estimate given to us by the Department of the Treasury and, as you know, the Secret Service is an agency of the Department of the Treasury. The figures were given by them, and I assume they have a breakdown on them. There is no way of knowing what the total costs are at this time.

Mr. GROSS. Mr. Chairman, will the gentleman yield further?

Mr. GRAY. Yes, I yield further to the gentleman from Iowa.

Mr. GROSS. We are dealing with a certain fact here. If we pass this legislation you would expect to get 600?

Mr. GRAY. That is right.

Mr. GROSS. Whatever happens with respect to the Metropolitan Police is quite another thing.

Do you expect to put 600 people under the jurisdiction of the Secret Service on the payroll of this country?

Mr. GRAY. Right.

Mr. GROSS. On the payroll of all the Federal taxpayers, in other words. It is not a District of Columbia obligation. So, we are dealing now with the proposal to provide a 600-man additional force to the Secret Service and all the supporting services for it.

The gentleman from Illinois (Mr. GRAY), has put a price tag or cost figure upon this request of $1 million a year. I appreciate having this information because it is not in the committee report.

Let me ask the gentleman this: Would not the District of Columbia government, if it was not providing such things as some 400 policemen at professional football games, and I do not know how many at professional baseball games, at apparently no cost to the football club or the baseball club—would the department not have the strength with which to police these embassies? In other cities the owners of football and baseball teams provide their own police.

Mr. GRAY. Most of the games to which the gentleman refers are played, of course, in the afternoon. I think the great manpower requirements here in the District of Columbia are at night. However, the gentleman has a very valid point. I am not on the District of Columbia Committee but I think the question is well worth looking into.

The CHAIRMAN. The time of the gentleman from Illinois has again expired.

Mr. GRAY. Mr. Chairman, I yield myself 5 additional minutes.

Mr. Chairman, I realize the point the gentleman from Iowa is making, but we already have an authorization of 1,000 to be secured. That is going to cost, perhaps, several millions per year in the District of Columbia. When this executive force is in place, we can relieve the District police of the necessity of obtaining some of these additional people. So, this is not a layer on another layer of police and cost.

Mr. GROSS. I think the gentleman is indulging in some wishful hoping with respect to the reduction in the Metropolitan Police force as the result of adding 600 to the Secret Service Force.

Mr. GRAY. I do not think we will have a reduction, but I think we will have a greater use of the police now protecting the embassies and we hope they will be able to turn their attention to the crime problem in the District.

Mr. GUDE. Mr. Chairman, will the gentleman yield?

Mr. GRAY. I yield to the gentleman from Maryland.

Mr. GUDE. Mr. Chairman, I rise in support of the Executive Protective Service Act. I want to commend the gentleman for his statement.

I would like to say that I think this would be a good supplement to the Metropolitan Police because of the ability to have a broader recruiting service and being able to tap resources insofar as recruiting is concerned which is now unavailable to the Metropolitan Police. But rather than to place all the blame for the crime situation here in the metropolitan area of our police force, I would like to remind the committee that we have had before us court reform bills in the House since the middle of the summer, bills which have been sent up here by the executive branch of the Government. These court reform bills are recognized as a very essential part in our crime fight. We have police out on the streets having to deal with criminals who have been arrested and then are released to go back out on the streets, criminals who have not been tried. This goes on to the second, third, and fourth offense. So, there is no simple solution to this crime problem. Certainly, court reform and additional judges is a very important aspect of it in order that we have speedy trials of the criminals now behind bars where they belong.

Mr. GRAY. The gentleman is eminently correct and I concur in his statement.

Mr. KYL. Mr. Chairman, will the gentleman yield?

Mr. GRAY. I am delighted to yield to the gentleman from Iowa.

Mr. KYL. I would like to discuss with the gentleman a little mathematics in

order to see if I am correct on the premise of hiring 600 additional men. If they are hired at a minimum salary of $7,000 a year—actually, it is higher than that—it seems to me that that comes out to $4.2 million for salaries alone rather than $1 million if all of these 600 men are beginning police.

If all of these 600 are beginning policemen, but of course you have to have corporals, sergeants, captains, and all the rest that go with it, and their pay is higher, and then you have the contributions toward their retirement, you have their uniforms, the implements that they use, the automobiles and the motorcycles, and so on, so it would be incorrect, would the gentleman not say, that the cost of this 600-man force is going to be $1 million?

Mr. GRAY. If the gentleman is talking about additional police, then the gentleman is correct, but I have tried to say all along that this is in lieu of the police that are now working who will fill the spots of other recruits that would cost money, and the committee has estimated that the people that they are going to have to take on additionally would only cost $1 million or so the first year.

Mr. KYL. If the gentleman will yield further, the gentleman is not being logical there, because the request of the Metropolitan Police Force for extra police took into account the number of them they had to have on duty in connection with the embassy patrols, and of course the need for police officers will be decreased, that is true, but you do not get money that way. That is a little mental legerdemain.

Mr. GRAY. It is going to cost the taxpayers the same, if we relieve the 600 we will not have to hire the additional 600. This is money saved that can be spent on the new force.

Mr. KYL. The gentleman is attempting to engage in a little bit of legerdemain because we are going to have to hire 600 if you take the duties away from the Metropolitan Police Department.

Mr. GRAY. That is right. But we save that. If we do not take 600 away then we have to hire 600 additional for the District.

Mr. KYL. But I was speaking about the mathematics used by the gentleman, and then you have to reduce the authorized strength of the Metropolitan Police by that number.

Mr. GRAY. That would make sense, but we just will not fill the vacancies if they are not needed.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GRAY. Mr. Chairman, I yield myself 1 additional minute.

Mr. RARICK. Mr. Chairman, will the gentleman yield?

Mr. GRAY. I yield to the gentleman from Louisiana.

Mr. RARICK. Mr. Chairman, I thank the gentleman for yielding. I wonder if the gentleman feels that as long as we have a Supreme Court that is soft on criminals if the addition of these proposed police officers would have any effect?

Mr. GRAY. Mr. Chairman, I would say to my distinguished friend, and this is my own personal opinion, of course, that if we do not do something to tighten up the court procedures we cannot hire enough police to combat crime in the District of Columbia.

Mr. RARICK. If the gentleman would yield further, I wonder if the gentleman does not also agree that since the District of Columbia is of a limited size, geographically, and can only accommodate a limited number of people—if it would not be more feasible to export the criminal element rather than add to the population by importing more peace officers.

The criminal element, for the most part, is not in the Federal city on our Nation's business and should be removed.

We might not be able to export all the criminal element but we can reduce or abolish those many fringe benefits, financed by our taxpayers, which encourage their presence. Specifically, I refer to public housing, liberal welfare programs, and lax judicial procedures.

In other words, we of Congress—in striving to protect the people of the District—those who have business being here—are going to need to adopt more constructive policies and institute programs to remove the many attractions which have induced the criminal element to infest our Capital City.

Mr. GRAY. The gentleman is correct.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GRAY. Mr. Chairman, I yield myself 1 additional minute.

Mr. TAYLOR. Mr. Chairman, will the gentleman yield?

Mr. GRAY. I yield to the gentleman from North Carolina.

Mr. TAYLOR. I thank the gentleman for yielding. I just wish to ask the gentleman this question: If we failed to do all we can to offer this new protection to the embassies and their personnel, can we expect to continue to offer the protection that is needed to our own American people, and representatives serving abroad?

Mr. GRAY. The gentleman has put his finger right on the point. I was in Japan last December, and saw 3,500 Japanese students crowded around our American Embassy, and if it had not been for the immediate action of the police of Tokyo we could have had a very serious situation. I know money, of course, is important, and must be, but even if we are talking about $4 million a year, if we allow something to happen in Washington that is going to be embarrassing, and then we have a $10 million American facility in some foreign country burned down because of our inaction here then we will be penny wise and dollar foolish. Plus a major embarrassment to our President and the American people.

Mr. TAYLOR. Mr. Chairman, I commend the gentleman from Illinois for a fine presentation on legislation which I think we must pass.

Mr. DON H. CLAUSEN. Mr. Chairman, will the gentleman yield?

Mr. GRAY. I yield to the gentleman from California, a valued member of our committee.

Mr. DON H. CLAUSEN. Mr. Chairman, actually not only is there a constitutional obligation on the part of the President to provide this protection, but it is my understanding that he has an obligation under international law to do just what the legislation is proposing.

Mr. GRAY. The gentleman is correct.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. GRAY. Mr. Chairman, I yield myself 1 additional minute.

Mr. Chairman, I include the following letters for the information of the committee:

THE DEPARTMENT OF THE TREASURY,
Washington, D.C., December 8, 1969.

HON. KENNETH J. GRAY,
Chairman, Subcommittee on Public Buildings and Grounds, Committee on Public Works, House of Representatives, Washington, D.C.

DEAR MR. GRAY: It has come to my attention that an objection to the enactment of H.R. 14944 may be raised on the belief that the creation of an organization to provide embassy protection could lead to the establishment of a national police force. I want to stress that there are no grounds whatsoever in fact or in the bill for such a belief.

As you are aware, H.R. 14944, as amended by the Public Works Committee, would change the name of the White House Police force to the Executive Protective Service. In addition to the protection duties now performed by the White House Police, the new Protective Service would be authorized to provide protection of foreign embassies located in the Metropolitan area of the District of Columbia and in such other areas within the United States as the President may direct on a case by case basis. The authorized statutory strength of the Executive Protective Service would be limited to 850 members.

The protection to be provided the foreign diplomatic missions will be *preventive* in nature, not investigative. It is not authorized nor is it contemplated that the Executive Protective Service will operate as a police force. It will not and cannot usurp the responsibility of the local police department to enforce the laws relating to the protection of persons and property. The narrowly restricted responsibility granted to the Executive Protective Service by the bill is a security authority.

The ultimate responsibility for the security of foreign diplomatic missions located in this country is a Federal responsibility. It is an obligation of the central government under international law and practices. American embassies in foreign countries receive protection from the central government of the countries in which they are located. In most instances, this protection has been adequate to provide reasonable security for American diplomatic personnel stationed abroad. In order to insure the continued security of American diplomatic personnel, it is incumbent upon the Federal Government to reciprocate and insure reasonable security to foreign diplomatic missions located in this country. To this end, the foreign diplomatic corps has repeatedly petitioned the State Department and the Office of the President for increased protection due to the high incidence of crimes directed at foreign embassies and their personnel. It is not contemplated that the new Service will have a broader police role than to fulfill the purposes for which it is established. Its jurisdiction is restricted to the performance of *preventive* security functions in very limited areas of responsibility, i.e., the Executive Mansion and grounds, Presidential offices, and foreign diplomatic missions. The size and authority of the new Protective Service are restricted by statute and it is dependent upon the Congress for the appropriations

necessary for the performance of its functions.

I wish to emphasize that the Executive Protective Service will not be authorized to assume the responsibility of the local police in providng protection to foreign diplomatic personnel, or to conduct criminal investigations involving embassy personnel, or to furnish officers in adequate numbers to control demonstrations and other disturbances occurring in close proximity to foreign diplomatic missions.

Such is the extent of the jurisdiction of the new Service as it relates to diplomatic protection.

Sincerely yours,

EUGENE T. ROSSIDES.

TREASURY DEPARTMENT,
U.S. SECRET SERVICE,
Washington, D.C., August 13, 1969.

Subject: Estimated Costs—Embassy Protective Forces.

Mr. RICHARD J. SULLIVAN,
Chief Counsel, Committee on Public Works, U.S. House of Representatives, Washington, D.C.

DEAR DICK: In accordance with the request of Congressman Cramer, and pursuant to the provisions of section 2953, title 5, United States Code, there is attached an estimate of expenditures for the next five fiscal years in connection with the establishment of a special Embassy Protective Force.

The aforementioned information relates to H.R. 14944, proposed legislation pending before your Committee which, if enacted, will entail an estimated annual expenditure of appropriated funds in excess of $1,000,000.

We appreciate your assistance in the matter of the legislation pending before your Committee regarding the Embassy Protective Force. If you should need any further information, we would be most happy to supply it.

Sincerely,

JAMES J. ROWLEY.

Mr. FALLON. Mr. Chairman, will the gentleman yield?

Mr. GRAY. I yield to the gentleman.

Mr. FALLON. Mr. Chairman, I rise in support of H.R. 14944, reported unanimously by the Committee on Public Works.

This legislation was requested by the Treasury Department, acting for the President of the United States. I have been advised that over the last number of months the President has received complaints from over 50 different embassies accredited to the United States involving various criminal incidents which have occurred in or about the embassies located in the District of Columbia. The embassies of these foreign nations, some 117 diplomatic missions in all, have requested the Department of State and the President to take action to find means of preventing disturbances, harassment, and the high incidents of crime involving foreign embassies and their employees.

The President, under his constitutional authority, has the duty to assure these duly accredited representatives of foreign governments to the United States that the security of their person and property will be fully provided for by this Government.

H.R. 14944, as reported, I believe will accomplish the purposes which the President desires.

The bill increases the size of the existing White House Police force from 250 to 850; it changes the name of that force to the Executive Protective Service; it gives the service new authority to protect the foreign missions located in the metropolitan area of the District of Columbia, including Maryland and Virginia; it authorizes the President to use this service to protect foreign missions located outside of the Washington area whether they be in the United States, its territories, or possessions as he may determine on a case-by-case basis.

There has been some concern that a large number of the new service will be drafted from members of the existing Metropolitan Police Force. This is not the intent of the legislation nor will this happen.

It is my personal belief and the committee's feeling that by relieving the members of the Metropolitan Police Force from their present duties of protecting these diplomatic missions and substituting for them the new Executive Protective Service, there will be an increase in police protection for the residents of the District of Columbia as the Metropolitan Police members will then be able to assume other duties than that of protecting embassies.

This is necessary legislation. There is a sense of urgency to it and, for this reason, I urge its adoption. At the same time I wish to commend those responsible for bringing this legislation to the floor today, which includes the distinguished chairman of the Subcommittee on Public Buildings and Grounds, the gentleman from Illinois, the Honorable KENNETH J. GRAY, and his counterpart, the ranking minority member of the subcommittee, the gentleman from New York, the Honorable JAMES GROVER.

May I also commend to the Members the expert testimony received from the Department of the Treasury on this matter including particularly the able Director of the Secret Service, Mr. James Rowley.

May I conclude by thanking my dear friend, the chairman of the Subcommittee on Treasury, Post Office and Related Agencies, of the Committee on Appropriations, the gentleman from Oklahoma, the Honorable TOM STEED, for his work in cooperating with the committee in bringing this legislation to the floor.

Mr. GRAY. Mr. Chairman, I yield back the balance of my time and urge the unanimous support for the bill.

The CHAIRMAN. The gentleman has consumed 22 minutes.

The Chair recognizes the gentleman from Florida (Mr. CRAMER).

Mr. CRAMER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I am in wholehearted support of this legislation. I just as much support this as I supported the President's initial recommendation with regard to fighting crime nationwide which incidentally is sitting in most of the subcommittees without action today.

I think it is a crime that it is being bottled up; and as much as I supported for instance the 1,000 new metropolitan police called for by the President of the United States, trying to do something about crime running rampant in the District of Columbia; and crime running rampant as much if not more so than every city in America—and this is supposed to be the showcase of government for the world.

I support also, and have encouraged others, and to try to get out of the proper committees legislation to control crime in the District of Columbia; in addition to the add on of 1,000 more people in the police force in the District.

So, really the way I conceive this legislation is that this is a peripheral way—this is a way of accomplishing better law enforcement in the District of Columbia when the Congress to this day has absolutely refused to provide the relief needed by direct legislation.

Let me tell you exactly what I mean. Today there are hundreds of metropolitan police needed on the beats and on the streets in the District of Columbia to combat crime and the rapes and robberies that are going up at a phenomenal rate here in the District of Columbia. So they put them in a cruise car and take them off the beats and the streets, to do what? In order to economize on personnel and save money. But it does not save the poor, harassed citizen or visitor in the District of Columbia who ends up being the victim of rape and robbery in their homes and on the streets.

So hundreds of District of Columbia police are needed on the beats and on the streets of the District of Columbia to fight crime in our Nation's Capital and for those who are criticizing providing a force for the embassies, listen to this—instead of those police who are needed on the beats and on the streets of the District of Columbia, they are presently protecting the embassies of the foreign nations.

So all we are saying is—to provide a proper force to protect the embassies, which is the duty of the President of the United States and our Government in any event, and a reciprocal responsibility of other governments that they have to protect our embassies in other countries. That is our duty. So let us establish a police force that may accomplish this and relieve these hundreds of Metropolitan Police and let them go back to the beats where they belong and protect the citizens of the District of Columbia and the visitors to the District.

That is as I see this legislation. So here is an opportunity to get 600 additional well-trained police—not recruited principally from the District of Columbia Police because that approach would not accomplish the objective of better law enforcement throughout the District. But we specifically provide in the report a requirement—

It is not anticipated that the local police forces of the metropolitan area will be a primary source of recruitment.

We state that specifically. I understand that there may be an amendment proposed that will clarify further that we clearly intend for them to recruit these people from outside the District. I will say this to you, it is my opinion that they will have no problem whatsoever to recruit people for this particular service because this service is going to have prestige and is going to have a specific

job and it is going to be backed up, which is not the case in many instances, by the police in the District of Columbia.

So this will be a nationwide effort to recruit for this force and to relieve the police for the District so that those who want law enforcement in the District should cling to this legislation and support it wholeheartedly because it will relieve those law enforcement authorities in the District of Columbia to do the job they should do and have not been doing. So if we have to use this peripheral way of doing it, I am 100 percent for it, if it is going to cost $4½ million to do it, I am 100 percent for that, to get the job done even partially in solving crime or helping to solve the problem of crime in the District of Columbia so that this will relieve some of the pressure on the Metropolitan Police force which is having to provide embassy protection for some 20 to 21 embassies here in the District of Columbia today.

In addition, these police will have the same authority for arrests as does the Metropolitan Police, and if a crime takes place in their presence or to their knowledge while they are on duty with the embassy, they will have the authority to make the necessary arrests, so they will be accomplishing that dual law enforcement purpose, too.

The city police are being stretched too thin, and everyone knows it. With the hippies, the kooks, and the peaceniks forever on the march, and some of them looking for trouble, providing the White House and embassies protection is becoming an ever more difficult task for the regular city police. Under international law and practice the United States is obligated to provide this protection. We have all heard of the rising crime rate in the District of Columbia. It is my hope that maybe this measure, if it gets the support to which it is entitled, will perhaps unlock the door to some of the anticrime measures that are not being acted on at the present time. The administration has exerted efforts to combat crime in America. It has presented legislation constantly. That effort, so far, is being thwarted in the Congress. I do not think the fight against crime can be frustrated in the name of cost or anything else. The need to combat the cancer of organized crime and crime in the streets far transcends partisan considerations. The people of America want prompt action on anticrime legislation, and they are entitled to have it. So I wholeheartedly support this legislation and encourage my colleagues to do likewise.

The President of the United States is vested with the constitutional responsibility for conducting this country's foreign policy. In order to adequately perform his duties in this regard, it is imperative that he assure accredited representatives of foreign governments in the United States at the seat of government security of person and property.

I regret to say that in recent years members of the foreign diplomatic corps stationed in the District of Columbia have complained that such security is lacking. They have been plagued with disturbances, harassments, and a high incidence of crime involving their embassies and their personnel. These have prompted demands that this country begin to provide them with the same kind of protection that their governments provide our people stationed abroad.

When the President became aware of these demands, he directed that a plan be developed for placing the responsibility for the protection of the 117 diplomatic missions in the Washington area under the control of an expanded White House Police force.

At the present time, the Metropolitan Police Department has this duty. In view of the increasing burdens being placed on it, however, it is doubtful whether this law enforcement agency can any longer fulfill this essential function. Its citywide responsibilities are too great. Moreover, it is operating more than 600 men below authorized strength.

Enactment of H.R. 14944 would shift the protective burden from the shoulders of the Washington Police to a new Executive Protective Service whose job would be to give embassies and their representatives in the Nation's Capital the same kind of protection presently provided the President and his family.

This legislation would boost authorized strength of the old White House Police from 250 to a maximum of 850 men. The new Service would be under the control of the Director of the U.S. Secret Service.

Its use would be specifically limited to providing security in the Washington metropolitan area. On special occasions, however, diplomatic missions in other areas of the country could be given protection where warranted on a case-by-case basis.

The reason for this special authority is to insure that the Executive Protective Service could be used on a selective basis to protect foreign dignitaries visiting this country. In such cases, however, the Service would not replace local police. Rather, it would supplement their efforts.

The Service will be a primarily preventive force. As planned, it will consist of motorized elements whose task it will be to patrol foreign missions in the metropolitan area. These will be supplemented by fixed or short beat patrols of the more sensitive embassies.

A ready reserve will be on duty at all times. It will respond when minor altercations or disturbances cannot be handled by the men on the beat.

When major trouble appears to be brewing, the Service will call upon District of Columbia Police to assist in handling it. When the Service is operating in other jurisdictions throughout the country under the special authority of subsection 3 (5) of the bill, local police will be called in when, as, and if needed. In all cases, the same operational arrangements and working guidelines which have proven so successful in the past will continue to govern the relationships between the law enforcement agencies involved.

Within the Nation's Capital, the expanded Service will relieve hundreds of District of Columbia policemen from embassy duties. This will enable them to pursue other law enforcement activities. In other words, by expanding the White House Police force, we will, in effect, be beefing up our sorely pressed Washington police.

As for recruitment, members of the new Executive Protective Service will come under the civil service laws and regulations. They will be recruited nationwide, although it is expected that local police forces in the metropolitan area will serve as a primary source of recruitment.

In view of the National Government's responsibility for protecting the President and the foreign diplomatic corps, the proposed expansion of the White House Police envisioned by this bill makes sense. Such duties properly belong to the Federal Government. The change should have been made long ago.

During the recent moratorium, I am informed, an unruly throng assembled in DuPont Circle. From there, they began to march on the Vietnamese Embassy. Fortunately, the security forces at hand were sufficient to deal with them before they reached their goal. Had they failed, we may have witnessed the sacking or worse of the embassy of a friendly nation and ally.

Such incidents happening to our embassies abroad have always shocked and outraged me. The establishment of a highly trained and mobile Executive Protective Service will insure that they will not happen here. Foreign representatives in this country will be assured the type of protection they are entitled to and deserve.

Their dignity and security requires it. The responsibility to preserve tranquillity and safety in the United States demands it.

Mr. RARICK. Mr. Chairman, will the gentleman yield?

Mr. CRAMER. I am glad to yield to the gentleman from Louisiana, who is known as a strong law-enforcement supporter in America.

Mr. RARICK. I thank the gentleman. I wonder if the gentleman and the committee have considered the possibility of transferring the Supreme Court Police to this newly proposed police force? The Supreme Court has many friends among the criminal element and should have minimal need for police protection. In this manner we can save the taxpayers money and at the same time promote international good will.

Mr. CRAMER. That would make about as much sense to the gentleman in the well as transferring the Capitol Police force, which we recently beefed up, just last year, and gave them additional authority to police Capitol Hill and Congress. I disagree with the gentleman, although, if some of the Justices were subjected to the same mob violence or criminal attacks suffered by many in the District of Columbia, they might render some different decisions.

The CHAIRMAN. Does the gentleman from Florida desire to yield additional time?

Mr. CRAMER. Mr. Chairman, I yield as much time as he may consume to the gentleman from California (Mr. DON H. CLAUSEN).

Mr. DON H. CLAUSEN. Mr. Chairman, I join my colleagues on the Public Works Committee in supporting the President's request to improve the protection of foreign embassy personnel and facilities through creation of an "Executive Protection Service."

The President has the clear constitutional responsibility of providing protection of personnel and for the conduct of the U.S. relationships with foreign governments and their resident representatives; their security of person and property in the same degree that the laws of this Nation assure to our own citizens.

Under international law and practice, it is the obligation of the host government to take reasonable precaution to insure the safety of foreign diplomatic officials and the embassies of foreign governments located in the receiving state. Our embassies overseas have been receiving protection from the central government of the countries in which they are located. It is, therefore, appropriate that we have the capability to carry out our reciprocal responsibility.

There are 117 diplomatic missions in Washington, D.C., and the immediately surrounding area. At the present time, the protection of foreign embassies is a responsibility of the Metropolitan Police Department. Over the past 4 years incidents at embassies and crime involving diplomatic personnel have shown a marked increase. The foreign diplomatic corps has constantly complained to the Department of State concerning disturbances, harassment, and the high incidence of crime involving foreign embassies and their employees. Ambassadors and other high diplomatic officials have demanded that the National Government fulfill its obligation to maintain the security of foreign diplomatic missions located in this country. Recently their complaints came to the attention of the President, and the level of his concern is evidenced in the request for this legislation.

The Metropolitan Police Department cannot provide the necessary protection. This fact is not an adverse reflection on the Department. The demands upon it in carrying out its citywide responsibility to the general public for law enforcement and protection are already overwhelming.

Responsibility for providing protection of this nature might reasonably be expected to lie with the Department of State. That Department, however, has no security personnel even remotely qualified to meet the needs involved.

The White House Police, under the supervision of the Director of the Secret Service, are uniquely qualified, by both training and the responsibilities already assigned to them under existing law, to meet this need. The assignment of embassy protection to this group will center responsibility in the Federal Government, where it belongs.

Accordingly, H.R. 14944 here reported, with amendments, will change the name of the White House Police to the Executive Protective Service, which more adequately describes the functions already assigned to it as well as the function to be added here. In addition, this legislation will extend the jurisdictional area within which the Service may function to the metropolitan area surrounding the city of Washington itself. Some embassies are already located outside the city limits, and it may reasonably be assumed that other embassies will so locate in the future. To carry out its function, the Service must be able to protect these embassies as well as those located within the city proper.

The committee wishes to make it clear, however, that foreign representatives are accredited to the President; they necessarily must be so situated physically as to be in relatively close proximity to the central seat of this Government. The authority for embassy protection is limited to the metropolitan area itself, except as the President otherwise provides, on a case by case basis. Where embassies are located in Maryland or Virginia, to the extent those States comprise a part of the metropolitan area, the same cooperation with local police forces would apply as now applies with respect to the Metropolitan Police Department. In this regard, the committee would emphasize that the embassy protective function cannot, and is not intended to, assume the local police department's responsibility (whether it be in the District of Columbia, Maryland, or Virginia) to conduct criminal investigations involving embassy personnel but to furnish police officers in adequate numbers to control major demonstrations and other large disturbances occurring in close proximity to foreign diplomatic missions.

With respect to the authority granted the President to utilize the Executive Protective Service for the protection of "foreign diplomatic missions located in such other areas in the United States, its territories and possessions, on a case-by-case basis," the committee here states plainly that this authority extends only to situations of extraordinary gravity, where the local police force is totally incapable of providing a level of protection deemed essential to the international integrity of the United States, or where the protection of the President himself, for example, would be involved. This additional authority is not, and may not be construed to be, a substitute for the responsibility of local police forces to provide protection for consulates, the United Nations, and similar foreign delegations within the United States. The increased protection to be provided by the Executive Protective Service is designed primarily as a preventive measure within the Washington metropolitan area. It is not intended that this new Service assume the responsibility of other police departments to provide protection to persons and property within their respective jurisdictions.

The number of personnel assigned to the Service will be increased from the present 250 to not more than 850. Not all of this authorized increase in personnel, of course, is attributable to embassy protection. The need for increased protection for the President accounts for part of the added personnel. The direction of the Executive Protective Service will be a responsibility of the Director of the U.S. Secret Service, and it is contemplated that the members of the Service will be recruited under the civil service laws and regulations on a nationwide basis. It is not anticipated that the local police forces of the metropolitan area will be a primary source of recruitment.

The administration originally requested an open-end authorization for personnel for this Service. The committee is unequivocally opposed to any such arrangement. The duties assigned the Service are specific. A maximum of 850 should, on the basis of the information submitted to the committee, be adequate for the foreseeable future. By whatever name it is called, and however meritorious its purpose, a police force at the disposal of the Federal Executive power is an instrument upon which our philosophy of government requires tight rein. The committee has every reason to expect restrained executive use and close congressional oversight of the Service, its assignments, and its performance.

The committee has had this legislation under active consideration since May 21 last. Public hearings were held on July 24, and four extensive executive sessions followed the public hearings. We believe H.R. 14944 as reported will meet the undeniable need for embassy protection as a Federal responsibility, but with safeguards the committee considers absolutely essential.

Mr. PETTIS. Mr. Chairman, I rise today to express my unqualified support for the pending measure to authorize the establishment of a federalized police force for the protection of the Executive Mansion and the 117 embassies of foreign governments.

And, in stating my support, I also wish to deplore the conditions in this, the Nation's Capital, which make this kind of legislation necessary. I think we have reached a rather sorry state of affairs when we have to admit that the local police force is not capable of providing adequate protection for the well-being and property of the diplomatic emissaries from around the world. This is supposed to be the greatest capital city in the world but I wonder how long we will be able to maintain that image.

The incidence of thievery, vandalism, and mayhem visited upon the foreign embassies is shocking and inexcusable. Let me cite just a few examples. Last July 27, persons forced their way into the Ethiopian Embassy and broke windows, furniture, and other valuable furnishings before they were subdued and arrested; two persons attempted to enter the Russian Embassy grounds last summer, and just this month 19 persons handcuffed themselves to the Embassy fence; the Italian Embassy has reported that automobiles on its property have been tampered with, and there have been any number of incidents at the Embassies of the Vietnamese and French Governments.

To my knowledge, this is the first time

in history that the Government has been forced to institute this kind of a federalized police force for such a purpose. And one has only to glance at the daily listings of criminal activity in the local newspapers to see the reason why. The weekend list of crime in the District would fill an entire page if it were printed in the same type as the rest of the newspaper.

Even though the Washington police force has been enlarged to almost 3,900—an increase of about 500 men over the past year—the crime rate continues to climb.

The number of homicides in the first 9 months of this year have increased by 56 percent over the figure for the same period last year and that was dreadful enough. Robberies have jumped 54 percent in the same 9-month period and I think they have lost count on the number of rapes, they occur with such sickening frequency. Nobody is spared the sadists. The young shopgirl, the matron, the very old, the infirm are daily victimized.

Just within the past 24 hours I read of the pleas of some women who are seeking to have year-round daylight saving so they will have a fighting chance to reach the safety of their homes—and that is a little precarious, too—before darkness sets in. Why, some of the women who work in the downtown agencies are sacrificing an hour's pay at the end of the day in order to get a head start on the rapists and muggers they know are roaming the city after dusk.

However, we do not have to go downtown for samples of violence. There is ample evidence right here on Capitol Hill. Members of the Congress have been mugged and robbed—one attacked in his own office. Our female staff members have been murdered, raped, robbed, and terrorized; even those girls who live within two blocks of the Capitol have a justifiable fear of walking home.

This deplorable situation has created a bonanza for people in the security business. Citizens have taken to double-bolting doors, buying watchdogs, and hiring guards. There are many Members, like myself, who have found themselves forced to find persons to live in their homes while out of the city. And the foreign embassies around the city have been forced to maintain their own security forces.

Whatever the shortcomings of the local police force, I do not lay the complete blame for this situation at their doorstep. A major reason we find ourselves having to enact such a bill as we have before us today is our inaction in taking up the President's anticrime proposals.

The first session of this Congress has been at work since January 3, now January of 1970 is right around the corner and not a single one of the major recommendations on crime has been acted upon. Instead of taking measures to combat crime in the streets, we have seemed more interested largely in superficial legislation and "giveaway" aid programs.

The administration has requested $296 million this year to help States and local communities improve their police and criminal justice systems. Legislation has also been introduced to intensify the national effort against organized crime which claims as its major victims the poor. A major revision of all Federal narcotics laws also has been proposed in an effort to curb illicit narcotics trade.

Failure to deal effectively with criminals and the causes of crime has resulted in what can only be termed major disaster. Crime has quadrupled since 1944. In 1968 alone, it increased by 17 percent.

Use of drugs has grown at an even more frightening rate. Between 1960 and 1967 juvenile arrests involving the use of drugs rose almost 800 percent and the number of narcotics addicts in the United States is now estimated to be in the hundreds of thousands.

The flow of smut and obscenity through the mails has increased enormously in recent years, to the disgust of decent citizens and to the detriment of our children.

Here in the Nation's Capitol, while serious crime skyrockets, the criminal courts lack progressive, effective procedures.

Organized crime continues to wrap its tentacles about our society. It controls illegal gambling, the numbers racket and dope smuggling, and has infiltrated government and legitimate business.

We must devote new resources and knowledge to the curbing of juvenile delinquency; we must develop new techniques of prisoner rehabilitation, both institutional and extrainstitutional; we must address the urgent need for penal reform.

Control of all areas of crime is absolutely necessary if we are to maintain the internal strength and security of our Nation, if we are to be safe in our homes and on our streets and if our children are to have the protection they deserve.

We should decide now to give anticrime legislation the number one priority for the next session so our people will know that we are interested in arresting and curing the cancer of crime which now afflicts the Nation.

Many people are coming to believe that the motto of Washington is "Kill a Citizen a Day" or "Rob a Bank Daily." That may be true of many other cities before long.

Mr. GRAY. Mr. Chairman, I have no further requests for time.

Mr. CRAMER. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. There being no further requests for time, the Clerk will read.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 3 of title 3 of the United States Code is amended as follows—

(1) by striking the words "White House Police force" whenever they appear in the chapter and inserting in lieu thereof the words "Executive Protective Force";

(2) by striking the words "White House Police" whenever they appear in the chapter and inserting in lieu thereof "Executive Protective Force";

(3) by striking the second sentence and inserting in lieu thereof, the following: "Subject to the supervision of the Secretary of the Treasury, the Force shall perform such duties as the Director, United States Secret Service, may prescribe in connection with the protection of the following: (1) the Executive Mansion and grounds in the District of Columbia; (2) any building in which Presidential offices are located; (3) the President and members of his immediate family; and (4) foreign diplomatic missions located in the metropolitan area of the District of Columbia, and such other areas as the President may direct."; and

(4) by striking the words "two hundred and fifty" in the first sentence of subsection (a) of section 203 and inserting in lieu thereof "eight hundred and fifty".

Mr. GRAY (during the reading). Mr. Chairman, I ask unanimous consent to dispense with further reading of the bill, and that the bill be printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will report the committee amendments.

The Clerk read as follows:

Committee amendments: First page, line 8, strike out "Force" and insert "Service".

Page 2, line 2, strike out "Force" and insert "Service".

Page 2, line 6, strike out "Force" and insert "Executive Protective Service".

Page 2, line 12, strike out "and".

Page 2, strike out lines 13 and 14, and insert: "metropolitan area of the District of Columbia; and (5) foreign diplomatic missions located in such other areas in the United States, its territories, and possessions, as the president, on a case-by-case basis may direct."; and".

The committee amendments were agreed to.

Mr. GROSS. Mr. Chairman, I move to strike the necessary number of words.

Mr. Chairman, I would like to ask: This 600-man addition to the Secret Service is for the purpose of being added to the 250 already in existence. Is that correct?

Mr. GRAY. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Illinois.

Mr. GRAY. Mr. Chairman, the gentleman is correct. The total complement of the White House Police force is 250 maximum, and this would add an additional 600, but I would correct the gentleman, it is not a Secret Service force.

Mr. GROSS. The gentleman can construe it any way he wants to. The additional 600 would be under the jurisdiction of the Secret Service.

Mr. GRAY. They work out of the White House Chief of Police.

Mr. GROSS. But now there will be a total force of 850, the 600 being provided ostensibly to protect the embassies.

Mr. GRAY. That is correct.

Mr. GROSS. We have 127 or 137 embassies?

Mr. GRAY. It is 117.

Mr .GROSS. It is 117 embassies. What in the world can they do with 600 men on any basis of a logical tour of duty per man, using 600 to protect 117 embassies?

Mr. GRAY. Mr. Chairman, if the gentleman will yield further, first let me remind the gentleman the additional 600 will not all be used for the 117 missions. The President wants to beef up the

White House protection and also the protection of the President and the Vice President and their families, so a small portion of the 600 would be used for those purposes.

I would remind the gentleman this contemplates three shifts per day, 7 days a week, for 365 days a year.

Mr. GROSS. Does it take 600 men on that basis to protect 117 Embassies? Surely, that would leave quite a cushion for the additions to the protection of the White House or any other function they might be called upon to perform in the Federal service.

Mr. GRAY. I would remind the gentleman these are maximum ceilings. The Chief of the Secret Service will have to come to the Appropriations Committee and justify every single body he puts on this force.

I would point out further that our very distinguished friend, the gentleman from Oklahoma (Mr. STEED), the chairman of the subcommittee, and the ranking Republican member on the committee, the gentleman from Massachusetts (Mr. CONTE), looked into this matter thoroughly. They made suggested changes. This is a compromise bill. They are coauthors of the legislation before us. They certainly will look into the shifts and how many are on them, and whether or not each man is justified, before ever one man is funded under the authorization.

Mr. GROSS. Will this require any brick and mortar for a headquarters?

Mr. GRAY. There is not a dime for construction in this bill.

Mr. GROSS. That may be, but does the gentleman know of any that would be proposed?

Mr. GRAY. I do not envision any authorization for construction of any facilities. These people will work out of the adequate space in the White House.

Mr. GROSS. There is adequate space in the White House?

Mr. GRAY. There will be three phases. The motorized police will work out of the GSA motor pool or the White House motor pool, and the second phase of it will be the foot patrols, and the third phase of it will be the stationary guard at the facility. He will report for duty and his sergeant will come around and make sure he is there. We do not need any barracks, and all that. Nobody will be domiciled there. They will be living at home and report for work to the White House directly.

Mr. GROSS. With all due respect for my friend, the gentleman from Illinois—and I do respect him—I think he has underestimated again, as he underestimated the cost of this 600-man addition, and as I think he has underestimated the cost of headquartering and maintaining this group. I think time will amply demonstrate it.

Mr. GRAY. If I did underestimate, I think my chairman, the gentleman from Oklahoma (Mr. STEED) will correct my errors.

Mr. GROSS. But that will come a little late for many of us on this floor, as many other things have come too late, including the revised estimates of more millions for the cultural castle in foggy bottom, as well as the visitors' center, and so on, up and down the line. It will come too late for the poor old taxpayers of this country.

Mr. GRAY. If the gentleman would like to have lunch with me tomorrow, I will be glad to bring him up to date at that time on the visitors' center. It is very exciting.

AMENDMENT OFFERED BY MR. MATSUNAGA

Mr. MATSUNAGA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MATSUNAGA: Page 1, line 19, strike out the word "and",

Page 1, line 22, strike out the period and insert in lieu thereof a semicolon and the word "and".

Page 2, after line 22, add the following new paragraph:

"(65) Strike out the period at the end of the second sentence of section 203(a), title 3, United States Code and insert in lieu thereof 'and by recruitment under the civil service laws and regulation on a nationwide basis.'"

Mr. MATSUNAGA (during the reading). Mr. Chairman, I ask unanimous consent that further reading of the amendment be dispensed with and that it be printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Hawaii?

Mr. GROSS. Mr. Chairman, reserving the right to object——

Mr. MATSUNAGA. If the gentleman will yield, I will explain to the gentleman what the amendment will do, under his reservation of objection.

Mr. GROSS. I yield to the gentleman.

Mr. MATSUNAGA. This amendment has been approved by both the majority and the minority sides of the committee.

Mr. Chairman, the amendment which I offer is really a very simple amendment. It would merely provide that the major part of the 600 additional members authorized by H.R. 14944 for the proposed Executive Protective Service would be recruited on a nationwide basis and not primarily from among members or former members of the Metropolitan Police force of the District of Columbia.

I support the bill now under consideration, for I am convinced that there is an urgent need to provide better protection for foreign embassies and their personnel in our country. As their host, we are responsible for their safety.

However, the Metropolitan Police force is severely undermanned today and is having extreme difficulty in recruiting police officers. According to testimony presented before the Rules Committee there are 800 vacancies which are yet to be filled. With the crime rate in the District on a constant increase we should not create a situation which would further decrease the Metropolitan Police force. This would tend to allow an even greater increase in crimes in the District.

Because of the greater attraction of the new Executive Protective Service, unless we limit the number of men who can be recruited from the Metropolitan Police force, we would open the floodgates and leave the District in an intolerable situation. The testimony before the Rules Committee was to the effect that only the basic cadre would be recruited from the District force and that the main part of the additional 600 officers could be recruited from areas other than the District because of the greater attraction of the new Executive Protective Service.

My amendment, therefore, would in no way interfere with the program intended by this legislation. By the same token, my amendment would protect the Metropolitan Police force from being severely crippled by mass resignations of its members who would be attracted to the new Executive Protective Service. My amendment would insure happiness all around.

I urge its adoption.

Mr. BROYHILL of Virginia. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Virginia.

Mr. BROYHILL of Virginia. In view of the fact that at present and for the past several years the recruitment of the White House Police has been exclusively from members of the Metropolitan Police force, I feel this additional language the gentleman proposes would certainly help to provide protection which the gentleman seeks.

Mr. MATSUNAGA. I thank the gentleman from Virginia.

Mr. GROSS. There is nothing in the gentleman's amendment—which was not read in full, as the gentleman knows—which would preclude the recruiting of potential police officers in the Southern States?

Mr. MATSUNAGA. Nothing at all.

Mr. GROSS. Mr. Chairman, I withdraw my reservation.

The CHAIRMAN. Is there objection to the request of the gentleman from Hawaii?

There was no objection.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Hawaii (Mr. MATSUNAGA).

The amendment was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. DANIELS of New Jersey, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H.R. 14944) to authorize an adequate force for the protection of the Executive Mansion and foreign embassies, and for other purposes, pursuant to House Resolution 754, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. O'HARA. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 394, nays 7, not voting 32, as follows:

[Roll No. 338]

Fascell	Pelly	Wright
Ford, Gerald R.	Pepper	

So the bill was passed.

The Clerk announced the following pairs:

Mr. Hébert with Mr. Gerald R. Ford.
Mr. Sisk with Mr. Lipscomb.
Mr. Rivers with Mr. Hall.
Mr. Hanna with Mr. Pollock.
Mr. Wright with Mr. Pelly.
Mr. Baring with Mr. Martin.
Mr. Fascell with Mr. Reifel.
Mr. Celler with Mr. Cahill.
Mr. Pepper with Mr. Taft.
Mr. Barrett with Mr. Whalley.
Mr. Abbitt with Mr. Landrum.
Mr. Andrews of Alabama with Mr. Moss.
Mr. Thompson of New Jersey with Mr. Conyers.
Mr. Tunney with Mr. Dawson.
Mr. Kirwan with Mr. Powell.

The result of the vote was announced as above recorded.

The doors were opened.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. GRAY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

PERMISSION FOR HOUSE MANAGERS TO FILE CONFERENCE REPORT ON S. 2577, TO LOWER INTEREST RATES, FIGHT INFLATION, HELP HOUSING, SMALL BUSINESS, AND EMPLOYMENT

Mr. PATMAN. Mr. Speaker, I ask unanimous consent that the managers on the part of the House may have until midnight tonight to file a conference report on the bill (S. 2577) to lower interest rates and fight inflation, to help housing, small business, and employment, and for other purposes. That is the bill passed yesterday afternoon.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERSONAL ANNOUNCEMENT

Mr. COUGHLIN. Mr. Speaker, when the votes were taken on rollcall No. 335, the motion to recommit, and rollcall No. 336, the conference report on the Federal Coal Mine Health and Safety Act, I was necessarily absent. I was a sponsor of the legislation. I firmly supported it, and supported its passage.

Had I been present, I would have voted "nay" on the motion to recommit, rollcall No. 335, and "yea" on the conference report, rollcall No. 336.

APPOINTMENT OF CONFEREES ON H.R. 13111, DEPARTMENTS OF LABOR, HEALTH, EDUCATION, AND WELFARE, AND RELATED AGENCIES APPROPRIATIONS, 1970

Mr. FLOOD. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 13111) making appropriations for the Departments of Labor, Health, Education, and Welfare, and related agencies for the fiscal year ending June 30, 1970, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

Mr. CONTE. Mr. Speaker, reserving the right to object, and I do not intend to object, let me say that we had an earlier colloquy on the floor of the House on the parliamentary situation. Since that time we have had several discus-

sions with the chairman of the subcommittee, Mr. FLOOD, who has been most gracious and most cooperative. We have also had some discussions with Members on my side of the aisle. The parliamentary situation is such, Mr. Speaker, that should I move to instruct the conferees and someone on that side moves to table the motion, we will not have a clear vote either up or down on the question of whether the House wishes to retain the Scott amendments or the Whitten amendments. Therefore, based on the conversations I had with the chairman of the subcommittee and the assurance he has given me of his cooperation, and the assurance I have from members on my side of the committee, including the ranking Republican and others on the committee——

Mr. FLOOD. I confirm these statements.

Mr. CONTE. At present it would appear that the wisest thing to do in order to try to preserve the language of the Senate would be not to move to instruct the conferees and let them work their will. Then when they come back at that time we will make a motion, I hope with the support of the leadership.

Mr. FLOOD. If I were in the position of the gentleman from Massachusetts, I would do exactly the same thing.

Mr. BOW. Mr. Speaker, will the gentleman from Massachusetts yield?

Mr. CONTE. I yield to the gentleman from Ohio.

Mr. BOW. The statement has been made that an agreement has been made with the ranking minority member. I do not know what that agreement is. No one discussed any agreement with me. I would like to be advised before any agreement is made here as to what it is.

Mr. CONTE. Certainly. I spoke with the gentleman from Illinois, and I apologize for not speaking to the gentleman from Ohio. Things were moving quite fast here.

Mr. BOW. I am still around here, and I am not hard to catch.

Mr. CONTE. As I understand it, there are Members on our side of the aisle and Members on the other side of the aisle that will support the Scott amendment individually. If we do prevail, then the issue is over with. If we do not prevail, then when the bill comes back from conference, we will have an opportunity at that time to ask for a rollcall vote on this particular amendment.

Mr. BOW. Mr. Speaker, will the gentleman yield further?

Mr. CONTE. I am glad to yield.

Mr. BOW. There is no question that you can have a rollcall vote, but I have heard some rumors around here that somebody wants to take over the prerogative of the motion to recommit. There has been no agreement on that.

Mr. CONTE. No. There has been no agreement.

Mr. FLOOD. I have never heard of that.

Mr. CONTE. If the gentleman had been in the Chamber earlier, we asked for that agreement but no one in the minority could give me that assurance.

Mr. COHELAN. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from California.

Mr. COHELAN. I thank the gentleman for yielding.

I merely want to say that the situation is fluid at this moment. The conferences we have been having in this intermittent period have been very awkward. We have been trying to get agreements that would give us some assurance, as the gentleman from Massachusetts has pointed out, that we would ultimately get an opportunity to obtain a clear vote on the Scott Senate amendment and, of course, the House version which was voted into the Committee of the Whole House on the State of the Union. It seems that on the basis of the information the gentleman from Massachusetts has at this moment received, he has decided that we should not follow this course of action.

This, of course, puts us in this awkward position. I want the record to be clear on this. If we fail to make a motion to instruct, we will have no parliamentary opportunity to express ourselves on this matter. Even though the inevitable motion to table will follow a motion to instruct the conferees to accept the Senate amendment and would, of course, obscure the issue.

Mr. Speaker, I am going to these lengths and am being elementary about this because neither I nor the gentleman from Michigan (Mr. O'HARA), who has been working to try to establish some agreement, have been able to make up our minds. As some of the sponsors of the Whitten amendment know, we are all most concerned. We must try to get a clear-cut record vote in the House of Representatives on this issue so we can go back to our constituents this year as we did last year and let them know how we stand on the Whitten amendment. Last year the conference came back in disagreement with the Senate amendments in three particulars and there were three rollcall votes. We adopted the Whitten amendment in the Committee of the Whole House on a teller vote, a nonrecord vote. When it came back from conference, we were in a position to get a record vote and were successful in striking the Whitten amendment. That is the issue here. We are hopeful that the House conference will come back in disagreement with the Scott amendment which was passed by the other body by a vote of 52 to 37. Such action will give us the opportunity to vote clearly on the record; an opportunity we have had in the past.

The Members of this body, especially those of us who have been here for a number of years, know the nature of the conference committee.

The composition of the conference on the other side is interesting in that seven of the nine Members voted against the Scott amendment. It may be assumed therefore that they would, of course, be willing to yield to our very persuasive and distinguished friend, the gentleman from Mississippi (Mr. WHITTEN), and his point of view. This, of course, would be reflected in the conference report. That is what it is all about.

Mr. O'HARA. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Michigan.

Mr. O'HARA. May I ask the gentleman from Massachusetts this question: Did I understand the gentleman to say that he had received assurances that he seemed to think were adequate if the motion to instruct were not offered, that an opportunity would be had to have a separate vote on the Scott amendment to the Whitten amendment?

Mr. CONTE. That is my understanding. I want it completely understood here that I have made no agreement on the motion to recommit in case that comes up. We have had an earlier discussion on that. We tried to receive that assurance here on the floor, but we did not receive it. However, I am assured at this time by the leadership on our side that they will support a rollcall vote to delete this from the conference report.

Mr. O'HARA. Mr. Speaker, if the gentleman will yield further for just one moment, I would like to inquire—not being an expert on appropriations conference committees—if it would be possible to bring back an amendment in disagreement if the Senate conferees were to offer to recede from their disagreement.

Mr. CONTE. Well, this is one of the very difficult porblems that we have. I would like to yield to my friend, the gentleman from Ohio, the ranking Republican Member here to respond to that. This represents a very difficult parliamentary procedure.

Mr. BOW. I would say to my friend, the gentleman from Massachusetts (Mr. CONTE), that the gentleman from Massachusetts now sitting in the chair will rule on the parliamentary procedures and not the ranking Republican member of the Committee on Appropriations.

I think we are dealing in semantics here. I would not be a bit surprised that whatever you should bring back in the way of this appropriation bill, unless there are a great deal of changes in it, we will probably be back here on the day after Christmas because I would expect a Presidential veto if it were otherwise.

Mr. CONTE. The vote in the other body on the so-called Scott amendment was 52 to 37.

I realize that seven out of the nine conferees on the Senate side voted against the so-called Scott amendment. Therefore I would imagine that the slightest breeze would topple them over. However, I also imagine the parliamentary situation would be that they would have to go back to the Senate, stating that they receded on that particular amendment, and with such a strong vote, 52 to 37 in the Senate, they would have a very difficult time getting away with it.

Mr. O'HARA. If the gentleman will yield further do we have assurances of the chairman of the subcommittee and the ranking minority member of the full committee and the ranking minority member of the subcommittee that they will endeavor to bring back an amendment in disagreement that will give the House a clear-cut vote on that issue?

Mr. CONTE. Mr. Speaker, I yield to the gentleman from Pennsylvania, because he was very clear and concise with me, and very fair.

Mr. FLOOD. Mr. Speaker, everybody in this House knows personally that I will exert myself to do just exactly what my friend requested. There is no doubt about it.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

Mr. CONTE. Mr. Speaker, further reserving the right to object, I will yield to the gentleman from Illinois (Mr. ANDERSON).

Mr. ANDERSON of Illinois. Mr. Speaker, I am in some state of confusion myself at the moment. I would like to ask the gentleman from Massachusetts further what does the gentleman understand the parliamentary situation to be in the event that the Senate does recede on the Scott amendment? Would the House then have to accept the language that was passed earlier in the Labor-HEW bill, namely, the Whitten amendment? Would we have to accept that precise language?

Mr. CONTE. I would imagine that might be the parliamentary situation.

Mr. ANDERSON of Illinois. Then how are we in a position to get a separate vote on that question when the conference report comes back to the House, if it is not in disagreement, if it is merely a part of the general conference report; unless there is some assurance that this would be the motion to recommit the conference report, how would we get a record vote?

Mr. CONTE. I do not see any way that you can. Of course, we are caught in this dilemma. When I offer a motion to instruct the conferees, I have been informed by the other side that they will immediately offer a motion to table. So we end up in the same fuzzy situation, in which you will not be voting on the specific issue.

Mr. ANDERSON of Illinois. Mr. Speaker, would the gentleman yield further, so that I may address a parliamentary inquiry to the Chair?

Mr. CONTE. By all means.

PARLIAMENTARY INQUIRIES

Mr. ANDERSON of Illinois. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. ANDERSON of Illinois. Mr. Speaker, in connection with the matter now under discussion, if in connection with the so-called Scott amendment the Senate conferees should recede and the position of the House should prevail, and the matter should then be returned to the House in the form of the so-called Whitten amendment as merely a part of the overall conference report, would it be possible then, or would the parliamentary situation be such that we in the House could obtain a separate vote on the question of whether or not we wanted the language of the so-called Whitten amendment?

The SPEAKER. The Chair will state that a motion to recommit with instructions could be made.

The question is then for recognition on the motion to recommit. But in response to the parliamentary inquiry the Chair will state that it cannot answer what might occur in the future.

Mr. ANDERSON of Illinois. Mr. Speaker, will the gentleman yield further for a further parliamentary inquiry?

Mr. CONTE. I yield further to the gentleman from Illinois.

Mr. ANDERSON of Illinois. Mr. Speaker, my further parliamentary inquiry is this: If the motion to recommit were to concern itself solely with the amount of the appropriation, the dollar amount of the appropriation, and have no reference to the substantive matter which we are now discussing, would it be possible under those circumstances to get a separate vote on the so-called Whitten amendment?

The SPEAKER. The Chair will state that the one motion to recommit would be in order, and the Chair has no knowledge as to what that motion would be, therefore the Chair does not feel constrained to give an opinion on something that concerns the future and might or might not arise.

Mr. ANDERSON of Illinois. Mr. Speaker, will the gentleman from Massachusetts yield further?

Mr. CONTE. I will gladly yield further to the gentleman from Illinois.

Mr. ANDERSON of Illinois. Mr. Speaker, obviously I am in no position to make any commitment for anybody other than myself. But it would certainly be my intention to vote against the so-called Whitten amendment, if the opportunity presented itself for such a separate vote.

I might say further that the public announcement this morning in the press that the Secretary of Health, Education, and Welfare was delighted with the action taken in the Senate yesterday by the so-called Scott amendment, I have received word this morning from two different members of the Department of Health, Education, and Welfare indicating that that is the administration position and that they are desirous of seeing the Scott amendment adopted as part of the final version of the Department of Labor and Health, Education, and Welfare appropriation bill.

Mr. CORMAN. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman.

Mr. CORMAN. I want to pose a question to the chairman of the subcommittee as well as the chairman of the conference of the House, Is it not the normal position of the House conferees that they will try to preserve the position of the House?

Mr. FLOOD. Of course.

Mr. CORMAN. Then I would observe that this is very probably the only time that we will have a separate vote on the Whitten amendment. I think we have been educated very well in this session on the use of the motion to recommit to frustrate efforts to get clear cut votes on matters in dispute. I would hope that we would have a vote now, and I do not think there really is any question about the issue, even though it must come up without debate, we should have a rollcall on the motion to table.

Mr. O'HARA. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman.

Mr. O'HARA. I would like to say to the gentleman, I do not think we can in any possible way get any reasonable assurance as to a separate vote when the conference report is brought back and under these circumstances I would hope that the gentleman from Massachusetts will offer his motion to instruct, and if he does not choose to do so, I would like to do so.

Mr. CONTE. Mr. Speaker, in view of this colloquy and the discussion I had with the distinguished chairman of the subcommittee, I want the record to be clear that I regret very much doing this. The chairman has been wonderful about the whole thing. However, if the Senate recedes, we would end up not being able to vote on the real issue—the Whitten amendment. I am afraid that, with seven Members out of nine having voted against the Scott amendment in the other body, we do not have much hope.

We only have one choice if we want to vote clearly on the Whitten amendment—we must act now. I understand the gentleman from Pennsylvania (Mr. FLOOD) will offer a motion to table. The parliamentary situation will be that this motion to table should be voted down.

If it is, then a motion to instruct the conferees should prevail. Therefore, Mr. Speaker, I will make my motion to instruct the conferees to accept the Scott amendment, and thus I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania (Mr. FLOOD)?

Mr. COHELAN. Mr. Speaker, further reserving the right to object, I would like to make one final comment.

I should like the Members of the House to understand that this colloquy is just as pure as it can be and it makes perfectly clear that our options are limited and is essential that the House express itself in this vital issue. I therefore urge Members to support the Conte motion to instruct and to vote against the motion to recommit.

Mr. Speaker, this motion would uphold the standards and principles which have been previously established by Congress and affirmed by the courts for desegregating illegally constituted dual school systems. Those standards, founded in title VI of the Civil Rights Act of 1964, make compliance with the law contingent upon the steps taken by school officials to end unconstitutional school systems.

The Supreme Court on October 29 of this year, just a few short weeks ago, again reaffirmed its position against segregated school systems. In Alexander against Holmes County, the Court ruled that the time in which schools were to desegregate with "deliberate speed" had expired—school systems must desegregate immediately. The Court stated clearly and emphatically that segregation is a concept thoroughly alien to the will of the Supreme Court and that such a concept as applied to education is no longer constitutionally viable. The Court further stated that school districts "must terminate dual school systems once and for all and operate now and hereafter unitary schools."

The language, will, and intent of the Court is perfectly clear. Can we in conscience ignore the dictates of the Court? Can we in conscience run the risk of a

mammoth retreat in civil rights progress—and this is exactly what we would be doing if we accept the original language of the Whitten provisions of this bill.

The acceptance of this language will do no more than weaken and undermine all the good that the Congress has done in the name of civil rights. All the laws in the world will not change mentalities of bigotry, prejudice and discrimination. But the law, in this instance, is the only instrument that will affect the climate of decency and equality under which free men can live with dignity and honor. And the proper enforcement of and protection of such law is that which gives it vitality and essence.

Our action here today will determine our respect for the law and our interest in its proper and equitable enforcement. If we accept the Whitten language, Mr. Speaker, we will be rejecting a fair and effective policy by watering down HEW's authority in taking prompt and decisive action to end illegal dual school systems.

Can any reasonable man believe that there would have been any change in the dual school systems of the South without some reorganization of the school systems? Furthermore, can freedom-of-choice plans be forwarded as effective devices for ending segregation? We have all been over this many times before. The record is abundantly clear. Freedom of choice did not alter patterns of unconstitutional school segregation in the South. Surely, none of us are naive enough to believe that black people living in areas where centuries-old attitudes of hostility and prejudice are realities, are really free to choose to send their children to all-white schools. And surely none of us is naive enough to think that these attitudes will just someday disappear—human nature is not like that. Genuine equality is not something which should be given only to those who are willing to take every conceivable psychic and physical risk to attain it. Equality is something which institutions—especially those supported by public funds—should insure and protect.

To modify title VI of the Civil Rights Act of 1964, with the provisions passed earlier by this body, the Whitten amendment extends nothing but encouragement to those who seek to stop those long overdue changes in the segregated educational institutions. The Senate had the wisdom in the past and again just yesterday, to appreciate the devastating effect which the House-passed language would have on the effective integration of segregated school districts.

The Senate has acted in a constructive manner in this issue and I feel that the House cannot do less. I realize that many of my colleagues are seriously concerned about unnecessary busing, but, if we are honest, we will admit that at issue here is not indiscriminate busing, but the means to be used to end segregation. The Senate version that passed 52 to 37 took note of all the objections of the Whitten language and said that none of the means suggested by this language could be utilized except when there was a constitutional question.

These six words, "except as required by the Constitution" adds a crucial dimension to the Whitten language by subjecting it to the test of constitutionality.

Moreover, the position of the Senate-passed version of the Whitten language is consistent with the courts and the statutes in dealing with school desegregation. For both, the courts and the law, have made it explicitly clear that Federal efforts at desegregation are to be confined to unconstitutional and discriminatory situations. I reject the argument that every effort of HEW or the courts to require positive implementation of school desegregation exceeded statutory and judicial boundaries. The recent Supreme Court decision of last month reaffirms the national commitment to desegregation and illustrates the fact that there has been much unnecessary delay in desegregating schools.

There are those who would contend that anything beyond the voluntary actions of parents or children to desegregate schools is outside the context of the law. I cannot subscribe to such a restrictive interpretation. I am sustained again in my position by the recent ruling of the Supreme Court and by the public statements of no less than the President of the United States, the Attorney General, and the Secretary of Health, Education, and Welfare. Furthermore, I concur with the opinion of the courts that affirmative action upon the part of school officials is both a just and practical way of abolishing educational inequality resulting from segregation.

I support Health, Education, and Welfare in its efforts to implement title VI of the Civil Rights Act of 1964. This effort, incidentally, includes patient and persistent efforts at negotiation with local school districts. But when meaningless gestures are offered as solutions to serious problems of illegal segregation, then the sanctions of title VI should become fully operative.

I regard this approach as one which is fair and hopefully effective. It is for this reason that I ask for support of the Senate language which, if accepted, would keep this Nation moving toward the goal which was charted for it in 1954 and made clearer 10 years later in the Civil Rights Act of 1964, and which was further implemented by the Supreme Court's decision in October of this year.

Mr. Speaker, I support the motion to instruct the conferees to accept the Senate-passed amendment. It is my fervent hope that if this motion is successful, the House conferees will accept and support the will of the House as expressed in this vote.

WHAT THE SENATE LANGUAGE DOES

Mr. CONTE. Mr. Speaker, it merely makes clear that the so-called Whitten amendment can be applied only to the extent that it does not conflict with the Constitution. Without it, this body would clearly be flouting the Constitution.

EQUAL APPLICATION OF THE LAW TO NORTH AND SOUTH IS NOT THE ISSUE

It may be, as some have said, that racial imbalance in the North should be opposed to the same extent that racial segregation is being opposed in the South. But that is not the issue before us now. The Whitten amendment without the change made in the other body, would have us thumb our nose at a series of unanimous Supreme Court decisions which have made it clear that government-created segregation is unconstitutional and must be stopped.

The Whitten proposal would have us retreat to the shameful record of the past before the famous Brown decision. We cannot countenance such a retreat. What is needed is a rededication to the speedy implementation of that great decision.

BUSING TO END RACIAL IMBALANCE IS ALREADY UNLAWFUL

At least three times before, the Congress has made clear that it is opposed to "forced busing" to eliminate racial imbalance. Racial imbalance is not a condition created by Government action. In the Civil Rights Act of 1964, in the Elementary and Secondary Education Act, and in the Metropolitan Development Act of 1966, "forced busing" or other acts to eliminate this innocently created "imbalance" are prohibited.

Therefore, these sections offered by the gentlemen from Mississippi are completely superfluous and unnecessary for that purpose. But, at the same time, they would nullify the action Congress has taken to implement the constitutional mandate to put an end to segregated schools.

Another deceptive phrase is "freedom of choice." Like the phrase "right to work" it has, in practice, a true meaning completely at odds with its civil libertarian ring.

Last year in Green against School Board of New Kent County, the Supreme Court held that so-called "freedom of choice" plans are unconstitutional where they are designed to perpetuate a segregated system. These sections seek to repudiate the Green decision.

As I said before in this House, the language used is nothing but a "red herring" since "forced busing" by the use or withholding of Federal funds is forbidden now for the purpose of achieving racial balance. Therefore, for that purpose, the amendment was unnecessary.

ADMINISTRATION OPPOSED TO WHITTEN AMENDMENT

There can no longer be any doubt where the administration stands on this issue. Secretary of Health, Education, and Welfare Finch has stated that this amendment "would seriously undermine this Department's responsibilities to public education." The amendments, he went on "would cripple the efforts of this Department to enforce the mandate of the Supreme Court."

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania (Mr. FLOOD)?

There was no objection.

MOTION OFFERED BY MR. CONTE

Mr. CONTE. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. CONTE moves that the Managers on the part of the House, at the conference on the disagreeing votes of the two Houses on the bill, H.R. 13111, be instructed to agree to the amendments of the Senate numbered 87 and 88.

PREFERENTIAL MOTION OFFERED BY MR. FLOOD

Mr. FLOOD. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. FLOOD moves to lay on the table the motion of the gentleman from Massachusetts (Mr. CONTE).

The SPEAKER. The question is on the preferential motion.

The question was taken, and the Speaker being in doubt, the House divided, and there were—ayes 93, noes 96.

Mr. FLOOD. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 181, nays 216, not voting 36, as follows:

[Roll No. 339]

So the preferential motion was rejected.

Mr. GALLAGHER changed his vote from "yea" to "nay."

Mr. BOW changed his vote from "nay" to "yea."

Mr. SPRINGER changed his vote from "yea" to "nay."

Mr. WIGGINS changed his vote from "nay" to "yea."

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the motion offered by the gentleman from Massachusetts (Mr. CONTE).

The motion was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER. The Chair appoints the following conferees: Messrs. FLOOD, NATCHER, SMITH of Iowa, HULL, CASEY, MAHON, MICHEL, SHRIVER, Mrs. REID of Illinois, and Mr. BOW.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H.R. 9366. An act to change the limitation on the number of apprentices authorized to be employees of the Government Printing Office, and for other purposes.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 15149. An act making appropriations for Foreign Assistance and related programs for the fiscal year ending June 30, 1970, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 15149) entitled "An act making appropriations for foreign assistance and related programs for the fiscal year ending June 30, 1970, and for other purposes, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. MCGEE, Mr. ELLENDER, Mr. MCCLELLAN, Mr. HOLLAND, Mr. MONTOYA, Mr. FONG, Mr. COTTON, Mr. PEARSON, and Mr. YOUNG of North Dakota to be conferees on the part of the Senate.

The message also announced that the Senate disagrees to the amendments of the House to the bill (S. 2577) entitled "An act to provide additional mortgage credit, and for other purposes," agrees to a conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. SPARKMAN, Mr. PROXMIRE, Mr. WILLIAMS of New Jersey, Mr. BENNETT, and Mr. BROOKE, to be the conferees on the part of the Senate.

The message also announced that Mr. PASTORE and Mr. CASE be appointed as additional conferees on the bill (H.R. 13111) entitled "An act making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1970, and for other purposes."

TO AUTHORIZE ADDITIONAL INVESTIGATIVE AUTHORITY TO THE COMMITTEE ON EDUCATION AND LABOR

Mr. YOUNG. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 572 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 572

Resolved, That the second paragraph of House Resolution 200, Ninety-first Congress, is amended by inserting after "within" the following: "or outside".

Such resolution is further amended by striking out the last paragraph and inserting in lieu thereof the following:

"Notwithstanding section 1754 of title 22, United States Code, or any other provision of law, local currencies owned by the United States shall be made available to the Committee on Education and Labor of the House of Representatives and employees engaged in carrying out their official duties under sec-

tion 190d of title 2, United States Code: *Provided*, That (1) no member or employee of said committee shall receive or expend local currencies for subsistence in any country at a rate in excess of the maximum per diem rate set forth in section 502(b) of the Mutual Security Act of 1954, as amended by Public Law 88–633, approved October 7, 1964; (2) no member or employee of said committee shall receive or expend an amount for transportation in excess of actual transportation costs; (3) no appropriated funds shall be expended for the purpose of defraying expenses of members of said committee or its employees in any country where counterpart funds are available for this purpose.

"Each member or employee of said committee shall make to the chairman of said committee an itemized report showing the number of days visited in each country whose local currencies were spent, the amount of per diem furnished, and the cost of transportation if furnished by public carrier, or if such transportation is furnished by an agency of the United States Government, the cost of such transportation, and the identification of the agency. All such individual reports shall be filed by the chairman with the Committee on House Administration and shall be open to public inspection."

With the following committee amendment:

Strike all after the word *"Resolved,"* on page 1, and insert in lieu thereof the following language:

"That, notwithstanding the provisions of H. Res. 200, Ninety-first Congress, the General Subcommittee on Labor of the Committee on Education and Labor is authorized to send not more than twelve members of such committee (seven majority and five minority), not more than two majority staff assistants, and not more than two minority staff assistants to the Scandinavian area, Southeast Asia, and countries on the North American continent for the purpose of making a full and complete investigation and study of (1) the circumstances surrounding the production in foreign nations of goods which are subsequently sold in the United States in competition with domestically produced goods; (2) welfare and pension plan programs; and (3) the operation by the Federal Government of elementary and secondary schools, both at home and abroad, with a view to determining means of assuring that the children of civilian officers and employees, and members of the Armed Forces of the United States will receive high quality elementary and secondary education.

"Resolved further, That, notwithstanding the provisions of H. Res. 200, Ninety-first Congress, the Select Subcommittee on Education of the Committee on Education and Labor is authorized to send not more than nine members of such committee (five majority and four minority), not more than two majority staff assistants, and not more than two minority staff assistants to Israel for the purpose of making a full and complete investigation and study of (1) Israeli educational institutions receiving United States funds to perform educational research, vocational rehabilitation services, model programs for the handicapped, adult and community services, preschool programs, higher education programs, and so forth; and (2) the applicability of Israeli programs to the improvement of United States education.

"Notwithstanding section 1754 of title 22, United States Code, or any other provision of law, local currencies owned by the United States shall be made available to the Committee on Education and Labor of the House of Representatives and employees engaged in carrying out their official duties under section 190(d) of title 2, United States Code: *Provided*, That (1) no member or employee of said committee shall receive or expend local currencies for subsistence in any country at a rate in excess of the maximum per diem rate set forth in section 502(b) of the Mutual Security Act of 1954, as amended by Public Law 88–633, approved October 7, 1964; (2) no member or employee of said committee shall receive or expend an amount of transportation in excess of actual transportation costs; (3) no appropriated funds shall be expended for the purpose of defraying expenses of members of said committee or its employees in any country where counterpart funds are available for this purpose.

"Each member or employee of said committee shall make to the chairman of said committee an itemized report showing the number of days visited in each country where local currencies were spent, the amount of per diem furnished, and the cost of transportation if furnished by public carrier, or if such transportation is furnished by an agency of the United States Government, the cost of such transportation, and the identification of the agency. Amounts of per diem shall not be furnished for a period of time in any country if per diem has been furnished for the same period of time in any other country, irrespective of differences in time zones. All such individual reports shall be filed by the chairman with the Committee on House Administration and shall be open to public inspection."

The SPEAKER. The gentleman from Texas is recognized for 1 hour.

Mr. YOUNG. Mr. Speaker, I yield 30 minutes to the gentleman from Tennessee (Mr. QUILLEN), pending which I yield myself such time as I may consume.

Mr. Speaker, the resolution as reported grants authority for the Committee on Education and Labor to send no more than 12 members and four staff assistants to the Scandinavian area, Southeast Asia, Mexico, and Canada to make investigations in the areas of the common market, welfare and pension plan programs, and education.

As I understand it, the 12 members who are on the General Subcommittee on Labor, will be separated into three groups, with one group traveling to each of the geographical areas specified.

House Resolution 572 also authorizes the Select Subcommittee on Education to send not more than nine members and not more than four staff assistants to Israel to make an investigation and study of Israel educational institutions receiving U.S. funds to perform educational research, vocational rehabilitation services, model programs for the handicapped, adult and community services, preschool programs, higher education programs, and so forth; and the applicability of Israel programs to the improvement of education in this country.

Counterpart funds shall be made available for the use of the members while in travel status and the resolution contains the so-called Hall amendment providing that per diem shall not be furnished for a period of time in any country if per diem has been furnished for the same period of time in another country, irrespective of differences in time zones.

House Resolution 572, as introduced, gave the Committee on Education and Labor blanket authority to travel anywhere at any time. The Committee on Rules, having original jurisdiction over the measure, deemed it advisable to amend the resolution to spell out more specifically how many members and staff personnel would be traveling and what countries would be visited.

Mr. Speaker, I urge the adoption of House Resolution 572, as amended.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. YOUNG. I yield to the gentleman from Iowa.

Mr. GROSS. Mr. Speaker, this resolution provides for members of the Education and Labor Committee to go to Europe and Asia and where else?

Mr. YOUNG. Mr. Speaker, I advise the gentleman from Iowa the resolution calls for the visits to the Scandinavian area, Southeast Asia, and countries on the North American Continent.

I understand the request will be laid before the Rules Committee, and the House Education and Labor Committee will be divided into three groups, and the groups will travel separately to those different areas.

Mr. GROSS. Do I understand they will study the common market?

Mr. YOUNG. Mr. Speaker, I will yield to the Chairman of the Education and Labor Committee for a description of his intentions in this respect.

Mr. PERKINS. Mr. Speaker, let me say to my distinguished colleague, the intent of the resolution is that the general Subcommittee on Labor will study the pension and welfare systems in the Scandinavian countries and in the other countries, because that committee shortly will be conducting lengthy hearings concerning the pension and welfare plans and amendments to the present law which involve many billions and billions of dollars.

Mr. GROSS. In the Scandinavian countries, are they going to Sweden?

Mr. PERKINS. I imagine that country will be included.

Mr. GROSS. Will they embark while on this junket on a study of Sweden's free love, trial marriage and so on?

Mr. PERKINS. I do not think so. I think the Subcommittee on Labor has demonstrated in their travels in Europe and in England this last spring, when they went to study mine safety and the so-called black-lung provisions of the law, that their trip was very beneficial.

There is no sinister motive involved, no motive except to write better legislation.

Mr. GROSS. I do not know anybody who ever took a junket abroad who had a sinister motive. There are usually other motives by Members in taking a junket over the world.

But does the Chairman have any idea of the expense of this junket? Was there not a big deficit in the U.S. balance of trade for the month of November.

Mr. PERKINS. Let me say to my distinguished friend I have not been anywhere since World War II days, and I know very little about the situation.

Mr. GROSS. But the gentleman is surely interested in knowing the deficit in the balance of payments as the chairman of the committee and as the one who authorizes these trips. This will contribute to the outflow of dollars.

Mr. PERKINS. The gentleman knows there are counterpart funds involved.

Mr. GROSS. Are there counterpart funds in Sweden? Since when did we have them on our giveaway list?

Mr. PERKINS. I do not know about that. I am not able to answer that.

Mr. GROSS. The gentleman is the chairman of the committee. He has authorized this junket. I am only trying to ask a few questions.

Mr. PERKINS. I will say to my distinguished colleague that I will not refer to them as junkets. I think the general Subcommittee on Labor has a worthy purpose in going over there, which is to study the pension and welfare laws. I think the other subcommittees, such as the Select Subcommittee on Education, has a worthy motive in going to Israel to study the educational problems involved there, where we are spending millions and millions of dollars in the overseas schools. I think it behooves the House to send representatives of the committee to look into the ways the schools are being operated over there. I say to my distinguished colleague, that is their duty.

I see nothing wrong with the resolution.

Mr. NELSEN. Mr. Speaker, will the gentleman yield?

Mr. YOUNG. I yield to the gentleman from Minnesota.

Mr. NELSEN. I was just going to suggest, if the Members get over to Denmark and need an interpreter, I speak the language rather fluently and I should be glad to assist the committee.

Mr. PERKINS. I was there once myself. It has been a long time ago. I hope to go back some day.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 572 as introduced provided for blanket travel authority outside the United States without any prior authorization by the House.

The resolution as reported by the Committee on Rules provides authority to the committee to undertake two investigative trips which it was testified were to be taken in the near future.

The Rules Committee, in its amended language, authorized travel to those places requested and also gave the committee its approval to send as many members to participate as was requested.

However, the Rules Committee did not believe that it should grant blanket, unrestricted travel authority to the Education and Labor Committee. To do so is to avoid its own responsibility to see that congressional travel is worthwhile and productive.

I have no further comments on this resolution as I feel it is clear on its face.

Mr. Speaker, I have no other requests for time. I yield to the gentleman from Iowa (Mr. GROSS).

Mr. GROSS. I thank the gentleman for yielding.

The committee did not put too many restrictions on them, if they are going to Europe, Southeast Asia, Mexico, Canada, and other watering places. They are going to take a pretty good gallop over parts of the world, are they not?

Mr. QUILLEN. I will say to the distinguished gentleman from Iowa, the Rules Committee did put a few restrictions on the language in the resolution. Had it been reported out as requested it would have been a galloping holiday with jingle bells and Happy New Year all entwined. The resolution as introduced provided for unrestricted travel authority.

Mr. GROSS. I thank the gentleman for what the committee did to put some strings on these junketeers.

Did the gentleman say that this trip was not authorized by any other committee? What was the statement about authorizing?

Mr. QUILLEN. I say that the Rules Committee did not authorize the original resolution which came before our committee. We amended it with this restricted language.

Mr. GROSS. I see. I thank the gentleman.

Mr. QUILLEN. Mr. Speaker, I have no further requests for time.

Mr. YOUNG. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore (Mr. PRICE of Illinois). The question is on the committee amendment.

The committee amendment was agreed to.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. GROSS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 224, nays 154, not voting 55, as follows:

[Roll No. 340]

Mr. Pepper with Mr. Cunningham.
Mr. Hanna with Mr. Grover.
Mr. Vanik with Mr. Esch.
Mrs. Green of Oregon with Mr. Taft.
Mr. Colmer with Mr. Whalley.
Mr. Sisk with Mr. Robison.
Mr. Fascell with Mr. Reifel.
Mr. O'Neill of Massachusetts with Mr. Pelly.
Mr. Fulton of Tennessee with Mr. McClory.
Mr. Andrews of Alabama with Mr. Baring.
Mr. Clay with Mr. Tunney.
Mr. Landrum with Mr. Kirwan.
Mr. Charles H. Wilson with Mr. Diggs.
Mr. Conyers with Mr. Powell.

Mr. WIDNALL changed his vote from "nay" to "yea."

Mr. SEBELIUS changed his vote from "yea" to "nay."

The result of the vote was announced as above recorded.

The doors were opened.

The title was amended so as to read: "A resolution to authorize additional investigative authority to the Committee on Education and Labor."

A motion to reconsider was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate insists upon its amendments to the bill (H.R. 13000) entitled "An act to implement the Federal employee pay comparability system, to establish a Federal Employee Salary Commission and a Board of Arbitration, and for other purposes," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. McGEE, Mr. YARBOROUGH, Mr. RANDOLPH, Mr. FONG, and Mr. BOGGS to be the conferees on the part of the Senate.

The message also announced that the Senate disagrees to the amendments of the House to amendments of the Senate to the bill (H.R. 11959) entitled "An act to amend chapters 31, 34, and 35 of title 38, United States Code, in order to increase the rates of vocational rehabilitation, educational assistance, and special training allowance paid to eligible veterans and persons under such chapters," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. CRANSTON, Mr. YARBOROUGH, Mr. RANDOLPH, Mr. KENNEDY, Mr. MONDALE, Mr. HUGHES, Mr. SCHWEIKER, Mr. JAVITS, Mr. DOMINICK, Mr. SAXBE, and Mr. SMITH of Illinois to be the conferees on the part of the Senate.

CONFERENCE REPORT ON H.R. 14580, FOREIGN ASSISTANCE ACT OF 1969

Mr. MORGAN submitted the following conference report and statement on the bill (H.R. 14580) to promote the foreign policy, security, and general welfare of the United States by assisting peoples of the world to achieve economic development within a framework of democratic, economic, social, and political institutions, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 91-767)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 14580) to promote the foreign policy, security, and general welfare of the United States by assisting peoples of the world to achieve economic development within a framework of democratic, economic, social, and political institutions, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

That this Act may be cited as the "Foreign Assistance Act of 1969".

PART I—ECONOMIC ASSISTANCE

DEVELOPMENT LOAN FUND

SEC. 101. (a). Section 202(a) of the Foreign Assistance Act of 1961, relating to authorization, is amended—

(1) by striking out "and" after "fiscal year 1968,";

(2) by inserting after "fiscal year 1969," the following: "$350,000,000 for the fiscal year 1970, and $350,000,000 for the fiscal year 1971,"; and

(3) by striking out "the fiscal year ending June 30, 1969" in the second proviso and inserting in lieu thereof "each of the fiscal years ending June 30, 1970, and June 30, 1971".

(b) Section 203 of such Act, relating to fiscal provisions, is amended to read as follows:

"SEC. 203. Fiscal Provisions.—Dollar receipts from loans made pursuant to this part and from loans made under the Mutual Security Act of 1954, as amended, are authorized to be made available for the fiscal year 1970 and for the fiscal year 1971 for use for the purposes of this title, for loans under title VI, and for the purposes of section 232. Such receipts and other funds made available under this section shall remain available until expended."

TECHNICAL COOPERATION AND DEVELOPMENT GRANTS

SEC. 102. Section 212 of such Act, relating to authorization, is amended by striking out "$200,000,000 for the fiscal year 1969" and inserting in lieu thereof "$183,500,000 for the fiscal year 1970, and $183,500,000 for the fiscal year 1971".

AMERICAN SCHOOLS AND HOSPITALS ABROAD

SEC. 103. Section 214 of such Act, relating to American schools and hospitals abroad, is amended—

(1) by striking out of subsection (c) "fiscal year 1969, $14,600,000, to remain available until expended." and inserting in lieu thereof "fiscal year 1970, $25,900,000, and for the fiscal year 1971, $12,900,000, which amounts are authorized to remain available until expended. Amounts appropriated under this subsection for the fiscal year 1970 shall be available for expenditure solely in accordance with the allocations set forth on pages 25 and 26 of House Report No. 91-611 and on page 23 of Senate Report No. 91-603.";

(2) by striking out of subsection (d) "fiscal year 1969 $5,100,000" and inserting in lieu thereof "fiscal year 1970, $3,000,000"; and

(3) by adding at the end of subsection (d) the following new sentence: "Foreign currencies appropriated under this subsection shall be available for expenditure solely in accordance with the allocation set forth on page 23 of Senate Report No. 91-603.".

PROTOTYPE DESALTING PLANT; PROGRAMS FOR PEACEFUL COMMUNICATION

SEC. 104. Title II of chapter 2 of part I, relating to technical cooperation and development grants, is amended by adding at the end thereof the following new sections:

"SEC. 219. PROTOTYPE DESALTING PLANT.—(a) In furtherance of the purposes of this part and for the purpose of improving existing, and developing and advancing new, technology and experience in the design, construction, and operation of large-scale desalting plants of advanced concepts which will contribute materially to low-cost desalination in all countries, including the United States, the President, if he determines it to be feasible, is authorized to participate in the development of a large-scale water treatment and desalting prototype plant and necessary appurtenances to be constructed in Israel as an integral part of a dual-purpose power generating and desalting project. Such participation shall include financial, technical, and such other assistance as the President deems appropriate to provide for the study, design, construction, and, for a limited demonstration period of not to exceed five years, operation and maintenance of the water treatment and desalting facilities of the dual-purpose project.

"(b) Any agreement entered into under subsection (a) of this section shall include such terms and conditions as the President deems appropriate to insure, among other things, that all information, products, uses, processes, patents, and other developments obtained or utilized in the development of this prototype plant will be available without further cost to the United States for the use and benefit of the United States throughout the world, and to insure that the United States, its officers, and employees have a permanent right to review data and have access to such plant for the purpose of observing its operations and improving science and technology in the field of desalination.

"(c) In carrying out the provisions of this section, the President may enter into contracts with public or private agencies and with any person without regard to sections 3648 and 3709 of the Revised Statutes of the United States (31 U.S.C. 529 and 41 U.S.C. 5).

"(d) Nothing in this section shall be construed as intending to deprive the owner of any background patent or any right which such owner may have under that patent.

"(e) In carrying out the provisions of this section, the President may utilize the personnel, services, and facilities of any Federal agency.

"(f) The United States costs, other than its administrative costs, for the study, design, construction, and operation of a prototype plant under this section shall not exceed either 50 per centum of the total capital costs of the facilities associated with the production of water, and 50 per centum of

the operation and maintenance costs for the demonstration period, or $20,000,000, whichever is less. There are authorized to be appropriated, subject to the limitations of this subsection, such sums as may be necessary to carry out the provisions of this section, including administrative costs thereof. Such sums are authorized to remain available until expended.

"(g) No funds appropriated for the Office of Saline Water pursuant to the appropriation authorized by the Act of July 11, 1969 (83 Stat. 45, Public Law 91-43), or prior authorization Acts, shall be used to carry out the purposes of this section.

"SEC. 220. PROGRAMS FOR PEACEFUL COMMUNICATION.—(a) The President is authorized to use funds made available under section 212 to carry out programs of peaceful communications which make use of television and related technologies, including satellite transmissions, for educational, health, agricultural, and community development purposes in the less developed countries.

"(b) In carrying out programs in the fields of education, health, agriculture, and community development, the agency primarily responsible for part I shall, to the extent possible, assist the developing countries with research, training, planning assistance, and project support in the use of television and related technologies, including satellite transmissions. The agency shall make maximum use of existing satellite capabilities, including the facilities of the International Telecommunications Satellite Consortium.

"(c) In implementing activities under this section, the agency primarily responsible for part I shall coordinate closely with Federal, State, and local agencies and with nongovernmental educational, health, and agricultural institutions and associations within the United States."

HOUSING GUARANTIES; OVERSEAS PRIVATE INVESTMENT CORPORATION

SEC. 105. Chapter 2 of part I of such Act, relating to development assistance, is amended by striking out title III and title IV and inserting in lieu thereof the following new titles:

"TITLE III—HOUSING GUARANTIES

"SEC. 221. WORLDWIDE HOUSING GUARANTIES.—In order to facilitate and increase the participation of private enterprise in furthering the development of the economic resources and productive capacities of less developed friendly countries and areas, and promote the development of thrift and credit institutions engaged in programs of mobilizing local savings for financing the construction of self-liquidating housing projects and related community facilities, the President is authorized to issue guaranties, on such terms and conditions as he shall determine, to eligible investors as defined in section 238(c), assuring against loss of loan investments for self-liquidating housing projects. The total face amount of guaranties issued hereunder, outstanding at any one time, shall not exceed $130,000,000. Such guaranties shall be issued under the conditions set forth in section 222(b) and section 223.

"SEC. 222. HOUSING PROJECTS IN LATIN AMERICAN COUNTRIES.—(a) The President shall assist in the development in the American Republics of self-liquidating housing projects, the development of institutions engaged in Alliance for Progress programs, including cooperatives, free labor unions, savings and loan type institutions, and other private enterprise programs in Latin America engaged directly or indirectly in the financing of home mortgages, the construction of homes for lower income persons and families, the increased mobilization of savings and improvement of housing conditions in Latin America.

"(b) To carry out the purposes of subsection (a), the President is authorized to issue guaranties, on such terms and conditions as he shall determine, to eligible investors, as defined in section 238(c), assuring against loss of loan investment made by such investors in—

"(1) private housing projects in Latin America of types similar to those insured by the Department of Housing and Urban Development and suitable for conditions in Latin America;

"(2) credit institutions in Latin America engaged directly or indirectly in the financing of home mortgages, such as savings and loan institutions and other qualified investment enterprises;

"(3) housing projects in Latin America for lower income families and persons, which projects shall be constructed in accordance with maximum unit costs established by the President for families and persons whose incomes meet the limitations prescribed by the President;

"(4) housing projects in Latin America which will promote the development of institutions important to the success of the Alliance for Progress, such as free labor unions, cooperatives, and other private enterprise programs; or

"(5) housing projects in Latin America, 25 per centum or more of the aggregate of the mortgage financing for which is made available from sources within Latin America and is not derived from sources outside Latin America, which projects shall, to the maximum extent practicable, have a unit cost of not more than $8,500.

"(c) The total face amount of guaranties issued hereunder or heretofore under Latin American housing guaranty authority repealed by the Foreign Assistance Act of 1969, outstanding at any one time, shall not exceed $550,000,000: *Provided*, That $325,000,000 of such guaranties may be used only for the purposes of subsection (b)(1).

"SEC. 223. GENERAL PROVISIONS.—(a) A fee shall be charged for each guaranty issued under section 221 or section 222 in an amount to be determined by the President. In the event the fee to be charged for such type of guaranty is reduced, fees to be paid under existing contracts for the same type of guaranty may be similarly reduced.

"(b) The amount of $50,000,000 of fees accumulated under prior investment guaranty provisions repealed by the Foreign Assistance Act of 1969, together with all fees collected in connection with guaranties issued hereunder, shall be available for meeting necessary administrative and operating expenses of carrying out the provisions of this title and of prior housing guaranty provisions repealed by the Foreign Assistance Act of 1969 (including, but not limited to expenses pertaining to personnel, supplies, and printing), subject to such limitations as may be imposed in annual appropriation Acts; for meeting management and custodial costs incurred with respect to currencies or other assets acquired under guaranties made pursuant to section 221 or section 222 or heretofore pursuant to prior Latin American and other housing guaranty authorities repealed by the Foreign Assistance Act of 1969; and to pay the cost of investigating and adjusting (including costs of arbitration) claims under such guaranties; and shall be available for expenditure in discharge of liabilities under such guaranties until such time as all such property has been disposed of and all such liabilities have been discharged or have expired, or until all such fees have been expended in accordance with the provisions of this subsection.

"(c) Any payments made to discharge liabilities under guaranties issued under section 221 or section 222 or heretofore under prior Latin American or other housing guaranty authorities repealed by the Foreign Assistance Act of 1969, shall be paid first out of fees referred to in subsection (b) (excluding amounts required for purposes other than the discharge of liabilities under guaranties) as long as such fees are available, and thereafter shall be paid out of funds, if any, realized from the sale of currencies or other assets acquired in connection with any payment made to discharge liabilities under such guaranties as long as funds are available, and finally out of funds hereafter made available pursuant to subsection (e).

"(d) All guaranties issued under section 221 or section 222 or heretofore under prior Latin American or other housing guaranty authority repealed by the Foreign Assistance Act of 1969 shall constitute obligations, in accordance with the terms of such guaranties, of the United States of America and the full faith and credit of the United States of America is hereby pledged for the full payment and performance of such obligations.

"(e) There is hereby authorized to be appropriated to the President such amounts, to remain available until expended, as may be necessary from time to time to carry out the purposes of this title.

"(f) In the case of any loan investment guaranteed under section 221 or section 222, the agency primarily responsible for administering part I shall prescribe the maximum rate of interest allowable to the eligible investor, which maximum rate shall not be less than one-half of 1 per centum above the then current rate of interest applicable to housing mortgages insured by the Department of Housing and Urban Development. In no event shall the agency prescribe a maximum allowable rate of interest which exceeds by more than 1 per centum the then current rate of interest applicable to housing mortgages insured by such Department. The maximum allowable rate of interest under this subsection shall be prescribed by the agency as of the date the project covered by the investment is officially authorized and, prior to the execution of the contract, the agency may amend such rate at its discretion, consistent with the provisions of subsection (f).

"(g) Housing guaranties committed, authorized, or outstanding under prior housing guaranty authorities repealed by the Foreign Assistance Act of 1969 shall continue subject to provisions of law originally applicable thereto and fees collected hereafter with respect to such guaranties shall be available for the purposes specified in subsection (b).

"(h) No payment may be made under any guaranty issued pursuant to this title for any loss arising out of fraud or misrepresentation for which the party seeking payment is responsible.

"(i) The authority of section 221 and section 222 shall continue until June 30, 1972.

"TITLE IV—OVERSEAS PRIVATE INVESTMENT CORPORATION

"SEC. 231. CREATION, PURPOSE, AND POLICY.—To mobilize and facilitate the participation of United States private capital and skills in the economic and social progress of less developed friendly countries and areas, thereby complementing the development assistance objectives of the United States, there is hereby created the Overseas Private Investment corporation (hereinafter called the 'Corporation'), which shall be an agency of the United States under the policy guidance of the Secretary of State.

"In carrying out its purpose, the Corporation, utilizing broad criteria, shall undertake—

"(a) to conduct its financing operations on a self-sustaining basis, taking into account the economic and financial soundness of projects and the availability of financing from other sources on appropriate terms;

"(b) to utilize private credit and investment institutions and the Corporation's guaranty authority as the principal means of mobilizing capital investment funds;

"(c) to broaden private participation and revolve its funds through selling its direct investments to private investors whenever it can appropriately do so on satisfactory terms;

"(d) to conduct its insurance operations with due regard to principles of risk management including, when appropriate, efforts to share its insurance risks;

"(e) to utilize, to the maximum practicable extent consistent with the accomplishment of its purpose, the resources and skills of small business and to provide facilities to encourage its full participation in the programs of the Corporation;

"(f) to encourage and support only those private investments in less developed friendly countries and areas which are sensitive and responsive to the special needs and requirements of their economies, and which contribute to the social and economic development of their people;

"(g) to consider in the conduct of its operations the extent to which less developed country governments are receptive to private enterprise, domestic and foreign, and their willingness and ability to maintain conditions which enable private enterprise to make its full contribution to the development process;

"(h) to foster private initiative and competition and discourage monopolistic practices;

"(i) to further to the greatest degree possible, in a manner consistent with its goals, the balance-of-payments objectives of the United States;

"(j) to conduct its activities in consonance with the activities of the agency primarily responsible for administering part I and the international trade, investment, and financial policies of the United States Government; and

"(k) to advise and assist, within its field of competence, interested agencies of the United States and other organizations, both public and private, national and international, with respect to projects and programs relating to the development of private enterprise in less developed countries and areas.

"SEC. 232. CAPITAL OF THE CORPORATION.—The President is authorized to pay in as capital of the Corporation, out of dollar receipts made available through the appropriation process from loans made pursuant to this part and from loans made under the Mutual Security Act of 1954, as amended, for the fiscal year 1970 not to exceed $20,000,000 and for the fiscal year 1971 not to exceed $20,000,000. Upon the payment of such capital by the President, the Corporation shall issue an equivalent amount of capital stock to the Secretary of the Treasury.

"SEC. 233. ORGANIZATION AND MANAGEMENT.—(a) STRUCTURE OF THE CORPORATION.—The Corporation shall have a Board of Directors, a President, an Executive Vice President, and such other officers and staff as the Board of Directors may determine.

"(b) BOARD OF DIRECTORS.—All powers of the Corporation shall vest in and be exercised by or under the authority of its Board of Directors ('the Board') which shall consist of eleven Directors, including the Chairman, with six Directors constituting a quorum for the transaction of business. The Administrator of the Agency for International Development shall be the Chairman of the Board, ex officio. Six Directors (other than the President of the Corporation, appointed pursuant to subsection (c) who shall also serve as a Director) shall be appointed by the President of the United States, by and with the advice and consent of the Senate, and shall not be officials or employees of the Government of the United States. At least one of the six Directors appointed under the preceding sentence shall be experienced in small business, one, in organized labor, and one in cooperatives. Each such Director shall be appointed for a term of no more than three years. The terms of no more than two such Directors shall expire in any one year. Such Directors shall serve until their successors are appointed and qualified and may be reappointed.

"The other Directors shall be officials of the Government of the United States, designated by and serving at the pleasure of the President of the United States.

"All Directors who are not officers of the Corporation or officials of the Government of the United States shall be compensated at a rate equivalent to that of level IV of the Executive Schedule (5 U.S.C. 5315) when actually engaged in the business of the Corporation and may be paid per diem in lieu of subsistence at the applicable rate prescribed in the standardized Government travel regulations, as amended from time to time, while away from their homes or usual places of business.

"(c) PRESIDENT OF THE CORPORATION.—The President of the Corporation shall be appointed by the President of the United States, by and with the advice and consent of the Senate, and shall serve at the pleasure of the President. In making such appointment, the President shall take into account private business experience of the appointee. The President of the Corporation shall be its Chief Executive Officer and responsible for the operations and management of the Corporation, subject to bylaws and policies established by the Board.

"(d) OFFICERS AND STAFF.—The Executive Vice President of the Corporation shall be appointed by the President of the United States, by and with the advice and consent of the Senate, and shall serve at the pleasure of the President. Other officers, attorneys, employees, and agents shall be selected and appointed by the Corporation, and shall be vested with such powers and duties as the Corporation may determine. Of such persons employed by the Corporation, not to exceed twenty may be appointed, compensated, or removed without regard to the civil service laws and regulations: *Provided,* That under such regulations as the President of the United States may prescribe, officers and employees of the United States Government who are appointed to any of the above positions may be entitled, upon removal from such position, except for cause, to reinstatement to the position occupied at the time of appointment or to a position of comparable grade and salary. Such positions shall be in addition to those otherwise authorized by law, including those authorized by section 5108 of title 5 of the United States Code.

"SEC. 234. INVESTMENT INCENTIVE PROGRAMS.—The Corporation is hereby authorized to do the following:

"(a) INVESTMENT INSURANCE.—(1) To issue insurance, upon such terms and conditions as the Corporation may determine, to eligible investors assuring protection in whole or in part against any or all of the following risks with respect to projects which the Corporation has approved—

"(A) inability to convert into United States dollars other currencies, or credits in such currencies, received as earnings or profits from the approved project, as repayment or return of the investment therein, in whole or in part, or as compensation for the sale or disposition of all or any part thereof;

"(B) loss of investment, in whole or in part, in the approved project due to expropriation or confiscation by action of a foreign government; and

"(C) loss due to war, revolution, or insurrection.

"(2) Recognizing that major private investments in less developed friendly countries or areas are often made by enterprises in which there is multinational participation, including significant United States private participation, the Corporation may make such arrangements with foreign governments (including agencies, instrumentalities, or political subdivisions thereof) or with multilateral organizations for sharing liabilities assumed under investment insurance for such investments and may in connection therewith issue insurance to investors not otherwise eligible hereunder: *Provided, however,* That liabilities assumed by the Corporation under the authority of this subsection shall be consistent with the purposes of this title and that the maximum share of liabilities so assumed shall not exceed the proportionate participation by eligible investors in the total project financing.

"(3) Not more than 10 per centum of the total face amount of investment insurance which the Corporation is authorized to issue under this subsection shall be issued to a single investor.

"(b) INVESTMENT GUARANTIES.—To issue to eligible investors guaranties of loans and other investments made by such investors assuring against loss due to such risks and upon such terms and conditions as the Corporation may determine: *Provided, however,* That such guaranties on other than loan investments shall not exceed 75 per centum of such investment: *Provided further,* That except for loan investments for credit unions made by eligible credit unions or credit union associations, the aggregate amount of investment (exclusive of interest and earnings) so guaranteed with respect to any project shall not exceed, at the time of issuance of any such guaranty, 75 per centum of the total investment committed to any such project as determined by the Corporation, which determination shall be conclusive for purposes of the Corporation's authority to issue any such guaranty: *Provided further,* That not more than 10 per centum of the total face amount of investment guaranties which the Corporation is authorized to issue under this subsection shall be issued to a single investor.

"(c) DIRECT INVESTMENT.—To make loans in United States dollars repayable in dollars or loans in foreign currencies (including, without regard to section 1415 of the Supplemental Appropriation Act, 1953, such foreign currencies which the Secretary of the Treasury may determine to be excess to the normal requirements of the United States and the Director of the Bureau of the Budget may allocate) to firms privately owned or of mixed private and public ownership upon such terms and conditions as the Corporation may determine. The Corporation may not purchase or invest in any stock in any other corporation, except that it may (1) accept as evidence of indebtedness debt securities convertible to stock, but such debt securities shall not be converted to stock while held by the Corporation, and (2) acquire stock through the enforcement of any lien or pledge or otherwise to satisfy a previously contracted indebtedness which would otherwise be in default, or as the result of any payment under any contract of insurance or guaranty. The Corporation shall dispose of any stock it may so acquire as soon as reasonably feasible under the circumstances then pertaining.

"No loans shall be made under this section to finance operations for mining or other extraction of any deposit of ore, oil, gas, or other mineral.

"(d) INVESTMENT ENCOURAGEMENT.—To initiate and support through financial participation, incentive grant, or otherwise, and on such terms and conditions as the Corporation may determine, the identification, assessment, surveying and promotion of private investment opportunities, utilizing wherever feasible and effective the facilities of private organizations or private investors: *Provided, however,* That the Corporation shall not finance surveys to ascertain the

existence, location, extent or quality, or to determine the feasibility of undertaking operations for mining or other extraction, of any deposit of ore, oil, gas, or other mineral. In carrying out this authority, the Corporation shall coordinate with such investment promotion activities as are carried out by the Department of Commerce.

"(e) SPECIAL ACTIVITIES.—To administer and manage special projects and programs, including programs of financial and advisory support which provide private technical, professional, or managerial assistance in the development of human resources, skills, technology, capital savings and intermediate financial and investment institutions and cooperatives. The funds for these projects and programs may, with the Corporation's concurrence, be transferred to it for such purposes under the authority of section 632(a) or from other sources, public or private.

"SEC. 235. ISSUING AUTHORITY, DIRECT INVESTMENT FUND AND RESERVES.—(a) (1) The maximum contingent liability outstanding at any one time pursuant to insurance issued under section 234(a) shall not exceed $7,500,000,000.

"(2) The maximum contingent liability outstanding at any one time pursuant to guaranties issued under section 234(b) shall not exceed in the aggregate $750,000,000, of which guaranties of credit union investment shall not exceed $1,250,000: Provided, That the Corporation shall not make any commitment to issue any guaranty which would result in a fractional reserve less than 25 per centum of the maximum contingent liability then outstanding against guaranties issued or commitments made pursuant to section 234(b) or similar predecessor guaranty authority.

"(3) The Congress, in considering the budget programs transmitted by the President for the Corporation, pursuant to section 104 of the Government Corporation Control Act, as amended, may limit the obligations and contingent liabilities to be undertaken under section 234 (a) and (b) as well as the use of funds for operating and administrative expenses.

"(4) The authority of section 234 (a) and (b) shall continue until June 30, 1974.

"(b) There shall be established a revolving fund, known as the Direct Investment Fund, to be held by the Corporation. Such fund shall consist initially of amounts made available under section 232, shall be available for the purposes authorized under section 234(c), shall be charged with realized losses and credited with realized gains and shall be credited with such additional sums as may be transferred to it under the provisions of section 236.

"(c) There shall be established in the Treasury of the United States an insurance and guaranty fund, which shall have separate accounts to be known as the Insurance Reserve and the Guaranty Reserve, which reserves shall be available for discharge of liabilities, as provided in section 235(d), until such time as all such liabilities have been discharged or have expired or until all such reserves have been expended in accordance with the provisions of this section. Such fund shall be funded by: (1) the funds heretofore available to discharge liabilities under predecessor guaranty authority (including housing guaranty authorities), less both the amount made available for housing guaranty programs pursuant to section 223(b) and the amount made available to the Corporation pursuant to section 234(e); and (2) such sums as shall be appropriated pursuant to section 235(f) for such purpose. The allocation of such funds to each such reserve shall be determined by the Board after consultation with the Secretary of the Treasury. Additional amounts may thereafter be transferred to such reserves pursuant to section 236.

"(d) Any payments made to discharge liabilities under investment insurance issued under section 234(a) or under similar predecessor guaranty authority shall be paid first out of the Insurance Reserve, as long as such reserve remains available, and thereafter out of funds made available pursuant to section 235(f). Any payments made to discharge liabilities under guaranties issued under section 234(b) or under similar predecessor guaranty authority shall be paid first out of the Guaranty Reserve as long as such reserve remains available, and thereafter out of funds made available pursuant to section 235(f).

"(e) There is hereby authorized to be transferred to the Corporation at its call, for the purposes specified in section 236, all fees and other revenues collected under predecessor guaranty authority from December 31, 1968, available as of the date of such transfer.

"(f) There is hereby authorized to be appropriated to the Corporation, to remain available until expended, such amounts as may be necessary from time to time to replenish or increase the insurance and guaranty fund or to discharge the liabilities under insurance and guaranties issued by the Corporation or issued under predecessor guaranty authority.

"SEC. 236. INCOME AND REVENUES.—In order to carry out the purposes of the Corporation, all revenues and income transferred to or earned by the Corporation, from whatever source derived, shall be held by the Corporation and shall be available to carry out its purposes, including without limitation—

"(a) payment of all expenses of the Corporation, including investment promotion expenses;

"(b) transfers and additions to the insurance or guaranty reserves, the Direct Investment Fund established pursuant to section 235, and such other funds or reserves as the Corporation may establish, at such time and in such amounts as the Board may determine; and

"(c) payment of dividends, on capital stock, which shall consist of and be paid from net earnings of the Corporation after payments, transfers, and additions under subsections (a) and (b) hereof.

"SEC. 237. GENERAL PROVISIONS RELATING TO INSURANCE AND GUARANTY PROGRAMS.—(a) Insurance and guaranties issued under this title shall cover investment made in connection with projects in any less developed friendly country or area with the government of which the President of the United States has agreed to institute a program for insurance or guaranties.

"(b) The Corporation shall determine that suitable arrangements exist for protecting the interest of the Corporation in connection with any insurance or guaranty issued under this title, including arrangements concerning ownership, use, and disposition of the currency, credits, assets, or investments on account of which payment under such insurance or guaranty is to be made, and any right, title, claim, or cause of action existing in connection therewith.

"(c) All guaranties issued prior to July 1, 1956, all guaranties issued under sections 202(b) and 413(b) of the Mutual Security Act of 1954, as amended, all guaranties heretofore issued pursuant to prior guaranty authorities repealed by the Foreign Assistance Act of 1966, and all insurance and guaranties issued pursuant to this title shall constitute obligations, in accordance with the terms of such insurance or guaranties, of the United States of America and the full faith and credit of the United States of America is hereby pledged for the full payment and performance of such obligations.

"(d) Fees shall be charged for insurance and guaranty coverage in amounts to be determined by the Corporation. In the event fees to be charged for investment insurance or guaranties are reduced, fees to be paid under existing contracts for the same type of guaranties or insurance and for similar guaranties issued under predecessor guaranty authority may be reduced.

"(e) No insurance or guaranty of any equity investment shall extend beyond twenty years from the date of issuance.

"(f) No insurance or guaranty issued under this title shall exceed the dollar value, as of the date of the investment, of the investment made in the project with the approval of the Corporation plus interest, earnings or profits actually accrued on said investment to the extent provided by such insurance or guaranty.

"(g) No payment may be made under any guaranty issued pursuant to this title for any loss arising out of fraud or misrepresentation for which the party seeking payment is responsible.

"(h) Insurance or guaranties of a loan or equity investment of an eligible investor in a foreign bank, finance company, or other credit institution shall extend only to such loan or equity investment and not to any individual loan or equity investment made by such foreign bank, finance company, or other credit institution.

"(i) Claims arising as a result of insurance or guaranty operations under this title or under predecessor guaranty authority may be settled, and disputes arising as a result thereof may be arbitrated with the consent of the parties, on such terms and conditions as the Corporation may determine. Payment made pursuant to any such settlement, or as a result of an arbitration award, shall be final and conclusive notwithstanding any other provision of law.

"(j) Each guaranty contract executed by such officer or officers as may be designated by the Board shall be conclusively presumed to be isssued in compliance with the requirements of this Act.

"(k) In making a determination to issue insurance or a guaranty under this title, the Corporation shall consider the possible adverse effect of the dollar investment under such insurance or guaranty upon the balance of payments of the United States.

"SEC. 238. DEFINITIONS.—As used in this title—

"(a) the term 'investment' includes any contribution of funds, commodities, services, patents, processes, or techniques, in the form of (1) a loan or loans to an approved project, (2) the purchase of a share of ownership in any such project, (3) participation in royalties, earnings, or profits of any such project, and (4) the furnishing of commodities or services pursuant to a lease or other contract;

"(b) the term 'expropriation' includes, but is not limited to, any abrogation, repudiation, or impairment by a foreign government of its own contract with an investor with respect to a project, where such abrogation, repudiation, or impairment is not caused by the investor's own fault or misconduct, and materially adversely affects the continued operation of the project;

"(c) the term 'eligible investor' means (1) United States citizens; (2) corporations, partnerships, or other associations including nonprofit associations, created under the laws of the United States or any State or territory thereof and substantially beneficially owned by United States citizens; and (3) foreign corporations, partnerships, or other associations wholly owned by one or more such United States citizens, corporations, partnerships, or other associations: *Provided*, however, That the eligibility of such foreign corporation shall be determined without regard to any shares, in aggregate less than 5 per

centum of the total of issued and subscribed share capital, required by law to be held by other than the United States owners: *Provided further*, That in the case of any loan investment a final determination of eligibility may be made at the time the insurance or guaranty is issued; in all other cases, the investor must be eligible at the time a claim arises as well as at the time the insurance or guaranty is issued; and

"(d) the term 'predecessor guaranty authority' means prior guaranty authorities (other than housing guaranty authorities) repealed by the Foreign Assistance Act of 1969, sections 202(b) and 413(b) of the Mutual Security Act of 1954, as amended, and section 111(b)(3) of the Economic Cooperation Act of 1948, as amended (exclusive of authority relating to informational media guaranties).

"SEC. 239. GENERAL PROVISIONS AND POWERS.—(a) The Corporation shall have its principal office in the District of Columbia and shall be deemed, for purposes of venue in civil actions, to be a resident thereof.

"(b) The President shall transfer to the Corporation, at such time as he may determine, all obligations, assets and related rights and responsibilities arising out of, or related to, predecessor programs and authorities similar to those provided for in section 234 (a), (b), and (d). Until such transfer, the agency heretofore responsible for such predecessor programs shall continue to administer such assets and obligations, and such programs and activities authorized under this title as may be determined by the President.

"(c) The Corporation shall be subject to the applicable provisions of the Government Corporation Control Act, except as otherwise provided in this title.

"(d) To carry out the purposes of this title, the Corporation is authorized to adopt and use a corporate seal, which shall be judicially noticed; to sue and be sued in its corporate name; to adopt, amend, and repeal bylaws governing the conduct of its business and the performance of the powers and duties granted to or imposed upon it by law; to acquire, hold or dispose of, upon such terms and conditions as the Corporation may determine, any property, real, personal, or mixed, tangible, or intangible, or any interest therein; to invest funds derived from fees and other revenues in obligations of the United States and to use the proceeds therefrom, including earnings and profits, as it shall deem appropriate; to indemnify directors, officers, employees and agents of the Corporation for liabilities and expenses incurred in connection with their Corporation activities; to require bonds of officers, employees, and agents and pay the premiums therefor; notwithstanding any other provision of law, to represent itself or to contract for representation in all legal and arbitral proceedings; to purchase, discount, rediscount, sell, and negotiate, with or without its endorsement or guaranty, and guarantee notes, participation certificates, and other evidence of indebtedness (provided that the Corporation shall not issue its own securities, except participation certificates for the purpose of carrying out section 231(c)); to make and carry out such contracts and agreements as are necessary and advisable in the conduct of its business; to exercise the priority of the Government of the United States in collecting debts from bankrupt, insolvent, or decedents' estates; to determine the character of and the necessity for its obligations and expenditures, and the manner in which they shall be incurred, allowed, and paid, subject to provisions of law specifically applicable to Government corporations; and to take such actions as may be necessary or appropriate to carry out the powers herein or hereafter specifically conferred upon it.

"(e) The Auditor-General of the Agency for International Development (1) shall have the responsibility for planning and directing the execution of audits, reviews, investigations, and inspections of all phases of the Corporation's operations and activities and (2) shall conduct all security activities of the Corporation relating to personnel and the control of classified material. With respect to his responsibilities under this subsection, the Auditor-General shall report to the Board. The agency primarily responsible for administering part I shall be reimbursed by the Corporation for all expenses incurred by the Auditor-General in connection with his responsibilities under this subsection.

"(f) In order to further the purposes of the Corporation there shall be established an Advisory Council to be composed of such representatives of the American business community as may be selected by the Chairman of the Board. The President and the Board shall, from time to time, consult with such Council concerning the objectives of the Corporation. Members of the Council shall receive no compensation for their services but shall be entitled to reimbursement in accordance with section 5703 of title 5 of the United States Code, for travel and other expenses incurred by them in the performance of their functions under this section.

"SEC. 240. AGRICULTURAL CREDIT AND SELF-HELP COMMUNITY DEVELOPMENT PROJECTS.—(a) It is the sense of the Congress that in order to stimulate the participation of the private sector in the economic development of less developed countries in Latin America, the authority conferred by this section should be used to establish pilot programs in not more than five Latin American countries to encourage private banks, credit institutions, similar private lending organizations, cooperatives, and private nonprofit development organizations to make loans on reasonable terms to organized groups and individuals residing in a community for the purpose of enabling such groups and individuals to carry out agricultural credit and self-help community development projects for which they are unable to obtain financial assistance on reasonable terms. Agricultural credit and assistance for self-help community development projects should include, but not be limited to, material and such projects as wells, pumps, farm machinery, improved seed, fertilizer, pesticides, vocational training, food industry development, nutrition projects, improved breeding stock for farm animals, sanitation facilities, and looms and other handicraft aids.

"(b) To carry out the purposes of subsection (a), the Corporation is authorized to issue guaranties, on such terms and conditions as it shall determine, to private lending institutions, cooperatives, and private nonprofit development organizations in not more than five Latin American countries assuring against loss of not to exceed 25 per centum of the portfolio of such loans made by any lender to organized groups or individuals residing in a community to enable such groups or individuals to carry out agricultural credit and self-help community development projects for which they are unable to obtain financial assistance on reasonable terms. In no event shall the liability of the United States exceed 75 per centum of any one loan.

"(c) The total face amount of guaranties issued under this section outstanding at any one time shall not exceed $15,000,000. Not more than 10 per centum of such sum shall be provided for any one institution, cooperative, or organization.

"(d) The Inter-American Social Development Institute shall be consulted in developing criteria for making loans eligible for guaranty coverage under this section.

"(e) The guaranty reserve established under section 235(c) shall be available to make such payments as may be necessary to discharge liabilities under guaranties issued under this section.

"(f) Notwithstanding the limitation contained in subsection (c) of this section, foreign currencies owned by the United States and determined by the Secretary of the Treasury to be excess to the needs of the United States may be utilized to carry out the purposes of this section, including the discharge of liabilities incurred under this subsection. The authority conferred by this subsection shall be in addition to authority conferred by any other provision of law to implement guaranty programs utilizing excess local currency.

"(g) The Corporation shall, on or before January 15, 1972, make a detailed report to the Congress on the results of the pilot programs established under this section, together with such recommendations as it may deem appropriate.

"(h) The authority of this section shall continue until June 30, 1972.

"SEC. 240A. REPORTS TO THE CONGRESS.—(a) After the end of each fiscal year, the Corporation shall submit to the Congress a complete and detailed report of its operations during such fiscal year.

"(b) Not later than March 1, 1974, the Corporation shall submit to the Congress an analysis of the possibilities of transferring all or part of its activities to private United States citizens, corporations, or other associations."

ALLIANCE FOR PROGRESS

SEC. 106. Section 252(a) of such Act, relating to authorization, is amended to read as follows:

"SEC. 252. AUTHORIZATION.—(a) There is authorized to be appropriated to the President for the purposes of this title, in addition to other funds available for such purposes, for the fiscal year 1970, $428,250,000, and for the fiscal year 1971, $428,250,000, which amounts are authorized to remain available until expended, and which amounts, except for not to exceed $90,750,000 for each such fiscal year, shall be available only for loans payable as to principal and interest in United States dollars. In order to effectuate the purposes and provisions of sections 102, 251, 601, and 602 of this Act, not less than 50 per centum of the loan funds appropriated pursuant to this section for any fiscal year shall be available for loans made to encourage economic development through private enterprise."

PROGRAMS RELATING TO POPULATION GROWTH

SEC. 107. Section 292, relating to authorization, is amended by striking out "fiscal year 1969, $50,000,000" and inserting in lieu thereof "fiscal year 1970, $75,000,000, and for the fiscal year 1971, $100,000,000,".

INTERNATIONAL ORGANIZATIONS AND PROGRAMS

SEC. 108. (a) Section 301(c) of such Act, relating to general authority, is amended to read as follows:

"(c) No contributions by the United States shall be made to the United Nations Relief and Works Agency for Palestine Refugees in the Near East except on the condition that the United Nations Relief and Works Agency take all possible measures to assure that no part of the United States contribution shall be used to furnish assistance to any refugee who is receiving military training as a member of the so-called Palestine Liberation Army or any other guerrilla type organization or who has engaged in any act of terrorism."

(b) Section 302(a) of such Act, relating to authorization, is amended by striking out "fiscal year 1969, $135,000,000" and inserting in lieu thereof "fiscal year 1970, $122,620,000, and for the fiscal year 1971, $122,620,000".

(c) Section 302(b) of such Act, relating to Indus Basin development, is amended by

inserting "(1)" immediately after "(b)" and by adding at the end thereof the following new paragraph:

"(2) There is authorized to be appropriated to the President for grants for Indus Basin Development, in addition to any other funds available for such purposes, for use in the fiscal year 1970, $7,530,000, and for use in the fiscal year 1971, $7,530,000, which amounts shall remain available until expended."

(d) Section 302 of such Act is further amended by adding at the end thereof the following new subsection:

"(e) There is authorized to be appropriated $1,000,000 for the fiscal year 1970, and $1,000,000 for the fiscal year 1971, to provide added contribution to the United Nations Relief and Works Agency for expansion of technical and vocational training of Arab refugees."

SUPPORTING ASSISTANCE

SEC. 109. Section 402 of such Act, relating to authorization, is amended by striking out "fiscal year 1969 not to exceed $410,000,000" and inserting in lieu thereof "fiscal year 1970 not to exceed $414,600,000, and for the fiscal year 1971 not to exceed $414,600,000".

CONTINGENCY FUND

SEC. 110. Section 451(a) of such Act, relating to the contingency fund, is amended by striking out "fiscal year 1968 not to exceed $50,000,000, and for the fiscal year 1969 not to exceed $10,000,000" and inserting in lieu thereof "fiscal year 1970 not to exceed $15,000,000, and for the fiscal year 1971 not to exceed $15,000,000".

PART II—MILITARY ASSISTANCE

MILITARY ASSISTANCE AUTHORIZATION

SEC. 201. Section 504(a) of the Foreign Assistance Act of 1961, relating to authorization, is amended—

(1) by striking out "$375,000,000 for the fiscal year 1969" and inserting in lieu thereof "$350,000,000 for the fiscal year 1970, and $350,000,000 for the fiscal year 1971"; and

(2) by adding at the end thereof the following new sentence: "Amounts appropriated under this subsection shall be available for cost-sharing expenses of United States participation in the military headquarters and related agencies program."

SPECIAL AUTHORITY

SEC. 202. Section 506(a) of such Act, relating to special authority of the President, is amended—

(1) by striking out "1969" in the first sentence and inserting in lieu thereof "1970 and the fiscal year 1971"; and

(2) by striking out "in the fiscal year 1969" in the second sentence and inserting in lieu thereof "in each of the fiscal years 1970 and 1971".

RESTRICTIONS ON TRAINING FOREIGN MILITARY STUDENTS

SEC. 203. Chapter 2 of part II of such Act, relating to military assistance, is amended by inserting at the end thereof the following new section:

"SEC. 510. RESTRICTIONS ON TRAINING FOREIGN MILITARY STUDENTS.—The number of foreign military students to be trained in the United States in any fiscal year, out of funds appropriated pursuant to this part, may not exceed a number equal to the number of foreign civilians brought to the United States under the Mutual Educational and Cultural Exchange Act of 1961 in the immediately preceding fiscal year."

PART III—GENERAL, ADMINISTRATIVE, AND MISCELLANEOUS PROVISIONS

SEC. 301. Section 610(a) of the Foreign Assistance Act of 1961, relating to transfer between accounts, is amended by inserting immediately after "funds made available for any provision of this Act" the following: "(except funds made available pursuant to title IV of chapter 2 of part I)".

SEC. 302. Section 612 of such Act, relating to use of foreign currencies, is amended by adding at the end thereof the following new subsection:

"(d) In furnishing assistance under this Act to the government of any country in which the United States owns excess foreign currencies as defined in subsection (b) of this section, except those currencies generated under the Agricultural Trade Development and Assistance Act of 1954, as amended, the President shall endeavor to obtain from the recipient country an agreement for the release, on such terms and conditions as the President shall determine, of an amount of such currencies up to the equivalent of the dollar value of assistance furnished by the United States for programs as may be mutually agreed upon by the recipient country and the United States to carry out the purposes for which new funds authorized by this Act would themselves be available."

SEC. 303. (a) Section 620(s) of such Act, relating to prohibitions against furnishing assistance, is amended to read as follows:

"(s) (1) In order to restrain arms races and proliferation of sophisticated weapons, and to ensure that resources intended for economic development are not diverted to military purposes, the President shall take into account before furnishing development loans, Alliance loans or supporting assistance to any country under this Act, and before making sales under the Agricultural Trade Development and Assistance Act of 1954, as amended:

"(A) the percentage of the recipient or purchasing country's budget which is devoted to military purposes;

"(B) the degree to which the recipient or purchasing country is using its foreign exchange resources to acquire military equipment; and

"(C) the amount spent by the recipient or purchasing country for the purchase of sophisticated weapons systems, such as missile system and jet aircraft for military purposes, from any country.

"(2) The President shall report annually to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate his actions in carrying out this provision."

"(b) Section 620(v) of such Act is repealed.

SEC. 304. Section 624(d) of such Act, relating to the duties of the Inspector General, Foreign Assistance, is amended—

(1) by inserting in paragraph (2)(A), after the words "under part I of this Act", the following: "(including the Overseas Private Investment Corporation), and under part IV of the Foreign Assistance Act of 1969 (the Inter-American Social Development Institute)";

(2) by inserting in paragraph (5), before the period at the end of the first sentence, the following: "and part IV of the Foreign Assistance Act of 1969"; and

(3) by inserting in the first sentence of paragraph (7), immediately after "programs under part I or II of this Act, "the following: "and part IV of the Foreign Assistance Act of 1969,".

SEC. 305. Section 634(a) of such Act, relating to reports and information, is amended—

(1) by inserting in the first sentence, after the words "concerning operations", the following: "(other than those reported pursuant to section 240A)"; and

(2) by striking out of the last sentence the following: "on the operation of the investment guaranty program and".

SEC. 306. Section 636(f) of such Act, relating to use of funds, is amended by inserting immediately before the period at the end thereof the following: "or by the Corporation established under title IV of chapter 2 of part I with respect to loan activities which it carries out under the provisions of the Agricultural Trade Development and Assistance Act of 1954, as amended".

SEC. 307. Section 637(a) of such Act, relating to administrative expenses, is amended by striking out "fiscal year 1969, $53,000,000" and inserting in lieu thereof "fiscal year 1970, $51,125,000, and for the fiscal year 1971, $51,125,000".

SEC. 308. Section 643 of such Act, relating to savings provisions, is amended by inserting after "section 642(a)" and "section 642(a)(2)" each time they appear the following: "and the Foreign Assistance Act of 1969".

PART IV—INTER-AMERICAN SOCIAL DEVELOPMENT INSTITUTE

SEC. 401. INTER-AMERICAN SOCIAL DEVELOPMENT INSTITUTE.—(a) There is created as an agency of the United States of America a body corporate to be known as the "Inter-American Social Development Institute" (hereafter in this section referred to as the "Institute").

(b) The future of freedom, security, and economic development in the Western Hemisphere rests on the realization that man is the foundation of all human progress. It is the purpose of this section to provide support for developmental activities designed to achieve conditions in the Western Hemisphere under which the dignity and the worth of each human person will be respected and under which all men will be afforded the opportunity to develop their potential, to seek through gainful and productive work the fulfillment of their aspirations for a better life, and to live in justice and peace. To this end, it shall be the purpose of the Institute, primarily in cooperation with private, regional, and international organizations, to—

(1) strengthen the bonds of friendship and understanding among the peoples of this hemisphere;

(2) support self-help efforts designed to enlarge the opportunities for individual development;

(3) stimulate and assist effective and ever wider participation of the people in the development process;

(4) encourage the establishment and growth of democratic institutions, private and governmental, appropriate to the requirements of the individual sovereign nations of this hemisphere.

In pursuing these purpose, the Institute shall place primary emphasis on the enlargement of educational opportunities at all levels, the production of food and the development of agriculture, and the improvement of environmental conditions relating to health, maternal and child care, family planning, housing, free trade union development, and other social and economic needs of the people.

(c) The Institute shall carry out the purposes set forth in subsection (b) of this section primarily through and with private organizations, individuals, and international organizations by undertaking or sponsoring appropriate research and by planning, initiating, assisting, financing, administering, and executing programs and projects designed to promote the achievement of such purposes.

(d) In carrying out its functions under this section, the Institute shall, to the maximum extent possible, coordinate its undertakings with the developmental activities in the Western Hemisphere of the various organs of the Organization of American States, the United States Government, international organizations, and other entities engaged in promoting social and economic development of Latin America.

(e) The Institute, as a corporation—

(1) shall have perpetual succession unless sooner dissolved by an Act of Congress;

(2) may adopt, alter, and use a corporate seal, which shall be judicially noticed;

(3) may make and perform contracts and other agreements with any individual, corportation, or other body of persons however designated whether within or without the United States of America, and with any government or government agency, domestic or foreign;

(4) shall determine and prescribe the manner in which its obligations shall be incurred and its expenses allowed and paid;

(5) may, as necessary for the transaction of the business of the Institute, employ, and fix the compensation of not to exceed one hundred persons at any one time;

(6) may acquire by purchase, devise, bequest, or gift, or otherwise lease, hold, and improve, such real and personal property as it finds to be necessary to its purposes, whether within or without the United States, and in any manner dispose of all such real and personal property held by it and use as general funds all receipts arising from the disposition of such property;

(7) shall be entitled to the use of the United States mails in the same manner and on the same conditions as the executive departments of the Government;

(8) may, with the consent of any board, corporation, commission, independent establishment, or executive department of the Government, including any field service thereof, avail itself of the use of information, services, facilities, officers, and employees thereof in carrying out the provisions of this section;

(9) may accept money, funds, property, and services of every kind by gift, devise, bequest, grant, or otherwise, and make advances, grants, and loans to any individual, corporation, or other body of persons, whether within or without the United States of America, or to any government or governmental agency, domestic or foreign, when deemed advisable by the Institute in furtherance of its purposes;

(10) may sue and be sued, complain, and defend, in its corporate name in any court of competent jurisdiction; and

(11) shall have such other powers as may be necessary and incident to carrying out its powers and duties under this section.

(f) Upon termination of the corporate life of the Institute all of its assets, shall be liquidated and, unless otherwise provided by Congress, shall be transferred to the United States Treasury as the property of the United States.

(g) The management of the Institute shall be vested in a board of directors (hereafter in this section referred to as the "Board") composed of seven members appointed by the President, by and with the advice and consent of the Senate, one of whom he shall designate to serve as Chairman of the Board and one of whom he shall designate to serve as Vice Chairman of the Board. Four members of the Board shall be appointed from private life. Three members of the Board shall be appointed from among officers or employees of agencies of the United States concerned with inter-American affairs. Members of the Board shall be appointed for terms of six years, except that of the members first appointed two shall be appointed for terms of two years and two shall be appointed for terms of four years, as designated by the President at the time of their appointment. A member of the Board appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed only for the remainder of such term; but upon the expiration of his term of office a member shall continue to serve until his successor is appointed and shall have qualified. Members of the Board shall be eligible for reappointment.

(h) Members of the Board shall serve without additional compensation, but shall be reimbursed for actual and necessary expenses not in excess of $50 per day, and for transportation expenses, while engaged in their duties on behalf of the corporation.

(i) The Board shall direct the exercise of all the powers of the Institute.

(j) The Board may prescribe, amend, and repeal bylaws, rules, and regulations governing the manner in which the business of the Institute may be conducted and in which the powers granted to it by law may be exercised and enjoyed. A majority of the Board shall be required as a quorum.

(k) In furtherance and not in limitation of the powers conferred upon it, the Board may appoint such committees for the carrying out of the work of the Institute as the Board finds to be for the best interests of the Institute, each committee to consist of two or more members of the Board, which committees, together with officers and agents duly authorized by the Board and to the extent provided by the Board, shall have and may exercise the powers of the Board in the management of the business and affairs of the Institute.

(l) The chief executive officer of the Institute shall be an Executive Director who shall be appointed by the Board of Directors on such terms as the Board may determine. The Executive Director shall receive compensation at the rate provided for level IV of the Executive Schedule under section 5315 of title 5, United States Code.

(m) In order to further the purposes of the Institute there shall be established a Council to be composed of such number of individuals as may be selected by the Board from among individuals knowledgeable concerning developmental activities in the Western Hemisphere. The Board shall, from time to time, consult with the Council concerning the objectives of the Institute. Members of the Council shall receive no compensation for their services but shall be entitled to reimbursement in accordance with section 5703 of title 5, United States Code, for travel and other expenses incurred by them in the performance of their functions under this subsection.

(n) The Institute shall be a nonprofit corporation and shall have no capital stock. No part of its revenue, earnings, or other income or property shall inure to the benefit of its directors, officers, and employees and such revenue, earnings, or other income, or property shall be used for the carrying out of the corporate purposes set forth in this section. No director, officer, or employee of the corporation shall in any manner directly or indirectly participate in the deliberation upon or the determination of any question affecting his personal interests or the interests of any corporation, partnership, or organization in which he is directly or indirectly interested.

(o) When approved by the Institute, in furtherance of its purpose, the officers and employees of the Institute may accept and hold offices or positions to which no compensation is attached with governments or governmental agencies of foreign countries.

(p) The Secretary of State shall have authority to detail employees of any agency under his jurisdiction to the Institute under such circumstances and upon such conditions as he may determine. Any such employee so detailed shall not lose any privileges, rights, or seniority as an employee of any such agency by virtue of such detail.

(q) The Institute shall establish a principal office. The Institute is authorized to establish agencies, branch offices, or other offices in any place or places within the United States or elsewhere in any of which locations the Institute may carry on all or any of its operations and business.

(r) The Institute, including its franchise and income, shall be exempt from taxation now or hereafter imposed by the United States, or any territory or possession thereof, or by any State, county, municipality, or local taxing authority.

(s) Notwithstanding any other provision of law, not to exceed an aggregate amount of $50,000,000 of the funds made available for the fiscal years 1970 and 1971 to carry out part I of the Foreign Assistance Act of 1961 shall be available to carry out the purposes of this section. Funds made available to carry out the purposes of this section under the preceding sentence are authorized to remain available until expended.

(t) The Institute shall be subject to the provisions of the Government Corporation Control Act.

PART V—AMENDMENTS TO OTHER ACTS

SEC. 501. Section 101 of the Government Corporation Control Act (31 U.S.C. 846) is amended by striking out "Development Loan Fund;" and inserting in lieu thereof "Overseas Private Investment Corporation;".

SEC. 502. (a) Section 3343(b) of title 5, United States Code, relating to details of personnel to international organizations, is amended—

(1) by striking out "3" and inserting in lieu thereof "5"; and

(2) by striking out the period at the end of such section and inserting in lieu thereof a comma and the following: "except that under special circumstances, where the President determines it to be in the national interest, he may extend the 5-year period for up to an additional 3 years."

(b) Section 3581(5) of such title, relating to reemployment rights of personnel who transfer to international organizations, is amended by striking out "the first 3 consecutive years after entering the employ of the international organization" and inserting in lieu thereof the following: "the first 5 consecutive years, or any extension thereof, after entering the employ of the international organization".

(c) Section 3582(a) of such title, relating to rights of personnel who transfer to international organizations, is amended—

(1) by inserting in clause (1), before the semicolon at the end thereof, a comma and the following: "except that such service shall not be considered creditable service for the purpose of any retirement system for transferring personnel, if such service forms the basis, in whole or in part, for an annuity or pension under the retirement system of the international organization"; and

(2) by striking out clause (2) and inserting in lieu thereof the following:

"(2) to retain coverage, rights, and benefits under chapters 87 and 89 of this title, if necessary employee deductions and agency contributions in payment for the coverage, rights, and benefits for the period of employment with the international organization are currently deposited in the Employees' Life Insurance Fund and the Employees' Health Benefits Fund, as applicable, and the period during which coverage, rights, and benefits are retained under this paragraph is deemed service as an employee under chapters 87 and 89 of this title,".

(d) Section 3582(b) of such title, relating to rights of employees transferring to international organizations, is amended—

(1) by striking out, ", except a Congressional employee," in the first sentence;

(2) by striking out of clause (1) "3 years" and inserting in lieu thereof "5 years, or any extension thereof,"; and

(3) by inserting at the end thereof the following new sentences: "On reemployment, he is entitled to be paid, under such regulations as the President may prescribe and from appropriations or funds of the agency from which transferred, an amount equal to the difference between the pay, allowances, post differential, and other monetary benefits paid by the international organization and the pay, allowances, post differential, and other monetary benefits that would have been paid by the agency had he been detailed to the international organization under section 3343 of this title. Such a payment shall be made to an employee who is unable to exercise his reemployment right because of

disability incurred while on transfer to an international organization under this subchapter and, in the case of any employee who dies while on such a transfer or during the period after separation from the international organization in which he is properly exercising or could exercise his reemployment right, in accordance with subchapter VIII of chapter 55 of this title. This subsection does not apply to a congressional employee nor may any payment provided for the preceding two sentences of this subsection be based on a period of employment with an international organization occurring before the first day of the first pay period which begins on or after the date of enactment of the Foreign Assistance Act of 1969."

(e) Section 3582(c) of such title, relating to rights of employees transferring to international organizations, is amended by striking out "3 years" and inserting in lieu thereof the following: "5 years, or any extension thereof,".

(f) Section 3582(d) of such title, relating to agency contributions to retirement and insurance programs for personnel who transfer to international organizations, is amended to read as follows:

"(d) During the employee's period of service with the international organization, the agency from which the employee is transferred shall make contributions for retirement and insurance purposes from the appropriations or funds of that agency so long as contributions are made by the employee."

SEC. 503. Subchapter II of chapter 53 of title 5, United States Code, is amended—

(1) by inserting at the end of section 5314, relating to level III of the Executive Schedule, the following:

"(54) President, Overseas Private Investment Corporation.";

(2) by inserting at the end of section 5315, relating to level IV of the Executive Schedule, the following:

"(92) Executive Vice President, Overseas Private Investment Corporation."; and

(3) by inserting at the end of section 5316, relating to level V of the Executive Schedule, the following:

"(128) Auditor-General of the Agency for International Development.

"(129) Vice Presidents , Overseas Private Investment Corporation (3)."

And the Senate agree to the same.

THOMAS E. MORGAN,
CLEMENT J. ZABLOCKI,
WAYNE L. HAYS,
DANTE B. FASCELL,
W. S. MAILLIARD,
PETER H. B. FRELINGHUYSEN,

FRANK CHURCH,
G. D. AIKEN,
CLIFFORD P. CASE,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 14580) to promote the foreign policy, security, and general welfare of the United States by assisting peoples of the world to achieve economic development within a framework of democratic economic, social, and political institutions, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The Senate struck out all of the House bill after the enactment clause and inserted a substitute amendment. The committee of conference has agreed to a substitute for both the House bill and the Senate amendment. Except for clarifying, clerical, and necessary conforming changes, the differences are noted below:

AUTHORIZATION OF FUNDS

FOREIGN ASSISTANCE AUTHORIZATIONS

(In thousands)

Section number	Economic assistance	Executive request fiscal year 1970	House	Senate	Conference agreement	Difference (H=House S=Senate)
101	Development loans	675,500	425,500	350,000	350,000	H—75,500
102	Technical cooperation and development grants	224,500	200,000	167,000	183,500	H—16,500 S+16,500
103	American schools and hospitals abroad	12,900	23,400	25,900	[1] 25,900	H+2,500
	Local currency			3,000	[2] 3,000	H+3,000
106	Alliance for Progress	553,500	437,500	419,000	428,250	H—9,250
	Loans	(437,500)	(337,500)	(337,500	(337,500)	S+9,250
	Grants	(116,000)	(100,000)	(81,500)	(90,750)	H—9,250 (S+9,250)
104	Desalting plant for Israel		[3] 40,000	[4] 40,000	[5] 20,000	H—20,000 S—20,000
108	International Organizations and programs	142,220	122,620	142,202	122,620	S—19,600
	UNRWA and U.N. Peacekeeping	[6] (19,600)	[7] (19,600)	[6] (19,600)	[7] (19,600)	
	Arab refugees		1,000	1,000	1,000	
	Indus Basin	7,530	7,530	7,530	7,530	
109	Supporting assistance	495,000	[8] 414,600	420,000	[8] 414,600	S—5,400
110	Contingency fund	40,000	15,000	20,000	15,000	S—5,000
307	Administrative expenses: AID	54,250	52,250	50,000	51,125	H—1,125 S—1,125
	Total economic assistance	2,205,400	1,739,400	1,645,650	1,622,525	(H—116,875) S—23,125
201	Grant military assistance	425,000	454,500	325,000	[7] 350,000	(H—104,500) S+25,000
	Total economic and military assistance	2,630,400	2,193,900	1,970,650	[8] 1,972,525	H—221,375 S+1,875

[1] For fiscal year 1971, the bill authorizes $12,900,000.
[2] Not authorized for fiscal year 1971.
[3] This sum was on a grant basis.
[4] This sum was on a loan basis.
[5] This sum is on a grant basis, limited to fiscal year 1970 funds.
[6] Included in international organizations and programs.
[7] Included in supporting assistance.
[8] Includes UNRWA and U.N. peacekeeping operations.

The House bill repealed part I of the Foreign Assistance Act of 1961, as amended, which includes the basic authority for economic assistance. In lieu of existing law, the bill restructured and amended the language. The changes made by the House bill were, for the most part, more in form and organization than in substance.

Although the Senate amendment did amend various provisions of existing law, it followed closely the organization of the 1961 Act.

After reaching agreement as to what it regarded as the substantive differences between the two bills, the committee of conference decided to retain the language and structure of existing law, including as amendments the language agreed to in conference and not including those provisions of the House bill which were essentially revisions or updating of present law.

Substantive changes in the House bill agreed to by the committee of conference are as follows:

ASSISTANCE TO MEXICO TO HELP SUPPRESS ILLEGAL TRAFFIC IN DRUGS (HOUSE SEC. 204(a)(2) OF THE ACT)

The House bill made available $500,000 of technical assistance funds to be used solely to furnish assistance to the Mexican Government to help suppress illegal drug traffic.

The Senate amendment did not contain a comparable provision.

The managers on the part of the House accepted the Senate contention that this program did not meet the criteria set forth in the law for the use of technical assistance funds. Further, they believed other agencies of Government were better equipped and financed to engage in this type of operation than the Agency for International Development. Therefore, the House receded from its position.

PROTOTYPE DESALTING PLANT (HOUSE—SECTION 209 OF THE ACT; SENATE—SECTION 101 OF THE BILL)

The House bill authorized the appropriation of not to exceed $40 million for a U.S. contribution to finance not more than 50 percent of the cost of building and operating a water treatment and desalting plant in Israel.

The Senate amendment did not include any reference to a desalting plant, but the report of the Committee on Foreign Relations stated that $40 million of the authorization for development loans "is to be used only for assistance in the development of a water treatment and desalting prototype plant in the Middle East if the executive branch finds the project to be feasible."

The committee of conference accepted the House language with two amendments: (1) an authorization of $20 million instead of $40 million and (2) a requirement that the President determine that development of such a plant is feasible.

The managers on the part of the House believe that an authorization of $20 million should be enough to cover the U.S. share of the cost during the early phases of the project and that it is essential that funds be available on a grant rather than a loan basis.

It is the understanding of the House conferees that because of the developmental and experimental nature of this project, it will not be subject to the requirements of section 611 of the Foreign Assistance Act or section 101 of the Appropriations Act which apply to water related capital projects.

AMERICAN SCHOOLS AND HOSPITALS ABROAD (HOUSE—SECTION 304(b) OF THE ACT; SENATE—SECTION 103 OF THE BILL)

The House bill authorized appropriations of a total amount of $23,400,000 for assistance to U.S. schools and hospitals abroad, including specific authorizations for certain designated institutions.

The Senate amendment authorized a total of $25,900,000, together with $3 million of foreign currency, for this purpose but did not name the institutions included. The report of the Foreign Relations Committee, however, designated the institutions which were included.

Those institutions named in the House bill were listed in the Senate report, which included three more.

Funds for these additional institutions were authorized by the Senate amendment.

The managers on the part of the House agreed to the inclusion of the additional institutions approved by the Senate.

OVERSEAS PRIVATE INVESTMENT CORPORATION (HOUSE—SECTIONS 321–332 OF THE ACT; SENATE—SECTIONS 231–240(a) OF THE BILL)

The House bill and the Senate amendment contained identical language which had the effect of permitting the Corporation to employ not to exceed 20 persons who may be appointed, compensated or removed without regard to the civil service laws and regulations. The language is sufficiently broad to authorize compensation beyond the range of salaries set by the Classification Act. It was the intent of both Houses to limit to not more than eight those who may be compensated at a rate not in excess of that for GS–18. The remaining 12 are not to receive compensation in excess of the rate authorized for GS–15.

CONTRIBUTIONS TO THE MIDDLE EAST (HOUSE—SEC. 452(C) OF THE ACT)

Section 452(c) of the House bill authorized the appropriation of such funds as the President may request with a 5 year period for programs and projects in the Middle East directly related to peacekeeping activities, resettlement and vocational training of refugees, rehabilitation of war damage to public facilities, and programs of health, education, agriculture and community development, upon a determination by the President that a peaceful settlement had been attained in the Middle East.

The Senate amendment did not include a comparable provision.

The House receded.

The Managers on the part of the House were persuaded by the Senate conferees that the Congress should not authorize funds for this area or for such purposes until the situation in the Middle East was clearer than at present and the use to be made of any funds could be more precisely reviewed.

MILITARY ASSISTANCE (HOUSE AND SENATE—SECTION 504 OF THE ACT)

The House bill authorized a total of $454,500,000 for military assistance, of which $350,000,000 was for worldwide allocation, $50 million for Korea, and $54,500,000 for the Republic of China.

The Senate amendment authorized a total of $325,000,000 without any allocation to specified countries.

The managers on the part of the House agreed to an authorization of $350,000,000 without specifying any country allocation.

They found it impossible to obtain agreement to a larger total for military assistance and believed that any specific additional allocation for Korea or the Republic of China would result in a drastic curtailment of the worldwide authorization which would be detrimental to the national security.

INTERNATIONAL MILITARY HEADQUARTERS (SENATE—SECTION 504(a) OF THE ACT)

The Senate amendment included a requirement that amounts appropriated for military assistance should be available for the expenses of U.S. participation in international military headquarters, and that no part of any funds made available under any other provision of law could be used for such expenses.

The House bill did not contain a comparable provision.

The managers on the part of the House accepted a compromise which authorized the use of military assistance funds for this purpose but deleted the prohibition against the use of funds which might otherwise be available for such expenses. This should permit the Department of Defense to draw on any funds which might be available to it, including military assistance funds, to finance the U.S. contribution to such headquarters.

LIMITATION ON CHANGE IN PROGRAM (HOUSE—SECTION 504(C) OF THE ACT)

The House bill amended section 504 of the Foreign Assistance Act to require that the military assistance program for any country in any fiscal year shall not be increased beyond 20 percent of the amount justified to the Congress, or $1,000,000, whichever is greater, unless the President determines such an increase is essential to the national interest.

The Senate amendment did not contain a comparable provision.

The House receded and accepted the deletion of this section.

The program has been operating since the beginning without such a provision in the authorization bill, and the managers on the part of the House were not convinced that it should be enacted under existing circumstances.

RESTRICTIONS ON TRAINING FOREIGN MILITARY STUDENTS (SENATE—SEC. 510 OF THE ACT)

The Senate amendment contained a provision that limited in any fiscal year the number of foreign military students to be trained in the United States whose training was financed out of military assistance funds, to a number no greater than one-half the number of foreign civilians brought to the United States under the Mutual Educational and Cultural Exchange Act of 1961 in the immediately preceding fiscal year.

The House bill did not have a comparable provision.

The Senate conferees receded and accepted a House amendment which permits the training of foreign military personnel in the United States in a number equal to the number of foreign civilian trainees who come here in the preceding fiscal year under the Mutual Educational and Cultural Exchange Act of 1961.

To have accepted the Senate language would have resulted in a drastic reduction in the training program. The managers on the part of the House believe that such training is necessary to achieve operational capability and readiness and is an important complementary element to our military assistance program.

DIVERSION OF RECIPIENT COUNTRY'S ASSETS TO MILITARY PURPOSES (HOUSE—SECTIONS 620(S) AND 620(V) OF THE ACT)

The House bill contained a revision of subsections 620(s) and 620(v) of the Foreign Assistance Act, which prohibited assistance to countries diverting their own resources to military purposes or which purchased sophisticated weapons systems.

The managers on the part of the Senate receded, accepting the House revision as including the essential elements of both subsections.

PROHIBITION OF MILITARY ASSISTANCE TO GOVERNMENTS OPPOSED TO DEVELOPMENT OF DEMOCRATIC INSTITUTIONS (HOUSE—NEW SECTION 620(V) OF THE ACT)

The House bill contained an amendment to section 620 of the Foreign Assistance Act that included a statement expressing disapproval of the provision of military assistance to any government denying freedom to its people and advocating the termination of military assistance to any government which comes into power through means other than through constitutional processes.

The Senate amendment did not include comparable language.

The House receded, accepting the deletion of this provision.

The committee of conference found itself unable to find acceptable language that expressed disapproval of infringement of liberty or of dictators but which would take into account all of the special circumstances which bear on U.S. policy in the various situations which confront us at the present time.

INTER-AMERICAN SOCIAL DEVELOPMENT INSTITUTE (HOUSE—SECTION 6 OF THE BILL)

The House bill contained a section creating the Inter-American Social Development Institute. The bill authorized the availability of not more than $50,000,000 of economic assistance funds for fiscal year 1970 to carry out the programs of the Institute. For subsequent fiscal years an open ended authorization of appropriations was included.

The Senate amendment did not contain a comparable provision.

The conferees accepted the House language with an amendment that permits the use of $50,000,000 of economic assistance funds not limited to fiscal year 1970 and deletes the open ended authorization for subsequent years. In view of the lateness in the fiscal year and the problems of transferring appropriate programs from AID to the Institute, the conferees were of the opinion that the availability of $50,000,000 was sufficient. Funds for subsequent years will require authorization. The conferees also deleted the word "Advisory" from the name of the Council.

APPOINTMENT OF CONFEREES ON H.R. 15149, FOREIGN ASSISTANCE AND RELATED PROGRAMS APPROPRIATIONS, 1970

Mr. PASSMAN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 15149) making appropriations for foreign assistance and related programs for the fiscal year ending June 30, 1970, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana? The Chair hears none, and appoints the following conferees: Messrs. PASSMAN, ROONEY of New York, Mrs. HANSEN of Washington, Messrs. COHELAN, LONG of Maryland, MCFALL, MAHON, SHRIVER, CONTE, Mrs. REID of Illinois, and Messrs. RIEGLE and BOW.

PRESIDENTIAL COMMISSION TO INVESTIGATE ALLEGED MASSACRES AT MYLAI

(Mr. COHELAN asked and was given permission to address the House for 1 minute.)

Mr. COHELAN. Mr. Speaker, I and 32 of my colleagues have just now introduced a bill to establish a Presidential Commission which will be directed to make a full investigation of the alleged massacres at Mylai, Vietnam, in March of 1968.

That these reports have shocked the American people is an understatement. I am not, nor are my colleagues who

have cosponsored this bill, making any prejudgments as to the guilt or innocence of any individuals, nor am I casting doubt on the integrity of the Armed Forces.

I have the utmost confidence that justice will prevail and the guilt or innocence of all parties will be established by the military tribunals.

The American people have been confronted with a crisis of conscience and confidence, however. The events of the past few weeks clearly indicate that an untoward and unusual event took place in Mylai in early 1968. I cannot accept unverified news reports as evidence, but neither can I dismiss such reports. If we are to insure the continued honor of our armed services—an honor that is justly deserved—an independent commission must make a full investigation and full report to the American people.

Any lingering doubt about this incident would be disastrous to the conscience of a people which prides itself for its reliance on the rule of law. As we have witnessed in the past, time alone can exaggerate rumor and totally distort the truth. Time alone also renders the truth difficult to find as witnesses are dispersed and the memory fades. It is for this reason that we must act now to establish this fact-finding commission.

I have full confidence in the Army investigation, but feel that full vindication in the eyes of the American people and the rest of the world can only come if an independent investigation is conducted.

The Commission authorized in this bill will be composed of 15 persons: Five Members of the House of Representatives, five Members of the Senate and five distinguished citizens, all appointed by the President. This Commission will have full subpena powers and a staff adequate to conduct a full investigation of all such actions involving military personnel in South Vietnam.

Since this investigation will be conducted concurrently with judicial actions against certain personnel, firm protections are provided for all individuals. These protections include the sealing of evidence during the course of the investigation, executive sessions for the taking of testimony, and representation by counsel for those who desire it.

I am convinced it is absolutely necessary that the questions raised by the Mylai incident be fully explored and aired to the satisfaction of the American people and the world at large.

I invite all my colleagues in this body to join in the introduction of this bill.

CHRISTMAS AND THE COAL MINERS

(Mr. HECHLER of West Virginia asked and was given permission to address the House for 1 minute.)

Mr. HECHLER of West Virginia. Mr. Speaker, what kind of a Christmas will it be for the coal miners? What kind of a Christmas will it be for the widows of the 78 men who lost their lives at Farmington?

Mr. Speaker, if the President vetoes the coal mine health and safety bill it would be just like placing loose razor blades in the Christmas stockings of hundreds of thousands of coal miners and their families.

The Federal Government, through Democratic and Republican administrations, shares the responsibility for failing to protect either the health or safety of those who work in the coal mines. Federal inaction has produced this terrible coal dust disease called pneumoconiosis. Now when Congress, over the objections of the administration, takes the initiative both to prevent the disease and take care of those miners who suffer from black lung, we are faced with the heartless threat of a Presidential veto.

If the President vetoes this bill, the Christmas lights will go out not only in the coal fields but all over the Nation. For too long, the coal miners have paid the price in broken bodies, and lungs whose tissues have been eaten away by coal dust. I have talked with hundreds of coal miners in the past few days, and I know how they feel. If the President vetoes this bill, there will be a major walkout in the coal fields. Furthermore, the sympathies of people throughout the Nation are on the side of justice for the coal miners. If the President dares to veto this bill, we have the votes to override such a veto.

I do not know who is giving the President the bad advice he is getting. But I would merely suggest that the President stop listening to those who have prevented meaningful legislation in the past, stop listening to the pressures of the coal operators, and stop listening to those special interests who are putting dollar signs on the life, limbs and lungs of the coal miner. In the spirit of this Christmas season, I trust that the President will consider the human values and sign the coal mine health and safety bill.

THE COURT OF APPEALS DECISION IN THE CASE OF BOORDA, ARCHULETA, AND HOLLEY AGAINST SUBVERSIVE ACTIVITIES CONTROL BOARD

(Mr. ICHORD asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. ICHORD. Mr. Speaker, my office has received numerous inquiries with respect to a decision rendered last Friday by the Court of Appeals for the District of Columbia Circuit—Chief Judge Bazelon, Judge Wright, and Judge McGowan—in the case of Boorda, Archuleta, and Holley against Subversive Activies Control Board. This is a significant case and I think it important to bring the matter to the attention of the House.

In this case, proceedings had been instituted before the Board by the Attorney General in July of 1968, against the three named individuals under relevant provisions of the Subversive Activities Control Act of 1950, as amended, to make determinations with respect to the membership of each of them in the Communist Party. It will be recalled that in proceedings under that act, the Communist Party had been previously determined to be a "Communist action" organization; that is, an organization operating within the United States under the control of the Soviet Union to advance the objectives of the world Communist movement. The Board made its determination finding each of the named individuals to be members of the Communist Party. They then appealed to the Court of Appeals for the District of Columbia circuit. That court, on December 12, 1969, reversed the Board and held the disclosure provisions of that act to be void on the alleged basis that the disclosure of Communist Party membership is "constitutionally protected" by the first amendment, except for those who join "with the specific intent to further illegal action."

The effect of the decision was not only to reverse the determinations made in the cases of Boorda, Archuleta, and Holley but also to stay 15 additional cases not yet determined that had been instituted this year, with commendable diligence, by the present Attorney General. The necessary result is that these cases must remain in abeyance and no additional cases instituted until and unless action is taken by the Supreme Court to reverse the action of the court of appeals.

The action of the court of appeals appears to me to be clearly in defiance of the prior determination on the same subject by the highest court of the land in *Communist Party* v. *Subversives Activities Control Board*, 367 U.S. 1 (1961), which squarely upheld the registration provisions of section 7 of the act "insofar as they require Communist-action organizations to file a registration statement containing the names and addresses of its present officers and members." Despite the fact that all of the Justices in that case, with the exception of Justice Black, supported this requirement as not repugnant to the first amendment, nevertheless the court of appeals last Friday reached a contrary result and voided section 13(g)(2) of the act. It seeks to justify its departure from the clear pronouncement in the Communist Party case on the basis of a number of other cases which it cited, none of which appears to be in point, and which had been previously considered and differentiated by the Supreme Court in its decision in the Communist Party case.

Without doubt, it seems to me, the court of appeals has ignored the prior pronouncement of the Supreme Court by which it should have been bound. While I do not believe it appropriate at this time to detail the Communist Party case in which all of the issues here pertinent were thoroughly discussed and disposed of by the Supreme Court in opinions which cover 202 pages of the official reports, I have noted certain principal points upon which I base this conclusion in my letter of yesterday to the Attorney General, requesting that he apply for writ of certiorari. In my remarks today, I would like to emphasize that the action of the court of appeals seems clearly in violation of the canon of judicial discipline which requires an inferior court to adhere to the precedents established by a superior court.

In making this comment, I believe I do so with some basis in fact. It appears that the judges themselves were conscious that their course of action might

be construed to be in disregard of the prior holding of the Supreme Court. In footnote 15 of their decision, they have noted a suggestion that the validity of the decision in Communist Party had been "eroded," citing cases which do not sustain this conclusion, although with respect to which they say they "express no opinion." Nevertheless, it appears that their action speaks more clearly than their words of disavowal.

One, of course, may speculate why these particular judges took the course they did. However, I do not believe that one may ascertain the "specific intent" which formed the basis for their action—at least in any greater degree than they could expect others to ascertain an individual's "specific intent" with respect to his membership in the Communist Party. We do know that their action in nullifying important aspects of the congressional program for coping with the dangers posed by the world Communist movement—dangers which have by no means abated within recent years—again demonstrates the frustration which this Congress and the public can experience, particularly by what appears to me in this instance to be ill-advised and undisciplined court action.

It seems clear to me that an application for certiorari, with the hope that the Supreme Court will vindicate its prior holding, is the only course that remains open to Congress to cope with the neat result of the decision of the court of appeals. I do not believe that any effective amendment can be made to the Subversive Activities Control Act to accord with the decision of the court of appeals and still preserve the basic disclosure purposes of the act which had previously been upheld by the Supreme Court. It seems obvious to me that if the act were amended to require proof of "specific intent to further illegal action" as a condition for disclosure of Communist Party membership, the disclosure purposes of the act could not be accomplished under that impossible requirement. There is no present law, as Justice Frankfurter observed in the Communist Party case, which in general makes pursuit of the objectives of the world Communist movement a crime. Hence, it would not be practicable to prove a "specific intent to further illegal action" when such action has not been made illegal. Nor has Congress chosen to make membership a crime as a means of coping with the Communist movement. There is some serious doubt, under recent decisions of the courts, whether that could be done without a constitutional amendment. In any event, if the Government were able to prove that individual membership was entertained with a specific intent to further illegal action, I think we would all agree that the individual should be prosecuted for criminal conspiracy, or some other crime, rather than coping with his action by a determination of his membership for disclosure purposes only.

Accordingly, on yesterday I addressed a letter to the Attorney General urging him to make immediate application to the Supreme Court for a writ of certiorari, and to prosecute this application vigorously to an early determination. I feel certain that the present Attorney General will fulfill his responsibilities and will give my request due consideration. As a matter of interest to the Members, I include with my remarks a copy of the December 12 decision of the court of appeals and a copy of my letter to the Attorney General:

U.S. COURT OF APPEALS, FOR THE DISTRICT OF COLUMBIA CIRCUIT

No. 22,514—*Simon Boorda, Petitioner* v. *Subversive Activities Control Board, Respondent*

No. 22,522—*Robert Archuleta and Wayne Dallas Holley, Petitioners* v. *Subversive Activities Control Board, Respondent*

(Petitions for review of order of the Subversive Activities Control Board)

[Decided December 12, 1969]

Mr. John J. Abt, of the bar of the Court of Appeals of New York, *pro hac vice*, by special leave of court, with whom *Mr. Joseph Forer* was on the brief, for petitioners.

Mr. Kevin T. Maroney, Attorney, Department of Justice, with whom *Mr. J. Walter Yeagley*, Assistant Attorney General, *Messrs. Frank R. Hunter, Jr.*, General Counsel, *Charles F. Dirlam*, Assistant General Counsel, Subversive Activities Control Board, and *Mrs. Lee B. Anderson*, Attorney, Department of Justice, were on the brief, for respondent.

Mr. Lawrence Speiser filed a brief on behalf of American Civil Liberties Union, as *amicus curiae* urging reversal.

Before BAZELON, *Chief Judge*, WRIGHT and MCGOWAN, *Circuit Judges*.

BAZELON, *Chief Judge*. These are petitions under § 14(a) of the Subversive Activities Control Act [1] to set aside orders of the Subversive Activities Control Board determining that each of the several petitioners is "a member of the Communist Party of the United States of America, a Communist action organization." The fact of membership is not at issue.[2] Instead, petitioners attack the Board's construction, and the constitutionality, of the Act. The Board erred, they argue, in taking official notice of its prior determination that the Communist Party is a Communist-action organization, and in not allowing petitioners to demand a redetermination of the status of the Party in the proceedings against them. Additionally, they claim that the Act is constitutionally defective in allowing public disclosure of an individual's membership to be made without a finding that the individual concerned shares in any illegal purposes of the organization to which he belongs. We find this second argument persuasive.[3]

I

Under the Act, when the Attorney General has "reason to believe . . . that any individual is a member of an organization which has been determined by final order of the Board to be a Communist-action organization," he is to file a petition with the Board seeking a determination "that such individual is a member of such Communist-action organization." § 13(a). After hearing, the Board is to make a written report including its findings of fact. If it determines that the "individual is a member of a Communist-action organization," it shall issue and serve him with an order "determining such individual to be a member of a Communist-action organization." § 13(g)(2).[4] Petitioners argue that the difference in language between the two subsections is critical: that is, they would read § 13(a) as instructing the Attorney General to institute proceedings before the Board whenever it comes to his attention that an individual belongs to any organization "which *has been determined by final order of the Board* to be a Communist-action organization." But § 13(a)(2) requires the Board to determine that the "individual *is* a member of a Communist-action organization," and this language is said to imply that, during the course of the hearings on a petition to determine an individual's membership, the Board must not only find that the individual is a member of a named organization, but must also redetermine that the organization is in fact a Communist-action organization.[5] Support for this construction is sought in § 13(b) and (i), which provide for redetermination, not more than once each calendar year, of the status of individuals and organizations against which Board orders are outstanding. Petitioners would read these subsections to allow an individual to reopen the status of an organization of which he is a member in a § 13(b) petition for redetermination. Therefore, they argue, § 13(g) should be read in the same way, and an individual should be allowed to litigate the status of an organization of which he is alleged to be a member during the course of the initial proceedings against him.

On its face, § 13(b) does not compel the construction sought by petitioners. It provides, in pertinent part:

"Any organization as to which there is in effect a final order of the Board determining it to be a Communist-action or Communist-front organization and *any individual as to whom there is in effect a final order of the Board* determining such individual to be a member of a Communist-action organization *may, not more often than once in each calendar year*, file with the Board and serve upon the Attorney General *a petition for a determination that such organization no longer is a Communist-action or Communist-front organization, or that such individual no longer is a member of a Communist-action organization, as the case may be.*" (emphasis added). This language is not entirely free from ambiguity, but it seems to imply that an individual, in a § 13(b) proceeding, may contest only the fact of his membership in a named organization against which an order is already outstanding.[6] The limitation of petitions to one per calendar year is at least an indication that Congress intended that no particular issue should be relitigated more than once each year.[7] Allowing individual members of an organization to reopen the complex question whether the organization to which they belong is a Communist-action organization would be to open the door to substantial delaying tactics without providing a corresponding benefit to anyone.[8] Absent any support in the legislative history for petitioners' construction of § 13(b) [9] we cannot conclude that it was intended to allow individuals to contest the status of the organizations to which they belong.

Deprived of any support from § 13(b), petitioners' construction of § 13(g) must likewise fail. That construction would require us to read identical statutory language [10] in substantially different ways without any apparent support for such a different construction in the legislative history.[11] It would raise a serious risk of inconsistent adjudications; that is, of opposite determinations of the same question (whether a given organization is a Communist-action organization) in proceedings against different individuals.[12] That § 13(a) allows individual proceedings to be consolidated is no assurance that they would be. The Board did not err in holding that petitioners may not challenge the status of the Communist Party in the instant proceeding.

We must therefore face the constitutional

Footnotes at end of article.

question. Petitioners argue that § 13(g)(2) of the Act[13] is invalid because it provides for public disclosure of the fact of their membership in the Communist Party whether or not they intend to further any of the Party's illegal, as well as its legal and constitutionally protected aims.[14] The Board's primary response to this argument is that it is foreclosed by the Supreme Court's decision in *Communist Party v. Subversive Activities Control Board*, 367 U.S. 1 (1961).[15]

The Supreme Court in the *Communist Party* case was presented with the question whether the First Amendment prohibited the requirement, set forth in § 7 of the original Act,[16] that organizations found to be dominated by a foreign power and intending the illegal overthrow of existing government could be required to file registration statements including the names and addresses of their members.[17] Individual members of the Communist Party were not parties to the action, but the Court allowed the Party standing to "assist those rights of its members, such as anonymity, which are necessarily infringed by the very act of *its filing a registration statement*, and which could not be otherwise asserted than by raising them here." 367 U.S. at 81.

The Court examined the structure of the Act, and found that the registration and disclosure requirements of § 7 did not attach "to the incident of speech, but to the incidents of foreign domination and of operation to advance the objectives of the world Communist movement." *Id.* at 90. Since regulation was premised on constitutionally unprotected conduct, the Court was required to balance "the value to the public of the ends which the regulation may achieve" against "the impediment which particular governmental regulation causes to entire freedom of individual action." *Id.* at 91; *see United States v. O'Brien*, 391 U.S. 367, 377 (1968). Although the Court did not consider the incidental infringement of First Amendment rights to be insubstantial, *see* 367 U.S. at 102, it concluded that the importance of the government's interest in disclosing the names of those who desired to further the illegal aims of Communist-action organizations justified the requirement that such organizations make public their membership lists. *Id.* at 102–03.

The present case, however, stands on an entirely different footing. Of course, in both cases the class of persons upon whom disclosure ultimately operates is the same—all members of the organization, whether innocent or guilty. But § 7 of the original Act on its face dealt directly with organizations at least some of whose members shared in the illicit, constitutionally unprotected aims of the organization. *See id.* at 23–27, 42–55. Of course it would hardly have been practicable to require the organizations themselves to distinguish in their membership lists between innocent and guilty members. Therefore, the disclosure provisions were viewed as attaching to the incidents of foreign domination and illicit purpose, characteristics of the organization and of some but not all of its members. Innocent members were unavoidably caught up in a net designed to disclose the guilty. But § 13(g)(2) operates directly on individuals; consequently, the "operative facts upon which [the statute] depends," *United States v. Robel*, 389 U.S. 258, 263 (1967), must be facts characteristic of the individual upon whom the statute operates. Under § 13(g)(2), disclosure attaches to mere membership in a Communist-action organization, whether or not the member whose affiliation is to be publicized has engaged in, or has any intent to further, the illicit ends of the organization. If mere membership, to which disclosure attaches, is constitutionally protected, the balancing test is inapplicable. *Communist Party, supra*, 367 U.S. at 90.[18] Consequently, the question for decision is simply whether the statute infringes protected rights. *De Jonge v. Oregon*, 299 U.S. 353, 364–65 (1937).

It seems clear to us that mere membership in the Communist Party is protected by the First Amendment. For it is "now beyond dispute," *Bates v. Little Rock*, 361 U.S. 516, 523 (1961), that "an individual's right of association . . . is protected by the First Amendment." *United States v. Robel*, 389 U.S. 258, 263 (1967) When a "quasi-political part[y] or other group . . . may embrace both legal and illegal aims," *Scales v. United States*, 367 U.S. 203, 229 (1961), affiliation with and membership in that group are constitutionally protected except for those who join "with the 'specific intent' to further illegal action." *Elfbrandt v. Russell*, 384 U.S. 11, 17; *see Noto v. United States*, 367 U.S. 290, 299–300 (1961). "Assuming that some members of the Communist Party . . . had illegal aims and engaged in illegal activities, it cannot automatically be inferred that all members shared their evil purposes or participated in their illegal conduct." *Schware v. Board of Bar Examiners*, 353 U.S. 232, 246 (1957). For "men in adhering to a political party or other organization notoriously do not subscribe unqualifiedly to all of its platforms or asserted principles." *Schneiderman v. United States*, 320 U.S. 118, 136 (1943).[19] Therefore the fact that some members of the Communist Party may be engaged in activity not protected by the First Amendment does not mean that the protected activity of their members may be infringed. If rights are abused, "legislative intervention can find constitutional justification only by dealing with the abuse. The rights themselves must not be curtailed." *De Jonge v. Oregon, supra*, 299 U.S. at 364–65.

Since the disclosure provisions of § 13(g)(2) attach solely to constitutionally protected rights, the only remaining question is whether they operate to discourage or penalize the exercise of those rights. We believe that they do. "Inviolability of privacy in group association may in many circumstances be indispensable to preservation of freedom of association, particularly where a group espouses dissident beliefs." *NAACP v. Alabama*, 357 U.S. 449, 462 (1958). In the present situation, we cannot assume that disclosure of an individual's membership in the Communist Party will not operate as a substantial burden upon the exercise of his right of free association.[20] Therefore, the disclosure provisions of § 13(g)(2) must fall as contrary to the First Amendment. *United States v. Robel, supra*; *De Jonge v. Oregon, supra*.

III

We would be led to the same conclusion under the balancing test as enunciated in the *Communist Party* case.[21] The Court in that case sustained the disclosure provisions of § 7 of the original Act, which like the present statute made no distinction between innocent and guilty members. But disclosure in that case was sought from the Party, not from individuals,[22] and consequently there was available no practicable, less intrusive alternative to disclosure of the names of all members: to ask the Party itself to distinguish between those of its members who did and who did not share its illegal aims would be to ask the impossible. But proceedings under § 13(g)(2) are on a case-by-case basis, rendering it feasible to distinguish in each case between protected and unprotected membership. *Scales v. United States*, 367 U.S. 203 (1961). Therefore, in weighing the public interest in disclosure, we must weigh a different quantity: since innocent members may easily be separated from guilty ones, the public interest in exposure of the guilty cannot be used to justify exposure of the innocent. *See Keyeshian v. Board of Regents*, 385 U.S. 589, 606–07 (1967); *Shelton v. Tucker*, 364 U.S. 479, 488 (1960). Since the First Amendment precludes the government from claiming an interest in public disclosure of the associations of innocent members of Communist-action organizations,[23] *Elfbrandt v. Russell*, 384 U.S. 11, 17 (1966), the governmental interest to be weighed in this case is nil.[24]

Since § 13(g)(2) of the Subversive Activities Control Act is contrary to the First Amendment, the orders issued in these cases cannot stand. The cases must be remanded to the Subversive Activities Control Board with instructions to dismiss the petitions.

It is so ordered.

FOOTNOTES

[1] Title I of the Internal Security Act of 1950, 64 Stat. 987, *as amended* 50 U.S.C. §§ 781–798 (1964 & Supp. IV, 1969). Unless otherwise indicated, all references are to the Act as amended.

[2] Petitioners have refused to respond to the allegations of membership on the ground that the statute under which proceedings were had is unconstitutional.

[3] We do not, therefore, consider petitioners' other constitutional claims.

[4] If the Board determines that an individual is not a member of a Communist-action organization, it shall issue and serve upon the Attorney General "an order denying the determination sought by his petition." § 13(h)(2).

[5] Petitions for determination that an individual is a member of a Communist-action organization apparently cannot be brought until the organization in question has been determined by the Board to be a Communist-action organization. *See* § 13(a).

[6] Of course, a petitioner in a § 13(b) proceeding could argue that there was no longer a Board order outstanding against an organization of which he was a member.

[7] The limitation of § 13(b) petitions to one per year was contained in the original act and carried over in the 1968 amendments. But it is of some relevance that the House Report on the 1968 amendments indicated substantial concern over delay in Board proceedings. *See* H.R. Rep. No. 733, 90th Cong., 1st Sess. 10 (1967).

[8] An organization may, of course, reopen the question of its status once per year under § 13(b), this should provide at least some remedy for the organization's members.

[9] Petitioners have directed us to no such material, nor have we been able to unearth any.

[10] The phrase "is a member of a Communist-action organization," appearing in § 13(b) and (g)(2) of the Act.

[11] As originally enacted, § 13(g)(2) spoke of "a Communist-action organization (*including an organization required by final order of the Board to register under § 7(a)*)" (emphasis added). 64 Stat. 1000. The italicized phrase is missing from the section as amended in 1968. But the House Report on the amendments describe them as simply "conforming amendments" to bring the Act in line with Albertson v. SACB, 382 U.S. 70 (1965). We do not believe that the House intended the radical alteration in Board proceedings sought by petitioners. *See* H.R. Rep. No. 733, 90th Cong., 1st Sess. 23 (1967).

[12] A "basic objective" of the Act is to provide public information concerning Communist activities. *See* H.R. Rep. No. 733, *supra* note 11, at 3. A regular pattern of inconsistent determinations based not on changed circumstances but solely on the particular evidence adduced at different proceedings would hardly advance this objective.

[13] Section 13(g) provides:

"If, after hearing upon a petition filed under subsection (a) of this section the Board determines—

* * * * *

"(2) that an individual is a member of a Communist-action organization it shall make a report in writing in which it shall state its findings as to the facts and shall issue and

cause to be served on such individual an order determining such individual to be a member of a Communist-action organization."

All such orders are a matter of public record. § 9(a).

[14] Neither petitioners nor the Board suggest that § 13(g)(2) could be construed so as to apply only to those members of Communist-action organizations who share in the group's illegal aims, and we believe they are correct. United States v. Robel, 389 U.S. 258, 262 (1967); Aptheker v. Secretary of State, 378 U.S. 500, 511 n. 9, 515–16 (1964); *see* Killian v. United States, 368 U.S. 231 (1961).

[15] It has been elsewhere suggested that Supreme Court cases subsequent to the decision in *Communist Party* have eroded its validity. Note, *Civil Disabilities and the First Amendment*, 78 Yale L.J. 842 (1969); *See* United States v. Robel, 389 U.S. 258 (1967); Keyeshian v. Board of Regents, 385 U.S. 589 (1967); Elfbrandt v. Russell, 384 U.S. 11 (1966). In view of the disposition made here, we need express no opinion on this point.

[16] That section has since been repealed. Act of January 2, 1968, Pub. L. No. 90–237, § 5, 81 Stat. 766.

[17] The Court in *Communist Party* phrased the issue as follows:

"The Communist Party would have us hold that the First Amendment prohibits Congress from requiring the registration and filing of information, including membership lists, by organizations substantially dominated or controlled by the foreign powers controlling the world Communist movement and which operate primarily to advance the objectives of that movement: the overthrow of existing government by any means necessary and the establishment in its place of a Communist totalitarian dictatorship."

367 U.S. at 88–89. It pointed out that "our consideration of any other provisions than those of § 7, requiring Communist-action organizations to register and file a registration statement, could in no way affect our decision in the present case." *Id.* at 77.

[18] *See also* United States v. Robel, 389 U.S. 258, 268 n. 20 (1967), where the Supreme Court explicitly rejected any attempt at "balancing" in dealing with § 5 of the Act:

"It has been suggested that this case should be decided by 'balancing' the governmental interests expressed in § 5(a)(1)(D) against the First Amendment rights asserted by the appellee. This we decline to do. We recognize that both interests are substantial, but we deem it inappropriate for this Court to label one as being more important or substantial than the other. . . ."

Petitioners suggest that this footnote implies that the approval of "balancing" in *Communist Party*, *see* 367 U.S. at 91, has since been withdrawn. But the Court once again resorted to a balancing test in United States v. O'Brien, 391 U.S. 367, 377 (1968). It appears, then, that balancing may be appropriate when a statute is directed at constitutionally unprotected conduct, and infringes upon protected conduct only as an unavoidable side effect of an otherwise unexceptionable purpose. But where, as in *Robel*, "the operative fact upon which [the statute] depends is the exercise of [a right] protected by the First Amendment," 389 U.S. at 263, the First Amendment precludes a resort to "balancing."

[19] The Board relies upon Adler v. Board of Education, 342 U.S. 485, 494–95 (1952), for the contrary proposition. But the Supreme Court in Keyeshian v. Board of Regents, 385 U.S. 589, 595 (1967) pointed out that "pertinent constitutional doctrines have since respected the premises" of that decision.

[20] There is no direct evidence in the record in this case as to the degree of harassment that one named as a member of the Communist Party may suffer as a result. But although it is true that the Supreme Court has in some cases relied solely on record evidence to establish such a possibility, *e.g.*, Shelton v. Tucker, 364 U.S. 479, 486 n.7 (1960), Bates v. Little Rock, 361 U.S. 516, 520–22 (1960), NAACP v. Alabama, 357 U.S. 449, 462 (1958), it was willing to state in *Communist Party* that "the public opprobrium and obloquy which may attach to an individual listed with the Attorney General as a member of a Communist-action organization is no less considerable than that . . . in *N.A.A.C.P.* and *Bates*." 367 U.S. at 102. And in American Communications Ass'n v. Douds, 339 U.S. 382, 402 (1950), the Court noted:

"Under some circumstances, indirect 'discouragements' undoubtedly have the same coercive effect . . . as imprisonment. . . . A requirement that adherents of particular religious faiths or political parties wear identifying arm-bands, for example, is obviously of this nature."

[21] "Against the impediments which particular governmental regulation causes to entire freedom of individual action, there must be weighed the value to the public of the ends which the regulation may achieve." 367 U.S. at 91.

[22] This difference was used in *Communist Party* to distinguish Shelton v. Tucker, 364 U.S. 479 (1960). *See* 367 U.S. at 92–93.

[23] We are not dealing here with a legislative investigation the primary purpose of which is to inform Congress with respect to matters properly within its concern. In such cases, some disclosure to the public may be justified as a necessary incident of disclosure to Congress. *Cf.* Watkins v. United States, 354 U.S. 178, 187 (1967) United States v. Rumely, 354 U.S. 41, 56–58 (1953) (concurring opinion).

[24] In the *Communist Party* case, the Court sustained the disclosure provisions of § 7 of the original Act because "the mask of anonymity which [the] organization's members wear serves . . . to enable them to cover over a foreign-directed conspiracy, infiltrate into other groups, and enlist the support of persons who would not, if the truth were revealed, lend their support."

367 U.S. at 102–03. In other words, the government's interest in disclosure was considered to be its interest in disclosure of the names of guilty members of the Party, *i.e.*, those who shared the purposes found by the Court not to be constitutionally protected. But, as pointed out above, there was in that case no practicable way of distinguishing between innocent and guilty members, and a refusal to consider the public interest in disclosure of the guilty members would have meant that the interest could not have been protected at all. *See* 367 U.S. at 88–89.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON INTERNAL SECURITY,
Washington, D.C., December 16, 1969.

Hon. JOHN N. MITCHELL,
Attorney General,
Department of Justice,
Washington, D.C.

MY DEAR MR. ATTORNEY GENERAL: I am much disturbed by the extraordinary result reached last Friday by the Court of Appeals (Chief Judge Bazelon, Wright, and McGowan, Circuit Judges) in the cases of *Boorda, Archuleta, and Holley* v. *Subversive Activities Control Board*. It seems to me that this decision voiding the disclosure provisions of the Subversive Activities Control Act relating to individual Communist Party membership, is both irrational and contrary to a prior determination on the same subject by the highest court of the land. Its impact in nullifying important aspects of the congressional program for coping with the dangers posed by the world Communist movement—dangers which have by no means abated within recent years—cannot remain unchallenged. I am writing to urge that immediate application be made to the Supreme Court for a writ of certiorari and that the application be vigorously prosecuted for early determination.

In *Communist Party* v. *Subversive Activities Control Board*, 367 U.S. 1 (1961), the Supreme Court squarely and unequivocally upheld the registration provisions of section 7 of the Subversive Activities Control Act "insofar as they require Communist action organizations to file a registration statement containing the names and addresses of its present officers *and members*." (Page 103). All of the justices, with the exception of Justice Black, supported this requirement as not repugnant to the First Amendment, although the court split 5–4 on other issues not here pertinent. Despite this ruling, and the reasoning in support of it, the Court of Appeals reached a contrary result and voided section 13(g)(2) of the Act on the ground that the disclosure of Communist Party membership is "constitutionally protected" by the First Amendment except for those who join "with the 'specific intent' to further illegal action."

To justify its departure from the clear pronouncement in *Communist Party*, the Court of Appeals cited a number of cases, none of which appeared to be in point, as a basis for its engrafting on the case, and the Act, a requirement of specific intent to further illegal action as a condition precedent to the disclosure of individual membership. All of these cases, namely, *U.S.* v. *Robel*, 389 U.S. 258; *Scales* v. *U.S.*, 367 U.S. 203; *Elfbrandt* v. *Russell*, 384 U.S. 11; *Noto* v. *U.S.*, 367 U.S. 290; *Schware* v. *Board of Bar Examiners*, 353 U.S. 232; *Schneiderman* v. *U.S.*, 320 U.S. 118; *DeJonge* v. *Oregon*, 299 U.S. 353; *Keyeshian* v. *Board of Regents*, 385 U.S. 589, and *Shelton* v. *Tucker*, 364 U.S. 479, involved either criminal prosecutions or situations in which employment or other civil disabilities were sought to be imposed. Cases of this sort, as well as *Bates* v. *Little Rock*, 361 U.S. 516 and *NAACP* v. *Alabama*, 357 U.S. 449, cited by the Court of Appeals in support of its more general proposition that "mere membership in the Communist Party is protected by the First Amendment," were considered and differentiated in *Communist Party*. (See page 96f, 101–103).

Indeed, the argument accepted by the Court of Appeals in *Boorda, et al.* had been previously advanced by the Party and was rejected in *Communist Party*. In that case it had been urged "that under the compulsion of the First Amendment the Act must be read as reaching only organizations whose purpose to overthrow existing government is expressed in illegal action or incitement to illegal action." Mr. Justice Frankfurter, speaking for the Court said, "We think that an organization may be found to operate to advance objectives so defined, although it does not incite the present use of force. Nor does the First Amendment compel any other construction. The Subversive Activities Control Act is a regulatory, not a prohibitory statute. It does not make unlawful pursuit of the objectives which section 2 defines. In this context, the Party misapplies *Yates* v. *United States*, 354 U.S. 298, and *Dennis* v. *United States*, 341 U.S. 494 on which it relies." (Pages 55f.) The same reply must be made to the Court of Appeals which seeks to apply *Scales* and *Noto*. These cases, like *Yates* and *Dennis*, involved prosecutions under the Smith Act.

The Supreme Court emphasized that in a number of situations "in which secrecy or the concealment of association has been regarded as a threat to public safety and to the effective, free functioning of our national institutions," Congress has met the threat by requiring registration or disclosure even among groups concerned exclusively with political processes irrespective of any purpose or intent to effect illegal action, citing the Federal Corrupt Practices Act, upheld

in *Burroughs* v. *U.S.*, 290 U.S. 534, the Federal Regulation of Lobbying Act, upheld in *U.S.* v. *Harriss*, 347 U.S. 612, and the Foreign Agents Registration Act, considered in *Viereck* v. *U.S.*, 318 U.S. 236. (Pages 97–102.)

It is thus clear that the registration requirement compelling disclosure of membership was upheld by the Supreme Court on the ground of the organization's foreign control and because of the harmful impact of its organizational activities on our society, without regard to whether or not its members shared its ultimate purposes or entertained any specific intent to effect illegal action. Finally, while recognizing that congressional power in this sphere, as in all spheres, is limited by the First Amendment, the Court admonished that "when existing government is menaced by a world-wide integrated movement which employs every combination of possible means, peaceful and violent, domestic and foreign, overt and clandestine, to destroy the government itself—the legislative judgment as to how that threat may best be met consistently with the safeguarding of personal freedom is not to be set aside merely because the judgment of judges would, in the first instance, have chosen other methods. Especially where Congress, in seeking to reconcile competing and urgently demanding values within our social institutions, legislates not to prohibit individuals from organizing for the effectuation of ends found to be menacing to the very existence of those institutions, but only to prescribe the conditions under which such organization is permitted, the legislative determination must be respected." (Pages 96–97.) This admonition was ignored by the Court of Appeals.

I would greatly appreciate knowing what conclusion your Department reaches on my request.

With kind personal regards, I am

Sincerely yours,

RICHARD H. ICHORD,
Chairman.

RESEARCH PROJECTS

(Mr. DADDARIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DADDARIO. Mr. Speaker, the act authorizing fiscal year 1970 military research and development has been recently signed into law by the President. That legislation contains language which may affect in a fundamental way our mechanisms for allocating Federal resources for the support of scientific research and development activities. I refer to section 203, which states:

None of the funds authorized by this Act may be used to carry out any research project or study unless such project or study has a direct and apparent relationship to a specific military function.

This provision was adopted without discussion of its implications for the future of American science, which must have thoughtful and imaginative implementation if it is not to be severely injured. Section 203 has also triggered a crisis which our Subcommittee on Science, Research, and Development has been developing and with which it has been intimately concerned since the early 1960's.

That crisis stems to a considerable extent from undue dependence of the scientific community upon military support.

I fear that there exists today a very real danger that research in the universities and elsewhere, now funded from defense appropriations and which should be continued in the national interest, will be fatally disrupted by a mechanistic and legalistic application of the strictures of section 203.

We must not lose sight of the fact that basic research is good for the country, not just for the Department of Defense. We must further see to it that support for basic research is divorced from partisan and passionate argument such as that with which it is presently involved so that basic research activity remains sufficient to meet the needs of the precarious times we face.

Congress must give urgent and immediate thought to arrangements that will identify and provide for the orderly, uninterrupted transfer and continuation of any research adversely affected by section 203, which should still be carried on in the national interest.

We have long been concerned that the mission-oriented agencies, under financial pressure, would be forced to give up much of their research. Recognizing this problem, we restructured the National Science Foundation in 1968 so it would be able to fill the gap. Specifically, we made arrangements whereby the Secretary of Defense and the Secretary of State, for example, may request the Foundation to do certain basic but unclassified research.

It was our purpose in this restructuring to allow transfers to be effected gradually over a number of years. Section 203 has the purpose of accelerating that process dramatically. Without careful, well-planned, and immediate action, however, it can cause major disruption.

Whatever basic research the Department of Defense does, it must in some way decide for itself. Research it is doing beyond that, and which, because of its nature, the country needs, ought to be carefully reviewed and handled in a special way.

Most importantly, we must be very careful that, in making program transfers, our most talented young people are not adversely affected. It would be especially unfortunate if competition between the recognized high-quality transfer projects and the new projects of our younger investigators resulted in alienation of these new young talents. We can ill afford a lost generation of science skills.

SUBCOMMITTEE'S INVOLVEMENT

Long before the distinguished Senate majority leader spoke out against Defense Department research, our subcommittee had been examining the question of scientific research and its relationship to the goals, objectives and functions of Federal agencies. We have made numerous recommendations to this body. It has been the subject of the distinguished report done for the Committee on Science and Astronautics by the National Academy of Sciences in 1965, entitled "Basic Research and National Goals." It has been the topic of discussion at two of our formal annual meetings of the Committee's Panel on Science and Technology, in 1966 and 1967.

The conclusions drawn from all of these efforts have shown a basic consensus that mission-oriented agencies have a responsibility—an obligation—to conduct a certain amount of basic research so as to be able to innovate in the applied area and to insure the capability to meet future needs.

DEFINITIONS

By basic research I mean research which at present may only vaguely seem as presenting prospects for direct application. Nonetheless, such basic research is a vital investment in our national future. It is directed not at solving the problems of today but at providing the knowledge for meeting unforeseen problems of tomorrow. It is a means of insuring that we have what Churchill called the tools to do the job.

Let me elaborate. We have an obligation today to the future, particularly when we are in competition with an economic system and an ideology which emphasizes the benefits of long-range planning. I do not have to remind this body of the fact that three of the most significant scientific and technological developments of the century—nuclear fission, radar and jet propulsion—were all based upon fundamental work done mainly from abroad. It is true that since then, we have done well. Nonetheless, until the massive mobilization of American science during World War II, we routinely looked to Western Europe for the scientific ground breaking needed by our technologies. And since that time, much of the finest fundamental research—including Charles Townes' laser—has been supported with funds from mission-oriented agencies with no firm goals in mind.

It is axiomatic that no modern American corporation would dare to cut itself off from future-oriented research. It is this research, often not related to products and services of the day, that so often will determine the profit-and-loss statement and the industrial standing of the company 10 years later. Similarly, the future of this Nation cannot rest upon an accidental, ad hoc science policy. We have to plan and make provisions for the future. This is the raison d'etre for our faith in and support of basic research.

OUR DECENTRALIZED SYSTEM

Since World War II we have successfully relied upon the principle that each department and agency which needs science and technology shall both carry on the short-term research and development to resolve immediate problems and also sponsor and conduct the exploratory research which can well shape its future. We have always thought it more healthy for our agencies and for the health of American science that each agency fund a certain amount of high-quality future-oriented research without regard for an immediate connection with present problems. Our own investigation shows that such involvement is necessary and vital. Our agency heads are responsible not only for meeting the issues of the day, but for preparing to meet the issues of tomorrow. For this, they have to look and work ahead.

Dr. Lee DuBridge, the President's Science Adviser, testified recently before my subcommittee:

We encourage every agency which has major technological enterprises under way to spend a portion of its funds to support fundamental science. Such agencies select those areas of fundamental science which appear to be most relevant to their agency missions, although the term "relevance" needs to be interpreted broadly since the results of science are always in part unforseeable.

The pluralistic system of supporting science has served us well. That system has in many ways provided an open market place where ideas could compete for attention. We do not claim that it is free from fault. But it does have many years of success behind it. So far, no other system suggested to replace it has received tangible support.

It would be a national tragedy were other Federal agencies to adopt the theme of section 203 and find their research limited to short-term, well-defined, highly visible needs. This was the fate of the buggy whip makers and the wagon craftsmen who kept on working to improve their whips and wagons long after the internal combustion engine had arrived. Our departments must continue to sponsor and carry on future-oriented research that can and will respond to the new discoveries and progress in science.

RESPONSIBILTIY FOR RELEVANCE

If "relevance" is to be emphasized, an appropriate question is: who should have the responsibility for determining the degree of relevance of research to the goals, objectives and functions of our Federal agencies?

I believe this is the first responsibility of the mission-oriented agencies themselves. It is they who must continue to assume the primary responsibility for demonstrating the functional relevance of the research they support. This point was emphasized by Mr. Elmer Staats, the Comptroller General, in his recent testimony before Congress—

I believe that the determination on individual research projects, after these guidelines have been established, has to be made pretty much within the Defense Department. We may want to test some of these . . . but it is somewhat a subjective kind of judgment in many cases.

While I agree that outside advice may be needed for questioned projects, I doubt if it is a proper role of the National Academy of Sciences to place itself in an adjudicating position with regard to relevance—an idea that has been suggested by the distinguished Senate majority leader. Perhaps the Secretary of Defense should request, as an alternative, that the Academy make a review in collaboration with the already constituted Defense Science Board, which does have extensive knowledge of defense needs. Or, for that matter, the President could decide to convene a special study panel from among the members of his President's Science Advisory Committee to undertake such a review. And this Congress should most certainly be involved in the determination—having made the recommendation to which we have referred.

The point is, however, that as we go about apportioning our national resources for scientific research, we must continue to realize that "relevance" itself needs to be interpreted broadly. And I repeat again—it is the primary responsibility of the individual mission-oriented agency to make the judgment, according to its own view as to its future needs and potential problems. This does not mean improvement should not be fostered. The hearings of our subcommittee into the way in which our science resources are administered and organized is, in fact, aimed in this very direction.

A TIME OF TRANSITION

Today, our mission-oriented agencies account for some 80 to 85 percent of the total Federal support for basic research. This is, in itself, largely the result of historical circumstance.

The National Science Foundation, when it was established in 1950, was conceived as the principal agent for the support of fundamental research in the Federal Government. However, from its earliest days, the Foundation never received funds to carry out this role adequately. Instead, while the NSF was being formed and, afterwards, as it grew, basic research being performed in mission-oriented agencies was jealously guarded. Much of this work would have been done in the NSF had it been formed earlier. But it was not, and thus our philosophy of decentralized science support took form, with the Defense agencies becoming a major source of funds.

Now we are in a period of transition. Many of the mission-oriented agencies are beginning to retrench in their support for basic research. This retrenchment is caused not so much out of belief that basic research is no longer relevant to their functions or missions, but is the result of severe budgetary stringency. In this process, much good has come, and, as anticipated, the National Science Foundation is playing a key role.

Already the National Science Foundation has been asked to take responsibility for $19 million in research projects, largely from the Department of Defense. In addition, and estimated $20 to $30 million in projects is also being considered for transfer to the Foundation because of mission agency budget cutbacks. It is apparent that the total could easily reach $200 to $300 million in the near future.

Section 203 not only compounds this problem, but presents two very serious potential dangers.

First, it is clear that American science is already in an unhealthy situation. It is rapidly being backed into a situation whereby no "new starts" will be possible. Because of the present decline in funding for research, Section 203 has the potential of encouraging not only the Department of Defense, but other mission-oriented agencies, to cut back their support for university research more heavily than they might otherwise under the same circumstances. As a result: improvements in the quality of our college and university science departments and curricula must be terminated or delayed indefinitely; scientifically excellent projects are continued at the expense of new and innovative projects; and our most promising and talented young students are discouraged from entering the scientific profession. These are things the Nation can ill afford to let happen.

Second, there is the dangerous effect of creating an even more intense polarization between the Defense Department and the university community. The Senate majority leader has pointed out that the intention of section 203 is not to "ban the Defense Department from sponsoring research in universities." Nonetheless, the seed has been sown. And such a polarization would work to the detriment of both the Defense Department and the universities.

We must recognize that much current criticism is against military participation in research. At the same time, many of these programs are necessary to the country, and our research effort should not suffer simply because a military label has been attached. There must be a gradual adjustment here in the best interests of the country—as we on the Science Committee have stressed time and time again.

The interaction between the Department of Defense and the university-based research community is of profound significance and importance to the Nation and its future defense position. The unique resources of scientific excellence in the university community are of critical importance if we are to meet effectively the increasing complexity of our national security problems.

It is obvious that if this relationship is not continued the Department of Defense will necessarily move elsewhere to fill the need. In turn, this will have the effect of removing the academic community from its critical role of informally monitoring such activities and through which it has provided balance and judgment in the past.

Similarly, the universities themselves have a unique opportunity through interaction with the Defense Department to make important inputs into the shaping of our future national security policies.

The level and degree of this interaction is a most delicate problem. Having had the opportunity of testifying before the Pounds Panel in its deliberations on the future of MIT's two off-campus research laboratories, I am keenly aware of the great sensitivities of this issue. There is no question in my mind about the pressing needs to begin to apply our great scientific and technological expertise to the many civilian problems that confront this Nation. However, we must be ever mindful of the need to balance these efforts with those necessary to maintain the national security.

TRANSITION MECHANISMS

Mr. Speaker, there may be some areas of work which have been or are being supported by the Department of Defense that could be more properly supported by the National Science Foundation. Scientific research is a dynamic process subject to continual change. Similarly, agency mission requirements are also subject to change. Our guidelines and criteria for support of research in the mission agencies should, therefore, re-

flect the dynamic nature of these changing requirements.

Nonetheless, given the present fiscal stringency and the reductions in agency budgets, it is clear that some of the highest quality research will have to be either terminated or transferred. Of course, it is one thing to talk generally about arrangements to effect a smooth and orderly transfer, and another to see that such arrangements actually materialize. One thing required, beyond coordination between the agencies involved, is close collaboration between them and the committees of Congress. We all have an obligation to see that programs worthy of support are transferred and that such transfers are, indeed, planned and not just accidental. Such arrangements should also provide for transfer of projects as on-going entities, complete with funds, equipment and facilities.

For the Defense research affected by section 203 which should be continued in the national interest, and for which the National Science Foundation or other agencies do not have funds in their fiscal year 1970 budgets to take over, it becomes important that the Defense appropriations provide some funds for transfer. Then, adjustments can be made in the various fiscal year 1971 budgets which will be presented to the Congress next month in the President's budget message.

Such arrangements should be possible. Consider, for example, the National Science Foundation. The present statutory authority of the National Science Foundation provides for exactly this eventuality. Section 3(b) of this statutory authority states:

> The Foundation is authorized to initiate and support specific scientific activities in connection with matters relating to international cooperation or national security by making contracts or other arrangements (including grants, loans, and other forms of assistance) for the conduct of scientific activities. Such activities when initiated or supported pursuant to requests made by the Secretary of State or the Secretary of Defense shall be financed solely from funds transferred to the Foundation by the requesting Secretary as provided in section 15(g), and any such activities shall be unclassified and shall be identified by the Foundation as being undertaken at the request of the appropriate Secretary.

Should such a funding procedure be followed on a large scale by the mission-oriented agencies, new statutory authority would probably be desirable. But this does illustrate that there is a feasible procedure for funding mission-oriented research through the National Science Foundation, and that the Congress has favorably considered the issue in the past.

Nonetheless, we should not focus solely upon the question of transferring projects from the Department of Defense to the National Science Foundation. Other agencies, such as the Departments of Housing and Urban Development, Transportation, and Commerce need to expand their own research and development efforts.

SUMMARY

No matter how much we may be concerned about the effects of section 203, it is now a matter of law. How it is administered by the Defense Department and how the Congress and the General Accounting Office will oversee its implementation are the matters now before us.

It is critical that any transfers be effected in an orderly, time-phased manner. When necessary, these should extend over a number of years.

Fiscal year 1970 is virtually half gone and the Defense appropriations are not yet made. Even were the bill signed into law this afternoon, the Bureau of the Budget and the departments would still need time to allocate the funds to the research administrators. By the time this is done, we will be well into the third quarter of the fiscal year.

I further propose as a matter of policy that the Congress relate section 203 to the fiscal year 1971 budget, which is even now being prepared, rather than to expect it be given full effect in the remaining quarter of this fiscal year.

The problem we are faced with is far too serious and far too long range to be dealt with summarily. This is especially so since budget cuts already made have caused intensive review of science programs, and further action should be carefully accomplished with long-range objectives in mind.

BLACK PANTHERS—THE RED CANNON FODDER

(Mr. RARICK asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. RARICK. Mr. Speaker, within the past few days we have heard from all the spokesmen and bleeding hearts of the left, both new and old, in support of a sinister organized crime gang—the so-called Black Panthers.

These criminals, bent on guerrilla revolution in the cities in support of the larger scale Communist plan to take over the United States from within, have suddenly been lofted into the role of folk heroes of the revolution.

One of the national television networks chimed in this morning with the frank admission that the failure of the diversionary tactics of the so-called peace movement would lead in 1970 to a student and "intellectual" attack on the practice of apartheid in the Republic of South Africa and on civilized government in the Republic of Rhodesia.

It is plain that the Black Panthers are being used—for the benefit of the very leftists whom they should most fear—in an effort to set up a diversionary attack intended to tie down the local police and occupy the attention of the people of the Nation, while the more nefarious operations of the left resume.

Testifying before an Appropriations Committee of the House this spring, J. Edgar Hoover called the Black Panthers one of the most active of the black extremist groups. Unite this revolutionary group with such organizations as the theoretical Republic of New Africa and the Black Muslims; and then supply the internationally indoctrinated leadership, which such groups have never been able to produce internally, and there is a real and significant threat to the internal security of the Nation. I don't care what the news media may say to explain away this violent threat to our people.

It is paradoxical that some who denounce Arabs as Communists would rush to the defense of Black Panthers—an identified Communist front.

This is the reason for the sudden interest of the left in the Panthers, in open warfare against our police, and in the further destruction of the few remaining sections of the Internal Security Act.

Americans would do well to pay attention.

I include in my remarks several current and pertinent news clippings:

[From the Washington (D.C.) Post, Dec. 16, 1969]

PANTHER SLAYINGS: "CURFEW" AND PROBE—CITIZENS ACT

(By William Grieder)

An extraordinary citizens' "commission of inquiry" to investigate the violent clashes between police and Black Panthers was announced yesterday by 28 prominent civil rights leaders, legal figures and church officials, including former Attorney General Ramsey Clark and former Supreme Court Justice Arthur J. Goldberg.

The citizens' group intends to direct "a searching inquiry" into incidents in Chicago, Los Angeles, New York, Detroit and other cities where local police and the militant black organization have battled in recent months.

Goldberg and Roy Wilkins, executive director of the NAACP, told a New York press conference that the 28 "conveners" of the inquiry "are profoundly disturbed" by the events. The most recent clashes in Chicago and Los Angeles, their statement said, "have raised grave questions over the whole range of civil rights and civil liberties as applied to the Black Panthers."

The Black Panthers contend that 28 of their leaders have been slain in what they charge is a systematic series of raids on Panther headquarters in various cities staged by local police with help from federal officials.

The Justice Department has denied any role in the shootouts and has initiated a preliminary investigation under its Civil Rights Division. The local police departments involved have all contended that the Black Panthers started the shooting during legal searches of the Panther quarters.

As a citizens' group, the "commission of inquiry" will have no legal standing and no power of subpoena to gather evidence on the cases, but it will be supported by funds from civil rights organizations and the services of some prominent lawyers.

Jack Greenberg, director-counsel of the NAACP Legal Defense and Education Fund, said the group will meet Saturday to decide on its procedures.

The probe may include public hearings and field investigations. Norman Amaker, first assistant counsel of the Defense Fund, will serve as staff director. All 28 signers are available to serve on the commission, but a smaller number will probably be chosen, Greenberg said.

In addition to Goldberg, Wilkins, Clark and Greenberg, the signers include Clifford Alexander, former chairman of the U.S. Equal Employment Opportunity Commission; Richard G. Hatcher, mayor of Gary, Ind.; Louis Pollak, law dean at Yale University; Cynthia Wedel, president of the National Council of Churches; Sam Brown, coordinator of the Vietnam Moratorium Committee; Phillip Hoffman, president of the American Jewish Committee; Georgia State Rep. Julian Bond;

A. Philip Randolph, vice president of the AFL–CIO; John Pemberton, executive director of the American Civil Liberties Union, and Whitney Young, Jr., executive director of the Urban League.

Both Greenberg and Goldberg avoided any suggestion that the inquiry has been initiated out of a fear that the federal authorities or local law enforcement officials would not make a thorough investigation.

"There is room for a citizens' inquiry to satisfy everybody that there isn't any question that the rules of law are being observed," Goldberg said in a telephone interview. "This would be a reassurance to people on all sides."

Alexander, now an attorney in Washington, said the Justice Department has had the Black Panther organization under surveillance and "they're looking at it from a different viewpoint obviously than this group might."

[From the Washington (D.C.) Evening Star, Dec. 16, 1969]

UNITY IN ADVERSITY: PANTHERS WIN SYMPATHY

(By Mary McGrory)

In adversity, the Black Panthers, a sort of underworld in the civil rights movement, is accomplishing something that no other group has been able to do. They have united the black community in outrage and white liberals in concern.

A citizens' committee of inquiry announced yesterday in New York shows that the outcasts have acquired, perhaps too late, possible friends of the most impeccable respectability.

Arthur Goldberg and Roy Wilkins are co-chairmen of the committee. Neither could be accused of militancy or even previous sympathy for the least beguiling of the extreme black organizations.

REGULARLY REVILED

Others on the committee have been regularly reviled by young black militants who rather admire the ranting, gun-toting Panthers.

Sociologist Kenneth Clark is a member. So is A. Philip Randolph, who mourned before a Senate committee a summer ago that he could not go into the ghetto and talk to the young blacks.

The American Jewish Committee and the American Jewish Congress are also represented, perhaps signalizing a moratorium on black-Jewish hostility recently chronicled in New York. Former Atty Gen. Ramsey Clark; Louis Polak, dean of the Yale Law School, and George Lindsay, brother of New York's mayor, are others on the 26-man panel who could not be suspected of fostering lawlessness.

All accepted with alacrity the invitation to investigate the predawn shootouts in two American cities on the theory that the Panthers, whatever their views and habits, have constitutional rights like other citizens.

NEW RESONANCE

The "genocide" charges that figure so largely in extremist rhetoric have acquired a new resonance in the ghetto. The fear is that the black community, which has been quiescent and divided since the riots following the death of the Rev. Martin Luther King Jr., can be radicalized by incidents in two cities with enthusiastic advocates of law and order, Mayors Sam Yorty of Los Angeles and Richard J. Daley of Chicago.

The Nixon administration, which has announced a breakthrough welfare program, has not addressed itself otherwise to the black citizenry. Its recent moves to delay school integration and dilute voting rights have not been particularly reassuring.

Julian Bond, the young member of the Georgia State Legislature, who is a member of the inquiry committee, put the worst black suspicions about the Black Panther raids to a group of students at George Washington University yesterday:

"The Black Panthers are being decimated by political assassination arranged by the federal police apparatus." He said later that the police, who are known as "pigs" to the Panthers, were carrying FBI warrants to search for guns.

A Washington lawyer active in civil rights said, "when the police move against a group, injustices to individuals almost always result."

ONE OF FIRST TASKS

One of the first things the committee will have to do is to find out the size of the Panther organization. Accounts vary from a maximum of 5,000 with 35 chapters to 1,500 with probably 10 chapters. The leader, Bobby Seale, is in jail.

The top spokesman, Eldridge Cleaver, is in exile in Algiers.

FBI Director J. Edgar Hoover once described the group as "the greatest threat to the internal security of the country" among civil rights groups.

There are facts available, some of them in a staff report issued by the National Commission on the Causes and Prevention of Violence, headed by Milton Eisenhower. That report stated:

"The Panthers were founded in Oakland, Calif., in 1966 as the 'Black Panther party for Self-Defense.' They advocate armed patrols. They despise authority, especially the police, and one of their demands is for U.N. observers in the ghetto to observe the actions of police. They have a history of violent confrontation with the police, having been attacked by off-duty officers in Oakland and Brooklyn last year."

The report quoted Oakland Panther leader Huey P. Newton, who was convicted of shooting a white policeman, as saying, "The Panther never attacks first, but when he is backed into a corner, he will fight back viciously."

ROMANTIC APPEAL

Newton also told staff interviewers that the Panthers had their gentler side.

They have been serving ghetto breakfasts, and they have a romantic appeal to angry young blacks.

Newton described a street school for the Panther Youth Corps, for boys from 10 to 13. They were not taken into the headquarters because of the prevalence of guns and other weapons, but were instructed outside in black history or mathematics, and to maintain membership had to show good report cards.

The report credits the Panthers with helping keep Oakland cool after the King assassination "not from any desire to suppress black protest—rather it stemmed from a sense that the police are waiting for a chance to shoot down the blacks."

Now with fears mounting that the Panthers seem about to be exterminated, they have aroused a rather wide range of black and white citizens to demands that they be allowed to exist.

"When," asked a successful, moderate black, "did the government ever move this way against the Mafia?"

[From the Washington (D.C.) Evening Star, Dec. 16, 1969]

CHICAGO BLACKS SET "CURFEW" BARRING WHITES

CHICAGO.—Spokesmen for a coalition of black groups in Chicago have proclaimed an unofficial curfew barring whites from Negro areas of the city from 6 p.m. to 6 a.m., but several black leaders have denounced the move.

The curfew announced yesterday, is part of the reaction to the deaths Dec. 4 of two Illinois Black Panther party leaders, Fred Hampton, 21, and Mark Clark, 22, who were shot during a raid by police searching for illegal weapons.

And in New York yesterday, an unofficial commission to investigate allegations of a national extermination plot against the Black Panthers was announced by former Supreme Court Justice Arthur J. Goldberg and Roy Wilkins.

RECENT CLASHES CITED

Citing recent clashes between Black Panther militants and police in Chicago and Los Angeles, Wilkins, executive director of the National Association for the Advancement of Colored People, said:

"If the Panthers are at fault, our investigation will bring it out. If the police are at fault, the investigation will bring it out."

Goldberg, former ambassador to the United Nations and onetime U.S. Supreme Court Justice, said he hoped for cooperation from Panthers and law enforcement agencies, although the commission would have no official government sanction. He promised an "orderly, dispassionate inquiry."

JUSTICE ORDERS PROBE

The Justice Department has ordered an investigation into the Chicago shootings.

Both the Justice Department and the FBI have denied a Panther charge that there is a national conspiracy of law enforcement against the party.

The Rev. C. T. Vivian and Earl Doty declared the Chicago curfew in the name of the newly created United Front of Black Community Organizations, which claims 100 member groups.

Vivian said, "No whites will be permitted to enter the black community during these hours and those who are in the black community will be expected to leave by the 6 p.m. deadline."

He said the new front includes the group he leads, the Coalition for United Community Action, composed of some 60 organizations which last fall shut down construction sites to press demands for more black jobs in the building trades unions.

Police said no incidents connected with the curfew were reported last night.

[From the Washington (D.C.) Sunday Star, Dec. 14, 1969]

CLEAVER SEEKS ENTRY TO UNITED STATES TO ASSUME PANTHERS ROLE

Self-exiled Black Panther Eldridge Cleaver is trying to arrange his return to the United States where his armed revolutionary party—reeling under police pressure—is hurting for leadership.

Twenty-four hours after two Panthers were slain in a shoot-out with Chicago police, sources said Cleaver contacted U.S. diplomatic officials in Algiers and asked for a passport to return to the United States where he is wanted on a fugitive warrant.

Cleaver didn't get the passport, the sources added, but in later discussions was told he could get a certificate of identity that would allow him to travel to the United States.

As Cleaver was making the inquiries in Algiers, there were signs that the Panthers are revolutionaries on the ropes.

LEADERS JAILED

A police raid on Panther headquarters in Los Angeles Monday resulted in a four-hour gun battle that left three policemen and three Panthers wounded. A score of Panthers were arrested.

Two Panther leaders—Huey P. Newton and Bobby Seale—already were in jail. Stokeley Carmichael quit the party last summer and Dave Hilliard, Panther chief of staff, faces trial on a charge of threatening the life of President Nixon.

If Cleaver returns to California, he faces imprisonment as a parole violator and for

jumping bail on charges of assault with intent to kill and assault with a deadly weapon. But the deepening Panther-police crisis presumably has increased pressure on him to give up his self-proclaimed exile.

NEED FOR LEADER CITED

Black leaders say the police raids have brought an upsurge in sympathy for the group, yet the Panthers are without the widely known leaders needed to take full advantage of it.

"No matter what kind of following you've got, if you can't keep a leadership, you can't keep an organization together," said radical lawyer Terence "Kayo" Hallinan of San Francisco. "It just keeps flying apart."

[From testimony of John Edgar Hoover, Director, Federal Bureau of Investigation, before the House Subcommittee on Appropriations, on April 17, 1969]

BLACK PANTHER PARTY

Mr. HOOVER. One of the most active black extremist groups is the Black Panther Party. It originated in Oakland, Calif., in 1966 and now has extended its activities to numerous cities throughout the United States.

Its members gained notoriety initially because of their practice of carrying rifles and pistols in plain view on the streets of Oakland while on "defense patrols" to prevent alleged police brutality.

On May 2, 1967, a group of Black Panther Party members armed with rifles, shotguns, and handguns invaded the chamber of the California State Assembly, while that body was in session, to protest pending gun legislation.

More recently its "minister of defense," Huey Newton, is appealing his conviction on Sept. 8, 1968, for having shot and killed an Oakland police officer who had stopped him in connection with a motor vehicle violation in October 1967.

On still another occasion, eight other members of this black extremist organization were arrested for complicity in a gun battle with Oakland police on April 6, 1968, during which one Black Panther Party member was killed. Thirteen rifles, four handguns, and four shotguns were confiscated from the participants.

Leroy Eldridge Cleaver, minister of information of the Black Panther Party, achieved notoriety rivaling that of Stokely Carmichael during 1968. A parolee who was freed in December 1966 after serving 9 years in California prisons, Cleaver was returned to prison in April 1968 due to his involvement in a gun battle with Oakland, Calif., police. He was again released after 2 months following a court ruling that his parole had been improperly revoked for political activity. This decision was overruled by higher California courts and Cleaver was scheduled to return to prison on November 27, 1968. He failed to appear and on December 10, 1968, a Federal fugitive warrant was issued charging him with unlawful flight to avoid confinement.

Cleaver ran as presidential candidate of the Peace and Freedom Party and in this capacity made a series of speeches on college campuses. These received widespread publicity because of their extreme obscenity and calls for revolutionary action by black people.

Another active Black Panther Party leader is George Mason Murray, minister of education. He is also a member of the Central Committee of the San Francisco State College Black Student Union. The latter organization has been deeply involved in the campus agitation which has plagued that college during the current school year.

The political philosophy of the Black Panther Party is based in part on the writings of Mao Tse-tung of Communist China. It advocates that its members study the teachings of Mao Tse-tung. Instructions have been given to members on the making and the use of Molotov cocktails. Members have also been instructed in guerrilla warfare tactics in preparation for a showdown with established authority. It is reported that in the near future scheduled training sessions in California will teach guerrilla warfare tactics to selected members from all parts of the United States.

PRESIDENT TO BE LET DOWN BY AIDES

(Mr. BROYHILL of Virginia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BROYHILL of Virginia. Mr. Speaker, the President of the United States is about to be let down by some of the people he employs to advise him. So are the American people. A group of his aides plan to meet this weekend on our national goals—a research study he established shortly after taking his oath of office. Their houseguests will curl your hair.

Our Nation's future depends, Mr. Speaker, on the vision of those who peer into it and who, in turn, give the President the benefit of their 20–20 foresight. I cannot believe he will get a true picture of this Nation's needs, Mr. Speaker, from a group of bleary-eyed malcontents invited to the White House to represent the District of Columbia, all of whom have uttered various dissertations on public affairs which range from sabotage to revolution.

I refer, Mr. Speaker, to the likes of Julius Hobson, an avowed Marxist-Leninist; Marion Barry, a SNCC graduate now under investigation by a grand jury; and Mrs. Willie Hardy, whose latest venture in establishing our national goals was a trip to Canada to confer with our enemy from Hanoi. These three, and perhaps others of like ilk have been invited by Presidential aides to confer this weekend on White House grounds about our future well-being.

Not only is the President being sabotaged, Mr. Speaker, but the American people as well, when a group of his aides find it necessary or convenient to turn to the likes of a Hobson, a Barry, or a Hardy for advice and consent on what lies ahead for the American people. This trio of malcontents, Mr. Speaker, is disruptive, disdainful, and destructive to the common good. And I consider it a public service to inform the President of the political puerility of his staff aides who have invited them to the White House.

THE 1969 FEDERAL ASSISTANCE PROGRAM CATALOG

(Mr. ROTH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROTH. Mr. Speaker, as you know, I have again developed in my office up-to-date information on Federal assistance programs. This catalog, which is far more complete than the one we prepared last year, will be delivered next week to the office of each Congressman.

As I state in the foreward, I believe this 1969 listing is the most comprehensive compendium of Federal assistance programs ever compiled. I found by our definition that there are 1,315 programs, 225 more than I reported to the House last year.

All the agencies, especially the Department of Health, Education, and Welfare, were most cooperative this year in supplying the data for this catalog, as were the vast majority of them last year. The principal difference is that we were able to get full information on HEW's 392 programs.

My reason for collating this information has been threefold. First, I wanted to gather data that would be of assistance to my State and local officials. In fact, as an illustration of the critical need for better information on Federal programs, I understand there has been a great demand for these catalogs in the executive branch itself: HEW has ordered 1,800 copies of the listing, and the Department of Housing and Urban Development has ordered 2,000 copies; the Department of the Interior has ordered 100 copies, and the Department of Transportation has ordered 250 copies. If the principal agencies have placed such substantial orders, it seems clear to me that there is not even an adequate flow of information within the Federal Government itself.

The second reason I have assembled this information is to prove that such data could be prepared rather easily. I have, of course, introduced the Program Information Act, H.R. 338 and S. 60 in the other body, which would require the executive branch to publish this catalog yearly with periodic updating. If one congressional office can complete the task, it seems to me such an undertaking should not prove too burdensome to the Federal Government.

I hope that next year we can succeed in getting action in committee on the Program Information Act so that it can be brought to a House vote. More than 180 Congressmen and 14 Senators have already cosponsored this legislation.

Finally, and most important, I think anyone who will take the time to examine the 1,315 programs in the catalog will see there is a serious need for consolidation and restructuring of much of our Federal aid. The taxpayer's dollar is not being used effectively, and it is up to us in the Congress to correct this situation.

I would like to thank my distinguished colleagues for unanimously authorizing the printing of House Document 91–177, the "1969 Listing of Operating Federal Assistance Programs." I am particularly grateful to the Honorable JOHN H. DENT, who introduced legislation to order the printing of this information; to the Honorable JERRY L. PETTIS, who worked actively for its passage; to the House Administration Committee, chaired by the Honorable SAMUEL N. FRIEDEL, and the Senate Committee on Rules and Administration, chaired by Senator B. EVERETT JORDAN.

CONGRESSIONAL STAFF REPORTS SAVE MONEY

(Mrs. GREEN of Oregon asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. GREEN of Oregon. Mr. Speaker, I will take only half a minute. I want to pay my respects to the gentleman from Delaware (Mr. ROTH) for the report that he has made on all of the Federal programs—the great proliferation of programs. I do this because there was a similar report that was paid for by the Office of Economic Opportunity that cost the American taxpayers over $1 million. I honestly believe that if we compare the report assembled by the congressional staff of Mr. ROTH, it will compare very, very favorably to the report that has cost over $1 million when the contract was leased out to some outside firm. I just suggest that the Members of Congress might look at all of the contracts that are given and realize that within our own offices we have the capability, we have the dedication and the integrity and the honesty to do reports that would be valuable to this House as we make decisions. It might also allow us to keep track of the proliferation and keep it in some kind of check.

THE PERIL TO THE SHORELINE OF THE GREAT LAKES

(Mr. SCHADEBERG asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SCHADEBERG. Mr. Speaker, many of us in Congress have expressed concern for the rapidly eroding shorelines of this Nation. As sponsors of H.R. 12712 and other similar bills, we recognize that the conditions caused by this erosion is injurious to the purity of the water, to the health of the people, to the recreational benefits of the communities. And to the tax basis of the local government.

The Wall Street Journal of yesterday, in a lead article, brought attention to the particular problems we are facing in the Great Lakes. It is a very comprehensive article and one that fully explains the need for consideration of the bill designed for the protection of the shoreline.

RISING WATERS: LEVEL OF GREAT LAKES MOVES SHARPLY HIGHER, PERILING THE SHORELINE—EROSION RUINS SOME HOMES; BEACHES DISAPPEAR FAST; PROTECTION OFTEN COSTLY—BUT EXTRA DEPTH AIDS SHIPS

(By Lewis M. Phelps)

SOUTH HAVEN, MICH.—The view of Lake Michigan from the living room of Michael Blake's two-bedroom house on a bluff here is about the most panoramic that any homeowner along the eastern shore can boast.

Trouble is, the view is not through a window but through the wall and part of the floor. The west half of Mr. Blake's living room crumbled off the bluff into the lake this fall, and there's every likelihood that more pieces of the house will take the plunge in coming months.

Mr. Blake is just one of a growing number of losers in a battle against rising water on the Great Lakes. Homes, highways and beaches have been flooded or nibbled away, causing property damages that experts say are already much higher than the $62 million loss in 1952, the last time the lakes went on a high-water rampage.

The Great Lakes' water levels fluctuate unpredictably from year to year, depending on precipitation and evaporation rates. Surveys by the U.S. Army Corps of Engineers show variations of four to six feet in lake levels. This year rain-swollen Lake Erie rose a record 4.05 feet above the level officially regarded as "normal," and Lakes Michigan and Huron, now three feet above normal, are at near-record levels.

What's worse, Army engineers say, the water in these lakes probably will rise even higher next spring and summer. (Lakes Superior and Ontario have locks that help control the water level, so they aren't causing any problems.)

ERODING THE SHORELINE

Last spring Lake Erie flooded several hundred homes in Eastlake, Ohio, three times. In July, Lake Michigan surged up the mouth of the St. Joseph River at Benton Harbor, Mich., and destroyed a 100-ship marina; it is costing the owners $100,000 to rebuild.

But the biggest problem is erosion, since most of the shoreline around the Great Lakes consists of sandy beaches and soft clay bluffs. As lake waters rise, they cover offshore sand bars that normally impede waves and thereby offer some protection to the shore. When storms come up, as they do with particular ferocity in the fall and early winter, the highwater waves now crash directly ashore, gnawing the ground out from under whatever is built there.

That's what happened to Mr. Blake's house. He bought the place in July 1968, assured that the 90-feet-high bluff on which it stood hadn't eroded at all in the last 18 years. No sooner had he finished a $6,000 remodeling job late this summer than the 30 feet of land between his house and the edge of the bluff peeled away, along with his west wall.

Mr. Blake, a 50-year-old engineer, didn't even have a chance to move into his new home from the modest white-board cottage he owns in South Haven. "I'd like to sell that lake property," he says, "but that half a house out there is a symbol of doom."

Some beaches are disappearing with startling rapidity. Chicago beaches shrink 25 feet for every foot that Lake Michigan rises, says a park engineer. The Rev. Gordon L. Ingram, a Presbyterian minister in a Chicago suburb, wistfully recalls sunning himself just six months ago on a 150-foot beach in front of his summer home in Winthrop Harbor, Ill., near the Wisconsin border. Today the beach is gone and the lake is wirling ominously around the foundation of his A-frame cottage.

BREAKWATERS ARE COSTLY

One cure for shoreline erosion is a concrete and rock breakwater, if it's made big enough. But construction costs can be staggering. The Michigan Highway Department will soon let bids for a seawall to protect one mile of Interstate 94 near St. Joseph; the estimated cost is more than $2 million.

Homeowners are trying less expensive solutions. In the resort community of Palisades Park, Mich., Emerson Welles recently paid $8,500 for a structural steel seawall to backstop an inadequate concrete retaining wall that he built several decades ago to keep his summer cottage from falling into the lake. Solid as the steel wall may seem, storm-powered waves have ripped away its top section twice since Labor Day.

Other lakefront residents are trying different tactics. Carl Kuyat of St. Joseph, Mich., bought 600 truckloads of rubble at $10 each from an old county courthouse that was being razed and spread the stuff over the bluff in front of his home in hopes of slowing erosion. Two of his neighbors have covered their bluffs from top to bottom with junked cars and trucks, stirring complaints from more fastidious but equally vulnerable nearby residents.

Another St. Joseph resident, a music teacher named Mrs. Genevieve Rae Hahne, is spending $10,000 to move a duplex apartment building she owns away from the bluff edge. She now is worrying about losing her $50,000 combination home and music studio on an adjacent lot. She shows a visitor one corner of her home that now has just one inch between it and the drop of the bluff; a year ago there was 75 feet of ground between them.

Homeowners in Kenosha, Wis., Willowick, Ohio, and other Great Lakes communities have built jetties extending into the water to deflect the currents and allow sand beaches to build up in the still water. But the jetties collect the sand only on one side, leaving the shore on the other side more barren and susceptible to erosion than normal. Other defensive measures, such as offshore construction of elaborate louvered steel walls that are supposed to keep beach sand from washing away or the planting of deep-rooted trees by the shore, also have proven inadequate.

Homeowners are on their own in fighting high water. Insurance companies "won't touch" flooding or erosion coverage, agents say, and the Great Lakes area isn't under consideration for inclusion in the Federal flood insurance program now being developed.

The Corps of Engineers will offer only advice, unless public property is threatened by the lakes. Only Ohio among the eight Great Lakes states offers financial help—one-third of the cost of private protective projects and two-thirds the cost of public undertakings. Local governments in troubled areas plead lack of funds for assistance, though some cities occasionally lend heavy equipment to homeowners shoring up their beaches.

Nor is there much comfort for imperiled shore dwellers in a long-range proposal to control the levels of all the Great Lakes. A Federal study that originally was supposed to be finished in 1973 is a year behind because of financing problems, says Leonard J. Goodsell, executive director of the Great Lakes Commission, an eight-state organization that studies Great Lakes problems. Interim reports indicate that controlling high water on Lakes Michigan, Huron and Erie would cost $20 billion. Mr. Goodsell says he doesn't expect construction of control systems could start before 1985.

Not everyone is unhappy with the sudden rise in water levels. Steamship operators, in fact, are delighted. They can load about 125 extra tons of cargo on a typical ship for every inch the lake rises and still not run aground along the most shallow parts of their routes.

Inland Steel Co. has been loading its ore carriers to full capacity since spring, says Riley P. O'Brien, fleet manager. Five years ago, when lake levels were low, his ships were running at 20% below capacity and he had to charter extra vessels to make up the difference, he says.

THE REGIONAL DEVELOPMENT INCENTIVE ACT OF 1970

(Mr. RUPPE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. RUPPE. Mr. Speaker, today, I am introducing the Regional Development Incentive Act of 1970. The goal of this act is to take a major step forward to revitalize rural America, and at the same time, relieve the population pressures on our urban areas. This legislation provides a 20-percent tax credit on certain new investment in plant and equipment to encourage industry to expand into the depressed and lagging regions of America. The tax credits will provide plant location decisionmakers with the possibility of a direct, immediately realized

financial incentive to expand into areas that have been substantially ignored in the past. I am convinced corporate managers will take advantage of the opportunity for substantial tax savings. This, in turn, will provide a stimulus to the local economic base of the poorer regions of this Nation, and indeed could have a massive impact on the economy of rural America.

The need for a program of this nature is great. The massive migration from countryside America to urban America has created a demographic and economic imbalance. Our rural areas have been depleted of economic and human resources. Our cities, on the other hand, are jammed with people and have become increasingly unable to cope with the growing violence and social decay.

As the Congressman from a rural Michigan district, I have witnessed firsthand the plight of many countryside towns. The young and well-educated move away; and the average age of the population becomes ever older. For those who remain, job opportunities are few and often limited in potential. The skills of the work force become obsolete, and the welfare rolls grow ever larger. The tax base for these communities erodes to the point where it is difficult to provide even basic community services.

While retarding our rural economy, the population shift has congested our urban areas to the point of crisis. City air and water are becoming polluted from uncontrolled filth, crime, turmoil, and racial strife are on the upswing. Highways are jammed, inner city transportation is breaking down, land use is inefficient, and social services are inadequate.

To some extent, the U.S. Government has contributed to this country's population imbalance. U.S. fiscal policy has failed to recognize that there are substantial economic variations between the regions of this Nation. Too often many Government economists seem to view the economy as a monolith, and positive actions to stimulate the economy are applied to the whole Nation, rather than directed to lagging sectors. The 7 percent tax credit for example, was a nationwide program simply to encourage investment—it did little to aid the economically ill regions of America. In fact, it may have worked to make the strong regions even stronger with little impact on the weaker regions. Furthermore, Government activity may attract private capital to areas that have less need for artificial stimulus. One economist noted that "through a system of subsidies to mass transit, thruways, slum clearance, housing and the like, Government has actually fostered private investment where it may not have belonged."

Actions to slow the economy, such as restricting the money supply or raising the interest rates, have a severe impact on depressed regions. In this fashion, again, U.S. fiscal policy serves to widen the economic gap between rural and urban areas, and fosters increased migration to the cities.

In recent years the Government has taken some cognizance of the fact that a geographic economic imbalance does exist. The results, however, have not been impressive. The first major attempt to redress this imbalance was undoubtedly the Federal effort to maintain an agricultural economy in many of these rural areas. Crop price supports, soil bank and all manner of schemes and programs proved incapable of meeting the challenge. Under President John Kennedy the area redevelopment adminstration came into being which recognized the need to look beyond a farm economy to bolster some lagging areas of the Nation. Under President Johnson we saw the ARA change to the economic development administration. In addition, the Farmers Home Administration, the Rural Electrification Administration, and other Government agencies have attempted to prop up sagging rural economies.

Perhaps the greatest contribution of the Federal Government toward recognizing that some regions of our Nation lag behind other regions came in 1965. That was the year Congress passed both the Appalachian Regional Development Act and the Historic Public Works and Economic Development Act which established the so-called title V regional commissions. For the first time a framework was created whereby the Federal Government and State governments would work together in a joint effort to stimulate sluggish economies across multistate areas. While, inadequate financing, has limited the regional commissions, I firmly believe that these 1965 acts may yet provide a direction to revitalizing rural America.

The result of all of the Federal Government's direct spending programs has, however, been minimal. It is true that in some areas of the Nation the direct infusion of these Federal dollars has made possible in infrastructure in which industries can—and sometimes do—develop. However, there is no guarantee that such expenditures by themselves will lead to increased industrial employment. The only guarantee is that many hours will be spent in bureaucratic paper passing and general Government redtape. Add to this the hard fact that the Federal expenditure gap and monolithic fiscal policies discriminate against rural America and one comes to the realization that the net result of Federal activity is to abet the unhealthy national process of rural to urban migration.

Our Government programs to aid rural areas have not, then, been sufficient to break, or even slow, the dynamics of excessive centralization of population, social services, public and private economic activity. Yet, clearly as a matter of economy and equity, we must promote growth in our lagging rural regions to provide the opportunities that will permit these regions to share in the national prosperity and, at the same time, to make a greater contribution to overall national growth. The time has come for a new national commitment and a new program to trigger dynamic new growth in rural America. This is precisely what the Regional Development Incentive Act proposes to do.

Utilizing tax policy to assist specific regions of the Nation is a revolutionary concept which runs counter to the direct Federal expenditures philosophy of the past several decades. It was thus greatly satisfying to note that earlier this month the U.S. Senate voted favorably on an amendment offered by Senator STEVENS to keep the 7-percent investment credit for poorer regions of the Nation. While I felt the language of the Stevens amendment to be somewhat imprecise and the amount insufficient to do the job required, the principle is precisely that of the Regional Development Incentives Act. I want to make it clear that I am not being critical of Senator STEVENS, but congratulate him for his important contribution. Indeed, his amendment which has been incorporated in the Senate Tax Reform Act is similar to legislation I introduced earlier this year to exempt depressed areas from repeal of the 7-percent investment tax credit. That earlier legislation is the forerunner of the Regional Development Incentives Act which I am introducing today.

The underdeveloped areas covered by my bill include the Appalachia region, the Four Corners region, the Coastal Plains region, the New England region, the Ozarks region, and the Upper Great Lakes region. Other economically depressed counties are also included.

Summarizing, the bill provides a 20-percent tax credit incentive for business and industry which chooses to make future expansions in the designated regions. The credit will apply both to new industries and to industrial expansions, the bill incorporates proper restrictions to prevent a raid on the Treasury. For example, metropolitan areas in excess of 300,000 are excluded since their problems require a different approach. The investment credits are limited to growth-generating industries. Credit will not be extended to industries which simply relocate their facilities from one region to another.

All of us have learned this session just how complicated and troublesome tax legislation can be. By contrast, this act is purposely designed to be short and readily understood. In combination with existing Federal programs it will have a significant impact on rural America, making it possible for these vast and vital regions to share more fully in future national growth. Previous efforts using direct Federal funds have been helpful in building infrastructure in which industry can develop, but it has not always led to significant industrial growth. Using the industrial expansion tax credit, the Government can, for the first time, guarantee that implementation of this act, while temporarily reducing tax revenues, will lead directly to more industry and more jobs. This is a guaranteed no-waste Federal program.

There is ample evidence that such a tax incentive can pay for itself in a very few years. The increased economic activity generated by the tax incentives will, in time, more than cover the loss in tax revenues.

Above all, the act will enlist the ingenuity, technology and resources of private enterprise in the mission to restore a better distribution of economic opportunity for the American people and a better balance to the American economy.

I include the text of my bill in the RECORD at this point:

H.R. 15327

A bill to amend the Internal Revenue Code of 1954 to provide a tax credit for investments in certain economically depressed regions

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a)(1) Subpart I of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits against tax) is amended by redesignating section 40 as 41 and by inserting after section 39 the following new section:

"SEC. 40. CREDITS FOR INVESTMENT IN CERTAIN ECONOMICALLY DEPRESSED REGIONS.

"(a) ALLOWANCE OF CREDIT.—There shall be allowed as a credit against the tax imposed by this chapter, the amount determined under the succeeding subsections of this section.

"(b) DETERMINATION OF AMOUNT.—

"(1) GENERAL RULE.—The amount of the credit allowed by subsection (a) for the taxable year shall be equal to the lesser of—

"(A) 20 percent of the qualified investment (as defined in subsection (c)), or

"(B) $5,000,000.

"(2) LIMITATION BASED ON AMOUNT OF TAX.—Notwithstanding paragraph (1), the credit allowed by section 38 for the taxable year shall not exceed 50 percent of the liability for tax for the taxable year.

"(3) LIABILITY FOR TAX.—For purposes of paragraph (2), the liability for tax for the taxable year shall be the tax imposed by this chapter for such year, reduced by the sum of the credits allowable under—

"(A) section 33 (relating to foreign tax credit),

"(B) section 35 (relating to partially tax-exempt interest),

"(C) section 37 (relating to retirement income), and

"(D) section 38 (relating to investment in certain depreciable property).

"(4) CARRYBACK AND CARRYOVER OF UNUSED CREDITS.—

"(A) ALLOWANCE OF CREDIT.—If the amount of the credit determined under subsection (b)(1) for any taxable year exceeds the limitation provided by subsection (b)(2) for such taxable year (hereinafter in this subsection referred to as 'unused credit year'), such excess shall be—

"(i) a section 40 credit carryback to each of the 3 taxable years preceding the unused credit year, and

"(ii) a section 40 credit carryover to each of the 7 taxable years following the unused credit year,

and shall be added to the amount allowable as a credit by subsection (a) for such years, except that such excess may be a carryback only to a taxable year beginning after December 31, 1969. The entire amount of the unused credit for an unused credit year shall be carried to the earliest of the 10 taxable years to which (by reason of clauses (i) and (ii) such credit may be carried, and then to each of the other 9 taxable years to the extent that, because of the limitation contained in subparagraph (B), such unused credit may not be added for a prior taxable year to which such unused credit may be carried.

"(B) LIMITATION.—The amount of the unused credit which may be added under subparagraph (A) for any preceding or succeeding taxable year shall not exceed the amount by which the smaller of the limitations provided by subsections (b)(1)(B) or (b)(2) for such taxable year exceeds the sum of—

"(i) the credit allowable under subsection (b) for such taxable year, and

"(ii) the amounts which, by reason of this paragraph, are added to the amount allowable for such taxable year and attributable to taxable years preceding the unused credit year.

"(c) QUALIFIED INVESTMENT.—For purposes of this section, the term 'qualified investment' means, with respect to any taxable year, the aggregate amount of the basis (as certified under subsection (f)(2)) of each certified development property (as defined in subsection (e)(1)) placed in service by the taxpayer during such taxable year.

"(d) EARLY DISPOSITION, ETC., OF CERTIFIED DEVELOPMENT PROPERTY.—If during the taxable year any property which was certified development property placed in service during the preceding taxable year or the second preceding taxable year is disposed of (or otherwise ceases to be development property with respect to the taxpayer), then the tax under this chapter for the taxable year shall be increased by an amount equal to the aggregate decrease in the credits allowed under subsection (a) for such preceding taxable year which would have resulted solely from treating such property as property which is not certified development property. For purposes of carrying out this subsection, the Secretary or his delegate shall prescribe regulations which shall include rules similar to the rules contained in sections 46(c)(4) and 47(a)(3) and (4), 47(b), and 47(c).

"(e) DEFINITIONS.—For purposes of this section.—

"(1) CERTIFIED DEVELOPMENT PROPERTY.—The term 'certified development property' means development property (as defined in paragraph (2)) which is certified for purposes of this section by the Secretary of Commerce under subsection (f).

"(2) DEVELOPMENT PROPERTY.—The term 'development property' means tangible property—

"(A) which is located in a development area (as defined in paragraph (3)),

"(B) which consists of (i) a plant or structure, or (ii) machinery or equipment relating to and located at a plant or structure,

"(C) the original use of which began with the taxpayer and which was placed in service in a taxable year beginning after December 31, 1969 and before January 1, 1975,

"(D) with respect to which depreciation is allowable under section 167,

"(E) which has a useful life (determined at the time such property is certified under subsection (f)) of three years or more; and

"(F) which is used predominately in a development business (as defined in paragraph (4)).

"(3) DEVELOPMENT AREA.—The term 'development area' means an area (A) outside any standard metropolitan statistical area the population of which exceeds 300,000 but (B) within—

"(i) the Appalachian region (as defined by section 403 of the Appalachian Regional Development Act of 1965),

"(ii) an economic development region designated under section 501(a) of the Public Works and Economic Development Act of 1965,

"(iii) a redevelopment area designated under section 401 of such Act, or

"(iv) an area designated under the authority of section 102 of such Act.

Any determination for purposes of this paragraph shall be made as of the time of certification under subsection (f) on the basis of the most recent data available at such time.

"(4) DEVELOPMENT BUSINESS.—The term 'development business' means a trade or business consisting of—

"(A) manufacturing,

"(B) providing goods and services for recreational purposes or to tourists or vacationers,

"(C) mineral processing (including oil refining but excluding extraction of minerals, oil, or gas), or

"(D) pulp and paper processing (excluding wood harvest operations),

except that such term does not include any trade or business described in section 7701(a)(33) (defining regulated public utility).

"(f) CERTIFICATION.—

"(1) GENERAL RULE.—Upon application made by a taxpayer, the Secretary of Commerce may certify property for purposes of this section in such manner, at such time, and subject to such conditions as the Secretary of Commerce and the Secretary of the Treasury (or his delegate) may jointly prescribe by regulations. The Secretary of Commerce may not certify any property under this subsection unless he determines—

"(A) that such property is development property,

"(B) that there is a market condition with sufficient national or regional demand to meet additional expansion,

"(C) that the property to be certified will not be placed in service in connection with the relocation of an existing plant or facility, and

"(D) that such property when placed in service, and any industrial process to be conducted at such property will be in compliance with Federal, State and local laws respecting air, water, and noise pollution.

Such certification shall state the amount of the basis of the property which may be taken into account for purposes of subsection (c).

"(2) BASIS LIMITATIONS.—In the case of any property, only that portion of the basis attributable to construction, reconstruction, erection, or acquisition by the taxpayer after December 31, 1969 may be certified under paragraph (1). In the case of property which consists of an addition, expansion, or reconstruction of property which had been placed in service prior to the certification (referred to in this sentence as 'existing property'), the amount of basis certified under the preceding sentence shall be reduced by the amount of depreciation allowed under section 167 (for the latest taxable year ending before certification) with respect to such existing property.

"(g) REGULATION.—The Secretary shall prescribe such regulations as may be necessary to carry out this section. Such regulations shall provide for rules similar to the rules contained in the last sentence of section 46(a)(3), and in sections 46(a)(4) and (5), 46(d), and 48(e) and (f)."

(2) The table of sections for such subpart A is amended by striking out the last item and inserting in lieu thereof the following:

"SEC. 40. Credit for investment in certain economically depressed regions

"SEC. 41. Overpayments of tax."

(b) The amendments made by subsection (a) of this section shall apply with respect to taxable years beginning after December 31, 1969.

SEC. 2. The Secretary of Commerce shall submit 2 years after the date of the Act and thereafter a report annually to the Senate and House of Representatives with respect to the carrying out of this Act, including the amount of credits against income tax allowed by reason of the amendments made by the first section of this Act, the economic effects of such credits, and the cost to the Federal Government by reason of such credits.

ARTHUR BURNS STATEMENT URGENTLY NEEDED TO SLOW DOWN TAX SELLING

(Mr. PUCINSKI asked and was given permission to address the House for 1 minute.)

Mr. PUCINSKI. Mr. Speaker, I was very pleased to see Dr. Arthur Burns, the soon-to-be new Chairman of the Federal Reserve Board, today announce that when he formally takes over after the first of the year he is going to move toward trying to ease credit to reduce skyrocketing interest rates. His statement earlier today had an electrifying effect. The stock market went up 13 points.

I am very pleased to see the administration is trying to do something to stem the tide of "tax selling" that has been anticipated in the last 3 weeks of December.

I made a statement on the floor the other day that if the high rate of "tax selling" continues the administration could conceivably lose as much as $20 billion in anticipated revenues in 1969, thus creating a substantial deficit and creating new inflationary pressures next year.

I am pleased to see that apparently somebody reads the CONGRESSIONAL RECORD in the White House.

The administration could not have moved any sooner to slow down tax selling.

It is most interesting to see that a statement about interest rates would have his kind of effect and impact on the stock market.

Those who continue to argue that there is no correlation, no relationship between skyrocketing interest rates and inflation ought to look at the demonstration in the stock market today. The minute an official statement was made that an effort will be made to reduce interest rates the entire economy rebounded.

I congratulate Dr. Burns for initiating this action. I hope the stock market will continue to rise in the next 3 weeks so that we can see a substantial discouragement of tax selling. Tax selling is, of course, at this point the most critical threat to the Nation's economy. I would be most pleased to have been wrong in my prediction that tax selling can deny the Government of revenue it expected from taxes. Nothing would please me more to see us wind up 1969 with a surplus instead of a deficit.

TRIBUTE TO DR. ANDREW STEVENSON

The SPEAKER pro tempore. Under previous order of the House, the gentleman from West Virginia (Mr. STAGGERS), is recognized for 60 minutes.

Mr. STAGGERS. Mr. Speaker and Members of the House, today we would like to take a few minutes to pay respectful tribute to a man who has served this Nation and its elected representatives with honor and with distinction and with unfailing devotion. That man is Dr. Andrew Stevenson, recently retired from the professional staff of the Committee on Interstate and Foreign Commerce of the House of Representatives.

Mr. ADAMS. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I am happy to yield to the gentleman.

Mr. ADAMS. I thank the chairman for yielding to me.

I want to join in the chairman's remarks in paying tribute to Andy Stevenson who served on this committee so well. I want to give my personal best wishes to him for his future activities and my gratitude to him for the help he has given to me personally on this committee, and what I have seen him do for other members of the committee during his tenure while I have been there. I know we are going to miss him, and I want to wish him and his family well.

I thank the chairman for yielding to me.

Mr. NELSEN. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I am glad to yield to the gentleman from Minnesota.

Mr. NELSEN. I thank the gentleman for yielding.

I think all of us realize that part of our success as Congressmen is certainly due to the competent staff that we may have. And, likewise, any one of our committees is effective only if effective and able staff persons work with us on committee business.

Dr. Stevenson has conducted himself with dignity and competence over a period of many years and has been a most valuable supportive member of our committee. He has given complete bipartisan help in every instance that I can recall.

Mr. Speaker, I certainly want to join with our chairman in wishing him well in his retirement. Further, I thank the chairman for his thoughtfulness in bringing this matter to the attention of the Members of the House so that we might pay tribute to a servant that deserves our most sincere thanks.

Mr. STAGGERS. I thank the gentleman from Minnesota for his remarks.

Mr. KEITH. Mr. Chairman, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from Massachusetts, a member of the committee.

Mr. KEITH. Mr. Speaker, I appreciate the chairman of the Committee on Interstate and Foreign Commerce yielding to me at this time.

Mr. Speaker, in my 11 years as a member of the Committee on Interstate and Foreign Commerce I have learned, together with other members of the committee, to like, respect, and, in fact, love Andy Stevenson.

Most of us in the Congress rely on the expertise of such professional staffers as we deal with the most difficult problems of conducting our Nation's business. Andy Stevenson has served us—and the country—extraordinarily well in this capacity.

His knowledge and willingness to help has been invaluable to the committee as it discharges its responsibility of overseeing the regulatory agencies. More than any other man whom I have met in my 11 years in Washington, Andy Stevenson has been able to comprehend the intricate nature of the relationships between government and the private sector. He has worked diligently to preserve the balance which is necessary if our free enterprise system is to function effectively. I have been privileged to have had the benefit of his counsel and advice all of these years. It has been one of the real joys of my experience here as a Member of Congress.

So, it is with a great deal of pleasure and satisfaction that I join with the chairman of the committee and other members of the committee in paying tribute to Andy Stevenson. It is my hope that he has in his retirement years, further time and good health to enable him to continue his study of public policy issues and to enjoy the rest he has earned. It is also my earnest hope that from time to time he will keep in touch with those of us who are still in the harness so that we might have the benefit of his views and counsel.

Mr. STAGGERS. I thank the gentleman from Massachusetts for his kind remarks.

Mr. MACDONALD of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from Massachusetts a member of the committee.

Mr. MACDONALD of Massachusetts. Mr. Speaker, I thank the chairman for yielding to me at this time.

Mr. Speaker, I rise to join the chairman of our committee and all the other Members who are here this evening to pay tribute to a man whom I think stands as an example to all those people who like to serve the public interest of the United States and who do not want to go the route of running for and holding an elective office. I can think of no man who exemplifies in a better way, self-sacrifice and the ability to help those of us who have to deal not just in the legislative field, but in other fields, as well. A person who has given all of his time to help the committee that he chose to serve on to become what it is, the most outstanding committee in this Congress, than Dr. Stevenson.

My experience with Dr. Stevenson—or Andy Stevenson as he is better known—goes back some 15 years. I must confess that when I first came to Congress I had held no prior elective office, and I was certainly not very wise in the ways of legislation, and the legislative process. There was no one man whom I leaned on more and who helped me more than any other individual, that individual was Dr. Stevenson.

Mr. Speaker, I think that I have a unique relationship with Dr. Stevenson, as we are among those of the very few remaining veterans of the people who served on the Committee on Interstate and Foreign Commerce, who took a very adventurous and inspiring trip during which we crossed both Poles—the North Pole, and then landed down at the South Pole. And even in those extremities of our world Andy's always wise guidance and counsel was invaluable.

To Andy Stevenson and his beloved wife, Betty, I can only wish the best in the years to come. I will not echo what has been said, that Andy Stevenson is going into retirement, because I certainly hope that the wisdom and the knowledge and the desire to serve that Dr. Stevenson has shown throughout his entire career will not be lost to the public interest—certainly not to the members of the Committee on Interstate and Foreign Commerce who have leaned on his knowledge and ability for so long.

I certainly hope that his great fount of knowledge will not be lost to us, and that from time to time, when the occasion arises, we can call on his great fund of knowledge and experience, and that he will be available to us. I certainly feel sure that because of his devotion, both to the Congress and, more especially, perhaps, to our committee and to the Members on both sides of the aisle, that he will respond to our call for assistance.

So, Mr. Speaker, to Dr. Stevenson I do not say "hail and farewell," I merely say "hail."

Again, I thank the gentleman for yielding.

Mr. STAGGERS. I thank the gentleman from Massachusetts for his comments.

I will now yield to the gentleman from Ohio (Mr. BROWN) Mr. Speaker.

Mr. BROWN of Ohio. Mr. Speaker, the late Speaker of the House, Sam Rayburn, who served at one time on the Committee on Interstate and Foreign Commerce—and certainly he was one of the great Members to serve in this, the greatest deliberative body in the world—suggested that the Committee on Interstate and Foreign Commerce was the greatest committee of substantive legislative jurisdiction in Congress. As a member of that committee I believe those words are surely true.

Like the gentleman from Florida (Mr. ROGERS) I am proud to be a second-generation member of that great committee, because of my father, when he first came to Congress 30 years ago also served on the Committee on Interstate and Foreign Commerce. And also like the gentleman from Florida, I had heard from my predecessor of the work of Dr. Stevenson. I have since learned this firsthand, and have been impressed and awed frequently by his knowledge and his bipartisan service to that committee.

Mr. Speaker, I think perhaps the greatest compliment that could be paid to Dr. Stevenson is that in the heat of legislative battle and discussion, when the issues are joined and philosophies contend in the art of compromise between the members of the committee who feel strongly one way and the other on the decision we are in the process of making, Dr. Stevenson always stood above the storm in a nonpartisan way, because good parliamentary procedure facts and careful legislative draftsmanship know no partisanship.

It was his responsibility to give us the depth and the breadth of his experience and his limitless knowledge of the facts on which we made our judgments in the committee. He always served us well in that regard during the time I served on the committee, and I am sure in the many, many years that he served on that committee preceding my service there.

I wish that the opportunity existed for those of us who are in the Congress, and particularly for those of us who are junior Members, to be injected with the knowledge of our seniors and predecessors—both those who are Members of Congress, and those who serve as staff members of the committee. Certainly if we could be thus infused with knowledge and ability all of us would be glad to have a transfusion from Andy.

The people who serve as the staff of the legislative committees and the staffs in the offices of Members of Congress are the anonymous people, who sometimes I believe, really run this country of ours; because they are the people on whom we rely for experience and information as elections change the membership of this body. They continue on sometimes, little known to the public, and frequently even little known to an aware press.

In Dr. Stevenson, our committee is losing its most distinguished staff member of this most important committee in this most outstanding assembly. I think all of the very capable staff members on that committee would concede that point at this moment—although they may have some feelings as to who is the most distinguished staff member next week. But, in any event, we have lost the services not only to the committee but to this Congress of a very fine and a very greatly talented gentleman.

While I regret to see him go, he certainly has earned the opportunity for retirement and I know we all join in wishing him well.

Mr. STAGGERS. I thank the gentleman from Ohio.

Mr. Speaker, I yield to the gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. Mr. Speaker, I appreciate the chairman yielding and I am delighted to be able to say a few words in behalf of my good friend, Dr. Andy Stevenson.

Andy is a real pro. He is respected throughout the city of Washington by those who have had any association with him. He has great ability and he probably can recall more facts and more figures and more background information than anyone on our committee, and perhaps in the Government.

When you couple that with 20 to 30 years of experience, you have a valuable man—and that is what Andy is—he is just an extremely valuable and good public servant.

I have been thinking about some of the things that come to my mind, when you realize that he has left our committee and that this very able man is not around to call up and ask for information. What are some of the things you remember?

I believe the first thing I recall would be that he was a real gentleman. He has great poise. He simply would not get excited. He would not take sides. He would not become involved in individual controversies but he would always conduct himself as a gentleman and as a great scholar, and as an objective adviser in legal and legislative matters.

Time after time, and again and again in committee when we would become ensnarled in some kind of problem, they would turn to him invariably and say to Andy, "How say you, counselor?" The doctor would straighten us out.

The second thing I recall about him is that he was in that rather unique position that invariably regulatory agencies wanted to know on any given matter how did Andy feel about it. I have had commissioners and board members and those connected with other agencies invariably ask me when we had a problem before us, they would say, "What does Andy think; what does he feel about it?" Because he knew and they knew that we would also always go back and say, What is your judgment on that? Do we have our facts rights?

I think the fact that he has this great respect of these agencies, that is an indication in itself that he is a very accomplished gentleman.

That same capability extended to industry. Those who came to testify naturally would testify for their particular industry or business. That was to be expected. But they also knew if they got off into left field or if they were making charges that could not be substantiated, they would always know that he, Andy, knew differently and would always get somebody by calling their hand or raising a proper question.

The third factor is that Andy always encouraged new Members. I have been privileged to go with him to lunch or to have conferences in his offices, to meet him in off-hours, or talk about a particular item of legislation. Invariably he would want you, not only as a new Member, but as a regular member of the committee, to inquire why you could not make a change. He would encourage you to challenge. He would want you to raise questions, to know why you could do it, why we would have to accept these statements, either by the agencies or the industry itself. That would give a man encouragement that he ought to participate in the legislative process.

Andy would pull you out. He would not say, "You do it," but he would give you that kind of encouragement.

Lastly, I think he had the acceptance and respect of everybody—agencies, industry, and his own extremely able staff. He did operate in the public good. He just would not take sides. He would not try to become involved personally. But he always thought in terms of what is in the public interest. It is because of that basic outlook he was such an extremely valuable member.

So, we have said farewell to him in a sense. I understand the chairman today said he hopes he might be back with us on a limited or special basis. I hope he is back with us a lot because he is a great, good and valuable person. We need more men like him in government.

Mr. STAGGERS. I made the statement that I would like to have him back as a consultant to our committee. He would render invaluable service. He has told us that he will, and I am hopeful he will come back so that we may have the benefit of his great knowledge and experience.

Mr. PICKLE. I thank the chairman. And I thank Dr. Stevenson for a life of dedicated service to the public good.

Mr. VAN DEERLIN. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from California.

Mr. VAN DEERLIN. Mr. Speaker and Mr. Chairman, the recollections of the gentleman from Texas have prompted me to recall my own earliest memory of Dr. Stevenson's value to our committee. When I was fortunate enough to win a place on the Committee on Interstate and Foreign Commerce 7 years ago, I was assigned, not by choice, to the Subcommittee on Commerce and Finance. During the first few months I was on that subcommittee we were given purview over the first improvement on the reform of the stock market that had been contained in the Securities and Exchange Commission Act of 1935. Some of my fellow members of the committee may give me an argument on this, but I should imagine that on the subject of the stock market I acted from a greater wellspring of ignorance than on any other subject that comes before our committee. I am getting some assistance from my colleagues nearby, suggesting other areas that might compete, I suppose, with this claim.

I do recall that Dr. Stevenson, by his kindness and his knowledge, first of all saved me from betraying my ignorance too much. But beyond that he saved me from becoming a victim of my ignorance. The legislation that came from that committee, the subcommittee and the full committee, was, as usual, marked by the strong hand and the guidance of Andy Stevenson.

I would just like to extend a welcome to him. I know he is a longtime resident of Washington, D.C. He will find he will get no younger in retirement. He may feel younger for a few months, but if and when the rigors and discomforts of advancing years begin to overtake him, I hope that he will remember there is a happier climate out in Southern California to which he can repair, and he will find the warmest welcome possible from this old colleague of his.

Mr. STAGGERS. I thank the gentleman from California. I yield to the gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. Mr. Speaker, I wish to commend our distinguished chairman and my good friend for having taken this special order to pay tribute to a distinguished American and to a good friend of all of us who serve on the great Committee on Interstate and Foreign Commerce.

I am sure my colleagues here know this is the committee in which Sam Rayburn took vast pride. All of us who have had the privilege of serving on that committee regard it as the greatest of the many great committees that exist in this House. We recognize the enormous breadth of legislative responsibility of this committee and the great responsibilities it has under the rules and the very broad duties it carries under the rules of this body. Indeed, it is interesting to note in the history of this body the Committee on Interstate and Foreign Commerce is the oldest and first of the committees of the Congress which was established when this body was created many long years ago.

Like my friend and colleague, the gentleman from Florida, Mr. PAUL ROGERS, and the gentleman from Ohio (Mr. BROWN), the son of another Member who served in this body for many years, and like many others of my colleagues, I not only learned of this institution but learned about the people who served here, and I remember this committee has given many distinguished leaders to this body. The great Sam Rayburn was one among others. Our colleague, Mr. BROWN of Ohio and our colleague, Mr. ROGERS of Florida served on this great committee. I know they as I learned the traditions and glories of this great body and the great committee on which we served.

Mr. Speaker, one of the greatest strengths of that committee has always been the outstandingly able and dedicated staff we have had working for us in the public interest. I remember well when I came to the Congress that one of the earliest acquaintances I made was Dr. Andrew Stevenson. I have had the benefit of his counsel for many years while serving on this committee. His counsel was wise and given well. One of the greatest compliments I can give him is that he was always careful of the interest of the country.

I have enjoyed his friendship and I have enjoyed his presence, and like most of my other colleagues, I will miss him in retirement. It is my hope that Dr. Stevenson will have a happy and enjoyable retirement and a long one. It is also my hope that he will come back and visit his old friends on the Interstate and Foreign Commerce Committee from time to time. If there are difficult and hard issues with which he is so thoroughly familiar which arise from time to time, I hope he will give us his counsel from time to time on that committee.

I commend my friend, the distinguished chairman of the Committee on Interstate and Foreign Commerce for taking this time. He is standing before this body and he is truly an outstanding and worthy successor of the other great chairman. I am proud today that he does this not only for his friend, but also for my friend.

Mr. STAGGERS. Mr. Speaker, I thank the gentleman from Michigan (Mr. DINGELL).

Mr. Speaker, I yield now to the gentleman from Rhode Island (Mr. TIERNAN).

Mr. TIERNAN. Mr. Speaker, I thank the gentleman for yielding to me at this time.

I join, Mr. Speaker, as a new member of the committee in the expression of deep appreciation and affection for Dr. Stevenson. I think this demonstration of esteem by the committee members today is a fitting tribute to the man, Dr. Stevenson, who is held in great respect and admiration by the members of the committee.

I am sorry I will not have the benefit of many years of serving with him that the others have had over the years, but as the chairman has indicated today, we may be able to call on Dr. Stevenson for assistance in some matters in the years ahead.

Mr. STAGGERS. Mr. Speaker, I thank the gentleman from Rhode Island and all who took part in this hour.

Mr. Speaker, I shall summarize my remarks and insert the remainder in the RECORD. The hour is late, but I would like to continue briefly.

Mr. Speaker, I have asked for this time in order to discuss with the House the recent retirement on October 31 of Dr. Andrew Stevenson, a member of the professional staff of the Committee on Interstate and Foreign Commerce for 22 years. It seems to me that Dr. Stevenson's retirement should give occasion to the House and its Members, to consider the proper role and functions of a professional staff of a committee of the House.

In 1946, the Congress adopted the Legislative Reorganization Act, an act designed to streamline and improve procedures of the Congress. One of the reforms adopted as a result of that act was the granting of authority to each standing committee of the House and of the Senate to employ four professional staff members who would be selected without regard to partisan considerations and solely on the basis of fitness to perform their responsibilities. The law prohibited any work other than committee work being assigned to the professional staff members, and also stated that they may not engage in any other employment while so serving.

Dr. Andrew Stevenson was a true professional's professional. His knowledge and competence and experience in the fields in which he served as an adviser to the committee is outstanding. He always served with diligence, with integrity, and the only criterion by which he was guided was the public interest and carrying out the intent of the committee.

Dr. Stevenson was initially appointed to the staff of the committee on March 16, 1947. The appointment was made by the Honorable Charles Wolverton, a Republican chairman of the committee. The Congress has changed its political complexion several times since March 16, 1947, so that Dr. Stevenson served on the staff under a total of two Republicans and four Democratic chairmen. I do not know what Dr. Stevenson's politics are; I do not think any other Member of the House knows; I understand that he has never been asked in 22 years what his politics are, and I do not think that any member of the Interstate and Foreign Commerce Committee has ever cared. We have always known that Dr. Stevenson's advice to the committee was based entirely upon the criterion of the public interest, and the best manner of serving the interests of the committee.

Dr. Stevenson brought great experience to the committee. He was born in Chicago, Ill., on August 5, 1906, educated in the public schools of Lake Bluff, Ill., Skagway, Alaska, and Nichol Senn High School in Chicago from which he graduated in 1922. He was awarded a bachelor of arts degree in 1926 from the College of Wooster where he was a member of Phi Beta Kappa. He entered graduate school in Yale University in the field of transportation receiving a master's degree in 1928 and a Ph. D. in 1930.

He served as the Strathcona fellow in transportation and as an assistant in

transportation at the Yale University Graduate School from 1927 to 1929. He served as associate professor of economics and transportation in Kalamazoo College from 1929 to 1932 and thereafter served as lecturer on Government and business at Catholic University Graduate School from 1938 to 1941.

He had direct experience in the field of transportation, serving as assistant to the president of the Chicago, Springfield & St. Louis Railway, Jacksonville & Havana Railroad in 1925 and 1926. He served as a clerk in the president's office of the Atchison, Topeka & Santa Fe Railway in 1926 and 1927, and served as vice president of the Nevada-Manhattan Corp. from 1932 to 1935, working for the merger of six California and Nevada Shortline railroads into a proposed Mid-Pacific Railroad. It is of interest here that Dr. Stevenson's Ph. D. thesis dealt with the subject "The Shirtline Shippers' Interest in Railroad Consolidation" in 1930.

In March 1935, Dr. Stevenson began the first of over 34 years of service with the Federal Government as an economist on problems and statistics in the fields of transportation, utilities, and finance for the Central Statistical Board. During the summer of 1935 he was on loan to the Federal Power Commission to review and approve special electric rates and power studies.

In November 1935, he began 6 years of employment with the Securities and Exchange Commission, serving as chief securities analyst concerned with registration of new securities under the Truth-in-Securities Act of 1933. He served as a member of the joint Government-industry committee looking toward revised legislation in 1940 and 1941.

From February to July of 1941, he was on loan to the National Resources Board for a report on transportation in wartime, and served as a consultant on transportation, utilities, and finance in 1940 and 1941 to the National Defense Advisory Commission.

From September 1941, to January 1942, he served in the office of production management as the chief of the automotive, transportation and farm equipment branch in charge of programs, priorities, allocations, and controls for these industries.

From January 1942, to October 1943, he served as the director of the Transportation Equipment Division of the War Production Board in charge of production and allocation of new railroad and transit equipment and maintenance supplies for domestic carriers, and for the military services. From October 1943 to November 1945, he served as executive assistant to the operations' vice chairman and to the chief of operations of the War Production Board concerning transportation matters, studies on reconversion and the elimination of controls, and was in charge of operations controls and their elimination for all industries, including transportation. In November 1945, he was appointed as a member of the Price Adjustment Board of the Department of the Navy, and also served as a member of the War Department Price Adjustment Board, dealing with renegotiation of contracts and remained in that position until he was appointed to the staff of the Interstate and Foreign Commerce Committee.

During the period of his service on the professional staff of the committee. Dr. Stevenson served as an adviser on all matters relating to the Securities and Exchange Commission, and legislation relating thereto; on all matters relating to transportation by rail, bus, truck, barge, and pipeline; on legislation and reports dealing with newsprint and its availability; on the Weather Bureau; communications satellites; on legislation involving the Federal Power Act; on oil and gas; and on numerous other subjects. A review of the legislation on which he has worked for the committee would be such a long list as to be overwhelming. Suffice it to say that the Interstate and Foreign Commerce Committee is one of the busier committees of the House, and Dr. Stevenson has served as an adviser, as a consultant, and as a professional staff member on a substantial part of this legislation.

His work with the committee embraced many more subjects than just legislation, however. Each committee is charged with exercising legislative oversight over the agencies for which it is responsible, and Dr. Stevenson always kept abreast of all activities of the agencies having jurisdiction over the subjects he covered for the committee.

He did more than just keep abreast of the agencies, however. As I can personally attest, he kept the chairman and the committee abreast of developments. As an illustration, we all know that the United States retains a presence in Antarctica today. This fact arises from action taken by this committee at Dr. Stevenson's suggestion. During the International Geophysical Year, the United States engaged in scientific activities in Antarctica, which were planned to be dropped in 1958. Dr. Stevenson suggested that, in exercise of its responsibilities over civil aviation, communications, weather, and—at that time—scientific activities generally, a subcommittee conduct an on-the-spot study of scientific activities in the Arctic and Antarctic. After this study was completed, the subcommittee reported to the President its views concerning the scientific activities being conducted, and as a result the decision was made to continue them.

This merely serves as an illustration of the type of activities conducted by the professional staff members of our committees. In the case of Dr. Stevenson, a listing of similar accomplishments would be as overwhelming as a listing of legislation he has worked on.

On December 16, 1933, Dr. Stevenson married the former Elizabeth Otis. They have two sons, Andrew, a teacher of physics at Morgan State College in Baltimore, and James, a teacher of mathematics at Bucknell.

Dr. Stevenson resides at 9208 Jones Mill Road, Chevy Chase, Md.

Dr. Stevenson's career, as these few brief remarks have shown, has been a busy one, dedicated to the best interests of his country. He deserves a rest and relaxation, but I would be less than honest if I did not say in closing that he is one of the finest men I have ever known, and we would like to have him back with the committee in whatever capacity he is willing to serve with us.

Mr. Speaker, on December 18, 1969, the Committee on Interstate and Foreign Commerce met, and adopted a resolution of appreciation for Dr. Stevenson's dedicated public service. I will include in my remarks at this point in the RECORD the text of that resolution:

RESOLUTION OF APPRECIATION EXTENDED TO DR. ANDREW STEVENSON

Whereas Dr. Andrew Stevenson served as a member of the professional staff of the House Committee on Interstate and Foreign Commerce, from March 16, 1947, through October 31, 1969, with outstanding dedication, devotion, competence, and skill; and

Whereas, in that capacity, and as professional staff coordinator, he has rendered service to the committee and to his country with unselfish tirelessness, integrity, and ability; and

Whereas his retirement brings a sense of loss to the members of the committee and the committee staff, and a realization of the excellent quality of the service he has rendered: Now, therefore, be it

Resolved by the Committee on Interstate and Foreign Commerce, That an expression of esteem and good wishes for his future, and and an expression of deep regret at his retirement, be extended to Dr. Andrew Stevenson in the name of all the members of the Committee he has served with such unselfish devotion and integrity.

Dr. Stevenson is more than a high-class professional expert. We used to have a phrase that represented the highest tribute we would pay to a man. We used to say, of the one whom we delighted to honor, that "He is an officer and a gentleman."

As an officer of the Government Dr. Stevenson has represented the United States in innumerable complex and delicate situations. As a gentleman he has inspired all his numerous acquaintances with respect and love. That is how I feel about him myself. It has been an education in proper official conduct and in desirable human relations for those who know him.

I accept his retirement from official life with the deepest regret. Dr. Stevenson has earned retirement, however, and we do not wish for him anything less than long years of happy contemplation of the service he has rendered the Nation and the good life he has led. May all of us profit from his example. In the future may the United States enjoy the devoted services of other individuals whose lives are patterned on the model of Dr. Stevenson.

As I remarked to one of the gentleman who spoke, we have implored Dr. Stevenson to come back to our committee as a consultant. He and his gracious, charming and lovely wife have been friends of mine, as I know they have been of practically every member of this committee. For them to sever relations completely would be certainly hard for me to take, and certainly we would miss them. I am hopeful he will come back and join with us.

We have a saying back home which I believe sort of applies to Dr. Stevenson:

that he believes in gentlemanliness—honest, chivalrous, clean-minded, God-fearing manliness. He believes in man, the masterpiece of God's creation, the finest of all fine things in the world. He believes in God, the infinite architect of the universe and the compassionate ruler of destiny.

I believe he has always held before him the words of that saying in the poem in living his life. I will only give part of it:

I have to live with myself, and so
I want to be fit for myself to know.
I want to be able as the days go by
Always to look myself in the eye.
I don't want to stand with the setting sun
And hate myself for the things I have done.
I want to go out with my head erect.
I want to deserve every man's respect.

And may the Lord who is above us in the heavens watch over the goings in and goings out of Andy and Betty and his family from this day henceforth and, forevermore, protect them and be with them always.

Mr. Speaker, I would like to say at this time I have several remarks to put in the RECORD concerning Dr. Stevenson. One of them is by our beloved Speaker, Mr. MCCORMACK, which I will put in the RECORD as well as one by the minority leader on our committee, Mr. WILLIAM SPRINGER, and one by Mr. BROTZMAN, a member of the committee. I know several others have signified that they wish to put remarks in the RECORD on the subject of Dr. Andrew Stevenson.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

Mr. MCCORMACK. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I will be delighted to yield to the Speaker.

Mr. MCCORMACK. I thank the gentleman for yielding and I wish to associate myself wholeheartedly with his remarks about Dr. Stevenson. I have known him as long as he has been on the staff of the House, and Dr. Stevenson is one of the finest examples of a dedicated profesional staff member ever to serve with the House during my tenure in the House.

There have been numerous occasions when I have called on Dr. Stevenson for advice or information, and I have always found his advice and his recommendations to be fair, impartial, and objective. His background, his knowledge, and his experience are outstanding. His service to the Committee on Interstate and Foreign Commerce, to the House of Representatives, and to the American people, can best be characterized by the one word, superb.

I am pleased that the committee today adopted a resolution of appreciation for Dr. Stevenson's service, and I concur in the sentiments expressed therein.

His retirement brings to me a great sense of loss. I wish him well in his retirement, and hope he enjoys many happy and useful years with his lovely wife, Betty.

Mr. SPRINGER. Mr. Speaker, Dr. Stevenson, Andy to us, has been the backbone of this committee for more years than most of us who serve as members. He has since 1947 been completely devoted to his job and to every member of this committee, whoever they have been over the years. He has long been recognized as the most capable and dedicated staff professional on the Hill.

Committee members have always sought Andy's advice on anything touching the work of the committee. In doing so, they knew that what he would give them was the truth and the very best information available. They also knew that they could expect no pat answer, no colored information or answers designed to tell them what they might wish to hear. What we always got from Andy was the unvarnished facts whether pleasant or unpleasant, whether agreeable to our individual views or otherwise. You might say he has been the ever-present conscience of the Interstate and Foreign Commerce Committee and in large measure responsible for the continuing reputation of this committee for industry and integrity. To carry such a burden is a large order for any man. To Andy it came naturally. And like the star performer, he made it look easy. His colleagues on the staff and those of us who have been around for awhile know that the likes of him will not be easy to find. He is a one-of-a-kind man.

It is not that Andy's talents and his character were hid under a bushel. Far from it. Every lobbyist and every lawyer who represented segments of the industry affected by the actions of this committee knew Andy. He scared them stiff. They knew that he knew more about what they were supposed to know than they knew themselves. And they also knew that phony arguments and unsound positions would be burst like nickel balloons. And most of all they knew that there was no way in the world to influence Andy Stevenson.

Elsie and I have known both Andy and Betty socially for many of these years. We know them to be a devoted couple with a fine family of which they can be justly proud. We like them both and are glad to have had the chance to associate with them in other than profesional contacts.

I am sure that I speak for many of us when I say that we will sorely miss Andy. We are sorry he has retired because we will see less of him. On the other hand, it is nice to contemplate that the Stevensons can now travel at will. I know they enjoy it. And since nothing we say now can lure Andy back to the daily grind we can and do wish him every bit of luck his service to us and the country deserve. And that is a heap of luck. We also wish him pleasant skies and soft landings for many years to come.

(Mr. OTTINGER asked and was given permission to address the House for 1 minute.)

Mr. OTTINGER. Mr. Speaker, I rise to pay tribute to one of the very fine staff members on the Committee on Interstate and Foreign Commerce, Andrew Stevenson, who is retiring this year. He has always been exceedingly helpful. He is an exceedingly able man and available to every member of the committee. It will be hard to see him go. I wish him well and good luck for the future.

Mr. BROTZMAN. Mr. Speaker, one of the most rewarding aspects of being a Member of the House of Representatives is to work with and know a person of the caliber and ability of Dr. Andrew Stevenson. Dr. Stevenson has served as a member of the professional staff of the House Committee on Interstate and Foreign Commerce from March 16, 1947, through October 31, 1969. I found him to be a dedicated, skillful public servant possessed of a pleasant, winning personality. While we, in the Congress, will miss Dr. Stevenson's able assistance, I want to join his multitude of friends and admirers in wishing him and his charming wife a fruitful and well-deserved retirement.

Mr. BROYHILL of North Carolina. Mr. Speaker, I am pleased to join with Chairman STAGGERS and other members of the Interstate and Foreign Commerce Committee in paying tribute on this occasion to Dr. Andrew Stevenson. I came to know Dr. Stevenson shortly after becoming a member of the committee in 1963 and through the years have found him to be unusually capable and cooperative in handling my questions and problems concerning committee legislative matters. Dr. Stevenson has made the personal decision to retire as an active member of the professional staff of the committee and I am sorry to see him go. I know that it will be difficult to replace him. He has a brilliant mind and a tremendous store of knowledge that has been useful to us all as we have considered complicated legislation in many fields. I want to wish him well and I certainly hope that we will be seeing more of him as he visits Capitol Hill on occasion.

THE FUTURE OF MICRONESIA

The SPEAKER pro tempore. Under previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 60 minutes.

Mr. BINGHAM. Mr. Speaker, last April I discussed at some length on the floor of the House the situation in Micronesia, that huge area of the Southwest Pacific with less than 100,000 inhabitants which the United States administers as a "strategic trust territory" under the U.N. Charter. I pointed out the growing dissatisfaction with the U.S. administration on the part of many Micronesians, and I urged that the United States take steps promptly to start moving toward allowing the islanders to determine their own political future as we are obligated to do under the terms of the trusteeship agreement we entered into.

Yesterday I was privileged to host a luncheon at which these same problems were discussed. Present at the luncheon were representatives of the executive branch charged with responsibilities concerning the trust territory and our relationship with the United Nations, Members of Congress from various committees concerned with different aspects of the matter, including the Interior and Insular Affairs Committee, the Appropriations Committee, the Foreign Affairs Committee, the Armed Services Committee, and representatives of the press.

Also attending the luncheon were Prof. Thomas Franck and Dr. Edward Weisband, director and associate director, respectively, of New York University's distinguished center for international studies, and the author of a "policy paper" released yesterday by the center, Prof. Stanley A. de Smith, of the London School of Economics and Political Science. The title of Professor de Smith's paper is "Options for Micronesia: A Potential Crisis for America's Pacific Trust Territory."

I append at this point the text of a press release concerning Professor de Smith's paper issued by the New York University Center for International Studies. The preliminary text of his paper will be inserted following my remarks under this special order.

The press release follows:

MICRONESIA'S RIGHT TO CHOOSE INDEPENDENCE

The people of Micronesia must be allowed a free choice between independence and continuing association with the United States, according to a British expert in international law.

Professor Stanley A. de Smith made his recommendations in a paper published December 17, 1969, by the Center for International Studies of New York University. The title of the paper is: "Options for Micronesia: A Potential Crisis for America's Pacific Trust Territory."

In reviewing the alternatives open to the United States, Professor de Smith concludes that "Given the general climate of opinion in the United Nations, it is essential that 1) Micronesia be given a genuine independence option and 2) the conduct of a referendum on the status issue be supervised or observed by United Nations' representatives."

Micronesia's future status should not be determined by its convenience as a substitute for United States military bases on Okinawa, according to Professor de Smith, nor should a choice be accompanied by an American threat to cut off economic aid if the Micronesians should choose independence.

"If these principles are applied without procrastination," Professor de Smith writes, "there is every possibility that the people of Micronesia will determine their future by opting for free association with the United States."

The Micronesians at this time seem to prefer to retain an association with the United States, Professor de Smith reports. Professor de Smith visited the Pacific Trust Territories recently while he was a Senior Fellow of the Center for International Studies of New York University, which sponsored his study.

Professor de Smith writes that a Commission appointed by the Congress of Micronesia recommended internal self-government in free association with the United States. If negotiations for such future political status should fail, the Commission recommended that Micronesia should seek full independence as a unified state.

Professor de Smith observes also that "America's self-image (as) that of a noncolonial, indeed anticolonial power . . . is no longer credible in much of the inaptly named 'third world' . . . In such a context, the United States must surely handle the problem of Micronesia with delicacy and finesse, unless, of course, it is prepared to thumb its nose at United Nations' opinion in defense of an issue inessential to national survival."

De Smith, who is Professor of Public Law at London School of Economics and Political Science, has had extensive experience as constitutional advisor to the British Government during its decolonization program. His paper was adapted from a larger work entitled "Microstates and Micronesia: Problems of America's Pacific Islands and Other Minute Territories." This work will be published in January, 1970 for the Center for International Studies by the New York University Press.

While I do not agree with all of Dr. de Smith's points, I believe his paper represents a serious study done by a recognized expert in the relatively new field of "decolonization" and deserves attention and study. Some might object and say: "This is an American problem; why should we have to have a Britisher tell us what to do?"

My own view is that in any case we should listen to advice from whatever quarter. In this particular case there is the added fact that the problem is not just an American one; it concerns the United Nations and, especially, the Government of the United Kingdom, which is a member of the Trusteeship Council and a permanent member of the Security Council and as such will be one of the governments that will pass judgment on whatever final arrangements the United States may propose for Micronesia under the terms of our Trusteeship Agreement. In addition, of course, the British—and Professor de Smith in particular—have had a lot of experience with the process of decolonization, both with respect to colonies and protectorates and with respect to trust territories.

I might add that I arranged for Professor de Smith to present his conclusions to a group on Capitol Hill at the request of the director of New York University's Center for International Studies, which I serve as a member of the center's President's Council. I felt that, by doing so, I would be helping to air a most difficult, and potentially dangerous problem, of which most Americans are not even aware.

I fully recognize that, for a number of years now, representatives of the executive branch, especially in the Interior and State Departments, and Members of Congress, especially in the Committees on Interior and Insular Affairs, and in the Appropriations Committees, have devoted a great deal of study and attention to the problem. Last year, for example, the Subcommittee on Territorial and Insular Affairs, headed by my able colleague, the gentleman from New York (Mr. CAREY), made a lengthy and arduous on-the-ground study of conditions in the trust territory. As a result of these activities, and also in response to the recommendations of the U.N. Trusteeship Council over the years, there have been extensive political developments in the islands, including the creation of an elected Congress of Micronesia, and much progress has been made in providing more adequate funds for the economic, educational, and social development of the trust territory.

However, I do not believe we have been moving fast enough, especially in the political arena. We have not, for example, responded to the request of the Micronesians, endorsed by the Johnson administration, that a Presidential commission should be established to explore the ways and means for ascertaining the wishes of the Micronesian people as to their political future.

I am very much afraid that, if we continue on our present deliberate course, concentrating mainly on improving the material conditions of the islanders, we will before long have a political crisis on our hands that may very well jeopardize our future in the whole area. That is why I believe we should pay serious attention to the views of a disinterested outsider such as Professor de Smith.

The text of the policy paper referred to follows:

OPTIONS FOR MICRONESIA: A POTENTIAL CRSIS IN AMERICA'S PACIFIC TRUST TERRITORY

(By Stanley A. de Smith)

I

For Micronesia, 1968 was a year of lopsided achievement. The number of Peace Corps volunteers rose to seven-hundred, a high proportion of them involved in teaching English and promoting community development. On the whole the Micronesians were very pleased to have them. Jet airline services, linking Saipan and Guam with Truk and Majuro, swept into the Territory. Before long aircraft would carry parties of Japanese and American tourists from district to district. High school enrollments were bounding forward, and more than three-hundred Micronesian students were going on to further education outside the Territory. But the base of the economy remained weak and the splendid development plans for district centers have yet to get off the ground. This was hardly surprising, inasmuch as the United States Congress had not in fact appropriated more than twenty million dollars for annual grants to the Territory till fiscal year 1968, and the cost of making good the years of neglect in these remote and scattered islands would be enormous. However, a higher annual ceiling of fifty million dollars was promised for fiscal years 1970 and 1971; if these sums were indeed to be appropriated and spent on worthwhile projects, this would mark a great leap forward.

1968 was also a year of ostensibly modest constitutional changes. One of these changes, the exclusion of government employees from membership of the Congress of Micronesia, made little difference in practice; but the fact that so many Congressmen were willing to surrender well-paid government jobs in order to remain in politics on a low salary showed clearly enough that Congress had come to stay. More significant, perhaps, was another feature of the Fourth Amendment to Secretarial Order No. 2882.[1] The salaries of Micronesian Congressmen were in the future to be paid out of funds appropriated by the United States Congress itself.[2] Obviously this gesture was not intended merely to make more funds available for the appropriation by the Congress of Micronesia. It indicated the direction in which thoughts were turning in Washington. Micronesian Congressmen accepted this change without enthusiasm. But then, many of them had drawn salaries as employees of the Territorial Government before this without being reduced to docility.

II

1968 saw the first fruits of serious local thinking about the ultimate political status of Micronesia. The story goes back to August 1966, when the Congress of Micronesia petitioned the President of the United States "to establish a commission to consult the people of Micronesia to ascertain their wishes and views, and to study and critically assess the political alternatives open to Micronesia." In 1967 the Congress of Micronesia provided for the establishment of its own Future Political Status Commission. About the same time, the President submitted to the United States Congress a proposal to set up a com-

Footnotes at end of article.

mission to examine the issues with a view to enabling "the people of the Trust Territory freely to express their wishes as soon as possible, and not later than June 30, 1972, on the future status of the Trust Territory."

The President's Status Commission would consist of a chairman and eight members appointed by the President, four members chosen by the President of the Senate, and four chosen by the Speaker of the House of Representatives; it would be required to submit its report and recommendations within eight months of the provision of appropriations.[3] Minor disagreements arose in Congress over the Commission's composition and the target date. A joint resolution to establish a Commission failed to pass in 1967, again in the election year of 1968 and yet again in 1969. But in January 1968 members of the Subcommittees on Territorial and Insular Affairs of both the House of Representatives and the Senate visited Micronesia and held discssions with the Micronesian Future Political Status Commmission.

These discussions were not published. It is understood, however, that the Micronesians found the American senators more flexible than the members of the House Subcommittee. The prevailing view on the House Subcommittee is said to have been that independence and statehood were equally unrealistic goals for Micronesia, that its best course would be to elect to become an unincorporated territory of the United States like Gaum. In the meantime Micronesia could not expect to be allowed either to appropriate federal grants in aid or to obtain free entry for its products into the United States.

Meanwhile the Future Political Status Commission had not been idle. At its first meeting, in November 1967, it elected as Chairman Representative (now Senator) Lazarus Salii of Palau, the prime mover in this local initiative. It met again in January and April 1968, the meetings lasting some six days each. In May 1968 Representative Salii and Senator Bailey Olter visited the United Nations, Puerto Rico and the United States Virgin Islands in company with a State Department official. At the end of June 1968 the Commission produced its first Interim Report, a document of one-hundred-twenty-five pages.

The Commission, under the terms of the joint resolution authorizing its appointment, consisted of a Congressman from each administrative district. Its terms of reference were (a) to develop and recommend methods of political education, (b) to present the alternative options open to Micronesians, (c) to recommend procedures to determine the wishes of the people, (d) "to undertake a comparative analysis and to select areas of study of the manners and procedures whereby the Commonwealth of Puerto Rico, Western Samoa, and Cook Islands, and other territories and developing nations have achieved their self-government, independence, or other status", and (e) to perform any necessary ancillary functions. The mention of "independence" in the terms of reference and also in the preambular recitals to the joint resolution, and the omission of any express reference to American unincorporated territories, were no doubt carefully calculated.

The Interim Report was inconclusive but unusually interesting. The Commission had not yet held public hearings; nor examined all the issues. It asked the regular session of Congress for renewal of its mandate. This was quickly granted without dissent; Congress appropriated the relatively large sum of seventy thousand dollars for the purpose, to enable the Commission to travel farther afield. Clearly the Interim Report had made a favorable impression.

The Report concentrated on identifying alternative constitutional destinations open to Micronesia. In an appendix it summarized the recent political history of the Commonwealth of Puerto Rico, Western Samoa, the Cook Islands, the Philippines, and Guam, in that order. Analyzing these particular cases, the report pointed out that the territories, upon determination of their present status, had not been economically self-sufficient and that determination of status had not significantly encouraged investment or economic growth. Each of them, neglected by the metropolitan government, had looked to local agitation for a change of status and for constitutional reform. In some of them external factors such as United Nations attitudes, or indirect pressures exerted within the metropolitan power structure by the dependent territory throughout the cultivation of influential friends, had been important. This analysis was cautiously objective, but its gist was not understood to appraise independence as a panacea for Micronesia's ills. However, there was no detailed examination of the circumstances in which an option for independence might be to Micronesia's advantage.

In other appendices, the Commission set out its recommendations for a review of Secretarial Order No. 2882, and its comments on a bill for an Organic Act for the Trust Territory, which Representative Patsy Mink of Hawaii had introduced into the United States Congress (the bill was not passed into law). These recommendations and comments probably influenced to some degree the Fourth Amendment to the Secretarial Order, issued three months later. The Commission also concluded that although it should cooperate with the Presidential Status Commission were it formed, Micronesians should not sit as members of the Presidential Commission.

The Commission recognized the importance of the question of political education, for Micronesians generally lacked adequate understanding of the present institutions of government and were not in a position to make an informed choice of their future status. But is was pointless to put forward detailed recommendations on the matter at that time, if only because the Commission itself was still in the process of evaluating the merits of various alternative types of status. One notes that in January 1969 a special committee on Government Organization was constituted by the Congress of Micronesia to examine ways of improving the efficiency of the Trust Territory Government. The committee heard testimony from officials and others, and decided to travel to all districts in March. It would be in a position to promote the diffusion of information and perhaps to indicate how best to prepare the people for subsequent self-determination.

The Interim Report gave preliminary consideration to nine possibilities. Three were concerned with the Territory's future geographical limits, six with the ultimate political status of the Territory, assuming retention of existing boundaries; there was some overlap between the several options.

On the question of geographical limits, the courses considered were the expansion of Micronesia to include island areas not yet within its boundaries; the division of Micronesia (perhaps uniting part of the Territory with another political entity); and the maintenance of present Micronesian boundaries.

The expansion of Micronesia to include other areas (e.g. Guam, Nauru, American Samoa, the Cook Islands, the Gilbert and Ellice Islands) presupposed a willingness to unite on the part of the others. Nothing in any of these territories except Guam evidenced any wish to create such a union, or that union would bring with it economic advantages. The question of union with Guam would, however, require further investigation.

My own impression was that no body of opinion in Micronesia except that represented by the Popular Party in the Marianas—now, for the time being, a minority party in its own district—wanted union with Guam. The Popular Party wanted the Marianas detached from the rest of Micronesia for this purpose; in Guam itself, opinion seemed more favorable to merger with the Marianas than with the Trust Territory as a whole.[4] It is of some interest that neither in this context nor elsewhere in the Interim Report was any express reference made to the possibility of union with Hawaii, despite the fact that Governor Burns of Hawaii[5] and other influential figures in that state[6] were known to favor the incorporation of Micronesia within Hawaii. The emphasis in this section of the Interim Report was on the expansion rather than the absorption of Micronesia. By implication, the Commission was unwilling to see Micronesia lose its identity by subordination to another entity.

The Commission felt that, on the whole, a division of the Territory offered little; moreover, fragmentation was opposed both by the United States and by the United Nations. But the decision to proceed on the assumption that the Territory would be preserved as an entity was "a begrudging and tentative conclusion."[7]

The wording reveals differences of opinion within the Commission. This is not surprising. Not only did the Commission include a separationist from the Marianas, but nationalist sentiment in other parts of Micronesia is weak and, as the Commission put it, "embryonic". Were a plebiscite conducted there and then, offering each district the option of separate independence, this option would probably have attracted a very large vote. Local particularism is a potent force in Micronesia. People are more aware of what divides them from their neighbors in other districts than of what unites them. These sentiments are not confined to the apolitical majority; they are shared in some degree by the more sophisticated. Among resolutions passed by the Congress of Micronesia in 1968 was one congratulating the diminutive but wealthy Republic of Nauru on the attainment of independence. A number of prominent Micronesians hanker after the same goal for their own districts. But they are practical enough to be pessimistic, especially as such miniscule and impoverished entities could hardly maintain a viable independence without offering strategic facilities to a foreign country hostile to the United States. One has only to state the problem to see that it would be almost impossible to resolve. Moreover, if each district decided to go its own way, and the United States and the United Nations were to concur, it is quite certain that some of the new microstates would be left to moulder in stagnation. And if strategic potential is to be used as a bargaining counter in negotiations about ultimate status, there is at present (quite apart from the attitude of the Administering Authority) a sufficient number of Micronesians with an interest in maintaining the Territory's geographical integrity to quash any serious separatist agitation. If a district has a valuable asset, pressure will be for an auction on behalf of the people of the whole Territory.

On the provisional assumption that the Territory would remain one, the Commission set out four main alternative destinations: independence; the status of a freely associated state or protectorate; integration with a sovereign state; and (perhaps surprisingly) continuance as a trust territory. The Commission made comments on these several possibilities but offered no recommendations.

The Commission briefly stated the implications of independence, but in so delicate a manner as to give no direct offense to the Administering Authority. It went on to observe that lack of money and manpower, and general economic underdevelopment, pre-

Footnotes at end of article.

sented serious obstacles to independence in the near future, unless one form of economic and political dependence were exchanged for another. The Commission concluded with the cryptic observation that "in considering an independent Micronesia . . . some thought must be given to the continuing strategic interest of the United States in Micronesia." [8] One could assume that these words were not composed in a spirit of altruism. Micronesians would not voluntarily eschew independence merely in order to safeguard the interests of the United States. The passage implied that American presence in Micronesia might well be worth a great deal of money to the United States, especially if the Ryuku Islands (including Okinawa) were to be evacuated soon; that an option for independence would not inevitably prove an economic catastrophe, despite serious risks (of which the present unpopularity of foreign aid in the United States Congress, and the unpredictability of future strategic appreciations are the most obvious); and that nobody could be sure of American reactions to a vote in favor of independence. One can at least be sure—and the Micronesians are aware of this—that the United States Government would prefer Micronesia *not* to opt for independence; and that it can be persuaded to invest a good deal of money in developing Micronesian resources in the hope of influencing the outcome.

The Commission dwelt even less expansively on the status of what it called a "free associated state", which it equated with a protectorate. It had not studied, at that time, arrangements for the British associated states in the Caribbean. One of the appendices described rather sketchily the constitutional and economic position of the Cook Islands.

The next group of possible destinations were forms of integration with a major power. "The logical choice for integration", in the words of the Report, "is with the United States." Such a choice would practically guarantee continued support for development programs and for the supply of skilled personnel not available in Micronesia. Three forms of "integration" were mentioned: Commonwealth status after the style of Puerto Rico; integration as an unincorporated territory; and integration as an incorporated territory. The Report did not deal with the possibility of separate statehood for Micronesia (except in passing, when it referred to the status of an incorporated territory as the "highest next to statehood" within the American system) nor, as we have pointed out, did it mention the question of union with Hawaii.

The present writer's own impression is that most of the members of the Commission were attracted to the idea of Commonwealth status but not to territorial status. They did not wish to be latter-day Guamanians or appendages of Hawaii; nor, for that matter, did they appear to be enamored of the concept of American citizenship or liability to the draft, which the Puerto Ricans enjoy. But Puerto Rico's wide measure of internal autonomy coupled with a de facto right of self-determination, viewed against a background of impressive economic development and participation in a range of American social welfare programs, had much to commend it. Why the Commission distinguished Commonwealth status so sharply from free association according to the Cook Islands model was not clear. The Cook Islanders have retained New Zealand citizenship and free access to New Zealand; the economy is heavily subsidized by New Zealand; and the Islands have an explicit constitutional right to opt for independence. It is true that the Cook Islands do not enjoy high living standards, and they do not share fully in the social benefits of New Zealand, but then the islands are very remote and poor in resources, and New Zealand is a fairly small and not particularly rich country. Moreover, it is open to the Cook Islands Legislature to enact measures for reasonable protective discrimination in favor of the indigenous inhabitants.

Finally, there was the possibility of remaining a trust territory indefinitely. Such a decision might expedite economic development by leaving United States exposed to pressure; if the status issue were resolved, there is a danger that Micronesia would be allowed to fall back into oblivion.

This last suggestion would be unattractive to the United States Government, to international opinion and to a growing number of educated Micronesians.[9] If such a state of affairs were to come to pass, it would be a by-product either of disagreement with the United States or within Micronesia on the status issue, or of failure to persuade the United Nations that the trusteeship agreement should be terminated—for example, because the Micronesians had opted for a status less than sovereign independence.

III

In July 1969 the Micronesian Future Political Status Commission issued its final Report. It came down in favor of an internally self-governing state in free association with the United States. If negotiations for free association were to fail, the Commission recommended that Micronesia ultimately opt for independence as a unified state.[10]

During the preceding few months there had been several developments. First, the Commission had engaged Professor James W. Davidson of the Australian National University, Canberra, as its constitutional consultant. Davidson, a New Zealander, was entirely independent of the Territorial Administration. He had been one of the architects of the Cook Islands free association scheme and Western Samoa's independence constitution. In 1967 he had advised Hammer de Roburt in Nauru during the difficult but successful negotiations for independence. His appointment to advise the Micronesian Commission was an astute and significant move.

Second, the Fourth Amendment to the Secretariat Order which had originally constituted the Micronesian Congress provided for a number of significant changes in the legislature. Government officers and employees and members of district legislatures were now disqualified from membership in Congress (they had previously been permitted to serve because of a dearth of suitably qualified candidates); a salary of three thousand five hundred dollars per annum was provided for each member of Congress [11] (compensation of members had previously been fixed at sixteen dollars per day plus travelling allowances); and the length of regular legislative sessions was increased from thirty to forty-five days per year, with provision for an additional regular session of up to fifteen days in alternate years. The fact that, in the future, salaries would be paid out of American congressional appropriations underlined the difficulties implicit in an option for independence. However, with the Congress of Micronesia now a body of salaried members and with the length of its usual sessions for 1969 now doubled, the status of Micronesian Congressmen had been enhanced rather than diminished in their own eyes and the eyes of the electorate. As professional legislators, they became more, not less, self-assertive.

Third, the Status Commission had broadened its horizons by talking to the political leaders of Nauru and the Cook Islands, and visiting American Samoa, Western Samoa, Fiji, and Australian New Guinea.

Fourth, it conducted public hearings in each of the six districts in order to sound local opinion and further political education.

Fifth, the election results in the Marianas (the Popular Party's candidate had been narrowly, but surprisingly, defeated) had probably reduced the future dimensions of the problem created by the separatist movement in that district. (However, see footnote 4 for evidence that in November 1969 this problem still remained).

Sixth, in April 1969 the Commission issued a Statement of Intent, virtually a synopsis of the conclusions contained in its Report three months later.

Seventh, in May 1969 the new Secretary of the Interior, the new Director of the Office of Territories,[12] and high-ranking defense officials visited Micronesia. The ball was already in their court, and they were in a position to assess the nature of America's problems.

Eighth, it was becoming increasingly likely that the United States would (i) relinquish its political status in Okinawa, where it had massive bases, and (ii) phase out its commitment in Viet Nam, during the next few years. The net result would probably be an increase in the strategic "denial" value of Micronesia to the United States. But it was impossible to predict how the change of government in Washington and the introduction of new faces among those responsible for the Territory's affairs [13] would affect the Administration's policies.

IV

The 1969 Report of the Future Status Commission was far more decisive and explicit than the Interim Report. It summarily dismissed integration with Japan as being neither advantageous nor practicable. It rejected the idea of integration with the United States,[14] while recognizing the economic benefits that incorporation with the American constitutional system would bring. The disadvantages, paramount in the eyes of the Commission, were five: other United States citizens would have equal rights to acquire land [15] and conduct business in Micronesia; Micronesia would lack control of its own affairs; Micronesians would be subject to United States taxes; they would have fewer opportunities to hold key positions in the government; there would be intensified Americanization, which would diminish the prospect of preserving Micronesian cultures. The Report failed to make clear, however, that some of these consequences would flow only from complete integration—e.g. as part of the State of Hawaii. Guam, an unincorporated territory of the United States, has a large measure of internal self-government; Guamanians hold most of the key positions in the Administration; the tax system is not the same as on the mainland. But to the Micronesians (except in the Marianas) America is no more than a generous and helpful friend. Most Micronesians, unlike Guamanians, do not *want* to be incorporated into the great American family; they do not feel that they are or ought to be Americans. Nor do they wish to have their hands tied by the Pentagon. Their aversion to territorial status rests to a large extent on a distaste for the situation in Guam, which they see as inimical to self-respect. To the members of the Status Commission, a merger with Guam imposed by the United States while Micronesia was still a trust territory would be unacceptable.

Nevertheless, the Commission took note of sentiment in the Marianas District in favor of an immediate merger with Guam,[16] and of interest shown at its public hearings in all districts in relationships with Guam. It dealt judiciously with the separatist movement on the Marianas, and went so far as to declare that it "would not oppose a political union which reflects the freely-expressed desire of a majority of the residents of the district." [17] But it also commented that it was ultimately for the United States and the United Nations to resolve this question, and expressed the hope that separation would not be embarked upon till all possibilities for partnership had been explored.

Footnotes at end of article.

The Commission foresaw a growth in cooperation between Guam and the Trust Territory, and thought it "not impossible" that Guam and Micronesia might one day comprise a single political unit.[18] But first the Trust Territory had to become a self-governing state in free association with the United States. If the people of Guam were to join the people of the Trust Territory in a movement towards full internal self-government, the question of a future union could be carefully discussed.[19] This part of the Commission's Report was cautiously and somewhat vaguely worded, perhaps for the purpose of securing unanimity on a contentious issue. Union between a self-governing Micronesia and Guam may indeed not be "impossible," but there would have to be big changes of attitude in both territories before it could be seriously contemplated.

On the central issues, the Commission shed the reticence it had shown in 1968. Micronesia had to become fully self-governing "because the continuation of a quasi-colonial status would prove degrading to Micronesia and unworthy of America." [20] But America had strategic interests in the area. For this purpose it needed to use the Micronesians' most precious asset, their land; and it should be prepared to pay an appropriate price, freely negotiated with Micronesians, for such facilities. The price would entail the provision of material and human aid to the Micronesian Government, and the representation and protection of Micronesia in international affairs. In return, Micronesia would accept some relinquishment of land for American military purposes, the social consequences of the presence of American military personnel, and the prospect of being a target in a future war.

The Commission envisaged the following procedure. First, a formal request by the Congress of Micronesia to the United States Congress for the passage of an enabling Act similar to the Act under which Puerto Rico's Commonwealth (or free association) constitution was adopted by the people; second, negotiations by Micronesian representatives with the Federal Government in Washington; [21] third, the adoption of an extensive program of political education in Micronesia, inspired by the initiative of individual members of the Congress of Micronesia; fourth, the election of a Constitutional Convention in Micronesia to determine the future constitution; fifth, submission of both the constitution prepared by the Convention and the question of political status accompanying it to a referendum of the people. If the proposals were rejected by the people, trusteeship would have to be prolonged till a satisfactory solution was reached. If the proposals were rejected by the voters of a single district, the Congress of Micronesia "should take this into careful consideration and attempt to resolve it." [22] The Commission was clear that the constitution could not be one handed down by the Administering Authority, and that close consultation with the United Nations should be maintained.

The Commission did not offer detailed suggestions for the future structure of internal self-government, but noted a consensus that the interests of each district ought to be taken into account; that no district or group of districts be allowed a dominating position by reason of numerical superiority; and that unity must be compatible with decentralization and the recognition of diversity. It might be desirable to vest executive power in a council representing all districts instead of concentrating that power in one individual.

Perhaps the best section of the Report was the succinct appraisal of the advantages and and disadvantages of independence.[23] An independent Micronesia would need to have close ties with a major power, presumably the United States, and would depend on that power for grants in aid and rental for leased strategic bases. An attempt by that power to exert undue pressure on an independent Micronesia would be more difficult than if Micronesia were its associated state. Its authority in an independent Micronesia would be defined by treaty. As an independent state Micronesia could, if it wished, take part directly in the affairs of international organizations; it would have more freedom of manoeuvre. The Commission also thought that a decision to opt for independence would assist the growth of national pride and a sense of Micronesian identity. Independence, moreover, would be an outcome acceptable to the United Nations.

On the other hand, the absence of a formal constitutional link with the United States would leave Micronesia in a perilous economic position as one among many claimants for foreign aid.

Even if the American Government felt a sense of obligation, their sympathy might not be shared by Congress. As an independent state, Micronesia could not expect duty-free entry for its exports to the United States or so ready a supply of American expert advisers, though it would be free to seek assistance elsewhere. However, independence would probably mean a fall in Micronesia's already low living standards. Given the "grim realities" of Micronesian conditions, the Commission recommended independence "only as a second alternative to be considered if self-government in free association with the United States should not be possible." Earlier in the Report the Commission had stressed that failure in the negotiations with the United States should not lead to "an abrupt and immediate plunge into the hardships and uncertainties of independence", but to a lengthy prolongation of the Trusteeship Agreement while the the basis for viable Micronesian independence was being established.[24]

In two respects the Commission seems to have been unrealistic. First, independence would be more likely to lead to insular fragmentation than to national unity, except possibly in the very short term. One clear advantage of association with the United States would be that America could be expected to apply coercion to a secessionist island group. It might be more reluctant to do so at the invitation of an independent Micronesian Government. Second, it is hard to believe that the United Nations would recognize the validity of an act of self-determination which did not offer the Micronesians the *option* of voting for independence.

The Report is markedly vague on the type of association arrangement the Commission had in mind. From its omissions one may perhaps infer that the Commission favored a relationship with the United States less close than that of Puerto Rico but not quite as loose as that between New Zealand and the Cook Islands. Nothing in the Report suggests that the association arrangements should include a provision (which exists in the Cook Islands and the British associated states) for termination at the instance of either party. Presumably this omission reflects the fear that Micronesia might one day be cast adrift to fend for itself. But the independence option cannot be dismissed so easily. Again, the Report seems to assume that Micronesians (unlike Puerto Ricans) would not be American citizens, but should enjoy free access to the United States and the American market, whereas American citizens would not enjoy corresponding rights of access to Micronesia; and that the United States Government and Congress would lack paramount authority in Micronesia (as New Zealand lacks paramount authority in the Cook Islands) except in relation to external defense and international relations. However, it is understandable that the Micronesians should seek the best of all available worlds. It is also understandable that, whatever the Report may say, continued association with the United States would be, for many Micronesians, a second best, a sacrifice of their emotional preference for independence.

v

America's self-image has been and still is that of a noncolonial, indeed anticolonial, power. For a number of reasons this image is no longer credible in much of the inaptly named "third world." [25] American interests have demanded support for a western alliance with colonial powers; military intervention in small countries menaced or thought to be menaced by Communist subversion or take-overs; the maintenance of foreign bases; and the adoption of positions in the Middle East and Southern Africa too moderate to satisfy inflamed passions. In addition, the United States remains subject to the hostile scrutiny of the Committee of Twenty-Four because of its "colonial" stance in Guam, the Virgin Islands, American Samoa and Micronesia. It has the disadvantage of being wealthy in a world of poor nations; it is accused of neo-colonialism. It houses the United Nations in New York, where delegates can observe for themselves a wide gulf between riches and squalor, surges of black revolutionary sentiment, and violent manifestations of social disorder.

The international image of the United States may improve; it may deteriorate. In any event, the influence wielded by the United States at the United Nations and in the world at large is more impressive than America's popularity. Its success (for what it is worth) in securing the exclusion of Communist China from the Chinese seat at the United Nations for so many years bears testimony to this fact. But in such a context the United States must surely handle the problem of Micronesia with delicacy and finesse, unless, of course, it is prepared to thumb its nose at United Nations opinion in defense of an interest inessential to national survival.

Relations between the United States and the Trusteeship Council have been amicable. The comments of the 1967 Visiting Mission to Micronesia were far from being uniformly uncomplimentary. At the conclusion of the debate on Micronesia in the Trusteeship Council in June 1968 the Senior American representative, a newcomer to these proceedings, was moved to observe that he had "never met a group of members of any [United Nations] body who could surpass, or even match in courtesy, cooperation and diligence, the members of this Council." [26] The Trusteeship Council is now a waning force.

Its proceedings attract little attention. At the Council's second meeting on Micronesia in May 1968 none of the sixty-six seats in the press gallery was occupied. Attendance in the public gallery—admittedly on a wet morning—varied from one to four. One spectator fell asleep. However, the Trusteeship Council, provided that it survives, may play an important role in the process of self-determination for Micronesia, if only because among the organs of the United Nations it is the least unsympathetic to American viewpoints and by far the best informed about the problems of the area. A Visiting Mission from the Trusteeship Council is going to Micronesia early in 1970. It may well be the last. America's interests dictate that the Visiting Mission's Report be generally favorable. That Report is unlikely to be favorable to the Administering Authority unless there are clear signs that (i) preparations for an act of self-determination are on their way and (ii) Micronesians will be left to choose their own ultimate status and not have that status thrust upon them.

It does not follow that America must totally endorse the recommendations of the Micronesian Future Political Status Commission or offer a blank cheque to Micronesia.

Footnotes at end of article.

Given the general climate of opinion in the United Nations, it is essential that (1) Micronesia be offered a genuine independence option and (2) the conduct of a referendum on the status issue be supervised or observed by United Nations representatives. There is no precedent for a trust territory opting for a status other than independence in its own right or as part of a contiguous independent state.

If Micronesia is not going to opt for independence, moderate anti-colonial opinion at the United Nations must at least be satisfied that the Micronesians really do not want independence. This cannot be demonstrated unless the Micronesians are offered the option, even if they would prefer not to be offered it. And the offer (which could be post-dated) should not be accompanied by threats of cessation of all economic aid if the Micronesians were to vote for independence; otherwise the people's choice of an association arrangement might be justly criticized as having been made under duress. It must be borne in mind too that, since the Anguillan episode, free association is widely regarded as colonialism masquerading under a thin disguise.

Termination of the Trusteeship Agreement must be approved not only by the United States Government (see Agreement, Art. 15) and Congress, but also by the Security Council. The General Assembly has no *locus standi*, since Micronesia is a strategic trust territory. If the Administering Authority purported to terminate the Agreement unilaterally, this would be ineffective in international law.[27] The United Nations Charter is strangely silent on the procedure to be adopted; but we can assume that (1) any resolution to terminate the Agreement must be passed by the Security Council and (2) each permanent member of the Security Council would have a right of veto. In addition, the matter would probably be construed as sufficiently important to require an affirmative vote of nine of the fifteen members of the Security Council, including the concurring votes of the permanent member.[28] The onus of satisfying an anti-colonial majority of the Security Council will not easily be discharged.

Perhaps the United States will be able to come to an understanding with the Soviet Union. If, however, Peking has occupied the Chinese seat by the time the issue comes before the Security Council, the prospects of a veto will be very real. For this reason alone the United States will be well advised to treat the question of ultimate status as urgent. If, moreover, things go wrong at the United Nations, if a referendum cannot be conducted with the blessing of the United Nations, or if its outcome is unacceptable to the Security Council, the United States will remain saddled with a trust territory for which it is no longer prepared to be internationally accountable. This state of affairs, leaving the United States barraged by international criticism and harried by ungrateful wards, ought to be avoided if possible.

The United States should therefore be accommodating to the Micronesians. It should, however, make clear that any association arrangement submitted to the people for approval must include provision for unilateral termination of the arrangement, enabling the Micronesians subsequently to proceed to independence if they so wished. Preferably that option for unilateral termination should extend to the Micronesians alone. But it would be asking a good deal of the United States not to insist on a reciprocal right to terminate the association.

The Micronesians ought not to be offered the choice of fragmentation. There is no dearth of particularist sentiment, and to legitimize it would be to encourage it, to the detriment of the Territory as a whole. To afford the Marianas the option of seceding to join Guam would be very badly received at the United Nations. Possibly the least unsatisfactory solution to this problem would be for the Constitution of Micronesia to provide that within a prescribed period *after* Micronesia had attained associated status (or independence) a referendum be held on the issue in the Marianas District.

From all this it follows that the United States should be prepared to risk its own interests in Micronesia in order not to thwart Micronesia's desire for autonomy and thereby antagonize the great bulk of international opinion. Temptation to palm Micronesia off with territorial status, either as a new unincorporated territory or as part of Guam, must be firmly resisted. Micronesians outside the Marianas do not want such a status. The annexation of a trust territory by a Western Administering Authority is without precedent and the status of an unincorporated territory is regarded by the United Nations as more "colonial" than that of a trust territory. True, America's defense interests could be better protected by the annexation of Micronesia than by any other constitutional arrangement. The embarrassment of seeing "immature" Micronesia leapfrog the Virgin Islands, Guam and American Samoa by achieving full internal self-government in a sudden bound would also be avoided. Again, there is a lot of ocean within the boundaries of Micronesia, which might yield wealth to be exploited one day, and the economic future of the Micronesians would become less uncertain. But the international image of the United States would be gravely damaged by such an imposition.

The general guide-lines for the United States to follow have been indicated by the Report of the Future Political Status Commission. An outsider would be presumptuous to prescribe the manner in which a scheme for association should be negotiated. Clearly, United States congressional leaders must be brought into the picture at an early stage; enabling legislation will be required, and it must not be allowed to suffer the fate of the joint resolutions on the Presidential Status Commission[29] or the dismal delays in implementing proposals for constitutional change in the Virgin Islands.

Meanwhile, development aid to Micronesia must somehow produce tangible results. This will at least help to dispel the pervasive sense of pessimism in Micronesia. Rome cannot, and yet it must, be built in a day and a half; and it must be built in the hearts and minds of Micronesians. Above all, Micronesians who are in politics must feel that they have a meaningful voice in shaping their country's destiny. Leading members of the Congress of Micronesia must be brought into closer association with the Territorial Government, participating directly in the formation and implementation of local policy decisions.

Their views on the question of Micronesia's future status—views which, by modern international standards, are distinctly moderate—must be listened to with the greatest respect in Washington. And within an agreed framework, the elected representatives of the Micronesians must then be allowed to evolve, in a Constitutional Convention, their own form of government, free from external constraint. If these principles are applied without procrastination, there is every possibility that the people of Micronesia will determine their future by opting for free association with the United States.

FOOTNOTES

[1] Secretarial Order No. 2882 is the instrument whereby the Congress of Micronesia had originally been constituted in 1964.

[2] Travel and subsistence allowances were to be met out of local funds appropriated by the Congress of Micronesia. At the same time, the salary of the Legislative Counsel to the Congress became payable out of the funds appropriated by the Congress of Micronesia instead of the High Commissioner's budget.

[3] See CONGRESSIONAL RECORD, vol. 113, pt. 18, pp. 23809–23810.

[4] An unofficial plebiscite taken in Guam in November 1969 has shown, however, that there is substantial opposition in that island to merger with the Marianas. Nonetheless another unofficial plebiscite taken in the Marianas a few days after the poll in Guam indicated that merger with Guam was still the preferred course for the district, despite the opposition of Guam.

[5] The Governor's views are reported in the *Guam Daily News*, July 5, 1968, p. 4.

[8] Interim Report, p. 21.

[9] Though many persons to whom the members of the Trusteeship Council's Visiting Mission of 1967 spoke had asked them: "Why is the United Nations rushing us? What is the hurry?" (Report, T/1658, S. 317).

[10] In July 1968 I had intimated to certain members of the Commission that if I had been asked to advise them, my own provisional inclination would have been to advise them broadly along such lines. I have no reason to suppose, however, that this informal and tentative expression of opinion carried any real weight.

[11] The Speaker of the House and President of the Senate were to receive an extra five hundred dollars per year.

[12] After the inauguration of the Nixon Administration, Mrs. Elizabeth P. Farrington replaced Mrs. Ruth G. Van Cleve.

[13] High Commissioner William R. Norwood, a conscientious and respected public servant, was replaced in 1969 by Edward E. Johnson, a businessman and chairman of the Hawaii State Republican Party. Initial reactions in Micronesia were cool. Peter Coleman, the well-liked district administrator for the Marianas, and former Governor of American Samoa—he is a part-Samoan—was appointed to the new post of Deputy High Commissioner for the Territory.

[14] Report, 48–49.

[15] The possibility of an American Samoan solution was not considered in the Report, perhaps because the constitutionality of protective discrimination in favor of the Samoans was questionable.

[16] In the Marianas Islands District (and particularly in Saipan, the most populous island in the District), desire for union with Guam is based partly on ethnic, linguistic, cultural and religious affinity; partly on the hope of sharing the economic benefits (in particular, the high minimum wage rates) accruing to Guam as an unincorporated territory and defense bastion of the United States; and partly on dissatisfaction with the relative anonymity of the Marianas in the new constitutional order. There is resentment at the material diminution of the status and resources of the Saipan municipality and the Marianas' contribution to the Territory's revenue exceeds the funds granted them by the Congress of Micronesia (a situation which may be aggravated when a territorial income tax is imposed). On Saipanese separatism see generally Reports of the United Nations Visiting Missions for 1961 (T/1582, 55–69), 1964 (T/1628, 245–248, 284–291) and 1967 (T/1658, 321–324).

[29] Three days after the presentation of the Future Political Status Commission's Report, the Congress of Micronesia adopted a joint resolution "urgently" requesting the President and Congress of the United States ". . . to give serious consideration to the future political status of Micronesia and the ways in which this status should be finally resolved . . ." This Joint Resolution was laid before the United States Congress as a petition. See Congressional Record—Senate, p. 20963 (July 28, 1969).

Mr. Speaker, on several occasions I have discussed on this floor the situation in Micronesia, the Trust Territory of the Pacific Islands. I have taken this time primarily to call the attention of the Members and others who read the CONGRESSIONAL RECORD to a report prepared under the auspices of the Center for International Studies of New York University.

Mr. CAREY. Mr. Speaker, will the gentleman yield?

Mr. BINGHAM. I am glad to yield at this time to my colleague from New York (Mr. CAREY).

Mr. CAREY. Mr. Speaker, I understand the gentleman's purpose today to be to call the attention of the Members to a report to which he refers which was prepared by a scholar, evidently, Prof. Stanley de Smith, of Cambridge University, who I understand is the constitutional adviser to the British Government. I appreciate the gentleman's effort to assist us in gathering information which will assist the committee of which I am chairman, the Territories Subcommittee, in our deliberations with regard to the Trust Territory of Micronesia and other areas under the U.S. flag. I also appreciate as a former member of the subcommittee of the Committee on Interior that the gentleman maintained an active interest in this area and the wide periphery of his interest in the Congress so as to include the affairs of our Government in the trust territories as well as the other foreign relations of our Government. We are fortunate to have his valuable experience as our former representative to the trusteeship Council of the United Nations where he served with great distinction in that body. I merely state that I do not question Dr. de Smith's competence in this field. I might add as a citizen of the United States that we can always look to a citizen of a constitutional monarchy like Great Britain, our ally in the world, for advice on many of our foreign deliberations. I might say, while not trying to be facetious but observing pertinently, that I would observe Dr. de Smith would know a great deal about colonization and decolonization, since the country of his origin practiced so much of it over the centuries, and we owe our existence to the fact that we were able to decolonize ourselves through a revolution.

Mr. Speaker, I will not take any more of the gentleman's time now because I will be following his special order with a special order during which I will take an hour to give my own comments on Dr. de Smith's report and also say that as we go on we will be leaning on many more authorities to help us steer what we hope will be a true course. Since we have heard from Dr. de Smith on the matter of colonization as a British subject, I might invoke my prerogatives as chairman to invite to testify before the subcommittee another constituted authority who is a Member of the British Parliament by the name of Bernadette Devlin, who may be able to advise us as to what Great Britain might do in terms of decolonization of the six counties of Northern Ireland.

I thank the gentleman for yielding.

Mr. BINGHAM. I thank the gentleman for his contribution and for his comments.

I would just like to say that I certainly agree with him in his remarks about the sad record that we have witnessed as far as the Government of the United Kingdom is concerned toward the six counties of Northern Ireland.

On the other hand, I think in many areas of the world the Government of the United Kingdom has established in recent years since World War II particularly a quite remarkable record of granting independence and granting help to many of the territories previously under its administration, territories that included colonies, protectorates, and several trust territories under the United Nations trusteeship system.

As I pointed out in my prepared comments, I think it is appropriate that a representative of the British Government comment upon this subject.

We have in Micronesia an international obligation as the gentleman very well knows and any arrangements that we may ultimately submit for approval to the United Nations with regard to the disposition of our trusteeship in Micronesia will have to be approved by the Government of the United Kingdom, both as a member of the trusteeship council and as a member of the Security Council.

So, I think it is appropriate that we pay attention to comments from outsiders. As the gentleman from New York knows at the present time the primary obligation of administering the trust territories is in the hands of the United States. As I have also pointed out in my remarks, I think it is pertinent to say at this time that the great Committee on Interior and Insular Affairs, and particularly the gentleman's subcommittee of which he is the distinguished chairman, has the responsibility for legislation affecting the trust territory, as it does with reference to other territories.

There are implications to the total problem of Micronesia that I think are of great interest to other committees, including the Committee on Foreign Affairs of which I am a member, especially insofar as its relationship with the United Nations is concerned, and also the Committee on Armed Services, since the islands in question occupy certainly a very strategic part of the Pacific Ocean.

Mr. UDALL. Mr. Speaker, most Americans would be surprised to know that the United States has held in trust since 1947 scores of widely scattered Pacific islands making up the little-known nation of Micronesia. These islands were originally placed under Japanese mandate in 1919, with the exception of Guam, Wake, Nauru, and the Gilbert Islands, which Japan later invaded and held during the early part of World War II. They were retaken by American forces in 1942–43, and we have stayed there ever since.

Micronesia has prospered and matured politically for 23 years under our care. Now, many believe, is the time to offer the citizens of this quickly emerging nation the chance to be self-governing. This call for independence leads me to believe that the United States has carried out its trustee duties well, that we have succeeded, in line with the United Nations Charter, to encourage political economic, social, and educational advancement leading to independent government.

As a member of the Interior Committee, and as one who has taken an interest in our territories, I urge the administration and the Congress to consider seriously the recommendations of the Micronesian Future Political Status Commission. In its recent report, the commission suggests that the time for self-government of this once piecemeal colony is rapidly approaching and that a Micronesian national referendum be held to determine its future political ties with the United States.

There are many urgent reasons for following this general plan of action. But perhaps the most important is to demonstrate to the world community once again that even in this crucial period in Asian history, we desire no colonial possessions for economic, political or military advantage.

Once again, I urge my colleagues to give serious consideration to the Micronesia question.

GENERAL LEAVE

Mr. BINGHAM. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days during which to extend their remarks on the subject of my special order.

The SPEAKER pro tempore (Mr. PRICE of Illinois). Is there objection to the request of the gentleman from New York?

There was no objection.

U.S. ADMINISTRATION OF THE TRUST TERRITORY OF THE PACIFIC ISLANDS

The SPEAKER pro tempore. Under a previous order of the House the gentleman from New York (Mr. CAREY) is recognized for 15 minutes.

Mr. CAREY. Mr. Speaker, I rise in response to the remarks of the gentleman from New York (Mr. BINGHAM) concerning the U.S. administration of the Trust Territory of the Pacific Islands.

While I have not had occasion to study

the "Policy Paper on Options for Micronesia: A Potential Crisis in America's Pacific Trust Territory" prepared by Prof. Stanley de Smith of Cambridge University and constitutional adviser to the British Government on its decolonization program, released to the press yesterday, I am aware of its critical import. Perhaps, upon further study of this policy paper, I shall, at some future time express further comment thereon.

At this time, however, it is most important I believe to allay any fear or alarm my colleagues may sense by the remarks of the gentleman from New York (Mr. BINGHAM) and the "Potential Crisis" as referred to in the paper of Professor de Smith. There is no crisis developing in the U.S. administration of the Trust Territory of the Pacific Islands. The only crisis, whether it be potential or developing, in the Trust Territory of the Pacific Islands is in the views and expressions of those who wish to see it as a crisis.

Suffice it to say that in all history the cause-and-effect relationship between people and their actions have always constituted a "potential crisis." This poor choice of words results in an inaccurate implication.

The remarks of the gentleman from New York and the expressions of Professor de Smith trouble me to the extent that they imply an unresponsive or irresponsible attitude upon the House Committee on Interior and Insular Affairs and its Subcommittee on Territorial and Insular Affairs of which I happen to be the chairman. I am more troubled by the gentleman's support of Professor de Smith's statements, which I am advised attempt to characterize the United States as a colonial power and impugn the international relations of this great Nation.

For these reasons, Mr. Speaker, I would like to first briefly tell this body and all the world of the record of the United States, and in particular the Congress of the United States, in the evolution of our territorial responsibilities.

In 1787, the fathers of this Nation ordained in the Constitution of the United States that the Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property of the United States.

Since that time the sovereignty of the United States has been extended over noncontiguous areas not by the exercise of colonial power, but through negotiation and treaties of purchase or cession. In 1867 the United States acquired Alaska. Between 1900 and 1904, the islands of American Samoa were ceded to the United States. In 1917, the Virgin Islands were purchased from Denmark, and in 1947 the United States became the administering authority of the Trust Territory of the Pacific Islands. The trust territory is not a territory of the United States, and in that sense is different from those areas which I have mentioned, which are, or have at some time been, territories of the United States.

In 1946 the Republic of the Philippine Islands achieved its sovereign independence. In 1952, the territory of Puerto Rico attained commonwealth status. In 1959, the territories of Hawaii and Alaska achieved statehood.

It is worth pausing for the moment to reflect on the fact that this is an exemplary record and the United States, and in particular the Congress, should be commended for having displayed the creativity and flexibility so necessary in dealing with the people, their culture, and the desired political status of these areas. There has been no preordained path for each to follow. The course has been simply what the majority of the residents of each of these areas chose to follow—and that chosen course has been what the United States has extended them the privilege of following.

The result has been that this Nation, the Congress, and more specifically, the House Committee on Interior and Insular Affairs, has experienced and successfully dealt with the political status of noncontiguous areas ranging from sovereign independence, in the case of the Philippines, through commonwealth status to statehood.

As I have previously mentioned the situation in the Trust Territory is uniquely different in that it is not a territory of the United States. This area is administered by the United States under a trusteeship agreement with the Security Council of the United Nations. Under this agreement as administering authority the United States has undertaken to promote the economic, educational, social, and political advancement of the people of the Trust Territory of the Pacific Islands.

The area of the trust territory approximates the size of the continental United States, involving 2,141 islands and atolls in the Western Pacific Ocean of which 97 are inhabited, having a population of approximately 92,000 people.

Upon execution of the Trusteeship Agreement the civil administration of this area was entrusted to the Secretary of the Navy and remained so until 1962, when by Executive order, the responsibility for administering the trust territory was vested in the Secretary of the Interior. During this period, Congress has provided for the continuance of the civil government in the trust territory by increasing the appropriation authorization from a level of $4,271,000 in 1952 to $50,000,000 in fiscal year 1970 and 1971.

Since 1965 with the establishment of the Congress of Micronesia, a bicameral legislative body of popularly elected Micronesians and with the substantial increase in authorized appropriations for continuance of the civil government in the trust territory in 1967, there has been significant progress in the educational, social, and political advancement of the people of the trust territory. The progress in these areas has been remarkable considering the level of appropriation. And, with this progress came the age of enlightenment to the Micronesian people. The result has been an awakening and awareness on behalf of the Micronesian people to the complex problems of providing adequate public works, buildings, and facilities throughout the trust territory, of establishing and changing the economic structure from a barter to a money economy throughout the trust territory. And, in this growing awareness has come the political desire for more self-government.

The primary responsibility for administering the trust territory has been and remains today, an executive branch responsibility. Congress has continually and since 1962, the Subcommittee on Territorial and Insular Affairs, has kept abreast of the economic, educational, social, and political advancement of the Trust Territory of the Pacific Islands. My subcommittee has constantly sought greater performance from the executive branch in its administration of these islands, particularly in the areas of public works and economic development. At the same time, the subcommittee has been acutely aware of the growing political expressions in the trust territory and has continually sought the executive branch position on the question of political status for the trust territory.

Let me make it abundantly clear that the executive branch has not as yet come forth with its position on the political status question. And, it should also be clearly understood that the executive branch has been unable to coordinate such a position among the executive departments involved.

The House Committee on Interior and Insular Affairs has consistently taken the posture that the executive departments involved, State, Interior, and Defense, should present a unified position on the question of political status to the Congress in order that Congress through the House Committee on Interior and Insular Affairs can take that position or alternatives to the people of the trust territory.

Because the executive departments were not able to agree on such a position or the alternatives, they fostered an executive communication during the 89th and 90th Congresses which was introduced by the gentleman from New York (Mr. BINGHAM) to establish a Commission on the Future Political Status of the Trust Territory of the Pacific Islands. To those of us who have been closely involved with the administration of the trust territory, it is clear that this executive communication was and is requesting the Congress to take the responsibility for making a decision which is properly the function of the executive branch of Government. In this instance the executive branch chose not to rely on the axiom of the executive proposes and the legislature disposes. The Status Commission proposal is merely a ruse for the executive departments to avoid their responsibility.

Since January, the Nixon administration has constantly been made aware of our committee's willingness and desire to deal with the political status question concerning the Trust Territory of the Pacific Islands. We have asked that legislation on this question be sent to the Congress. We are aware of the work being done to formulate this legislation both here in Washington and in the Trust Territory of the Pacific Islands. We are not aware from the reports to our committee or from members of the committee who have been to the trust territory this year or from the Department of the Interior of any "potential crisis."

On the contrary, the reports to our committee show that the report of the Micronesian Future Political Status

Commission has not been adopted by the Congress of Micronesia or the people of the trust territory. Reports to our committee also indicate that the members of the Micronesian Future Political Status Commission are not unanimous in their decision regarding the future political status of Micronesia. Moreover, the reports to our committee concerning the most recent discussions with the members of the Micronesian Future Political Status Commission, here in Washington, D.C., concerning their future political status, is that the discussions were recessed by the Micronesians in order to return home and further discuss the question before a decision is made.

From these reports, and the constant surveillance and experience of the members of the House Committee on Interior and Insular Affairs in this question, I see no reason for alarm or fear of a potential crisis for this Nation in its administration of the Trust Territory of the Pacific Islands.

Mr. Speaker, I rise also to respond in part to the valuable contribution which has been made by my colleague, the gentleman from New York (Mr. BINGHAM) with reference to this problem. However, I would like to add this addendum to what I have previously covered. That is, I would not like my colleagues in reading the RECORD to be totally convinced that in our deliberations in regard to the Trust Territory of the Pacific Islands that we will have to in a sense get approval or have at all times and in any event the understanding and guidance of other nations with regard to our actions there. The unique document which gives us the strategic Trust Territory of Micronesia permits this wide latitude in our operations in this area. It was wisely drawn to have that effect. It is a fact that if we desire to do so we could hold a referendum there and suggest various forms of associations, or the people could suggest various forms of associations with us. We could work out a form of association on the part of Micronesia and, in fact, one of our colleagues, the gentleman from Washington (Mr. MEEDS), has a bill which, if enacted, would do this.

But just to complete the record, and make it entirely accurate, I would like to make it perfectly clear at this time that with regard to the document under which we hold the strategic trust we can follow a number of options with regard to the eventual disposition of this area in the interest of its inhabitants and in our national interest, and we should not have to have the approval or any kind of understanding with any other nation to effectuate that possible development.

Mr. Speaker, I yield back the balance of my time.

QUESTIONING MIDDLE EAST FOREIGN POLICY

The SPEAKER pro tempore (Mr. PRICE of Illinois). Under a previous order of the House, the gentleman from New York (Mr. FISH) is recognized for 20 minutes.

Mr. FISH. Mr. Speaker, last Sunday, December 14, I had an opportunity to speak before the B'nai B'rith of the city of Poughkeepsie, in my district, to give in effect a wrap-up of the first session of the 91st Congress, dealing with changes in direction both in domestic and foreign policies. With regard to the foreign policy portion of my remarks, I said:

In Foreign Affairs too there is a change. President Nixon in his Inaugural Address stated that we were moving from a period of confrontation to one of negotiation. The start of the long delayed S.A.L.T. (Strategic Arms Limitation Talk) talks is one indication of this new move. Vietnam is another. President Nixon has instituted two major changes in the policy which has dominated activity in that part of the world for over 10 years. He is conducting a phased troop withdrawal, not dependent upon what happens at the Paris Peace Talks, and had de-escalated from a policy of maximum military pressure to one of protective reaction to enemy attack. I have been among the backers of this policy.

One reason I have favored the President's position is because of the realization that our foreign policy is largely of a piece. A retrenchment and realignment in Vietnam is essential, and even if gradual will cause major adjustments elsewhere. Precipitous flight could, I believe, lead to a total deterioration of the credibility of our position in every area of contention. Even now, in spite of the Administration's policy of gradual but steady withdrawal, I believe signs of change—deterioration if you will—can already be observed.

In a speech last Tuesday night before the 1969 Galaxy Conference on Adult Education, Secretary of State William Rogers spelled out this country's position on the Middle East—a position which I confess I find perplexing.

At the start of the four power talks—which broke down and gave way to the bi-lateral talks between the Soviet Union and the United States—there was a clear pledge by the Administration that Israel's vital interests would be preserved—and that the four power talks would not lead to a sell-out of Israel. In May it was the position of our Administration that withdrawal of Israeli-occupied Arab lands must occur only with mutual consent of the parties directly involved, based upon a face-to-face settlement involving recognized, definable and just boundaries. These were our stated objectives in May.

Following the first announcement by the U.S. of what appeared to be a softening of the U.S. position on the Middle East, America was strongly denounced by Nasser. The December 9 speech by Secretary Rogers, proposed as a base for negotiations a pull back by Israel to its pre-1967 boundaries, plus joint Israeli-Jordan control of Jerusalem. Following this the Soviet Union stated that they too wished peace—although there was no indication of any Arab concession such as recognizing the right of Israel to exist—but added they were continuing their program of arming the Arab countries.

The Rogers' policy statement is too new to be fully clear, but as one who joined a Sense of Congress resolution in January of 1969, opposing the one-sided condemnation of Israel by the United Nations; as one who joined with a clear majority of the Congress on the occasion of Israel's 21st birthday, in which the Congress reaffirmed its conviction that peace could come only through direct Arab-Israel negotiations, I must view the recent statement by our Secretary of State with a great deal of concern.

Mr. Speaker, I must confess that I do not know why our Secretary of State chose in the first place to make a public statement such as his December 9 speech. It was obvious that the conditions set forth would be shot down not only by the Arabs and Israelis, but by the Soviet Union as well. Unfortunately the political realities of such a pronouncement and the reactions to it are to harden the positions of the respective parties and make it almost impossible for them to move in the direction of the concept proposed.

Aside from this, Mr. Speaker, I think it would be well for us to recall the language of the declaration signed by a clear majority of both the House and the Senate, which stated: "The United States should oppose all pressures upon Israel to withdraw prematurely and unconditionally from any of the territories which Israel now administers." Clearly, this declaration by the Congress is at odds with the recently stated policy of our State Department.

Mr. Speaker, the realities of the Middle East today involve matters that are not easy for U.S. policy to resolve. They include Arab intransigence, and adherence to a myth that Israel does not exist. They include the open support and sanctuary by Arab States of terrorist bands whose strength and influence has grown alarmingly. They include the fact that the Soviet Union stands to gain from the subjugation of the State of Israel the century-old dream of the Czarist regimes of a sphere of influence in North Africa, the Middle East and the gateway to the Indian Ocean. More important, Mr. Speaker, is the fact that the vital interests of the United States are at stake in this region. It is in the interests of our national security that an independent, viable, secure Israel exist in the Middle East.

In the light of these realities, it seems to me only prudent and consistent that the United States, while working toward direct negotiations between Israel and the Arabs of their disputes, should assist militarily and with economic assistance our friends in the Middle East. We have this opportunity now to respond affirmatively to the requests by Israel Prime Minister Golda Meir. These are: A further commitment to sell Phantom jets and other aircraft to counter the continuing Soviet buildup of Arab strength and, secondly, the request for financial assistance in the form of long-term loans to finance defense purchases.

MAINTENANCE OF U.S. SOVEREIGNTY AND JURISDICTION OVER PANAMA CANAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. PRICE) is recognized for 5 minutes.

Mr. PRICE of Texas. Mr. Speaker, in recent months certain elements in the Republic of Panama have renewed their attack on the jurisdiction of the United States over the Panama Canal and the Canal Zone. I believe the Congress has the clear responsibility to take whatever legislative action it deems necessary to insure that the United States retains its rightful sovereignty over both the canal and the Canal Zone.

In my view, the interest of the House of Representatives on this issue should

be clearly registered and forcefully stated by the adoption of a resolution expressing the American people's desire that the United States maintain its sovereign jurisdiction over the canal and the Canal Zone. To facilitate matters, I am today introducing a resolution which spells out what I think is the continuing interest, and the position of this country and the American people on this issue.

Our involvement in the Panama Canal has deep historical roots. In 1903, the United States and the Republic of Panama entered into a treaty to insure the construction across the isthmus of a ship canal of Panama, which would connect the Atlantic and the Pacific Oceans. Under the terms of that treaty, the Republic of Panama granted for all time to the United States, the full use, occupation, and control of a zone of land in the Isthmus of Panama and certain underwater land for the construction, maintenance, operation, and protection of the Panama Canal. The Republic of Panama also granted to the United States exclusive jurisdiction over the canal area and the Canal Zone. In return, the United States gave Panama what has amounted to almost $12 million; plus, we have invested almost $5 billion in the canal and the Canal Zone.

Through the years, the Panama Canal has grown in importance to the United States. It provides our shipping industry a vital commercial link to world markets. It opens foreign trade doors for our Nation. Approximately 70 percent of all canal traffic originates or terminates in U.S. ports. In this connection, canal operations net us more than $40 million annually, a substantial bonus for U.S. balance of payments.

The Panama Canal also constitutes a vital strategic asset for both national and hemispheric defense. Without free access to and full use of the canal, the flexibility and responsiveness of our water-based military forces would be dealt a severe blow. In addition, any disruption in canal operations would reduce the flow of foreign strategic materials that are normally supplied to the United States by way of the isthmus passage.

Mr. Speaker, in spite of the economic and strategic importance of the Panama Canal, representatives of the United States acting under the auspices of previous Democrat administrations have negotiated with Panamanian representatives three new treaties concerning U.S. rights in Panama. If these three treaties are ratified, certain changes will be made that will be clearly contrary to our national interest. Chief among them are:

First. Our original treaty with the Republic of Panama would be nullified. This would invalidate the rights, power, and authority that the United States has in Panama.

Second. A weak and perhaps inefficient form of international administration would be substituted for present U.S. control over the Canal Zone.

Third. U.S. ability to defend the canal in times of crisis, or to otherwise insure its security would be severely compromised.

Fourth. The United States would be forced to abandon both the $5 billion in capital investment it presently has in the Canal Zone; plus, we would lose the $40 million balance-of-payments bonus we receive each year from canal operations.

Fifth. The United States would be forced to renounce its sovereign jurisdiction over the canal and give exclusive rights to the canal to the Republic on or before the last day of this century.

Sixth. The United States would be entitled to construct, at its own expense, a second "sea-level" canal across the isthmus. Within 60 years after the opening of such a canal, all ownership rights would have to accrue without charge to the Republic of Panama.

Mr. Speaker, I believe that these changes would strike a mortal blow to our national interest in the Panama Canal and the Canal Zone. I believe further that my views are shared by a majority of my colleagues and the American people. The resolution I am introducing today will provide us all with an opportunity to formally, forcefully, and directly register our views on this vital matter.

I request permission to have the resolution printed in the RECORD at this point.

The resolution follows:

RESOLUTION

Whereas it is the policy of the House of Representatives and the desire of the people of the United States that the United States maintain its sovereignty and jurisdiction over the Panama Canal Zone; and

Whereas under the Hay-Pauncefote Treaty of 1901 between Great Britain and the United States, the United States adopted the principles of the Convention of Constantinople of 1888 as the rules for the operation, regulation, and management of said canal; and

Whereas by the terms of the Ha-Bunau-Varilla Treaty of 1903, between the Republic of Panama and the United States, under the authority of the perpetuity of use, occupation, control, construction, maintenance, operation, sanitation and protection for said canal was granted to the United States; and

Whereas the United States has paid the Republic of Panama almost $50,000,000 in the form of a gratuity; and

Whereas the United States has made an aggregate investment in said canal in an amount of over $5,000,000,000; and

Whereas said investment or any part thereof could never be recovered in the event of Panamanian seizure or United States abandonment; and

Whereas under Article IV, Section 3, Clause 2 of the United States Constitution, the power to dispose of territory or other property of the United States is specifically vested in the Congress; and

Whereas 70 per centum of the Canal Zone traffic either originates or terminates in United States ports; and

Whereas said canal is of vital strategic importance and imperative to the hemispheric defense and to the security of the United States; and

Whereas, during the preceding administration, the United States conducted negotiations with the Republic of Panama which resulted in a proposed treaty under the terms of which the United States would shortly relinquish its control over the Canal; and

Whereas there is reason to believe that the present dictatorship in control of the Government of Panama seeks to renew negotiations with the United States looking toward a similar treaty; and

Whereas the present study being conducted by the Atlantic-Pacific Interoceanic Canal Study Commission may result in a decision to utilize the present canal as a part of a new sea level canal; and

Whereas any action looking toward an agreement with the Government of Panama which would affect the interest of the United States in the Canal would be premature prior to the submission of the report of the Commission in any event;

Resolved by the House of Representatives, that it is the sense of the House of Representatives that the Government of the United States maintain and protect its sovereign rights and jurisdiction over said canal and that the United States Government in no way forfeit, cede, negotiate, or transfer any of these sovereign rights or jurisdiction to any other sovereign nation or to any international organization.

TAKE PRIDE IN AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. MILLER) is recognized for 5 minutes.

Mr. MILLER of Ohio. Mr. Speaker, in 1967 civil aviation miles flown in the United States totaled 1,833,598,000—well over one-half of the world figure of 3,287,200,000.

NINETY-FIRST CONGRESS, FIRST SESSION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. WILLIAMS) is recognized for 10 minutes.

Mr. WILLIAMS. Mr. Speaker, the first session of the 91st Congress moved toward adjournment in a flurry of activity inspired by the Democratic congressional leadership's efforts to take the sting out of President Nixon's charges that they had dragged their feet on many of his more meaningful legislative proposals, particularly in the domestic area.

My participation in this session was as active as in the previous sessions in which I have been privileged to represent the people of the Seventh District of Pennsylania. As this is written, my attendance record was 95.46 percent. I responded to 315 quorum and record votes out of 330. My prime effort, at all times, is to serve, conscientiously and diligently, the people of this district in an effort to solve all problems encountered at the Federal level. To do this effectively, I return to Delaware County almost every weekend and see constituents.

Letters are the best way in which to contact me when you have a problem, inquiry, request, or criticism. Letters give me a written record for my files and help to avoid errors.

VIETNAM DEESCALATION

President Nixon's determination to systematically reduce U.S. troop participation and to turn the military responsibility for the war over to the South Vietnamese continues despite substantially increased North Vietnamese infiltration.

Five months after his decision to withdraw the first 25,000 troops, and 3 months after his decision to withdraw another 35,000 by December 15, Mr. Nixon, that day, announced that he would withdraw another 50,000 by April 15, 1970. That meant that, by April 15, he shall have

withdrawn a total of more than 110,000 men.

This meant, further, that during his first 11 months in office, Mr. Nixon had dramatically reversed the tide of military acceleration which he inherited by reducing authorized U.S. troop strength from 549,000 on his inauguration day to 489,000 by December 15, with the promise of reducing that to less than 439,000 by next April 15.

There is no doubt that President Nixon is accomplishing that which all Americans desire; namely, the disengagement of U.S. troops from the Vietnam war. Some may disagree with his timetable, but none can disagree with the fact that he is successfully achieving his objective.

As the President put it on December 15:

> This reduction in our forces is another orderly step in our plan for peace in Vietnam . . . I shall not be satisfied until we achieve the goal we all want—an end to the war on a just and lasting basis.

SOCIAL SECURITY BENEFITS

On December 15, the House passed, with my support, a bill providing a 15-percent increase in social security benefits.

Earlier, President Nixon, who had proposed a 10-percent increase in social security benefits, had indicated that he would not veto a 15-percent increase if it reached his desk as legislation separate from tax reform. And Senate leaders had indicated that they were amenable to that proposition.

This 15-percent increase means that the approximate 25 million people benefiting from social security payments can enjoy a more adequate standard of living. These include such people as our senior citizens, widows with minor children and disabled workers.

FOREIGN AID

After World War II, the United States started a foreign aid program to help those nations ravished by war. To date, this program has cost us over $182 billion. This program has been a major factor in running our national debt up to over $360 billion with an annual interest payment of $16.7 billion. This means that our national debt is now over $57 billion more than the combined debt of all other nations. These huge expenditures for foreign aid have created a deficit in our balance of payments and have been a major cause of inflation.

It is long past the time when the money we are devoting to foreign aid should be used right here at home. This is why I voted against the Foreign Aid bill which, on December 9, squeaked through the House by the slim margin of 200 to 195. The new budget requests in the first 6 months of this calendar year totaled more than $10 billion for foreign assistance in the form of loans, grants and credits. I believe the original purpose of foreign aid has been more than fulfilled.

ANTIPOVERTY PROGRAM

There is much evidence that the so-called antipoverty program is a gigantic failure. Billions of dollars have been spent on this program. Much of this money has been spent for large salaries in top-heavy administration. The job training and educational programs have been inefficient and have not produced results. Under this program the impoverished people have received little actual assistance.

I have voted for many Federal expenditures that actually helped people. I have voted for increased expenditures for food stamps, low cost housing, job training under the Department of Labor, better education at all levels, improved health services, and other worthy programs.

Due to the ineffectiveness of the antipoverty program, on December 12 I voted against the bill to extend the life of the Office of Economic Opportunity which conducts this program.

DISTRICT OF COLUMBIA CRIME BILLS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. HOGAN) is recognized for 60 minutes.

Mr. HOGAN. Mr. Speaker, I doubt if there is any Member of the House who is not intensely concerned about the crime situation in the Nation's Capital. The overwhelming vote today to augment the law-enforcement forces in the Capital City indicates this concern. To our increasing alarm we have noted a steadily increased rate of crime here.

The FBI's Uniform Crime Report released December 12 showing crimes in the District of Columbia for the first 9 months of 1969 compared with the first 9 months of 1968 highlight the problem:

	Murder, non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary, breaking or entering	Larceny $50 and over	Auto theft
Washington, D.C.:							
1968	128	183	5,633	2,316	13,350	5,503	8,219
1969	200	259	8,656	2,687	16,367	8,345	8,115

President Nixon, on January 31, 1969, made the Washington crime problem the subject of one of his very first messages to Congress. Later the Attorney General offered for our consideration various legislative proposals responding to the District of Columbia crime problem. I was very pleased to cosponsor these bills. These and other anticrime bills are pending before subcommittees of the House District of Columbia Committee under the chairmanship of the gentleman from Mississippi (Mr. ABERNETHY) and the gentleman from Texas (Mr. DOWDY).

I am highly pleased to have the opportunity to be serving on these two subcommittees.

As a freshman member of the District Committee, it has been deeply gratifying to me that the distinguished chairman of the committee, the gentleman from South Carolina (Mr. MCMILLAN) and the distinguished minority leader of the committee, the gentleman from Minnesota (Mr. NELSEN), have allowed me to participate actively in the crime bills before the committee.

On October 3, I summarized some of these bills and I will not repeat the arguments made at that time in support of these bills. I will, however, briefly describe them.

These bills deal with court reorganization, bail reform, strengthening the bail agency, a public defender system, and creation of a new code of juvenile procedure for the District of Columbia.

I was pleased to cosponsor with the gentleman from Maryland (Mr. GUDE) and the gentleman from Virginia (Mr. BROYHILL) a bill to create an interstate compact on juveniles. This bill has been approved by the House and is pending in the other body.

Today, I have introduced six additional crime bills and I have asked for this opportunity to explain these proposals and why I feel their enactment is important.

H.R. 15339 would amend the law to cover imitations of guns as well as actual guns for premium punishment when committing a crime when armed.

On December 27, 1967, Congress amended the District of Columbia Code, section 22–3202, to provide that a person who commits a "crime of violence when armed with or having readily available, any pistol or other firearm, or other dangerous or deadly weapon" may, in the discretion of the sentencing judge, receive an additional term of imprisonment "up to life." The statute as amended reads as follows:

> If any person shall commit a crime of violence in the District of Columbia when armed with or having readily available any pistol or other firearm, or other dangerous or deadly weapon, including but not limited to, sawed-off shotgun, shotgun, machinegun, rifle, dirk, bowie knife, butcher knife, switchblade knife, razor, blackjack, billy, metallic or other false knuckles, he may in addition to the punishment provided for the crime be punished by imprisonment for an indeterminate number of years up to life as determined by the court. If a person is convicted more than once of having committed a crime of violence in the District of Columbia when armed with or having readily available any pistol or other firearms, or other dangerous or deadly weapon, including but not limited to, sawed-off shotgun, shotgun, machinegun, rifle, dirk, bowie knife, butcher knife, switchblade knife, razor, blackjack, billy, metallic or other false knuckles, then, notwithstanding any other provision of law, the court shall not suspend his sentence or give him a probationary sentence.

The statute was designed to deter the increasing number of armed crimes in the District of Columbia by providing the sentencing judge with discretion to impose life sentences for those who frightened their victims with a weapon. In applying this statute, however, one significant problem has arisen in cases where the gun used in a crime of violence is not recovered. A majority of the robbery cases in the District of Columbia involve defendants who are arrested at least several days subsequent to the crime on an arrest warrant obtained after a photographic identification is made. Generally, in these cases, the gun used in the robbery is not recovered. The prob-

lem then arises whether the defendant can be charged and convicted of armed robbery under the District of Columbia Code, section 22–3202. In most of these cases, the Government can produce the victim who will testify that the robber had a weapon that looked like a pistol; however, the Government will be unable to show that the pistol was real, operable, and loaded—not an imitation or blank pistol. The statute is silent on these types of cases.

There is a substantial question whether the District of Columbia Code, section 23–3202 covers cases where the Government cannot show that the unrecovered gun was real, operable and loaded. Of course, the Government can argue first, that if the unrecovered gun looked like a pistol to the victim and was used as an aid to the robber in perpetrating the robbery, then a prima facie case is made out and the issue of whether the unrecovered pistol is a "pistol" under the statute should be submitted to the jury, and second, that the unrecovered pistol is an "other dangerous or deadly weapon" because it could be used to "pistol whip" a victim much like a blackjack, a billy or metal knuckles which are specifically enumerated in the statute. However, the problem still remains in interpreting the statute with respect to unrecovered guns.

Since the majority of robbery cases in the District involve unrecovered guns, the significance of the problem is maximum. If the District of Columbia is to get the full benefits of the District of Columbia Code, section 22–3202, it is necessary for Congress to clarify the statute to alleviate the problem discussed herein.

It makes little difference to the victim of a rape or robbery that subsequent to the crime it is determined that the weapon used was an imitation or blank pistol. At the time of the rape or robbery, the victim feared being shot or beaten with the weapon. That fear is not diminished by what is subsequently learned. In order to give the citizens of the District the protection they deserve, the proposed amendment to the District of Columbia Code, section 22–3202 is necessary.

The existing District of Columbia Code, section 22–3213 provides:

> This chapter shall not apply to toy or antique pistols unsuitable for use as firearms.

The proposed amendment to District of Columbia Code, section 22–3202, in my bill H.R. 15339 would modify section 22–3213 in its application to section 22–3202.

One of these bills, H.R. 15340, would allow evidence of prior convictions to be introduced to impeach the credibility of a witness.

The Luck doctrine of the U.S. Court of Appeals for the District of Columbia circuit provides that trial judges have discretion to limit or ban impeachment of a witness's credibility through introduction of prior convictions where, as the court said:

> The cause of truth would be helped more by letting the jury hear the defendant's story than by the defendant's forgoing that opportunity because of the fear of prejudice founded upon a prior conviction.

My bill would allow the prosecution to introduce prior convictions to impeach a witness' credibility. In other words, it would undo the obstacle which the Luck doctrine places in the way of the prosecution.

Convictions which carry a penalty of 1 year or more would be admissible as would any conviction relating to dishonesty or false statement, regardless of the term of imprisonment.

To give an advantage to rehabilitated individuals, however, evidence of a conviction would be inadmissible if a period of more than 10 years has elapsed since the expiration of the term of punishment.

Another of these bills, H.R. 15341, would amend certain provisions of the criminal law in the District of Columbia relating to rape. It would allow a judge to sentence a person convicted of rape to any term of years or for life. For so-called statutory rape, the sentence would be up to 30 years.

Presently, the District of Columbia Code provides that—

> Whoever has carnal knowledge of a female forcibly and against her will, or carnally knows and abuses a female child under sixteen years of age, shall be imprisoned for not more than thirty years: *Provided*, That in any case of rape the jury may add to their verdict, if it be guilty, the words "with the death penalty," in which case the punishment shall be death by electrocution: *Provided further*, That if the jury fail to agree as to the punishment the verdict of guilty shall be received and the punishment shall be imprisonment as provided in this section.

On April 8, 1968, the U.S. Supreme Court in *United States* v. *Jackson*, 390 U.S. 570, ruled that a substantially identical death penalty provision in the Federal Kidnaping Act, 18 United States Code, section 1201(a), was unconstitutional since it placed an impermissible burden—the threat of the death penalty—on the exercise of a defendant's right to a jury trial and tended to coerce a defendant to either plead guilty or be tried without a jury. The United States has conceded that under Jackson the death penalty proviso of the District of Columbia Code, section 22–2801, is invalid—see Government's opposition to petition for extraordinary writ to restrain prosecution under the District of Columbia Code, section 22–2801, at 2, *Hill* v. *United States*, No. 21, 747, D.C. Cir., May 3, 1968. Thus, the maximum penalty that now can be imposed in the District of Columbia for rape is 30 years. In light of the fact that prior to Jackson the maximum sentence that could be imposed under the District of Columbia Code, section 22–2801, was death. I feel that the statute should be amended to allow the imposition of a life sentence in forcible rape cases.

H.R. 15342 would make it unlawful for a person to use force to resist an arrest by an individual he has reason to believe is a police officer whether or not such arrest is lawful.

Although there is no decision in the District of Columbia that squarely holds that a person may use force to resist an unlawful arrest, it is commonly thought that the early English rule which permitted a person to use force to resist an unlawful arrest prevails in the District of Columbia.

The modern rule has been recently succinctly articulated by the Superior Court of New Jersey:

> (A) private citizen may not use force to resist arrest by one he knows or has good reason to believe is an authorized police officer engaged in the performance of his duties, whether or not the arrest is illegal under the circumstances obtaining. *State* v. *Koonce*, 89 N.J. Super. 169, 184, 214 A. 2d 428, 436 (1965).

Both the Uniform Arrest Act and the Model Penal Code have also recognized the modern view of the law. Section 5 of the Uniform Arrest Act provides:

> If a person has reasonable ground to believe that he is being arrested by a peace officer, it is his duty to refrain from using force or any weapon in resisting arrest regardless of whether or not there is a legal basis for the arrest.

Section 3.04 of the Model Penal Code (official draft 1962) provides in pertinent part:

> (a) The use of force is not justifiable under this Section:
> (1) To resist an arrest which the actor knows is being made by a peace officer, although the arrest is unlawful; . . .

The modern rule that a person may not use force to resist an unlawful arrest is required by sound public policy:

> (A)n appropriate accommodation of society's interests in securing the right of individual liberty, maintenance of law enforcement, and prevention of death or serious injury not only of the participants in an arrest fracas but of innocent third persons, precludes tolerance of any formulation which validates an arrestee's resistance of a police officer with force merely because the arrest is ultimately adjudged to have been illegal. Force begets force, and escalation into bloodshed is a frequent probability. The right or wrong of an arrest is often a matter of close debate as to which even lawyers and judges may differ. In this era of constantly expanding legal protections of the rights of the accused in criminal proceedings, one deeming himself illegally arrested can reasonably be asked to submit peaceably to arrest by a police officer, and to take recourse in his legal remedies for regaining his liberty and defending the ensuing prosecution against him. At the same time, police officers attempting in good faith, although mistakenly, to perform their duties in effecting an arrest should be relieved of the threat of physical harm at the hands of the arrestee.
>
> * * * * *
>
> The concept of self-help is in decline. It is anti-social in an urbanized society. It is potentially dangerous to all involved. It is no longer necessary because of the legal remedies available. *State* v. *Koonce*, 89 N.J. Super. 169, 183–84, 214 A.2d 428, 435–436 (1965).

In today's urbanized society, there is no valid reason for a rule allowing the use of force to resist an unlawful arrest:

First. Today, one arrested and accused of a crime is taken immediately, after being processed by the police, before a commissioner or judge. Fed. R. Crim. P. 5(a). The person arrested is assured of a hearing with the advice of counsel. Fed. R. Crim. P. 5 (b) and (c). And the person arrested is entitled under the Bail Reform Act of 1966 to be released either on his own personal recognizance or subject to certain conditions to assure his court appearance—18 United States Code, section 3146.

Today, a person arrested need not fear the hardships that one might have endured during early English times when most arrests were made by private citizens. Then, long imprisonment could follow an illegal arrest because "bail for felonies was usually unattainable, and years might pass before the royal judges arrived for a jail delivery. Further, conditions in the English jails were then such that a prisoner had an excellent chance of dying of disease, or physical torture before trial"—Warner, the Uniform Arrest Act, 28 Va. L. Rev. 315, 330 (1942). Self-help was essential for the individual in days of yore because the processes of law were inadequate to protect him. Today, of course, this is no longer true.

Second. Today, because of modern firearms and other dangerous weapons, the possibility of serious injury to both the arresting police officer and the resister is great. "Today, every peace officer is armed with a pistol and has orders not to desist from making an arrest though there is forceful resistance"—Warner, supra, 28 Va. L. Rev. at 330. Accordingly, the resister will most likely not succeed in his attempt to escape and may suffer serious injury as a result. Successful resistance is usually only possible by shooting the officer or inflicting serious bodily harm on him. Usually, the result of an individual forcibly resisting arrest will be his failure to escape arrest and injuries to both him and the police officer.

Third. To permit the individual to forcibly resist an arrest on the basis of his judgment as to its legality is to permit him to act in folly. The individual is in no position to make an intelligent decision as to the legality of the arrest for "he cannot know what information, correct or incorrect, the officers may be acting upon." *United States* v. *Di Re*, 332 U.S. 581, 594 (1947). In those rare instances where resistance is actually being offered in the belief that the arrest is illegal, the resister is invariably only acting on the belief that he is innocent of the crime. But it is the difficult question of probable cause, not innocence or guilt, which determines the legality of an arrest. As District Judge Hart remarked in a recent case:

(T)he idea that every time a person is arrested, he can determine in his own mind whether there was probable cause for his arrest, a matter that the courts in this country, including the Supreme Court, spend months and months and months arguing about in given cases . . . and use all force arguing to resist the arrest is . . . perfectly absurd, and I don't believe it is the law. *United States* v. *Montgomery*, Cr. No. 1191–66, Tr. 50.

Fourth. Society's interest in protecting the entire community from the threat of physical harm also demands that an individual peacefully submits to an arrest, regardless of its legality. It is the street altercation between the police officer who is attempting to perform his duties and the individual who forcibly resists that, in our urban society, has increasingly become the springboard to general rioting. The report of the National Advisory Commission on Civil Disorders is sprinkled with examples of riots being ignited by individuals forcibly resisting arrest and assaulting police officers. See report of the National Advisory Commission on Civil Disorders, Chapter 1, "Profiles of Disorder," 1968:

The former rule [of allowing forcible resistance to illegal arrests] . . . [has] led to riots and violence by fostering a belief on the part of many people that they were the sole judges as to whether their arrest was or was not proper. (*People* v. *Burns*, 18 Cal. Rptr. 921, 922 (Super. Ct. App. Dept. 1962)).

We know of no valid reason for the antiquated doctrine allowing the use of force to resist an illegal arrest. As the late Judge Learned Hand stated:

The idea that you may resist peaceful arrest . . . because you are in debate about whether it is lawful or not, instead of going to the authorities which can determine, . . . [is] not a blow for liberty, but, on the contrary, a blow for attempted anarchy. 1958 Proceedings, American Law Institute, p. 254. Cited in *United States* v. *Heliczer*, 373 F. 2d 241, 246 n. 3 (2d Cir.), *cert. denied*, 388 U.S. 917 (1967).

Another of the bills I have introduced today, H.R. 15343, would amend the District of Columbia Code's burglary provisions to include parking meters, coin telephones, vending machine, money changer or other device which is designed to receive currency.

The loss from professionals who pilfer all types of coin-operated machines is enormous. National figures steadily rising amount to one-half percent of the gross sales from such machines.

Being professionals, they take just enough so that if they are caught, they will come under a petty larceny charge. These thieves are well-organized and some work this racket nationally with even keymaking machines in their vehicles.

My bills would make these offenses felonies.

One of these bills, H.R. 15350, would provide a presumption that sentences would run consecutively unless the judge specifies that they should run concurrently.

Under present law, in the absence of a specification of consecutiveness, multiple sentences operate concurrently, even if they are imposed at different times, at different places, for entirely unrelated criminal offenses. *Borum* v. *United States*, 409 F. 2d 433 (D.C. Cir. 1967), certiorari denied, 395 U.S. 916 (1969). Thus, if a judge imposing sentence for rape upon a defendant who has previously been sentenced for an unrelated housebreaking fails to state explicitly that the sentences are to run consecutively, either because of inadvertence or because he simply was unaware at the time of the prior conviction, the sentence for rape runs concurrently with the sentence previously imposed, the intention of the sentencing judge to the contrary notwithstanding. This has happened.

In Borum against United States, supra, the defendant, who had been recently convicted of two separate housebreakings and a robbery, was convicted of pistol whipping an 80-year-old occupant of a house and raping a visiting female neighbor. In imposing sentence, however, the judge by oversight failed to specify that it was to run consecutively to the sentences previously imposed, nor did he state that the sentence was to run concurrently. To clarify the record, he recalled the defendant only 5 days later, and explained that he had intended that the sentence he imposed should run consecutively to those the defendant was already serving and filed a commitment order to that effect. This order was reversed on appeal because the judge had failed to use the magic word "consecutively" when sentence was pronounced, and his silence on the issue required the sentences to run concurrently.

My bill is designed to prevent the reoccurrence of such an undesirable result by providing that a sentence for one offense is deemed to run consecutively to a sentence previously imposed for an unrelated offense unless the judge provides to the contrary. This proposal, moreover, is consistent with what should be the general rule. Concurrent sentences for unrelated criminal offenses have no deterrent effect whatsoever. This is particularly true for defendants who are arrested on strong evidence and released prior to trial under the Bail Reform Act of 1966. Aware that they will be convicted and imprisoned, but also aware of the current practice against imposing consecutive sentences should they again be arrested and convicted, there is absolutely no deterrent to their going on a spree of criminal activity, so as to be able to "eat, drink, and be merry" before imprisonment.

There may, of course, be instances in which a judge concludes that concurrent sentences would be in the best interest of society and the individual. My proposal would permit such a sentence. It only requires the judge to specify that the sentence run concurrently. Should he fail to do so, by oversight, this can be corrected because under present law a defendant can seek a reduction of sentence. It is only the prosecution which cannot seek an increase.

For offenses arising out of the same act or transaction, whether or not consecutive sentences may be imposed depends on the intent of Congress. Since Congress in enacting legislation rarely specifies its intent on this matter, the courts have long adhered to the rule that Congress did intend to permit consecutive sentences for offenses arising out of the same transaction when each offense "requires proof of a fact which the other does not"—*Blockburger* v. *United States*, 284 U.S. 299, 304 (1932); *Gore* v. *United States*, 357 U.S. 386 (1958); *Morgan* v. *Devine*, 237 U.S. 632 (1915).

Recent decisions by the U.S. Court of Appeals for the District of Columbia have retreated from this settled principle of law, however, by prohibiting consecutive sentences for offenses arising out of the same transaction in the absence of some plain indication of congressional intent. Since, as already explained, Congress rarely manifests its intent, the result is that the power of trial judges to impose consecutive sentences has been seriously circumscribed, even in cases involving brutal, serious offenses—see, for example, Smith against United States, decided on May 7, 1969 (D.C. Cir.), in which, though the defendants

assaulted their female victim with a curling iron and hammer and then threw her down a flight of stairs, the court refused to allow consecutive sentences to be imposed for convictions, under separate, independent provisions of law for assault with a dangerous weapon and assault with intent to kill. In other cases in which congressional intent was found not clear despite the offenses being defined in separate provisions, the court applied a so-called rule of lenity to resolve all ambiguities in favor of defendants and thereby prohibit consecutive sentences. *Ingram* v. *United States*, 353 F. 2d 872 (D.C. Cir. 1965); *Davenport* v. *United States*, 353 F. 2d 882 (D.C. Cir. 1965).

To obviate the need for the courts to flounder around searching for a legislative intent which is hardly ever expressed, my bill would clarify the legislative intent by codifying the long-established Supreme Court case law principle and permit a court, for offenses arising out of the same transaction, to impose consecutive sentences in its discretion when each offense requires proof of a fact which the other does not.

I hope these bills will receive expeditious attention and will be enacted into law.

This week, the House and Senate, in approving appropriations for the District of Columbia, included $150,000 to finance the Commission To Revise the District of Columbia Criminal Code. I am honored to have been appointed to this Commission, along with the distinguished gentleman from Texas (Mr. DOWDY), by the Speaker (Mr. MCCORMACK). I look forward to participating in the important work of this Commission now that it has at last been funded.

It is imperative that the Congress move with all deliberate speed in all areas of anticrime legislation.

I am optimistic that the House District of Columbia Committee, which has been laboring diligently for many months on anticrime legislation will bring to the floor early in the next session a broad spectrum omnibus crime bill to give added impetus to the war on crime in the Nation's Capital.

I hope that my colleagues in the House will give this legislation prompt and enthusiastic support.

ACCURATE PRESS COVERAGE ON THE NECESSITY FOR INVESTIGATION OF MYLAI

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. SIKES) is recognized for 30 minutes.

Mr. SIKES. Mr. Speaker, some American newspapers, and particularly some of the local press, have reached a new level of irresponsibility in their reporting of the Mylai tragedy and in their reporting of the actions of the Armed Services Committee of the House in trying to find the truth of that tragedy. Previously I have not spoken out on this issue. I have not taken and probably will not take any part in the investigation. But I must speak out when I see the press slandering a great committee and its chairman by alleging that the Armed Services Committee is going to cover up the Mylai case and that Chairman RIVERS has been pressured into burying the investigation.

The Washington Star on Saturday, December 13, in a front page story said that the Army had prevailed upon the House Armed Services Committee to call off its investigation of the Mylai massacre. The appointment of a special subcommittee under Representative F. EDWARD HÉBERT was described in another paper as "a graceful burial of the whole Mylai investigation."

The very unfair implication has been repeated that the Armed Services Committee is interested only in protecting the military and is attempting to cover up or whitewash the facts.

This is a grossly unjust attack on the reputation of this great committee.

The idea that the committee will cover up the Mylai story is a curious editorial conclusion, indeed, since it was only earlier this month the press disclosed that the Mylai matter was first brought to light by the actions of Chairman RIVERS of the Armed Services Committee. At that time, the papers quoted Representative UDALL, of Arizona, as saying that the Rivers intercession helped bring the case into public view.

Mr. HÉBERT has assured me that he will conduct a complete and thorough investigation of the Mylai incident and its implications as to the Army's command structure, and anyone who knows his great record as an investigator in the House can hardly doubt that he will succeed. There is not enough firepower in the whole U.S. Army to pressure F. EDWARD HÉBERT into burying a hearing or covering up the truth, and Chairman RIVERS knew that when he appointed Mr. HÉBERT to head this subcommittee.

It also requires a special pair of blinders to recent history to say that the Armed Services Committee under Chairman RIVERS is interested only in protecting the military leadership or covering up the facts.

Was it a coverup when the Armed Services Committee brilliantly exposed the shabby Army performance in the procurement of the M–16 rifle?

Was it a whitewash when the Armed Services Investigating Subcommittee conducted a searching probe and issued a searing report on the Army's "snafu" with the Sheridan tank?

Was it burying the facts when the committee exposed the Navy's errors in the sinking of the submarine *Guitarro?*

I could name many other cases where the Armed Services Committee through vigorous and forthright investigation has brought the services and the Department of Defense to task, bringing the truth to light and saving the taxpayers millions of dollars in the process. From its investigation of the *Pueblo* through its exposure of the fallacies in the Defense Department's cost reduction program and irregularities in the LOH helicopter program, the committee has established an unexcelled reputation for investigative excellence, and I cannot stand by and see that record besmirched or remain silent when grossly unfair charges are made against Chairman RIVERS, under whose leadership the record was made.

That distinguished record will be enhanced by the present investigation if the press will strive equally for accuracy and fairness. The confusion in some of the papers and the conflicting stories about this situation have been almost beyond belief.

I would point out to the Members of the House that the investigation by the Armed Services Committee is to date the only investigation of the Mylai situation not being conducted by an agency of the U.S. Army. There are many things that have been evaluated—including the Army's own capacity to investigate itself. It is right and proper for the Armed Services Committee of this House to conduct an inquiry. That investigation is only beginning. It will be a full and thorough investigation. It will be a long and detailed and arduous piece of work. And I think the American press owes it to the people and to those whose constitutional rights may be involved to avoid trying to make a three-ring circus of this investigation and to allow it to proceed with the dignity that so serious a problem deserves.

I think I can properly point to the fact that new information is beginning to reach the news columns which indicate the charges of a massacre at Mylai by American forces may have been grossly overexaggerated. The matter is now under detailed investigation and eventually the facts will be brought out. The case was first presented piecemeal and through random charges by individuals who are no longer in the service and it appears that some of them may have been prejudiced.

The essential facts are that Mylai has been a Communist center for years and that Vietcong living in and around the village have been a thorn in the side of American forces. It was decided to eliminate the village in order to get rid of the problem. There is no evidence that orders were ever issued to kill noncombatants. However, during the ensuing battle it appears that many noncombatants, including women and children, were killed. This, unfortunately, is a frequent occurrence in warfare in heavily populated areas, and it is not confined to Vietnam. Some of the Vietnamese probably were killed by ground forces as the village was overrun, but they were not necessarily killed intentionally. The majority may have been killed by bombs and artillery fire before the assault was begun by ground forces, although the attacks were timed to avoid such deaths. The incident is an extremely unfortunate one, and whatever part of it is true reflects no credit on American forces. However, it now appears there are two sides to the story. It is significant that such charges against U.S. forces are extremely rare. On the contrary, massacres are a usual procedure in Communist tactics but this unhappy situation does not seem to capture U.S. headlines. It is encouraging to note that friends of the U.S. armed services are fighting back and are attempting to insure that all of the facts are made known.

DEATH OF JOHN T. REARDON, OF WATERTOWN, CONN.

(Mr. MONAGAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous material.)

Mr. MONAGAN. Mr. Speaker, I am sorry to note the death of one of the outstanding citizens of the Waterbury metropolitan area and a warm personal friend of mine for many years, John T. Reardon of Watertown, Conn.

John Reardon lived a life of service. He gave himself completely and enthusiastically to his job as a teacher and to his voluntary work on behalf of the community of Watertown, the Waterbury area, and the State of Connecticut.

As head of the Taft School history department for 37 years, he was an inspiring and brilliant teacher through the years when the school had a preeminent place in secondary education in the Nation. As an active member of the Democratic Party, he was always willing to serve the community in important posts and his life of public service was eloquent proof of his belief that our democratic system requires active participation for its successful operation.

An active athlete when young, he played baseball with the late Joseph P. Kennedy, and it is interesting to note that the death of these two teammates at Boston Latin School came so close together.

In these days when our problems require the best efforts of our best men, Jack Reardon will be sorely missed. I grieve the loss of a true and constant friend.

The summary of Mr. Reardon's career, which appeared in the Hartford Courant of December 16, 1969, follows:

JOHN T. REARDON DIES; SERVED TAFT SCHOOL LONG

WATERTOWN.—John T. Reardon, 79, of 99 Nova Scotia Hill, retired head of the history department at Taft School from 1917 until 1954, died Sunday at Waterbury Hospital.

Mr. Reardon had long service on the Democratic Town Committee and for 15 years was a member of the Board of Education. He was president of the Watertown Golf Club and until Friday had been supervising plans for the club's expansion.

Three times Democratic candidate for the State Senate from the 32nd District, Mr. Reardon had been active in educational matters since his retirement from Taft.

He formed the Secondary School Society for International Cooperation and the Society for Educational Public Service.

He was a founder of the Connecticut Historical Association and was chairman of the Watertown Foundation scholarship committee and the Connecticut State Golf Association scholarship committee which has assisted 44 young men to attend college since 1954.

Born in Dorchester, Mass., Mr. Reardon lived 52 years in Watertown. He was graduated from Boston Latin School where he played baseball with the late Joseph P. Kennedy, and Dartmouth College, where he won the Tuck Fellowship for foreign study. After a year of graduate study at Yale, he took his masters at American Academy, Rome, Italy, where he won the Grand Prix de Rome.

He leaves his wife, Louise Brower Reardon of Watertown and a sister, Mrs. John Kenilley of Quincy, Mass.

The funeral will be today at St John's Church at 11 a.m. The Hickox Funeral Home, 195 Main St., is in charge of arrangements.

There will be no calling hours. Memorial contributions may be made to the Litchfield County University Club Scholarship fund.

GENERAL LEAVE TO EXTEND

Mr. MONAGAN. Mr. Speaker, I ask unanimous consent that all Members may be permitted to extend their remarks after my own on the subject on which I have spoken, and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

ADMINISTRATION MAKES SERIOUS ERROR IN ATTEMPTING TO DISMISS MORGENTHAU

(Mr. PATMAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PATMAN. Mr. Speaker, yesterday the White House announced that it planned to dismiss Robert Morgenthau as U.S. attorney for the southern district of New York.

Mr. Speaker, I am greatly distressed by this announcement. It is ill-timed and there is simply no reason for this action against such a great American and such an outstanding public official.

Mr. Speaker, today I issued a release criticizing the administration's action, particularly as it relates to our hearings on the secret foreign bank accounts.

Mr. Speaker, I place in the RECORD a copy of this release:

WASHINGTON, D.C., December 18.—Chairman Wright Patman today charged that President Nixon's attempted dismissal of United States Attorney Robert Morgenthau is a serious blow to the House Banking and Currency Committee's efforts to control the use of secret foreign bank accounts by criminal elements in this country.

"At the time of the White House's announcement, the Administration was surely aware that the Banking and Currency Committee is working closely with Mr. Morgenthau on hearings on legislation involving the secret accounts in foreign financial institutions," Mr. Patman said. It is incredible that the Administration would seek to dismiss Mr. Morgenthau under these circumstances."

Mr. Patman said that the move against Mr. Morgenthau "casts great doubt on the Administration's determination to fight organized crime."

"Mr. Morgenthau's record as a prosecutor and an investigator is unparalleled in the history of law enforcement and it is indeed sad that the Administration is seeking to remove such an outstanding public servant," the Texas Democrat said. "His work has been invaluable to the Banking and Currency Committee in its investigation of the secret numbered accounts."

Mr. Patman said that the Administration, after initially cooperating with the Banking and Currency Committee, has apparently turned its back on the problems of the secret foreign accounts. He said the Committee staff had consulted with Administration officials at all levels in an attempt to reach agreement on a legislative package which would control the use of secret foreign bank accounts by United States citizens for illegal purposes.

"Now the Administration has gone so far as to attempt to silence the U.S. Attorney most responsible for uncovering these illegal activities," Mr. Patman said.

Mr. Patman noted that the Treasury Department has reversed its previous assurances of support for the legislation and that the comments of other agencies of the Executive Branch have been suppressed and censored.

VIOLENCE, EXTORTION, AND BRIBERY—LIBERALS CANNOT WHITEWASH THEIR MISTAKES

(Mr. RARICK asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. RARICK. Mr. Speaker, the apologists for the incompetents in our society continue to blame all of the ills of poverty on the citizens who are supporting their families, all of the evils of crime and violence on the law-abiding and decent people of the country, and while loudly proclaiming their doctrine of absolute equality, just as loudly insist that a Negro child cannot learn if his schoolmate is another Negro, but only if he is seated next to a white child.

The Americans who are paying the bills for all of this kind of foolishness are awakening to the facts of life, and recognize that a number of the pitiful poverty-stricken are poverty-stricken simply because they feel they are too good to work, and would far rather spend the money given to them for wine than for food and clothing.

Americans are tired of the same sorry excuse that there is crime because of "conditions"—and that to relieve the crime waves, we should amend the criminal laws to make them more "relevant" to the times. For example, it is actually urged that the increase in the crime—I repeat, crime—of possession and use of marihuana, can be solved simply by repealing the criminal laws on the subject. This is tantamount to solving the terrible problem of crimes of violence in the District of Columbia by a quick repeal of the laws against armed robbery, kidnaping, and rape, or to solve the population explosion by just quit counting.

Taxpayers are sick and tired of contributing their own hard-earned money to feather the nests of the unproductive—let alone the destructive—portion of our population. The grant of more than $28 million of the taxes paid by honest Americans for the repair and reconstruction of the areas of the Nation's Capital burnt out in 1968 by the criminal element, the welfare hangers-on, and the looters and rioters, who go totally unpunished, is something that the people of my district are thoroughly disgusted about.

The necessity to triple the White House Police force for the protection of foreign embassies here in our Nation's Capital is a national disgrace in itself and points out that the present approach to crime has but encouraged more of the same.

The serious consideration of winter daylight saving time for Washington, because it is unsafe for female employees to return to their homes once the sun has set, would be unbelievable only a few years ago.

But the truth of the matter is that enforced equality always levels down, not up. And a further truth is that when blackmail and extortion are found to be profitable, criminals will continue to pursue that path rather than work.

Finally, in a related vein, the leftists and so-called liberals who have destroyed the Nation's Capital in less than 20 years, by making it a subsidized sanctuary for the unfit and the criminals—driving decent citizens to the suburbs—are now promoting the same thing for all of our cities, and to the balance of the countryside as well.

All the violence commissions and Kerner reports in the world—prepared by the liberals to confuse most Americans—will not prevent parents from doing what they know is necessary to safeguard the health and welfare of their children.

A case in point, and one for which the people of this country will no longer stand, is the murder of a 14-year-old Chicago schoolgirl, resisting an assault by Negroes on a moving bus.

The liberal-left are finding that verbose reports can no longer explain away their failures. When are they going to admit to their responsibility for the violence and lawlessness rampant in our country?

I include the following pertinent newsclippings in my remarks:

[From the Washington (D.C. Post, Dec. 14, 1969]

$28.1 MILLION GRANTED FOR AREAS IN RIOT

(By Anne Hebald)

Washington will receive an additional $28.1 million from the federal government to rebuild three of the city's corridors damaged in the April, 1968, riots.

Secretary of the Department of Housing and Urban Development George W. Romney announced the grant yesterday at groundbreaking ceremonies for the city's first apartment project that relies on a federal subsidy of mortgage interest rates to reduce rents.

The 108-unit building, on 7th Street NW between R and S Streets, will be the first low and moderate income housing to be built in any of the capital's riot-damaged corridors.

The $28.1 million grant, which Romney said was approved Friday, brings to a total of $57.8 million the amount allocated to Washington for urban redevelopment this year.

Earlier this year, HUD approved $29.7 million for the rebuilding of downtown Washington and the Shaw area.

The announcement took the crowd by surprise. After a moment of stunned shock, smiles broke out throughout the gathering.

Mayor Walter E. Washington was asked, after the ceremony, how he felt about the news of the additional $28.1 million. He beamed and said, "It's great, it's just great."

The estimated damages to real property in April 1968 were $4,257,216 in Shaw, $1,799,326 in the H Street NE. corridor and $6,647,119 on 14th Street NW.

Romney told an enthusiastic crowd of about 200 community residents that the new grant would be divided between the Shaw, H Street and 14th Street NE. corridors:

$4.2 million in Shaw.

$9.8 million in H Street.

$14.1 in 14th Street.

In Shaw, the approved plans for renewal cover 650 acres on which 15 sites have been chosen for new buildings. About 900 residential units are planned, as well as a new junior high school and public library.

Eight city blocks, which had been damaged but not demolished, are marked for rehabilitation. These blocks contain an estimated 850 dwelling units.

On H Street, about 280 acres will be included in the redevelopment area. Five new sites will be used for slightly more than 500 residential units.

The new construction is planned on lots now vacant and to replace buildings damaged in 1968. Two blocks containing about 200 existing but rundown residential units will be improved.

In the 14th Street N.W. corridor, the area most seriously damaged by the riots, which followed the assassination of Dr. Martin Luther King Jr., about 340 acres will be affected by renewal projects.

Bounded by Florida Avenue on the south, Spring Road on the north, 11th Street on the east and 15th and 16th Streets on the west, the first proposals call for building on 16 sites that would create between 800 and 1,000 new dwelling units.

COMMERCIAL SITES

In the 14th Street corridor, five commercial sites are envisioned: three near the intersection of 14th Street and Park Road, where a major community center has been proposed, and two at 14th and Belmont Road.

Four blocks in this corridor are marked for rehabilitation of existing buildings. These include about 850 residential units.

The three corridor rehabilitation plans are currently at three different stages of planning. The Shaw plan, which includes the site of yesterday's groundbreaking, has been formally approved by HUD.

The H Street plan will receive final HUD approval within the next week to ten days, Romney announced yesterday.

The 14th Street plan, however, has not yet been approved by the city. But it is assured of federal support once the District government submits a formal application, Romney said. A special meeting of the City Council is scheduled for Wednesday and adoption of the 14th Street plan is on the agenda.

As he stood bare-headed in the cold noontime sun, Romney said in his address, "Ordinarily it takes two years to go from RLA (the Redevelopment Land Agency) to groundbreaking. In this (Shaw) project," he said, "it's taken nine months and that's pretty good bureaucratic speed."

Romney recalled the day, last Jan. 31, when President Nixon, Mayor Washington and he visited damaged parts of 7th Street N.W. Following his tour of the riot-torn Shaw neighborhood, the President ordered, on April 8, a "new priority on rebuilding the riot-scarred neighborhood of America's major cities."

Two hundred million dollars was then promised for rebuilding the nation's cities.

PRESIDENT ASKS FUNDS FOR EMBASSY POLICE UNIT

President Nixon has asked Congress to provide a $4.75 million supplemental appropriation for the 1970 fiscal year to finance an adequate federal police force for protection of foreign diplomatic missions.

The appropriation would be contingent upon the passage of a bill authorizing the Executive Protective Service, which would be essentially an expansion of the White House police force.

The augmented force would protect foreign diplomatic missions as well as the White House.

The protection of foreign diplomatic missions will be under the direction of former Metropolitan Police Department Chief John B. Layton. The 33-year veteran of the police force resigned in May to accept a job as special assistant to the U.S. chief of protocol.

In a letter yesterday to the Senate, Nixon said such legislation is necessary because of "the inordinate number of complaints relating to crimes and disturbances directed against foreign missions and their personnel."

He said the responsibility for protecting foreign diplomatic missions—"a recognized obligation of a host government"—rightly belongs to the federal government.

In an accompanying letter, Budget Director Robert P. Mayo said the Metropolitan Police Department now provides protection for foreign diplomatic missions in Washington on an "actual need" basis. But he added that the local police department, "because of the many other demands being placed upon it, is finding itself unable to provide fully the protection required."

The new executive protective service would have as its nucleus the 274 members of the White House police. The proposed supplemental appropriation would finance the addition of 300 police officers during the remainder of this fiscal year and 95 Secret Service personnel.

For the 1971 fiscal year starting next July 1, the administration plan calls for an additional 214 police officers—making a total of 514 more than the present White House police force.

Statistics released yesterday by the Federal Bureau of Investigation point up the crime problem in the District. They show that crime in the District during the first nine months of this year increased more than 25 percent over the corresponding period last year.

Homicides in the District jumped 56 percent, according to the FBI figures, which also show an increase in forcible rapes, robberies, aggravated assaults, burglaries, and larcenies involving $50 or more.

IMPACT ON CRIME DEBATED—DAYLIGHT SAVING IN WINTER?

(By William Delaney)

On a darkened downtown sidewalk at 5:20 p.m., Mary Green anxiously scans the 12th Street traffic, hoping to see her husband's car.

"I just don't like going home in the dark," she says, shaking her head. "I think it's quite dangerous for most females."

Mrs. Green, a collector for Central Charge Service, is glad she had a direct ride home from work. If she took the bus, she'd have to walk three blocks from a 14th Street stop to her home on Missouri Avenue NW—past an area where she says a rape occurred in the early evening darkness last winter.

But, like most office workers in America's crime plagued cities, Mrs. Green has no choice but to go home in the dark during these midwinter evenings, when the sun sets before 5 p.m.

She hopes America will adopt daylight saving time in the winter, too.

She would "feel better," she says, if tonight's sunset came an hour later, at 5:48, with twilight lingering 15 or 20 minutes longer.

Mary Green's hope seems to be shared by a big majority of downtown Washington pedestrians,both women and men, according to a random survey conducted during a recent evening rush hour.

DISCUSSED AT WORK

"They all talk about it," said Dorothy Page, referring to her colleagues at the Food and Drug Administration.

Miss Page, an FDA science aide whose home on Luzon Street NW is two blocks from her bus stop, is a firm advocate of winter daylight time. "As long as I have to walk those two blocks in the darkness," she said, "I'd rather do it in the morning."

The reason such a proposal hasn't surfaced as a major public topic is understandable to District Police Chief Jerry V. Wilson.

Outside the nation's urban areas Wilson notes, "daylight time is politically unpopular" with many Americans, even on the April-to-October basis prescribed by the Uniform Time Act of 1966.

Farmers and other outdoor workers generally don't like it, because it keeps them at their jobs until late in the summer evenings.

WOULD "FEEL SAFER"

Most of the Washington area residents questioned by The Star based their support of winter daylight time on the reason cited by Mrs. Green. People would "feel safer," they said, if they didn't have to be on the streets after dark.

But some offered other reasons for favoring the change.

C. C. Segors of Hyattsville, a Post Office Department worker, argued that "it would speed up traffic" in the evenings, when the rush-hour flow seems less staggered than in the mornings.

A few of those polled, like Chesapeake & Potomac Telephone employee Nancy Stacy of Arlington, simply want to see an end to the confusion about which way to turn the clocks each spring and fall.

For these reasons, and to smooth the time difference with Continental Europe, Great Britain is now in the second winter of a three-year experiment with year-round daylight time.

A LITTLE MORE SUN

Interestingly, this gives Londoners a few more minutes of evening sun than Washingtonians now have, though London is 782 miles closer to the arctic and thus has an hour and a half less of winter daylight.

In Congress, the House Interstate and Foreign Commerce Committee has a handful of time-change bills, most of them from Midwestern congressmen who want to whittle down the present half year of daylight time to only the midsummer months.

One bill—H.R. 7587—proposes year-round daylight time. Introduced in February by Republican Craig Hosmer in behalf of his sun-loving California constituents, it is a poor bet to make it out of committee.

POLICE SKEPTICAL

Several top District police officials say they doubt whether pushing daylight an hour later would have any significant effect on either crime or traffic problems. Some, however, wouldn't mind seeing the idea tried, if only to make citizens feel a little more secure.

Chief Wilson, who says he can't recall hearing any discussion of the proposal, points out that winter daylight time might simply transfer the problems of darkness to the morning rush hour.

Capt. Ralph Stines, head of the Robbery Squad, thinks it's worth a try.

"The thieves just wait for the dark," he says, and police statistics tend to bear him out.

Last December, for example, robberies rose from a level of 90 an hour at 5 p.m. to a daily peak of 166 by 6 p.m.

In July, the evening surge started at 8 o'clock and peaked by 10, while in October the graph goes up between 7 and 8.

"DOUBLE DAYLIGHT"

William Katzenstein, who heads the police department's Operational Planning Division, thinks one benefit of pushing back the darkness might be to make police saturation patrols easier, by concentrating robberies in a shorter period.

"Personally," he says, "My ideal would be daylight saving time in the summer and an additional hour—double daylight—in the winter."

OBJECTIONS DISCOUNTED

The British experiment with year-round daylight time has been blamed for some loss of productivity in the construction industry, according to a spokesman for the British Embassy here. But over-all, he says, the objections to the changeover "weren't as great as had been anticipated."

The questions of it and when America will ever make such a changeover were perhaps best answered by Sandra Hagen of the D.C. Congress of Parents and Teachers, who said her organization would probably favor year-round daylight time if the idea ever came up for formal discussion.

"I think the reason people don't discuss it," she said, "is that they feel uneasy tampering with time."

THE NIGHTMARE OF D.C. SCHOOLS

(By Richard Starnes)

Enter the dirty, tombstone-colored building and you walk into a nightmare world where an aura of diffuse terror falls into step beside you.

There is a sound in the air that bespeaks Kafka's madhouse, a subdued keening, a wordless language that murmurs violence, despair, savagery and dread. The sound is an overture to hysteria, an obbligato written for the destruction of a society.

There are warders wherever you look, but it isn't a prison. There is the unmistakable stink of lunacy on the place, but it is not an asylum. Where you are is a public school. It might be any one of a hundred in Washington (or, perhaps, in any other American ghetto, circa 1969).

It may be unfair to single out one school, for its most awful crime is that it is fairly typical. This one happens to be Shaw Junior High, and it is a monument to an unprecedented epoch of murder, rape, extortion and fear that has all but destroyed the public school system in the nation's capital.

IN RIOT AREA

Shaw sits in the middle of Washington's "charcoal alley"—the central ghetto that was burned and pillaged in the riots of April, 1968. Because it is so typical of the disaster that has overtaken the public schools here it is worth a closer look. But it is a look that should be taken within this perspective:

The District of Columbia school system, in the words of its acting superintendent, has been "seriously crippled" by vandalism and thefts, security of children has reached "a horrible point," classroom intruders have posed a "severe" threat to education.

At Cardozo High School, 13th and Clifton streets nw, two to three purse snatchings occur in the school cafeteria every day, despite the fact that a policeman is on duty during school hours. Last winter at Cardozo an assistant principal was shot and killed by youths who robbed the school bank.

At Hart Junior High, 601 Mississippi-av se, the score since school opened in September is two burglaries, one safe cracking, 20 assaults, an equal number of cases of extortion, more than a score of lockers looted, and an undetermined amount of teaching equipment stolen or vandalized.

An epidemic of robbery, beating and extortion has created a reign of terror for children attending public schools in the area of Bolling Air Force Base and the U.S. Naval Station in southeast Washington. Mrs. Gladys Ford, president of the Military Parents Association, told authorities that career service men were quitting the military rather than expose their children to the jungle atmosphere. "Our children are being robbed and beaten every day," she said.

On the first day of school a Paul Junior High teacher was knocked unconscious. It was the third such episode in less than a year, and teachers threatened a march on the Capitol to demand protection.

In the Anacostia (far southeast) area of the city one girl was put on tranquilizers after young thugs tore off her shirtwaist and bra during a robbery.

Early this week at Anacostia High School (scene of a shootout with .45s last year) a pupil was shot and critically wounded in a washroom.

A class at Monroe Elementary School (725 Columbia road nw) was held at gunpoint just after the start of the current school year and a teacher's purse was looted of the $2 it contained.

A teacher at McFarland Junior High School (Iowa-av and Webster-st nw) told a Congressional inquiry two months ago that he spent most of his time as a jailer, cop and disciplinarian. Three weeks after school started this fall he was beaten up by five drunken youths who invaded his classroom and began over-turning desks. A policeman advised him to ". . . get yourself a club" if it happened again.

Since much of the violence comes from dropouts and truants most school officials try to restrict access to the school to pupils who are actually attending classes. This has led to the chaining and padlocking of all but one or two exits in a number of schools, a clear violation of the law that has alarmed Fire Department officials. Altho fire marshals have made representations to principals of the schools involved the practice has not stopped.

BLACKBOARD JUNGLE

A durable—almost heroic—first witness to this nightmare is Percy Ellis, principal of Shaw Junior High, a Negro who goes everywhere in his seedy old school at a dead run, who takes cheerless pride in telling it like it is, and who might make a fruitful source for some latter-day Gibbon recording the decline and fall of the American civilization. Mr. Ellis has a round, smooth face that mirrors tragedy, elation, moody reflection and ominous forboding with the quick fluency of a performer schooled in Chinese drama.

With the quick hands of a welterweight, Mr. Ellis intercepts a skinny black child who is sidling along a corridor.

"What are you doing with those rubber bands on your wrist?" he demands. "Take them off. Throw them in the waste basket."

With the expertise of an old cop he frisks the child, and then tells him to return to his home room. When the child is gone Mr. Ellis answers a question posed by a visitor naive in the ways of the blackboard jungle.

HALLWALKER

"Why did I take the rubber bands? Because I have two good eyes and I want to keep them. These hallwalkers use rubber bands as slingshots, and their ammunition is staples. We haven't had any eyes put out yet, and I'd like to keep it that way."

Another question elicits the information that a "hallwalker" is a youth—truant or dropout—who invades the school but does not attend classes.

In Mr. Ellis' office a tray of untouched lunch, a wilted sandwich and a sagging piece of cherry pie, bears additional witness that the principal of a District of Columbia public school has no more time for lunch than the master of a burning passenger vessel would.

But all this is prologue. The real message of archetypal Shaw is the ominous shadow of the future that it casts.

"Something happened six months ago," Mr. Ellis tells his visitor. "It became different, much more difficult, almost unmanagable." Three veteran women teachers have come to the principal's office now—women like those for whom the word "dedicated" first was coined—and in deference to them Mr. Ellis takes rare recourse to euphemism. "Since school started I've been called s.o.b. and m.f. more times than in all my 21 years in the schools before. They stop you in the halls and want to fight you. And it is going to get worse. Something is happening."

VOLATILE

One of the teachers, bright, articulate and (curiously, like so many others in the front line of Washington's school system) a chain smoker, takes up the dreadful hard kernel of the story.

"There is something unusually volatile about Shaw," she muses. "So often we have been the first wave of whatever is going to happen. Ten years ago it was gangs, and every boy wore the uniform jacket of his gang or club. Then, long before it began to happen elsewhere, the gangs disappeared at Shaw. After that, say two years ago, we began having fires . . ." The sentence hangs unfinished in the air, while everyone in the room is reminded that 20-odd months ago the riot fires consumed a great deal of the ghetto area around Shaw. "And now . . ." Again she lets her listeners complete the sentence themselves.

* * * be more than 25 per cent. Almost everyone agrees that one cause is a creaking, time-encrusted bureaucracy that is unable to deal with the explosive problems that confront it. While Congress, the city's perennial scapegoat, is not wholly blameless, a good case can be made that the bulk of the blame lies elsewhere.

Sen. William Proxmire, D-Wis., a member of the Appropriations Committee considering the school system's $185 million annual budget, recently offered figures to show that Washington was "right on top" in per capita expenditure per pupil. At $982 per year, according to Sen. Proxmire, the nation's capital compares favorably with Cleveland's $800, Boston's $885 and Atlanta's $772.

"HISTORY OF NEGLECT"

Benjamin J. Henley, the city's acting superintendent of schools (another worn-out chain smoker) is quick to admit the manifest ailments that afflict the schools, and cities "a long history of neglect" to explain them.

"We have urgent needs in employment, housing, education and health," he told a recent visitor to his top floor office in one of Washington's newest high rise buildings. "In the far southeast overcrowding is almost unbelievable. We need staff development—all of us need re-training."

Why the terribly physical toll on school buildings? Why more than $200,000 worth of broken windows in the schools every year?

"The schools represent the power structure," Mr. Henley replies slowly. "The schools are an agency to which people turned with hope, and it has not done what was hoped for. If we could handle the materials that are needed quickly enough, if we had a mechanism that really made teachers think that their feelings were being taken into account, if we could respond quickly to critical situations, morale could be helped measurably."

Now Shaw is a place of aimless violence, where hallwalkers sow terror, where burly assistant principals stand guard at doors and stairways, where little children are drilled in the safest method of reacting to extortion.

EXHAUSTION

Like chain smoking, exhaustion is another hallmark of the people who are trying to keep Washington's public schools from slipping the last inch into the inferno. At 5 p.m. it is dark outside, and the lurking shadows in the hallways contain a malignant promise that is enough to raise the hair on a veteran of Vietnam, Watts and other way-stations in our hard hat society. But Percy Ellis is still at it, explaining, preaching, like some despairing ancient mariner unwilling to miss an opportunity to tell a man from the other side what is happening here, where it is at.

"The (Teachers') union is responsible for a lot of this," he says. "This isn't a 9 to 5 job here. It takes dedication. Like those three great ladies who were here earlier. But we aren't getting that kind any more, we're getting a new breed. They won't take hall duty, which is the only thing that keeps us alive here. They won't offer that extra effort that is a minimum requirement here.

"We are trying to hold back disaster, and with them everything is a grievance. Two or three a week. Children in Shaw need self-respect, for example, and we know that a child's opinion of himself, his morale, is conditioned by his appearance. Until two or three months ago we had a necktie rule here; it was difficult to enforce, yes, but it was a valuable thing. But they made a grievance out of it, and we got orders from the superintendent's office to stop it. Things have gotten worse since."

RACIAL IMBALANCE

Not everyone who was interviewed during a week-long survey of the beleaguered Washington schools agreed that the Washington Teachers Union (WTU) was a major factor in the coming collapse of the system. But most agreed with Mr. Ellis about a number of other elements in the gathering disaster.

From a number of different vantage points, everyone alludes to the fact that integration has been a failure in Washington. The schools here are between 93 and 94 per cent black. Even busing, which is done to a limited extent, cannot redress the imbalance. Some experts (among them the voluble Percy Ellis) vow that no improvement can be expected until whites are somehow encouraged to return to the city. Others insist the problem is not one of race, but of poverty, and point to an unemployment rate among ghetto youths.

IMPROVE READING

Mr. Henley sighs ponderously and lights another cigaret. "If I could have one wish I would have every teacher given the skills needed to improve reading in our schools. We would reduce dropouts. We would convince the community that we are doing what we are supposed to be doing."

In spite of the bubbling of the volcano beneath him, Henley says he is convinced things are getting a little better. "Student unrest is lessening," he insists. "We've been thru two moratoriums this fall with no problems. We have had a championship football game without incident."

Not unexpectedly the Washington Teachers Union takes a somewhat different attitude toward the convulsion that has beset the school system. WTU President William Simons cautiously concedes "Yes, there is a problem. But nevertheless a learning program is going on for many children. The problem that does exist is a shortage of classroom facilities, too-large classes. The average is 35, it should be 25, and 20 for the very early grades."

(But again Shaw's tough-minded Percy Ellis: "Teacher-student ratios are meaningless. We have 1,300 enrolled in Shaw, and on an average day 20 per cent will be absent. Some classes might show as many as 45 on the books, but you visit the room and you'll find eight or 10 actually attending.")

DISCIPLINE

WTU defends its intervention in the great necktie dispute, calling a dress code "absolutely unnecessary." But it turns out that during contract negotiations for Washington's 8,000 teachers (of whom about half belong to WTU) the union opposed a dress code for teachers. "We could hardly oppose it for teachers and accept it for the children," a union spokesman said.

The next witness, is the Proxmire committee. "Whatever the problems of the District school system," a recent committee paper said, "the committee suggests that they are perhaps not wholly related to the present level of resources being committed to it.

"The children of the District of Columbia are entitled to better educational advantages than they are receiving. The schools have both the personnel and financial means to mold a system of public education second to none."

And at the locked and guarded door of Shaw, a final word from Principal Ellis:

"Discipline has vanished from the homes and from the schools. It is in fact now impossible to fire or transfer a teacher. And nothing can be accomplished without discipline. Above all else, we need discipline, discipline, discipline."

[From the Chicago Tribune, Dec. 6, 1969]

GIRL PUSHED TO DEATH FROM A MOVING BUS

Linda Cicero, 14, a sophomore at Siena High school, was pushed to her death from a moving bus at 3737 Chicago av. yesterday, apparently when two girls tried to rob her.

Witnesses said Linda, who lived at 3811 Division st., was shoved out of the exit door toward the rear of the Chicago transit authority bus. They said she was struggling with two Negro girls who had demanded that she give them money.

Maxwell street homicide detectives were questioning witnesses.

The driver of the bus, Alvin E. Johnsey, 28, of 737 N. Central av., said he saw in his rear view mirror as Linda fell out and the rear wheels of the bus ran over her. He pulled the bus to the curb immediately. The two Negro girls fled when the bus stopped.

The exit door had been opened by someone who pulled the emergency knob.

[From the Washington Daily News, Dec. 17, 1969]

VIOLENCE COMMISSION RAPPED

(By Samuel J. Taranto)

So who elected the ultra-liberals who make up the so called "Violence Commission." They have recently made the ridiculous request that Americans spend billions and billions of dollars to solve domestic problems after the Vietnam War because, for some reason, that is supposed to solve our problems and "allegedly" keep people from committing violent acts.

This reminds me of another ultra-liberal Commission known as the "Kerner Commission" which claimed the reason for urban riots was white racism.

It is an established fact that poor people are not committing the violent crimes in America, or anywhere for that matter. This old cliche is worn out and won't work anymore because we're not going to be fooled by this leftist propaganda.

You couldn't consider the assassins of the Kennedy brothers in a state of poverty. You couldn't consider the aircraft hijackers a bunch of "poverty stricken" people. Those hard-core militants who started urban riots are not from poor black families.

And observe the chaotic conditions on university campuses. Those are "white" revolutionaries from upper class families. In fact, most of the radical revolutionaries from the far left are from the high class and wealthy families. Many are sons and daughters of millionaires.

While President Nixon rode in the inaugural parade last January, "violent" type revolutionaries threw things at the President's car, obviously aiming to injure the President. Certainly they were not from poor families. They were, in fact, mostly students.

We accept the fact that the Mafia and the Cosa Nostra are violent organizations. Does the "Violence Commission" feel we should spend billions on the Mafia, so that they will allegedly "mellow?"

You can't expect to solve crime and violence by "bribing" and paying off criminals and crackpots. That is what the Violence Commission practically advocates. As a man from a "poor" background, I totally disagree with much of the philosophical thinking of

the Violence Commission. Let them come out here among the average people and see exactly what causes violence. They won't find the answer in their cozy offices. Besides all that, they are elected.

[From the Sunday Star, Dec. 14, 1969]

THE VIOLENCE REPORT: A DARK CONCLUSION

(By William Delaney)

"Tonight, our nation faces, once again, the consequences of lawlessness, hatred and unreason in its midst . . ."

Lyndon Johnson looked into the television cameras at the White House and spoke as a man who had seen too much.

At that moment, Robert Kennedy lay dying in Los Angeles, dying the same violent death that had thrust Johnson into the presidency five years earlier in Dallas.

Johnson had seen that first Kennedy assassination, seen the pictures of the later Oswald and King assassinations, seen his own capital engulfed like scores of other American cities in defiant, race-proud flames of hate, consumed daily by a smoldering, colorless fear of armed bandits in the night. This was the civilization that he presided over, that sent him more than 1,000 death-threat letters a month, that dared him to set foot in the citadels of academic freedom, that kept him from announcing his visits to other than military bases.

And so that night before the cameras, sickened, angered and deeply perplexed, the beseiged President did the only thing he could do: he appealed for calm and reason.

Then he went one step further. He told the people he was forming yet another presidential study commission—this time, "to learn why we inflict such suffering on ourselves and, I hope and pray, how to stop it."

Thus was born the National Commission on the Causes and Prevention of Violence.

* * * * *

Last Wednesday evening, as sheets of rain washed the streets of Richard Nixon's capital, Lyndon Johnson's 13 sages officially ceased their $1.6-million probe into the darker side of American life.

And what they found, this generally moderate-to-conservative group of legislators and leading professionals, is very dark indeed.

So dark that the commission, in its 338-page final report to Nixon, proclaimed the current lack of domestic peace and justice a "graver" threat to the nation's survival than any external threats, serious as those may be.

In a conclusion reminiscent of those of the 1965 presidential Crime Commission and the 1967 Kerner Commission on racial disorders, the Violence Commission called for a reordering of national priorities to combat the internal threat, with a $20-billion-a-year increase in "general welfare" spending when the Vietnam war is over.

Drawing on some 10,000 pages of published research by its seven task forces and five investigatory study teams, the commission specifically said:

America has always been a relatively violent nation. "Considering the tumultous historical forces that have shaped the United States, it would be astonishing were it otherwise."

Today America clearly leads the world's advanced nations in both violent crimes and group violence, ranks among the highest in actual and attempted assassinations.

The nation is more vulnerable to violence today than ever before, largely because of haphazard urbanization, racial discrimination and a "dislocation of human identity created by an affluent society."

To combat violence, a twin approach is needed: redress of legitimate social ills and grievances, and vast reforms in America's underfinanced, uncoordinated police courts-corrections system.

One commission member summed it up succinctly: "It's comforting to reach the moon, but it's more comforting to be able to shop around the corner without a police escort."

And with that, the Violence Commission rested its case with the people.

* * * * *

What the commission said, and how it said it, was largely the doing of two men.

The first, of course, was Johnson, who assembled what he felt was a cross-section of thoughtful Americans to serve on the panel, and charged them with a task that "may be beyond the frontiers of human knowledge."

The second was the man Johnson picked as chairman, Dr. Milton S. Eisenhower, president emeritus of Johns Hopkins University.

Blessed with his brother's famous, guileless smile, a political centrist of unquestionable personal and intellectual character, he proved to be the key arbiter and tone-setter during the commission's 50 meetings, according to knowledgeable sources.

The choice of Eisenhower also was fortuitous in an ironic way.

With Nixon's election, the Eisenhower commission was assured of respectful attention from Johnson's successor, at the very least.

As for the commission membership, it appeared to be on the moderate-to-conservative side, hardly the sort of group an outsider would expect to recommend, as it did unanimously, a post-war reversal of the defense-domestic spending ration and reduced penalties for marijuana possession.

"When we were appointed," a key commission figure recalls, "the liberal reaction was at best unfriendly. It was expected that we would serve as a whitewash."

As the commission began probing the many-facets of violence, five members generally emerged as a conservative bloc: longshoreman-philosopher Eric Hoffer, Sen. Roman Hruska, R-Neb., Rep. Hale Boggs, D-La., Chief Judge Ernest W. McFarland of the Arizona Supreme Court, and Houston lawyer Leon Jaworski.

The liberal core consisted of Sen. (blank); Dr. W. Walter Menninger of Kansas, a psychiatrist at the famous Menninger clinic; U.S. District Judge A. Leon Higginbotham of Philadelphia, vice chairman of the commission, and lawyer Patricia Roberts Harris, Johnson's former ambassador to Luxembourg. Higginbotham and Mrs. Harris were the panel's two Negro members.

The others, according to insiders, were less predictable: Terrence Cardinal Cooke, Catholic archbishop of New York; Chicago lawyer Albert F. Jenner Jr. and Rep. (blank), the latter a Kerner Commission veteran.

* * * * *

The whole labor initially was given a legal lifespan of one year, but Johnson, naturally, preferred to see the final commission report on his desk before he left the White House last Jan. 20.

Under this pressure to dissect a topic of almost boundless limits, the commission an its executive director, Washington attorney Lloyd Cutler, began whittling "violence" int seven task force topics—its history in A- ica, its role in protests, its relationship to firearms, etc. A scholarly expert was assigned to direct each.

The same plan was followed with later special investigative reports into specific turbulent events, the most celebrated being the Walker Report on the 1968 Democratic National Convention disorders in Chicago.

"It was decided," said a commission spokesman, "that whatever they wrote, we would publish, making only consentual changes. This way, the scholars' work wouldn't end up on a shelf the way a lot of the Kerner Commission material did."

It also was decided that all these research studies, as well as the commission's own conclusions on various aspects of violence, would be made public as soon as they were completed.

"If we presented it all at once," the spokesman explained, "it would be a one-day sensation, like the Kerner report. Too much for the press and the public to digest."

* * * * *

By fall of last year, the commission was in high gear in its starkly modern Federal Office Building No. 7 headquarters behind Blair House.

As the 50 staff members and task force leaders pressed more than 500 consultants for reports, commission members themselves staged public hearings two days a week for nine weeks, taking testimony from FBI director J. Edgar Hoover, SDS founder Tom Hayden, Yale president Kingman Brewster Jr., Black Panther founder Huey Newton (via tape recorder) and some 150 others ranging from network presidents to criminologists.

* * * * *

It was the eye-opening impact of those hearings, in addition to Eisenhower's leadership, that contributed most to the commission's judiciously open approach to later policy statements, according to an informed source.

On only two statements were the commissioners less than unanimous.

A bare 7–6 majority opposed non-violent civil disobedience as a tactic of dissent, fearing that it may lead to anarchy.

And four of the conservatives dissented mildly, backing state controls only, when the panel urged a federal system of handgun licensing designed to remove more than 90 percent of the privately held handguns in the nation.

Along with the Walker Report and its "police riot" key phrase, the gun recommendation generated by far the commission's heaviest feedback from citizens. Eisenhower called the gun letters "the most vitriolic" he'd ever received.

* * * * *

Two of the staff reports—Walker's and the Skolnick report on "The Politics of Protest"—also tested the commission's aim not to tamper with the scholars' research products. But both reports, including Skolnick's "myth of peaceful progress" theory, were released without comment.

Still, mused one source half-jokingly, "After the Walker Report, I think Johnson may have come to regret the commission."

* * * * *

Hard as the commission pushed the reports, Johnson left office with only a preliminary sketch of the commission's work.

Even with a six-month extension granted by Nixon last spring, after Eisenhower's illness during his brother's funeral here, the panel's full-steam drive to complete its work went down to the wire last week.

And there are still three reports to be published in the next two months.

* * * * *

What, then, of the commission's legacy? What will result from its work?

In a gloomy statement last week, vice chairman Higginbotham called for a "national moratorium" on presidential study commissions in such fields as race, crime, poverty and the urban crisis. The landscape, he said is "littered with the unimplemented recommendations of so many previous commissions."

Regardless of whether its recommendations are followed, a commission staff leader is confident that it has already had an impact on American life.

First, it is providing massive new resource data in such fields as firearms use, worldwide assassinations, and violence in American history.

Second, "We've literally launched hun-

dreds of people doing papers and books" in a previously barren academic field. "That may be the most important thing we do."

Finally, he credits commission recommendations with blocking a bill last summer to punish students in campus disorders, with contributing to more subdued police handling of radical crowds this year (in reaction to the Walker Report), and with toning down the level of violence in this fall's network television programming.

"I don't think you can judge for another five years the value of what we've done," he added. "The value of the Crime Commission report is still rising, and that's been several years.

"We have provided a consensus for change."

As for whether the commission's 81 recommendations will actually result in change, Eisenhower notes Nixon's promise "to study with concern every part of this report."

"It does take strong action from the President to get results on a study of this sort," Eisenhower added.

His view, in contrast to Higginbotham's, is doggedly optimistic, as one would expect.

But Eisenhower added tht if the bulk of recommendations haven't begun to put into effect five years from now, "I will be one of the most disappointed men in America."

[From the Washington Post, Dec. 14, 1969]

IT'S TIME TO ATTACK ROOTS OF VIOLENCE

(By James J. Kilpatrick)

The week of the Black Panther shootouts happened also to be the week in which the National Commission On the Causes and Prevention of Violence wound up its work. In the midst of a season of peace on earth, good will towards men, we are asked to ponder once again the why of violence in American life.

The problem is real; and the problem is growing. Last year 588,000 violent crimes were reported to police across the country. Authorities believe at least that many more were never reported at all. The commission's "fair guess" is that perhaps 2.4 million offenders were involved in these crimes. It is a guess that numbs the mind.

No such conditions obtain elsewhere. Our homicide rate, as the commission noted, is more than twice that of second-ranking Finland, and from four to 12 times higher than the rates in a dozen other advanced countries, including Japan, Canada, England, and Norway. We lead the civilized world in rape, robbery, and assault. The past decade has seen a 200 percent increase in arrest rates of boys, 10 to 14, on robbery charges.

What has produced this appalling picture of America today? The commission's principal answer lies in its study of race and poverty in the central cities. Violent crime is largely an urban phenomenon; and within the major cities it is largely the work of young black males. What drives them to robbery, assault, murder, rape? What virus infects the Panther group?

If I read the commission correctly, a combination of environmental factors is responsible. In the span of a couple of generations, at least five stabilizing influences have disintegrated: Home, family, neighborhood, school and employment. The typical child of the black slums is reared with little loving attention from his parents. The father is "sometimes or frequently absent, intoxicated, or replaced by another man." He is often unemployed, unfair in his discipline, or treated without respect by others. No wonder, the commission remarks, that a slum child grows up with resentment of such authority figures as police officers and teachers.

The chaos of a slum household might be relieved by tranquility in the schools or by stable employment opportunities. It seldom happens. Good teachers rarely remain long in the ghettoes; fearful for their personal safety, or discouraged by the intellectual poverty around them they tend to depart. The swift efficiencies of automation eliminate jobs for unskilled labor. Some slum children escape by luck, industry, and exceptional character. Others find themselves on an escalator down. And they turn to crime.

In times past, as the commission acknowledges, other racial and ethnic groups have encountered inner-city poverty and risen above their environment—the Irish, Chinese, Jews, Europeans. But their upward movement came in a simpler day, when cities were smaller and religion loomed larger. They were victims of discrimination, true, but not the enduring, pervasive discrimination that has affected the American Negro.

Other causes play a part. The U.S. has "the highest gun-to-population ratio in the world." Television, motion pictures, the mass media, tend to glorify violent themes. Our prison system, starting with juvenile detention homes, fails to exert a rehabilitative influence; in any given year, half of all offenders are repeaters. Clogged courts grind out their verdicts slowly. Overburdened police cannot keep pace with demands upon them.

Add to all this the erosion of law that results from massive civil disobedience. Consider the influence of pornography, eating away at the social and moral fabric. Give account to the temptations that stem from affluence. Perhaps we should marvel, the commission remarks that the situation is not worse.

The situation is intolerable. "Order is indispensable to society," the commission observes, and "law is indispensable to order." No greater responsibility lies upon government at every level, and upon the people in every community, than the responsibility of attacking the causes of violence and reversing the dark tides that swirl across our cities.

REMARKS BY ASSISTANT SECRETARY OF AGRICULTURE PALMBY BEFORE THE ANNUAL CORN AND SORGHUM RESEARCH CONFERENCE OF THE AMERICAN SEED TRADE ASSOCIATION

(Mr. MIZE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MIZE. Mr. Speaker, I think all of us see the strong temptations for this and other nations to place protective barriers in the way of a freer trade among nations. World trade policy and domestic agricultural policies of various countries, including the United States, are at a critical point.

The increasing involvement by governments in pricing of exports encourages a tendency to set export prices on the basis of destination. The relationship of the export price to the domestic price and the cost of production is obscured when this happens.

World trade could go either toward more protectionism or toward greater liberalism. The Nixon administration is committed to a freer trade concept, but to achieve this as a nation we will need help from all who can help.

I commend the recent remarks of Assistant Secretary of Agriculture Clarence D. Palmby before the Annual Corn and Sorghum Research Conference of the American Seed Trade Association. He speaks to this topic frankly and with knowledge. I include Mr. Palmby's remarks at this point in the RECORD:

It is easy to forget that as recently as 1940 the U.S. average yield of corn was still below 30 bushels per acre. This year, farmers are harvesting an acre yield of 81 bushels.

It is easy to forget that as recently as a decade ago the U.S. average yield of grain sorghum was around 35 bushels. In 10 years, sorghum yields have gone up some 20 bushels.

Many elements have contributed to the spectacular efficiency of America's corn and sorghum industries. *But first the seed.*

I congratulate the American seed trade for its outstanding contributions to agriculture. Without the rise in grain yields that you have done so much to generate, we would have a vastly different agriculture today—a vastly poorer America in terms of the we eat—the quality of diet available even to people of modest means.

Once again, I am pleased to have a place on the program of your annual Corn Sorghum Research Conference. I have looked forward to being here. I want to talk with you about something that has been on my mind for some time.

Since returning to Government service a little less than a year ago, I have found myself more and more impressed by the fact that the world agricultural community is standing at *a point of decision* in terms of its future development. The decision is this:

We have the opportunity—our Nation and others—to move rather rapidly now to a commercial world agriculture. Parts of the world are now emerging from a subsistence economy. Other areas have the opportunity to move away from an agriculture administered by Government. Modern industrial complexes are offering job opportunities to more people.

The opportunity is present—to develop a world agricultural economy based on economic comparative advantage. This would imply less Government interference in trade and in pricing. It would mean a truly international trading economy that could do a great deal for the growth of national economies around the world.

On the other hand, the world may miss this golden opportunity. It may move further into protectionism—and this would be a disaster.

The Nixon Administration is dedicated to a freer trade concept—based on economic comparative advantage. We are pursuing this objective in a number of ways—and it is certainly true that a variety of approaches is needed, by the U.S. and by other countries.

For example, the United States supports the Organization for Economic Cooperation and Development (OECD), headquartered in Paris, and The General Agreement on Tariffs and Trade (GATT), officed in Geneva. This is good, but supporting or belonging to international forums does not in itself contribute to a lessening of trade problems and impediments. New initiatives are needed. We need a constructive examination of internal agriculture policies within industrially developed countries, with a goal of improving and increasing the international climate for trade. We need a full appreciation of the fact that trade is trade regardless of whether we are talking about agricultural commodities or industrial products. They go hand in hand.

We are eager, therefore, to discuss trade problems in international forums—or, in instances, on a bilateral basis.

The fact is that there is increasing government interference in agriculture and trade, around the world. There is more involvement by governments in the pricing of exports. There is a growing tendency to set prices on the basis of destination—which means that there may be little relationship between the export price, the domestic price, and the cost of production.

In the short run at least, this will continue. At the same time, we are not reconciled to it. We will continue to do everything we can to persuade other trading nations to liberalize and rationalize their trade policies. Meanwhile, we hope to administer our own domestic policies in such a way as to permit our farm products to compete in the world.

Because of our historic involvement in the European market, we have been watching with acute interest the possibility that the United Kingdom and other nations may be admitted to the Common Market. The U.S. and other members of the so-called "outer seven"—the European Free Trade Area—are possibilities for future membership; and the outcome of these negotiations could be critical to our trade with those nations.

If those countries do enter the community, the terms of their admission will of course be crucial as far as we are concerned. If the Community is expanded to a dozen or more members, will this mean that present restrictive agricultural policies will be extended to these additional areas? Or would it mean that the broadening of membership might cause the Community's trading policies to be tempered or even recast?

These are timely questions. They are critical questions as far as we are concerned. They are the reasons why we are watching with such intense interest the negotiations between EEC and its possible new members.

Our European friends have often said that we should not be concerned about our corn and sorghum exports. They point out that their imports of U.S. corn and soybeans have trended upward quite rapidly during the 1960's. Even since the "harmonization" of EEC grain policies in the middle 60's, imports of these commodities from the U.S. have increased. Therefore, they say, we in the U.S. have nothing to worry about.

The rightful answer is that our grain and soybean exports to Europe *should* expand and any time they do not expand we should be concerned. We have a true economic comparative advantage in producing soybeans, corn, and milo. In order for the U.S. to continue to increase our over-all trade with Europe, Japan, and other countries, we must continue to expand our sales of those commodities in which we do enjoy a comparative advantage. Otherwise they in turn cannot expect to expand or even to maintain their sales of industrial items to the United States.

The European Community has made heavy sales of feed wheat to central European countries at prices that have no relationship to world corn prices. Also, the EEC has been feeding wheat at record levels internally. Couple these facts, and they add up to a matter of considerable concern to farm and trade interests in this country.

As I look at it, there is a growing body of thought among U.S. opinion-makers—including many in Congress—that we should definitely expect a growth in our exports of corn and soybeans. This means that European actions to produce and use more of their grain for feed, with the announced goal of lessening the need for U.S. corn, would be looked upon unfavorably by many Americans. Such actions, without downward price adjustments in Europe, would likely lead to a demand for import restrictions on many items imported into the U.S.

The mood here, as I read it, is that growth in the market for imported industrial items into this country simply cannot continue unless normal growth is allowed for our export products to Europe, Japan, and other industrially developed countries. This feeling, it seems to me, is growing. I find it sad that trends abroad should encourage this type of protectionist reaction in a Nation that has traditionally supported a liberal trade policy.

To summarize the export situation very briefly, our exports of corn and sorghums in the past marketing year, which ended September 30, were disappointing. But exports in the current marketing year are brighter—particularly for corn.

A major problem for corn and sorghum exports has been, of course, the large increase in world stocks of wheat available for export. The demand for milling wheat from the world market declined. There has been, as a result of these pressures, a deterioration in world wheat prices. There has been increased feeding of wheat—not only in the EEC, as I mentioned, but also in Spain and the United Kingdom.

Even in the United States, use of wheat for feed is growing. In 1966 and 1967, we were feeding less than 100 million bushels of wheat a year. In the current marketing year, we will feed an estimated 225 million bushels.

To summarize: U.S. corn exports were off about 15 percent last year, and sorghum exports were off 36 percent.

Looking ahead: Export prospects in the new marketing year seem considerably brighter for corn. We are not likely to increase exports of sorghum, but the opportunity for future growth in sorghum exports is certainly great. This depends primarily on our product being available the year-round at prices that are acceptable in relation to corn or grain from other countries.

In the current marketing year, world trade in feed grains should run somewhat above last year. Meanwhile, the present corn loan level in the U.S. is allowing corn to move into use at unprecedented levels. And—supplies are shorter than usual in the other principal exporting countries, Argentina and South Africa.

The upshot is that corn exports in 1969–70 will be an estimated 600 million bushels or more.

Japan continues to be a major factor in the U.S. outlook. Import demand for feed grains in that country will expand this marketing year, as it has in recent years. Japanese imports of grain for feed from all sources are expected to increase at the rate of 25 to 30 million bushels per year.

Now, if I may introduce a change of subject—I would like to talk with you about something we have discussed several times before. It is not unrelated to export policy; in fact, there is a great deal of relationship between our market development efforts and the condition of the commodity that we export.

Much has been said in recent years about the condition of U.S. corn arrivals in Great Britain and other importing countries. Consistent with this problem, let me quote a few lines to you from a U.S. Department of Agriculture report:

"For several years an increasingly large number of more or less forcible and persistent representations were made to the Secretary of Agriculture and other officers of the Federal Government, to the effect that much of the grain, and especially the corn, that was being exported from the United States was not being delivered abroad in a satisfactory condition, that it was not of the quality represented by the inspection certificates accompanying the shipments, and that material injury was in consequence being done to the export grain trade of the United States."

When do you think that report was submitted? In 1969? In 1968? The paragraph I just read is from a USDA circular entitled "American Export Corn (Maize) in Europe" and *dated February 8, 1910!*

The report also included the following paragraph:

"Several shipments or parcels, amounting in all to 79,847 bushels of badly discolored heat-damaged corn, sometimes known as 'mahogany,' which had been artificially dried before shipping, were also examined in Europe. These shipments bore certificates as 'rejected corn' 'dried'. . . . The moisture content of this corn varied from 13.2 to 17.4 percent. Such corn is used almost entirely for distilling purposes on the continent of Europe."

Finally, under "Observations and Recommendations", the Report said:

"There are two means by which the moisture content in any part or the whole of a ship's corn cargo may be increased during transit: (1) the transfer of moisture by air currents caused by changes in temperature; and (2) by chemical changes within the corn kernel."

What all this proves is that, although things change, they sometimes remain the same. It is apparent that, despite all our progress in shipping and handling, we still have problems in corn quality—after 60 years!

I think it is fair to say that these problems, if and as they exist, are caused more often than not by our rapidly changing technology. I am thinking particularly of the great increase in the amount of field shelling and kiln drying.

It is quite evident that we cannot ship to other countries corn that has higher quality than it possessed at the time it was sold by the farmer to the first receiver. Of necessity, following receipt of corn after the first exchange of hands, the needs for blending may result in the incorporation of wider ranges of moisture levels than may be desirable. This may add to our problem.

I have discussed this problem with you many times, along with other aspects of production and handling of grains. The problem is large enough that each segment can participate in trying to improve the condition of our corn so it can be handled and shipped without undue depreciation. All of us can help.

I know that you are concerned about one situation that has been present the past few years. This is the fact that the competition for maximum yields sometimes leads to high levels of moisture in corn in normal harvesting periods. To the extent that varieties may lead to poor quality under farm conditions, the seed trade shares a responsibility.

There does seem to be some progress in developing corn for good handling qualities as well as for good yields and feeding quality. There may be promise in some of this work.

The problem for the United States in supplying corn of almost any quality and condition is a most difficult one. It is difficult because the price for corn traded in the entire world market is established at Chicago. Other suppliers price their corn in relation to U.S. prices. Need I say more?

In closing, let me reiterate that world trade policy and the domestic agricultural policies of various countries are at a critical point in their history. The world's nations could go either way—toward more protectionism or to more liberalism in their trade policies. This is a key question, not only in terms of world trade, but also in relation to future economic development of countries that need to trade in order to develop.

So we need all the help we can muster to move the world toward more liberal trade policies. Also, we need to gear our own agriculture—in production, marketing, pricing, and merchandising—to meet the requirements of the world market in the 1970's.

The U.S. is maturing as an export nation. But we will never be really mature as an exporter until we are able to look at overseas outlets as being as important to us as are the commercial poultry producer and the commercial corn processor in this country.

We have not yet attained that degree of sophistication.

THE U.S. GOVERNMENT'S HISTORICAL PROGRAMS

(Mr. SCHWENGEL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SCHWENGEL. Mr. Speaker, recently it was my privilege to attend the national meeting of the Southern Historical Association and convention, in Washington, D.C. During that time, Dr. Walter Rundell, Jr., of the Department of History at Iowa State University, presented a paper entitled "The U.S. Government's Historical Programs" Because this paper is obviously the result of some very thorough research, evaluations and is abundant with historical activities that are little known and has special recommendations for Members of Congress, I include it in the CONGRESSIONAL RECORD for perusal, study, and consideration by my colleagues and others who may chance to read this very important and worthwhile dissertation:

THE U.S. GOVERNMENT'S HISTORICAL PROGRAMS

(By Walter Rundell, Jr., Department of History, Iowa State University) *

The involvement of the United States government in historical publication dates back almost to the beginning of the republic. While this paper focuses mainly on the government's current programs for writing history, it is important to understand something of the initial efforts in publishing historical sources. As early as 1799 the government printed the journals of the Continental Congress, and then in 1818 came the journal of the Constitutional Convention. Two years later the secret journals of the Continental Congress followed. The State Department published *Diplomatic Correspondence* in 1832, and supplemental volumes appeared in 1888. In 1833 the government contracted with Matthew St. Clair Clarke and Peter Force to publish *The Documentary History of The American Revolution,* which became popularly known as Peter Force's *American Archives.* This nine-volume set appeared between 1837 and 1853.[1]

Almost concurrent with Peter Force's *American Archives* was the issuance of *American State Papers* by Gales and Seaton, publisher of the *Annals of Congress.* Between 1832 and 1861, under government contract Gales and Seaton put out thirty-eight volumes of *American State Papers,* covering some topics from 1789 to 1823 and others to 1838. The documents are classified under these rubrics: Foreign Relations, Indian Affairs, Finance, Commerce and Navigation, Military Affairs, Naval Affairs, Post Office Department, Public Lands, Claims, and Miscellaneous.

Shortly after the *American State Papers* were inaugurated, the government realized its obligation to print the papers of some distinguished statesmen. The first of these projects was the Madison papers in 1840. In the next decade came the Adams, Jefferson, and Hamilton papers. Then in 1865, a second series of Madison's writings appeared.[2] Judged by modern standards of documentary editing, the aforementioned publications were crudely edited.

The Department of State undertook the publication of its major documentary series, *Foreign Relations,* in 1861. From the first volume through those for 1913, the series was uneven and unsystematic in the coverage of diplomatic affairs, for there were no scholarly standards for editing. Yet the inauguration of such an annual series was unique, for it indicated a desire for open diplomacy and quick publication of the diplomatic record. Scholarly standards were imposed in 1921, which meant that the volumes for 1914 on were appreciably better.[3] In 1888 Secretary of State F. Bayard proposed the publication of his department's historical manuscript collection. President Cleveland's approval and support of the project notwithstanding, Congress refused to appropriate the necessary funds. Unable to fulfill this first objective, the Department of State undertook a helpful expedient. In 1893 the Department's Bureau of Rolls and Library began publishing a series of calendars, indexes, catalogs, and other finding aids for its holdings.[4]

During the last third of the nineteenth century the government was involved in planning and publishing this country's greatest documentary monument, *The Official Records of the War of the Rebellion.* As early as 1879 radical defects in the plan of compilation were detected.

Nonetheless, publication of the original edition continued a decade, with a total of seventy-nine volumes. Soon after the deficiencies in the original became apparent, a revised edition was planned, and its first volume appeared in 1881. For eight years, then, there was concurrent publication of the revised and discredited editions. No reason was ever given for the continuation of the first edition beyond 1881. An Army officer later commented: "Why the first edition, thus condemned to abandonment for its imperfections, was not forsaken at this time instead of being permitted to continue its superfluous career for eight years longer, is one of those inscrutable mysteries of departmental life which baffle alike the speculations of the philosopher, the investigations of the historian, and the imprecations of the soldier." The 128 volumes, plus atlas, of the revised edition were completed by 1901. Cost of the entire project was $2,858,514.67, not including salaries of Army officers assigned to the project.[5] After this publication of the records of the Union and Confederate Armies was well under way, the government realized that a companion set for the naval forces was necessary. *The Official Records of the Union and Confederate Navies in the War of the Rebellion* were printed in thirty volumes between 1894 and 1927.[6]

At the end of the nineteenth century Congress published James D. Richardson's compilation of *Messages and Papers of the Presidents* in ten volumes. The set covered the period 1789 to 1897. Unfortunately, it omitted some important messages as well as all the working papers, which often were more important than the formal documents. Through some hazy arrangements, a commercial publisher also brought out the set and added supplements through the Coolidge administration. This 1789 to 1929 edition consisted of twenty-five volumes.[7]

Another highly important documentary series inauguarated by the Department of State in 1931 was the *Territorial Papers of the United States.* Clarence E. Carter edited the twenty-six volumes which appeared between 1934 and 1962. In 1950 the National Archives assumed responsibility for the series, which so far has dealt with territories east of the Mississippi River, Louisiana, Arkansas, and Missouri. The first of two Wisconin Territory volumes, prepared by the current editor, John Porter Bloom, will appear shortly.

To commemorate the bicentennial of George Washington's birth, a federal commission selected John C. Fitzpatrick to compile and edit Washington's out-going correspondence. While his edition improved upon the work of Jared Sparks and Worthington C. Ford, it suffered from an inadequate budget that obviously limited the scope of the project. The thirty-nine volumes, published between 1931 and 1944, omitted incoming letters and thereby left the work only partially done. We have great expectations for an authoritative edition of the Washington papers from Donald Jackson, now on the staff of the University of Virginia.[8]

Our expectations for this forthcoming edition of the Washington papers stem from the editor's proven competence,[9] and the fact that he will follow the editorial trail blazed by the big five—the Jefferson, Adams, Franklin, Madison, and Hamilton papers. The projects have proceeded with guidance and financial assistance from the National Historical Publications Commission.[10] Since its revitalization in 1950, the National Historical Publications Commission has been an important force in establishing and promulgating the modern scholarly canons of documentary editing.[11] For the last twenty years, it has been associated with virtually all the important editorial monuments to famous Americans.[12] Since 1965 the National Historical Publication Commission and geographically diverse repositories have co-sponsored the microfilming of research collections of national significance. Approximately seventy-five are now available. Like the Library of Congress' microfilms of presidential papers, these may be borrowed on inter-library loan.[13]

The willingness of the federal government to publish documents related to its own history is entirely understandable. From the beginning of our government, and indeed from the inception of revolutionary thought, the shapers of our history have been invested with a sense of their moral rectitude. They felt that they were acting according to the highest principles of self-government and therefore the published records of their activities could constitute a noble lesson for other nations and a wholesome reminder to American citizens of their heritage of freedom. Hence, there seemed to be little danger involved in sponsoring documentary history.

To move from a program of reproducing records to one of interpreting them required more courage and entailed somewhat more risk. It was one thing to print the manuscript records of the past, even allowing for subjective editorial decisions, for citizens then could read the actual documents and draw their own conclusions. But for the federal government to sponsor historical programs that would result in secondary, interpretive works was another matter. Those who envisioned the latter program must have realized they faced two potential—and often very real—types of critics. First would be Congressmen who would appropriate funds for the program. They might fear that historical scholars on the federal payroll would present the past in a partisan light, perhaps discrediting some current political theory or effort. Or Congressmen with some longevity might also be uneasy about investigation of episodes in which they took a hand.[14] Beyond the Congressional barrier lay the scholarly community, with inbred prejudices about official histories. "How could an investigation be pure and disinterested," academic critics would ask, "when the historian gets paid by the organization whose history he is writing?" Not only were such considerations faced at the outset; they have kept vigil over most, if not all, the historical activities in the federal government.

These programs for producing interpretive histories of governmental operations emanate from the executive branch, and most relate to departmental operations. The only exception is the Supreme Court history now being written under the supervision of the Library of Congress. This project is supported by funds from the Oliver Wendell Holmes Devise. Of the twelve executive departments, the following have some type of historical program: Defense, Interior, State, Agriculture, Labor, Transportation, and Health, Education, and Welfare. Some independent executive agencies, such as the Atomic

Footnotes at end of article.

Energy Commission, National Aeronautics and Space Administration, and USIA, likewise have historical offices. By far the most extensive program is that of the Department of Defense. Within this vast enterprise, each service, including the Marines, has its historical program, as does the Office of the Secretary of Defense and Joint Chiefs of Staff. Unlike most government historians, those with the Joint Chiefs of Staff expect no public recognition for their work, since they realize from the outset that all their research and writing must be for the files. Their highly classified products are available only to those with the requisite security clearances within the military establishment. Hence these historians must possess what Leon Blum once termed the requisite for an ideal civil servant, a passion for anonymity.[15] This quality, I hardly need add, is one not ordinarily associated with historians.

Easily the largest and most active historical program within the Department of Defense is that of the Army. The Army's historical consciousness was amply documented by the monumental *Official Records of the War of the Rebellion*. After this project was completed, the Army proposed a publication of Revolutionary War documents. Although the government had spent around $3,000,000 on the Civil War Army records, in 1913 Congress appropriated only $32,000 for the collection and publication of Revolutionary documents.[16] The Army's historical concern with World War I was primarily documentary, since Secretary of War Newton D. Baker opposed official interpretive history.[17] Between the wars, the Historical Section of the Army War College edited records of the American Expeditionary Forces, whose seventeen volumes were published in 1948 as the *United States Army in the World War, 1917–1919*.

Impetus for significant historical coverage of the second World War came from President Roosevelt. On March 4, 1942 he directed the Bureau of the Budget to name a committee on records of war administration to preserve "an accurate and objective account of our present experience." [18] The Army responded in mid-summer by assigning historical officers for the Services of Supply (John D. Millett), Army Ground Forces (Kent Roberts Greenfield), and Army Air Forces (Clarence B. Lober).[19] Then in August 1943 the Army consolidated the program by establishing the Historical Branch within G–2, the staff office responsible for intelligence. This consolidation enabled the Army to extend its historical coverage to overseas theaters.[20] A search went out for professional historians already in uniform to man the section. With the headquarters unit established, the War Department provided historical units for overseas theaters. These combat historians recorded their own observations, interviewed key figures, and collected other important documentary data. The War Department had also prescribed periodic historical reports prepared by various military units. From these reports, the observations and writings of field historians, and the gigantic volume of records produced and preserved during the war, the Army produced the magisterial series entitled *United States Army in World War II*. Supervising the series was the Office of the Chief of Military History, an outgrowth of the G–2 historical branch. Since the beginning of this Office, the Chief has been a general whose duties have been administrative, as have those of most of the other military personnel in the Office. The actual historical research and writing has been under the direction of the chief historian, a civilian. The three chief historians have been Walter L. Wright, Jr., Kent Roberts Greenfield, and Stetson Conn. The professional staff working under them have been civilian historians, cartographers, edtiors, and librarians. Most of the historians have had military experience, usually in the theaters they have written about. To recruit qualified professionals for the World War II series, the Army considered authorship credit indispensable.

While the Office of the Chief of Military History has coordinated and directed the Army's history of World War II, until 1962 it did not have sole responsibility for the program. Before the reorganization of that year, the chiefs of the Army's administrative and technical services maintained their own historical offices and were responsible for the histories of their components in World War II. Between 1945 and 1962, the Surgeon General, Chief Signal Officer, Chief of Engineers, Chief of Transportation, Chief of Ordnance, Quartermaster General, Chief of Finance, and Chief Chemical Officer had historians on their staffs, and most of these services are represented in the official series.[21] Moreover, some have published histories for periods other than World War II, notably the Quartermaster and Surgeon Generals. Offices lacking a historical program for World War II were those of the Adjutant General, Chief of Chaplains, Provost Marshal, and Judge Advocate General.[22]

From the scholarly standpoint, what has been the result of the Army's tremendous effort to record its World War II history? The series includes studies on strategic planning, logistics, defense of the Western hemisphere, manpower, training, combat in all theaters, and the technical and administrative services. In any undertaking of this scope, there are obvious differences in approach and quality. The combat volumes contain more built-in plot and excitement than do those dealing with field laundries or spare parts for tanks. It is manifestly easier to maintain reader interest when dealing with General Patton's daring armored tactics than with methods of loading cargo ships. For all the innate differences in the seventy-odd volumes, they represent a high level of historical scholarship. Based as they are on the original sources, they form the foundation for any subsequent investigation of this subject. Because of the books' workmanlike quality, future historians will not have to undertake this level of investigation again. Through its critical evaluations, notably in the *American Historical Review*, the profession has generally recognized the solid contributions these volumes made. One would wish, however, that the *Mississippi Valley Historical Review* had seen fit to assess the books with standard reviews rather than mere mention in "Book Notes." Whether intentional or not, the *Mississippi Valley Historical Review* evaluated the series along with such contributions as *My Mother Used to Say: A Natchez Belle of the Sixties* [23] and *Great Train Robberies of the West*.[24] In 1967 the *Journal of American History* reversed this policy with signed reviews.

With the reorganization of the Army's historical activities in 1962, the Office of the Chief of Military History was charged with winding up the World II history, supervising historical offices in major commands, as well as with maintaining several other important activities. It has published two monographs on the Korean War, four in a miscellaneous Army Historical Series, and is preparing volumes on the Army's role in the Vietnamese conflict.[25] In addition, it has written studies concerning the Army's involvement in civil disturbances, such as the use of federal troops during the integration of Central High School in Little Rock and the University of Mississippi.[26]

Of current interest is the Office of the Chief of Military History project on the history of integration in the armed forces. Its significance lies in the fact that it is the first historical study undertaken on a Departmental basis and that the Army got the assignment. Similar studies concerning matters common to the entire Department of Defense should follow.

The Navy's historical program originated in the Navy Department library in 1882 when the librarian began the collection and publication of the *Official Records of the Union and Confederate Navies*. Later known as the Office of Naval Records and Library, the unit is now the Naval History Division. The Navy published seven monographs on World War I, including the *History of the Bureau of Engineering* (1922, 176 pp.) and *The American Naval Planning Section, London* (1923, 537 pp.). Between the wars the Office prepared two significant documentary publications, *Naval Documents Related to the Quasi-War Between the United States and France* (1935–38, 7 vols) and *Naval Documents Related to the United States Wars with the Barbary Powers* (1939–45, 7 vols.)

When considering the Navy's history in World War II, we naturally think first of Samuel Eliot Morison's monumental fifteen-volume *History of United States Naval Operations in World War II*.[27] Although this history, based on primary sources, was supported by the Navy Department, it was published commercially.[28] The Naval History Division, directed since 1956 by retired Rear Admiral Ernest M. Eller, is responsible for many specialized volumes on World War II dealing with such topics as operations, logistics, administration, and chronology. Bureaus, such as those of Ordnance, Personnel, Medicine and Surgery, Ships, and Yards and Docks, published multi-volumed histories of their World War II activities. Moreover, the great number of historical studies published by the U.S. Naval Institute in Annapolis qualify as quasi-official history.[29] An example of the Navy's recent historical publications is William B. Clark's edition of *Naval Documents of the American Revolution*, of which four volumes have appeared. Perceptive reviewers criticized deficiencies in the first two volumes,[30] but the third met more enthusiastic response.[31]

While the Marine Corps' historical section began in 1919, its significant publications date only from World War II. Prior to and during the early years of that war, the historical office functioned chiefly as a reference service and was attached to different parts of the Corps headquarters.[32] The first fruits of its World War II historical program were fifteen monographs published between 1947 and 1955, dealing with individual campaigns, such as those of Tarawa, Bougainville and the Northern Solomons, Guadalcanal, Saipan, Tinian, New Britain, Iwo Jima, and Okinawa. Beginning in 1958, the office began publishing a projected five-volume *History of U.S. Marine Corps Operations in World War II*. These books treated the Pacific war chronologically and profited from being based on Japanese, as well as American sources.[33] Concurrent with its work on World War II, the Historical Branch began a series on Marine involvement in the Korean War. Of a projected five-volume *U.S. Marine Operations in Korea*, four had been published by 1962.[34]

The historical consciousness of the newest of the armed services, the Air Force, was nurtured by its parent, the Army. In fact, the Army Air Forces' historical program begun in 1942 remained intact through the establishment of the Air Force. Before the 1947 "unification" of the services into a single Department of Defense, which rather anomalously created the Air Force as a third and coequal branch along with the Army and Navy, the Army Air Force had begun work on its World War II history. Edited by Wesley Frank Craven and James Lea Cate, *The Army Air Forces in World War II* comprised seven volumes, published between 1948 and 1958. The first five volumes dealt largely with operations; the sixth was concerned with high-level organization (no pun intended), procurement of materiel, and personnel. Volume VII was something of a catch-all, covering the Air Transport Command, Weather Serv-

Footnotes at end of article.

ice, Airways Communications System, and demobilization. This series, written from official records and reflecting that viewpoint, was published by The University of Chicago Press. Futrell's study of the Air Force in the Korean War used the same approach.[35]

In 1949 the Air Force Historical Division moved to the Air University, Maxwell Air Force Base. Since then, it has published a long series of USAF Historical Studies dealing with World War II, the post-war period, the Korean conflict, and subsequent events. In administering the service's program, the Historical Division required each major command and numbered air force to maintain a historical office.

This extensive field program, manned by some 200 full-time civilian and military personnel, is far larger than that of the other services. These field offices have prepared semi-annual histories of their organizations. Among those involved, there has been some doubt about the effectiveness of these six-month reports. The reservations concern the length of the period under review and the consequent inability to deal with the major issues in sufficient perspective. Presently, the Air Force's historical program is undergoing a significant reorganization which may result in more sophisticated publications. The fact that a retired major general, R. A. Grussendorf, was recalled to active duty to establish the Office of Air Force History in Washington indicates increased emphasis on the program. Further indication of a change of direction is that command historians, once attached to information offices, now submit annual histories directly to their chiefs of staff.[36] This reorganization incorporates the principal suggestions made by an advisory committee on the Air Force historical program.[37] Some of the encouragement for the reorganization apparently has stemmed from the Department of History at the Air Force Academy, which is keenly conscious of the need for the Air Force to have a meaningful historical program attested to by serious publications, informative to the military, the community of scholars, and the public.

Combining its various components, the Department of Defense clearly maintains the largest federal historical operation. It is somewhat ironic that the government of this "peace loving" nation has devoted far more resources to its military history than to the study of its more pacific operations. This development no doubt reflects our imitation of the European governments that inaugurated official military history in the nineteenth century rather than any deliberate policy of slighting civil administrative history. Nonetheless, as the works of Leonard D. White demonstrated so eloquently, the latter field is rich for tillage and we are the poorer because of the traditional imbalance.

The second largest historical activity in terms of manpower and publications is the Department of State's.[38] Its Historical Office, directed by William M. Franklin, belongs to the Bureau of Public Affairs. The State Department began its documentary publications in 1861 with *Foreign Relations of the United States*, but as noted previously, the series did not bear the stamp of professional preparation until the 1914 volumes appeared. As an indication of the nation's major diplomatic concerns through the years, *Foreign Relations* constitutes a valuable asset to students of diplomatic history and to the profession generally. When Dean Dusk was Secretary of State, he agreed in principle to keep the publications within twenty years of the present, a goal proposed by the Department's advisory committee. As an injunction to those editing the volumes, a sizeable banner in the Historical Office once proclaimed: "Hold that 20-Year Line." The passage of years and the crumbling line may have resulted in the banner's removal. Concerned scholars have repeatedly urged the Department of State to support this publication program sufficiently to hold the twenty-year line,[39] but there is no real evidence that the leadership in the Department feels any urgency about the situation. By real evidence, I mean sufficient funding for the necessary staff to accomplish the job. The best intentions of the Historical Office—and I think they have been amply manifested—cannot accelerate publication of the annual volumes. It requires an adequate staff. The problem concerns not merely the volumes themselves, but access to State Department records in the National Archives. Until the annual volumes come out, researchers cannot examine records for that year. So the further *Foreign Relations* lags, the less access scholars have to needed information. The profession must keep pressure on the Department of State and Congress to provide sufficient support for this important documentary publication as well as for others that have languished because funds were withdrawn. Another challenge the series faces as it enters the post-World War II period is the greatly inflated volume of pertinent materials, not only within the State Department files, but also in those of other departments, agencies, and private individuals. It will require coping with greater amounts of complex documentation, as well as with materials from increasingly higher levels.[40]

As the *Foreign Relations* series indicates, the State Department's historical publications have been largely documentary. An important, continuing series of digests of international laws affecting the United States was launched in 1887.[41] Between 1931 and 1948, Hunter Miller's eight-volume edition of *Treaties and Other International Acts of the United States of America* appeared. Further work in this series, which comes only to 1863, was suspended for lack of funds. The Department has published numerous other compilations of treaties and conference proceedings. Unlike the military historians, the government's diplomatic historians have written few analytical, interpretive volumes. The most notable of these are by Carlton Savage,[42] Harley A. Notter, *et al.*,[43] and William M. Franklin.[44]

In the popular mind, the historical program of the Department of the Interior's National Park Service evokes images of articulate, uniformed park guides who seem to possess an encyclopedic knowledge of the events connected with their particular site. Sometimes this narrative flows forth by rote, and the professional historian is struck by the lack of an analytical or conceptual framework. Nonetheless, such information greatly benefits the numerous visitors to important historic sites.

On the scholarly level, the National Park Service's historical program centers in the Washington office, where Robert M. Utley is Chief Historian. This office has consolidated the work of the National Survey of Historic Sites and Buildings and the park historical research function. This includes the preservation, development, and interpretation of some 169 areas of national historical significance, such as famous battlegrounds and frontier military posts. The Division of History has designated 800 National Historic Landmarks, thereby recognizing their importance and encouraging their preservation. The Division's two types of publications have met with considerable popular approval.

Its Historical Handbook Series contains several dozen pamphlets on individual sites. Like all the Park Service's offerings, they are well-illustrated with photographs and maps. The National Survey has published volumes dealing with historic places within different regions, such as *Soldier and Brave: Indian and Military Affairs in the Trans-Mississippi West*[45] and *Colonials and Patriots: Historic Places Commemorating Our Forebears, 1700–1783*.[46] Each contains historical narrative that lends meaning to the discussion of sites. Since the National Park Service's historical program applies only to its own functions, it provides no coverage for other important operations of the Department of the Interior. With our growing sensitivity to the needs of American Indians in the areas of conservation and reclamation, it is regretable that the Department has provided no historical treatment of these concerns.

For several decades the Department of Agriculture has maintained a historical program, but only recently has it been identified as such. Until the USDA allowed historians to sail under their own colors, Mrs. Clio of the cabbage patch—or should we say Clio of cabbages and cotton—was treated as a function of agricultural economics. Notwithstanding whatever limitation this placement may have been, the USDA historians have played an important role in the development of agricultural history as a specialty within the discipline. A name early associated with agricultural history was that of Everett E. Edwards, who was in charge of the USDA historical program from the 1920s until his death in 1952.

In 1930 the USDA published his *Bibliography of the History of Agriculture in the United States*, a definite work for its time. A decade later the Yearbook of Agriculture contained his perceptive "American Agriculture—*the First 300 Years*." After Edwards' death, Wayne D. Rasmussen took charge of the program and was responsible for the centennial history entitled *Century of Service: The First 100 Years of the United States Department of Agriculture*.[47] Authors of the book were Gladys Baker, Rasmussen, Vivian Wiser, and Jane M. Porter. Some Congressmen denounced the volume, questioning the ability of government historians to write objectively. The critics' allegation was that this scholarly account of the USDA's operations was a partisan tool.[48] Fortunately, their attempts to enjoin distribution of the book were foiled by the Department's leadership. Besides the publication of books, articles, and bulletins, the office prepares staff studies for the Secretary that present historical background for current policy decisions. Several other Departments have studied this unusual function.[49] In a different dimension, this office has for many years served as a secretariat for the Agricultural Historical Society.

Among the newer departmental historical programs are those in Health, Education, and Welfare; Labor; and Transportation. Within Health, Education, and Welfare, the Department has historical offices in the Social Security Administration, National Library of Medicine, and National Institutes of Health. Since its inception in 1963, the Social Security Office has been headed by Abe Bortz. Like the Labor Department's program, it has not yet produced any major publication. Soon, however, it will publish a 100-page guide to social security records. Its oral history project, consisting of more than 150 interviews, also nears completion.[50] Jonathan Grossman launched the Labor Department's historical efforts in 1963. He serves as a consultant to the Secretary and maintains a bibliography on the history of labor in America. The Department of Transportation's historical program began in 1967, although that of its component, the Federal Aviation Administration, predates it seven years.

Two independent agencies, the Atomic Energy Commission and the National Aeronautics and Space Administration, have developed substantial historical activities during their comparatively brief existence. The first, and highly acclaimed, product of the AEC historical office was *The New World, 1939/1946*, Volume I of the official history of the AEC. The second volume, *Atomic Shield, 1947–1952*, has just appeared.[51] Richard G. Hewlett, Chief Historian of the AEC and co-author of these works, is now preparing a book on Rickover and the nuclear navy.[52]

Footnotes at end of article.

NASA's historical program began in 1959 under the leadership of Eugene M. Emme. Two years later Emme launched the official publications with his *Aeronautics and Astronautics: An American Chronology of Science and Technology in the Exploration of Space, 1915–1960*.[53] This has been followed by similar annual chronologies and chronologies devoted to the Mercury, Gemini, and Apollo projects.[54] Since 1966 the office has published several monographs, some written under contract by private scholars, rather than being undertaken by the permanent staff. A good example is *This New Ocean: A History of Project Mercury*, by Swenson, Grimwood, and Alexander.[55]

The only approach to a formal history of the legislative branch began in 1962 with the founding of the United States Capitol Historical Society. This organization, whose sole president has been Representative Fred Schwengel (R.-Iowa), bears no official relation to the government and receives no appropriated funds. It has emphasized a historical awareness of the Capitol as a building. To accomplish this end, it has published the highly successful guidebook, *We, the People*. With funds from the sale of over two million copies, the Society has undertaken the compilation of a comprehensive, scholarly bibliography on the Capitol, which will bear the imprint of the University of Oklahoma Press. Several members of the Board of Trustees, myself included, hope to persuade the Society to broaden its scope to include the study of legislative history. By making fellowships available for such investigations, both on the pre- and post-doctoral level, the Society could make a great contribution to American historiography.

In considering the federal government's historical programs, attention must not be restricted to those agencies which publish their own histories. Without the facilities of the government's great repositories, the National Archives and the Library of Congress, little official history could be written. And without the use of these repositories, unofficial history of many aspects of the American experience is likely to be deficient. In their support of all serious investigation into the nation's past, these agencies constitute a vital part of the government's historical program. Probably the most concrete contribution these agencies make to historical study, besides the obvious fact of collecting and maintaining original sources, is in their preparation of finding aids. Within the National Archives system, which includes the presidential libraries and Federal Records Centers,[56] finding aids range from preliminary inventories to elaborate guides to special categories of records, such as the Kenneth W. Munden and Henry P. Beers *Guide to Federal Archives Relating to the Civil War*.[57] This *Guide*, like Beers' more recent one dealing with Confederate records,[58] cites secondary publications based on the sources, thus performing a valuable bibliographical service.

Although the compilation of *Writings on American History*, Volume II of the American Historical Association's *Annual Report* is not directly related to the work of the National Archives and its National Historical Publications Commission, the NHPC in 1951 assumed responsibility for this publication. It should be noted that both volumes of the AHA *Annual Report* (*Proceedings* and *Writings*) have always been published by a government agency. The fact that the most recent volume of *Writings* is for 1958 indicates the pressing need for this discipline to apply computer techniques to its bibliographical apparatus.[59]

In addition to the previously mentioned documentary publication of the National Archives, and those sponsored by the National Historical Publications Commission, some of the presidential libraries have undertaken their own publication programs. The Roosevelt Library has published two volumes on *Franklin D. Roosevelt and Conservation*[60] and three volumes on *Franklin D. Roosevelt and Foreign Affairs*.[61] The Harry S. Truman Library Institute has initiated a series of research projects supported by private funds. Donald R. McCoy, Director of Studies for the Institute, gave first priority to civil rights during the Truman administration.

With the assistance of Richard Ruetten, he has prepared a manuscript on this topic. The Eisenhower Library as yet has undertaken no monographic or documentary publications, but it has initiated an impressive series of conferences for historians. To popularize the Library as an educational and cultural institution, the staff held conferences in 1969 dealing with Western history and the twenty-fifth anniversary of D Day. In connection with the meetings, the Library assembled thematic art exhibits. These conferences may well have been inspired by the series the National Archives began in 1967. They have dealt with polar records, statistical records, captured German documents, and diplomatic history. A two-day conference on the history of the U.S. territories begins Monday, November 3, and another on urban history is scheduled for spring 1970. To keep the academic profession abreast of its programs and plans, the National Archives inaugurated *Prologue: The Journal of the National Archives* in the spring of 1969. Its articles will encompass the entire Archives establishment, including the presidential libraries and Federal Records Centers.

The newest of the presidential libraries, the Johnson Library in Austin, assured itself a vast quantity of documentation when the President required all executive agencies to prepare histories of their activities during his tenure. This rush project prevented any real analytical syntheses, but it did provide in one place much of the raw data, with some guides to its import, that future historians will use. Like other presidential libraries, the Johnson Library has an active oral history program.

For American historians engaged in original research, the Library of Congress' Manuscript Division offers a tremendous variety of Riches, ranging from presidential papers to the official files of the American Historical Association and the National Association for the Advancement of Colored People. In an effort to aid researchers locate needed information, the Library of Congress has prepared extensive finding aids to its own holdings, as well as to those of other institutions. In 1918 it issued the first guide that made a substantial effort to incorporate data on manuscripts throughout the country, the *Check List of Collections of Personal Papers in Historical Societies, University and Public Libraries, and Other Learned Institutions in the United States*. A popular revision came in 1924 entitled *Manuscripts in Public and Private Collections in the United States*. These guides were not nearly so comprehensive nor helpful as Philip M. Hamer's *A Guide to Archives and Manuscripts in the United States*,[62] prepared under the auspices of the National Historical Publications Commission, but they were important as pioneering efforts. Another significant biographical contribution was *A Guide to the Study of the United States of America* (1960). When the Library of Congress undertook compilation and publication of the *National Union Catalog of Manuscript Collections* (6 vols. 1962–68), it provided the vehicle for a complete reporting of manuscripts in the country. Unfortunately, the completeness depends on the cooperation of repositories, and the method of cumulating data and indices is antiquated, but the Library of Congress must be applauded for furnishing the opportunity for achieving bibliographical control over our vast array of primary sources. Among the Library of Congress' most important documentary publications have been the *Journals of the Continental Congress, 1774–1789*[63] and the *Records of the Virginia Company*.[64]

A comparatively recent venture of the Library of Congress, the Center for the Coordination of Foreign Manuscript Copying, promises—and indeed has already delivered—great help to historians. This center, headed by George O. Kent, serves as a clearinghouse for information on the availability of photocopied manuscripts in the United States. It seeks, moreover, to assist scholars in planning photocopying projects abroad so that duplication, with its attendant wastes to both repository and copier, may be avoided. Twice a year *News From the Center* apprises readers of copies of foreign manuscripts in this country and research conditions in foreign archives. Another publication important to historians is the *Quarterly Journal of the Library of Congress*. While its scope transcends our discipline, some of its most significant articles are historical.

In recent years the Smithsonian Institution has offered increased support for the study of history in the forms of postdoctoral visiting research associateships, predoctoral internships, and research assistantships. The collections of the Institution have long been available for research, but the inducement of financial aid to study specific collections has been a positive attraction for historians, especially those interested in American studies and the history of science and technology. Students of American history have too often ignored the kind of non-literary documentation offered by museums. Whatever attraction the Smithsonian may have for visiting researchers, its primary mission is to advance and diffuse knowledge through its corps of resident scholars. Researchers in several fields have long profited from the Smithsonian's specialized publications. Beginning in 1966 the Institution strove for a general audience through the *Smithsonian Journal of History*. Its erratic publication schedule proved a great disappointment, and in the summer of 1969 the Institution decided to kill the *Journal* and divert funds elsewhere.

The sheer size of the government's historical program is an impressive indication of its commitment to history. But governmental agencies do not necessarily construe this as a commitment to publication, nor even as a service to the taxpayers who support it. The military offices stress that their histories are primarily for internal consumption and secondarily for the public.[65] Perhaps the recent record should encourage official military historians to take less pride in our martial accomplishments and to seek to render a wider service to the citizens of the nation, who, after all, make their work possible. My argument is not that official historians have worshipped false gods, for the scholarly quality of their work has generally been sound. The time has come, it seems to me, for those directing the government's historical programs to put social utility ahead of any kind of parochial interest. This obviously is more easily said than done for civil servants, but unless it is done, I fear that the commonwealth will suffer.

One of the problems now besetting service histories is just this matter of parochialism. Military policy since World War II has been formed above the levels of individual services. The nation's political, military, and diplomatic decisions have often been shaped and determined by the National Security Council, the Central Intelligence Agency, and the Joint Chiefs of Staff. More often than not, official historians writing for publication do not have access to records from these agencies, so anything they write reflects a decidedly low level of operations. Even within the Department of Defense, there has been little coordination of the history of military activities since 1947, when the Department was created. The historical staff of the Office of the Secretary of Defense would be the logical agency to exercise leadership in

Footnotes at end of article.

writing a departmental history, but it has not done so. Even if such a history could not be published immediately because of security restrictions, preliminary research and writing should be under way. Inaction now means that the type of history that should be written may remain undone.

Aside from the scholarly activity that results in publication, almost all governmental historical offices maintain reference services, both for internal and public use. Many assemble reference files that enable the research which can later lead to publication. Several historical agencies administer museums, which can be an excellent means of communicating a sense of the past. These activities are manifestly important, but I submit that the prime responsibility of official historians in a democratic society should be to write and publish history that explains governmental operations to intelligent citizens. Otherwise, government history serves mainly itself and not the public that sustains it.

Because of their knowledge of agences' operations and records, government historians frequently are commandeered into nonhistorical duties. Career administrators usually have little appreciation for the historian's task and the fact that long periods of concentration are required to produce decent history. They find it easy to use historical talents in writing speeches, preparing reports, and the like. Unfortunately, some historians are willing to be diverted and use this as an excuse for not fulfilling their primary obligation. Since the government has a considerable investment in official history, the profession, through its various organizations, must maintain pressure on the government to insure that its official historians do not become burdened with other responsibilities.

The amount of the government's investment in official history is no real indication of its effectiveness nor of whether taxpayers get their money's worth. Those programs that can be judged by their serious publications have usually measured up to scholarly criteria.

While the finished products reflect objective scholarship, in the process of research and writing, government historians are sometimes subjected to pressures—subtle and not-so-subtle—to engage in special pleading, or at least to present the history of their particular employer in the best possible light.[66] It has been easy for hostile critics to label them "court historians." It is a credit to the integrity of the government historians that they can usually withstand these pressures, but subjection to them drains away creative energy and often delays the entire process.

One problem that accounts for many delays in writing official history is access to classified records. Since I have dealt with this elsewhere,[67] I shall not belabor it here. Suffice it to say that the government badly needs a coordinated, unified system of classifying and downgrading its records. Historians within the government should have easy access to all agencies' records, excepting only those obviously deserving security classifications. And the government should establish a central office to facilitate the access of both official and private historians to the necessary documents. This office could also bring much needed coordination to the entire federal historical effort. If Nixon and subsequent presidents follow Johnson's cue in requiring agencies to prepare their histories during a particular administration, this cannot help having a profound impact on the government's historical operations. Then there would be even greater need for such an office located high within the executive branch.

Finally, questions must be raised concerning the cost and utility of the government's historical programs. In comparison with other governmental expenditures, the cost is negligible and it would be easy to avoid raising the issue. But many wonder today if it is wise to assume that governmental expenditures are beyond the power of our analysis, if not comprehension. Certainly, the information presented by the government's historical programs is a positive contribution to scholarship and justifies their existence. But academic historians, as scholars and citizens, must concern themselves with the governmental aspect of the profession. They must be aware of the time and money necessary to produce official histories and of their intended audiences. The profession should strive to promote a comprehensive governmental historical program that would reflect accurately the role of the government in American life.

In view of these considerations, what recommendations may be made concerning those departments without historical programs? These include Treasury, Housing and Urban Development, Post Office, Commerce, Justice, as well as the legislative branch and the lower federal courts. As one vitally interested in the welfare of the profession and conscious of the need to apprise historians of non-teaching career opportunities, I could say that all major governmental agencies would be well advised to have historical programs. Some existing programs, however, have not established their worth through publications, and although the process of governmental history is admittedly slow, it is not unreasonable to expect from most official historians some token of scholarly publication after several years on the public payroll. Consequently, before any agencies establish new historical offices, they should enunciate their goals clearly, employ historians capable of achieving these goals, give them the requisite support and see that they produce. Lest this analysis of the government's historical programs seem too stringent, we must remember that these programs are possible only through public support. Therefore their entire operation, from the beginning of research to the published product, is a matter of public, as well as professional, concern.

FOOTNOTES

* The author wishes to thank the following persons for critical evaluations of an earlier draft of this essay: John Porter Bloom, Abe Bortz, Stetson Conn, Ernest M. Eller, Eugene M. Emme, Stanley L. Falk, William M. Franklin, Alfred Goldberg, Jonathan Grossman, Elizabeth E. Hamer, Richard G. Hewlett, Wilber W. Hoare, Jr., Alfred F. Hurley, George O. Kent, Donald R. McCoy, Wayne D. Rasmussen, Daniel J. Reed, James B. Rhoads, C. R. Rowdybush, Paul J. Scheips, Fred Schwengel, Boyd C. Shafer, Henry I. Shaw, Jr., Robert M. Utley, and Wilcomb E. Washburn. They detected factual errors and offered helpful suggestions for revision. While many of these have been incorporated, the author takes sole responsibility for the opinions offered herein.

THE LATE BELOVED EVERETT McKINLEY DIRKSEN

(Mr. ARENDS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. ARENDS. Mr. Speaker, it is no exaggeration to say that no man served in the Congress of the United States with greater distinction than our late beloved Senator Everett McKinley Dirksen. His contribution is almost beyond measure. Many people likened him to Abraham Lincoln, another son of Illinois, and in many respects he was the Lincoln of our day.

There should be a memorial to this truly great man. No more fitting memorial would be the naming of the new proposed Federal building and the existing Federal building and U.S. courthouse in Chicago after him. It was in the Federal building that Senator Dirksen had his office in Chicago. It was to this office that people from across the State would come for guidance and assistance. None were turned away. All were always given the best he had to offer for he was in the truest sense a man of and for the people.

I am today introducing a bill, on behalf of myself and other Members of Congress, to name these two buildings in Chicago after Senator Dirksen. Knowing the high regard which the American people of both political parties held for the late Senator, I am quite confident that all will join in supporting this proposal.

ON THE POSSIBILITIES OF TAX TREASON

(Mr. VANIK asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. VANIK. Mr. Speaker, yesterday the Attorney General requested the resignation of one of the greatest U.S. attorneys in recent times: Mr. Robert M. Morgenthau. This request comes with 2 years left to Mr. Morgenthau's term and while he is in the middle of major investigations of national importance, involving organized crime and public officials.

To quote this morning's Washington Post:

> The Nixon administration's attempt to fire Robert M. Morgenthau as U.S. attorney for the Southern District of New York is widely viewed here as the result of political pressure generated by the prosecutor's widespread investigations of white-collar crime and organized racketeering which could involve many prominent members of the business and political world.
>
> Recently, as Morgenthau's probes into financial dealings involving the use of foreign banks picked up steam, the reports of pressure from Washington have become more frequent.

I hope, Mr. Speaker, that everyone who is concerned about crime—not just the very serious and dangerous crime on the street, but the multibillion-dollar crimes of the rich and the syndicates—will support Attorney Morgenthau and the continuation of his probes.

I propose, Mr. Speaker, that the files which the U.S. attorney of the southern district of New York has accumulated on the use of Swiss banks by American citizens to evade U.S. tax laws be subpenaed by the House Ways and Means Committee to determine the extent of the use of international tax loopholes by Americans. It is incumbent upon Congress to utilize this evidence of tax abuse before it disappears.

The use of foreign secret bank accounts to avoid taxation is a form of tax treason which no American should tolerate.

I have today requested Chairman WILBUR MILLS, of the Ways and Means Committee, to initiate committee action on this critical matter.

HOBBY FARMING

(Mr. OBEY asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. OBEY. Mr. Speaker, family farmers should not have to compete against someone who does not have to make a profit to stay in business. In an attempt to do something about that, I am introducing in the House of Representatives today legislation which would prohibit agricultural grants-in-aid or farm assistance payments for persons who farm only for tax purposes. Senator NELSON is today introducing companion legislation in the Senate. It is time that we eliminate the tax advantages which benefit the wealthy who use farms as tax shelters and milk the Federal Treasury for upward of $600 million per year. And it is time that we prohibit these tax dodge farmers from gaining the economic benefits of farm programs as well.

Last January I had the opportunity to attend a seminar on corporation farming in Des Moines, Iowa, where the main issues discussed were the invasion of corporate and nonfarm interests into the agricultural sector of our Nation. At the end of that conference a statement was issued which read in part:

> An alarming trend in our time is the massive invasion of agriculture by corporate and non-farm interests . . . made possible and abetted by the availability of virtually unlimited capital and credit in the hands of those corporate giants, and by the provisions of tax laws which make it possible for corporations and the investors who are not primarily engaged as farm operators to take advantage of tax-loss deductions on their farm operations against income produced from non-farm enterprises.
>
> The activity of corporate and non-farm interests in agriculture has resulted in commodity market price manipulation, unrealistically high prices for farm land, and the driving of farm families off the land.

Mr. Speaker, a number of us in Congress have introduced legislation which we believe would go far in dealing with this corporate invasion in agriculture, an ever increasing occurrence which we look upon with grave concern. In particular, this legislation included the Metcalf and Culver bills which would have limited tax-loss deductions as a writeoff against nonfarm income to $15,000, with a dollar reduction in the writeoff allowed for each dollar of nonfarm income over $15,000. I support the Metcalf-Culver bills, and included a provision of this sort in the tax reform legislation which I introduced shortly after my election to Congress last April.

The need for such legislation is, I think, obvious. There is a marked tendency for example, for farm losses to increase as adjusted gross income increases. In 1966, in fact, the average farm losses reported by 88 millionaires were in excess of $40,000, something one should not expect from those who are otherwise prudent and successful businessmen and investors.

On almost any day we can see advertisements in the Wall Street Journal telling how farm investment for wealthy people results in tax shelters that enable them to avoid millions of dollars in taxes.

To quote from the report of the Senate and House committees which studied the tax reform legislation:

> The utilization of these tax advantages by high-income taxpayers is not merely a theoretical possibility.

It is a real threat, Mr. Speaker, and one we attempted to deal with in the tax reform legislation which recently was debated in the House and Senate.

Among other provisions, the House-passed tax reform bill contained a provision establishing an excess deductions account. The EDA was established to prevent individuals from using farm losses to convert ordinary income, taxed on a graduated scale, into capital gains, which of course are taxed at much lower rates. However, under the tax bill passed by the House, only losses in excess of $25,000 would be added to the EDA and it would apply only if the person had a nonfarm income of $50,000 per year or more. This method would still leave the tax-dodge farmer free to use the full amount of his farming losses to reduce the taxes he would otherwise have to pay on his nonfarming income.

Unfortunately, the provision adopted by the Senate Finance Committee was little better. Under that bill, a taxpayer whose nonfarm income is less than $50,000 could deduct his farm losses in full, and one with more than $50,000 of nonfarm income would be allowed to deduct his losses in full up to $25,000, and one-half of everything over this.

Both the Senate and House tax reform bills generally agreed also on a "hobby farm" provision which included a rule under which a taxpayer could not deduct losses arising from an activity if it was carried on without an expectation of realizing a profit. Where the losses of such an activity—including farming—were more than $25,000 in 3 out of 5 consecutive years, then the activity is presumed to have been carried on without the expectation of a profit, unless the taxpayer can show to the contrary.

In his attempt to amend the Senate bill, Senator METCALF pointed out that the House EDA provisions would raise about $20 million and would affect about 3,000 persons. If approved as an amendment to the Senate tax reform legislation, his amendment would have raised about $205 million in revenue and would have affected about 14,000 persons.

Mr. Speaker, even this was no panacea and Senator METCALF pointed out himself that his amendment, while much better than the House proposal, would still have affected only 2 percent of the 770,000 taxpayers who claim farm losses on their income tax returns. The important point, however, is that it would not affect the legitimate farmers who claim legitimate losses.

When the tax reform bill was presented to the House in August, I said at that time that I considered the tax-loss farming provisions unsatisfactory. Senator METCALF'S amendment did not pass the Senate, and the bill which did pass the Senate a few days ago is also inadequate to deal with this matter.

It is for this reason that I am introducing today additional provisions to the coalition farm bill which I cosponsored several weeks ago. My amendment will simply assure us that tax-dodge and hobby farmers—both in farming to avoid taxes and not to make a profit—will not get the same farm program benefits as the legitimate farmers who actively work their fields and provide this Nation with an abundant supply of food and fiber.

Although there are not many statistics available on this matter, I have received information from the Internal Revenue Service indicating that in 1966, 264,000 farmers reporting losses on their operations had received $272 million in farm program payments.

Mr. Speaker, I have already pointed out that many persons with very high incomes, including some whose incomes reach $1 million or more, claim tax

losses for farming operations. Figures compiled by the USDA indicate that in 1968 over 56 percent of our farmers receive only 11 percent of all farm payments, and most of these receive between $200 and $499 per year. Now we know that a number, and I suspect a growing number, of hobby farmers are not only milking the Federal Treasury by claiming tax losses, they are at the same time accepting grants-in-aid or assistance payments for not farming when they had no intention of doing so in the first place. I think this practice ought to be stopped. It is unfair, and it is unfairly giving the whole farm program a bad name. To correct that, I am using a vehicle which has already been accepted in principle by the Senate and the House in the tax reform bills passed by the two houses—that persons who farm without an expectation of realizing a profit should be prohibited from using their "hobbies" to gain tax benefits.

If the addition to the coalition farm bill which I am introducing today were adopted, no person who has a loss of $10,000 or more in 3 years out of 5 could obtain the benefits of the various farm programs extended in this major farm legislation, unless he could prove that he is in business to make a profit. This includes the wool program, feed grains, cotton, wheat, rice, soybeans and flax.

I would like to point out, however, that my proposals would not prohibit any persons from receiving cropland adjustment payments—CAP. Under this cropland conservation program, farmers receive payments for diverting acres of land from crops to conservation uses. The concern over soil, water, and wildlife conservation makes it apparent, I think, that any attempts to conserve our land are necessary and ought to be encouraged. To qualify for CAP payments a person must be actively farming for a period of 3 years and he must have a history of crop production. If any person under this program has farm losses, but wants and can qualify to divert acres into conservation uses, I believe he ought to be allowed to do so.

Mr. Speaker, this legislation is not intended nor would it penalize the family farmer who may legitimately incur losses from sales. In fact, it is meant to protect him from unfair competition. It would affect the so-called "farmer" who loses at least $30,000 in a 5-year period, and who cannot show that he is in business with an expectation of making a profit.

This measure is not a cureall for the corporate invasion into agriculture whose tentacles seem to be extending each year, and I will continue to support the measures proposed by Senator METCALF and Representative CULVER. But I believe this measure is a first step. With its adoption we will be telling tax-dodge farmers and investors that farm assistance programs were not established for their benefit, but to help stabilize farm income and assure the consumer an adequate supply of quality agricultural products. Wealthy nonfarmers should not be allowed to use farming as either a tax dodge or as a means to obtain Federal assistance payments designed for totally different purposes.

Mr. Speaker, since I am already an author of the coalition farm bill (H.R. 14014) I am using that measure as a vehicle to introduce the legislation which I am proposing today. My proposal, which appears below, will appear as title XI of that legislation, and will affect titles II, wool; title III, corn and feed grains; title IV, cotton; title V, what; title VI, soybeans and flax seed; and title X, rice.

The new title follows:

TITLE XI—LIMITATION ON BENEFITS FOR HOBBY FARMERS

SEC. 1201. (a) If the net operating loss incurred by any person from farming operations exceeds $10,000 in each of any 3 years in any 5-year period, then unless the person establishes to the contrary that he was operating with an expectation of realizing a profit, that person shall be deemed to be carrying on farming operations in the last year of such 5-year period without an expectation of profit.

(b) No person who, pursuant to subsection (a) of this section, is deemed to be carrying on farming operations in any year without an expectation of profit may be provided any benefits the following year under any laws amended by titles II, III, IV, V, VI, or X of this Act.

MILITARY CONSTRUCTION APPROPRIATIONS—CONFERENCE REPORT

Mr. SIKES submitted the following conference report and statement on the bill (H.R. 14751) making appropriations for military construction for the Department of Defense for the fiscal year ending June 30, 1970, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 91–770)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 14751) "making appropriations for military construction for the Department of Defense for the fiscal year ending June 30, 1970, and for other purposes," having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 5, 6, and 7; and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$287,228,000"; and the Senate agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$300,028,000"; and the Senate agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$284,327,000"; and the Senate agree to the same.

Amendment numbered 4: That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$33,915,000"; and the Senate agree to the same.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 14751) making appropriations for military construction for the Department of Defense for the fiscal year ending June 30, 1970, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report as to each of such amendments, namely:

Amendment No. 1, Military construction, Army: Appropriates $287,228,000 instead of $240,446,000 as proposed by the House and $297,597,000 as proposed by the Senate. The conferees have agreed to the following additions and deletions to the amounts and line items as proposed by the House:

Fort Holabird, Md.: Building alteration (National Agency Check Center)	+$489,000
Fort Knox, Ky.: Armor and reconnaissance instruction facility	+2,830,000
Fort Rucker, Ala.: USAAVNS maintenance instruction facility	+3,636,000
Fort Bliss, Tex.: Guided missile maintenance buildings	+2,004,000
Fort Riley, Kans.: Road	+1,023,000
Aberdeen Proving Ground, Md.: Automotive instruction buildings	+1,966,000
Utilities and roads	+346,000
Atlanta Army Depot, Ga.: Storage modernization	+572,000
Letterkenny Army Depot, Pa.: Radiographic inspection facility	+1,049,000
Pueblo Army Depot, Colo.: Radiographic inspection facility	+1,026,000
U.S. Military Academy, West Point, N.Y.: Cadet activities center	+16,814,000
Brook Army Medical Center, Tex.: Administrative and classroom building	+9,891,000
Europe: Ammunition storage	+2,500,000
Reduction due to unobligated balances	+8,000,000
Fort Dix, N.J.: Elevated steam line, reception center	−75,000
Fort Polk, La.: Light vehicle driving range	−216,000
Army Map Service, Washington, D.C.: Alter building for computer	−134,000
Fort Lee, Va.: Post office	−284,000
Fort Bliss, Tex.: Main post office	−436,000

U.S. Army Military Academy, West Point, N.Y.: Hospital and utilities (deficiency) — −$3,399,000
Fort J. M. Wainwright, Alaska: Survival measures — −820,000

The conferees have approved a cadet activities center, in the amount of $16,814,000, at the United States Military Academy, with the proviso that before any contract for the construction of this center is awarded, the Army must make a full report to the Committees on Appropriations of the House of Representatives and the Senate. This report should set forth the extent of competition obtained in the bidding for this project and the measures taken by all concerned with this construction to ensure that fair value is obtained for the construction dollars spent. The Army should make every effort to construct this center within the amount allowed.

Amendment No. 2, Military Construction, Navy: Appropriates $300,028,000 instead of $271,605,000 as proposed by the House and $305,377,000 as proposed by the Senate. The conferees have agreed to the following additions and deletions to the amounts and line items as proposed by the House:

Naval Underwater Weapons Research and Engineering Station, Newport, R.I.: Mark 48 weapons system test center	+$754,000
Naval Air Rework Facility, Quonset Point, R.I.: Engine parts coating shop	+1,063,000
Fleet Antiair Warfare Training Center, Dam Neck, Va.: Computer building addition	+493,000
Naval Air Rework Facility, Norfolk, Va.: Cleaning and corrosion treatment building	+1,254,000
Naval Training Center, Orlando, Fla.:	
Recruit barracks	+8,285,000
Mess hall	+2,023,000
Naval Shipyard, Charleston, S.C.: Waterfront services facilities	+200,000
Naval Air Station, Chase Field, Tex.: Transmitter and receiver building and land acquisition	+791,000
Naval Air Station, Kingsville, Tex.: Aircraft maintenance hangar	+2,681,000
Naval Air Station, Lemoore, Calif.: Aircraft systems training building	+956,000
Naval Air Station, North Island, Calif.: Helicopter overhaul and repair shop	+1,620,000
Naval Training Center, San Diego, Calif.: Service school barracks	+3,335,000
Naval Shipyard, Bremerton, Wash.: Woodworking shop	+4,000,000
Marine Corps Auxiliary Landing Field, Bogue, N.C.:	
Utilities	+352,000
Combat vehicle maintenance shop	+136,000
Marine Corps Base, Camp Lejeune, N.C.:	
Alterations for ADP installation	+103,000
Weapons maintenance shop	+425,000
Electronic maintenance shop	+506,000
Utilities and roads	+683,000
Marine Corps Air Station, Cherry Point, N.C.:	
Aerial gunnery range improvements	+1,631,000
Barracks	+352,000
Marine Corps Air Station, El Toro, Calif: Barracks	+3,554,000
Marine Corps Recruit Depot, San Diego, Calif.: Barracks	+5,601,000
Navy Public Works Center, Guantanamo, Cuba: Electric powerplant	+$2,898,000
Naval Construction Battalion Center, Gulfport, Miss.:	
Enlisted men's barracks	+4,430,000
Controlled humidity warehouse	+3,381,000
Stock receiving facility	+2,088,000
Fire station	+234,000
Supply operations facility	+545,000
Retail supply issue	+413,000
Utilities	+540,000
Telephone exchange/command center	+357,000
Reduction due to unobligated balances	+12,000,000
Naval Support Activity, New Orleans, La.: Reconstruction of wharf	+544,000
Navy Supply Corps School, Athens, Ga.: Training building	+2,920,000
Naval Construction Battalion Center, Davisville, R.I.: Regimental headquarters building	+621,000
Naval Station, Guantanamo Bay, Cuba: Enlisted men's club	+1,108,000
Marine Corps Base, Camp Lejeune, N.C.: Base post office	−536,000
Naval Hospital, Camp Pendleton, Calif.: Hospital	−19,805,000
Reindeer Station: (Classified)	−9,556,000
Naval Air Station, New York, N.Y.: Boiler fuel conversion	−228,000
Naval Supply Center, Norfolk, Va.: Fumigation building	−96,000
Naval Undersea Warfare Center, San Diego, Calif.: Launch and repair facility	−725,000
Naval Station, Adak, Alaska: Community center	−3,219,000
Marine Barracks, Washington, D.C.: Land acquisition	−459,000
Marine Corps Supply Center, Barstow, Calif.: Sanitary landfill	−64,000
Navy Public Works Center, Guam: Electric power plant and land acquisition	−9,396,000
Naval Air Facility, El Centro, Calif.: Photographic laboratory	−250,000
Naval Air Station, LaMoure, N.D.: Transmitter facility (OMEGA) price reduction	−120,000

Amendment No. 3, Military Construction, Air Force: Appropriates $284,327,000 instead of $253,505,000 as proposed by the House and $302,349,000 as proposed by the Senate. The conferees have agreed to the following additions and deletions to the amounts and line items as proposed by the House:

Kirtland AFB, N. Mex.: Survivability/vulnerability test simulation facility	+$669,000
Keesler AFB, Miss.: Data processing plant	+342,000
Lackland AFB, Tex.: Composite recruit training and housing facility	+7,789,000
Sheppard AFB, Tex.: Data-processing plant	+155,000
Barksdale AFB, La.: Data processing plant	+237,000
Davis-Monthan AFB, Ariz.: Runway access taxiway	+609,000
Loring AFB, Me.: WAF dormitory	+545,000
George AFB, Calif.: Airman dormitory	+1,950,000
Luke AFB, Ariz.:	
Operational apron	+3,714,000
Airman dormitory	+1,206,000
Nellis AFB, Nev.:	
Addition to operational apron	+$1,203,000
Squadron operations	+1,318,000
Relocate utilities	+318,000
Addition to aerospace ground equipment shop	+128,000
Hahn AB, Germany: Maintenance hangar	+544,000
Lakenheath RAF, United Kingdom: Target intelligence training facility	+115,000
Mildenhall RAF, United Kingdom: War readiness material storage (POL)	+1,019,000
Upper Heyford, United Kingdom: War readiness material storage (POL)	+468,000
Dover AFB, Del.: Aircraft maintenance dock	+1,380,000
Elmendorf AFB, Alaska: Alter squadron operations	+100,000
Reduction due to unobligated balances	+15,000,000
Eglin AFB, Fla.: Officers open mess	+953,000
Keesler AFB, Miss.: Refueling vehicle depot	+135,000
McGuire AFB, N.J.: Officers open mess	+1,085,000
Offutt AFB, Nebr.: Extend runway	+1,743,000
Foreign leases	+753,000
Holloman AFB, N. Mex.: Addition to research data center	−295,000
Sheppard AFB, Tex.: Library	−338,000
Travis AFB, Calif.: Security fence	−137,000
Tinker AFB, Okla.: Alter avionics shop	−410,000
Tonopah AFS, Nev.: NCO open mess	−166,000
Wadena AFS, Minn.: Sewage treatment system	−56,000
Key West NAS, Fla.: Alert facility	−79,000
Perrin AFB, Tex.: Non-Destruct inspection laboratory	−122,000
McClellan AFB, Calif.: Alter heating plant	−151,000
Brooks AFB, Tex.: Human resources research facility	−197,000
Los Angeles AFS, Calif.: Base communications	−258,000
Western Test Range, Vandenberg AFB, Calif.: Power and environmental systems facility	−2,105,000
Satellite Control Facilities: Electric power plant—Kodiak, Alaska	−1,750,000
Elmendorf AFB, Alaska: Field training facility conversion	−100,000
Hickam AFB, Hawaii:	
Post office	−221,000
Walkway-bridge	−50,000
K.I. Sawyer AFB, Mich.: Civil engineering pavement and grounds facility	−342,000
March AFB, Calif.: Numbered AF HQ	−4,210,000
Offutt AFB, Neb: Utility supervisory control system	−376,000
Wurtsmith AFB, Mich.: Non-Destruct inspection laboratory	−156,000
Cambria AFS, Calif.: Sewage treatment and disposal system	−47,000
Empire AFS, Mich.: Sewage treatment and disposal system	−99,000
Yokota AB, Japan: Hazardous parking area	−435,000
Howard AFB, C.Z.: Covered aircraft corrosion control facility	−556,000

Amendment No. 4, Military Construction, Defense Agencies: Appropriates $33,915,000

instead of $28,720,000 as proposed by the House and $43,165,000 as proposed by the Senate. The conferees have agreed to the following additions and deletions to the amounts and line items as proposed by the House:

Defense Atomic Support Agency: Sandia Base, N. Mex.: Plastics and special fabrication shop	+$121,000
Defense Supply Agency: Defense Depot, Ogden, Utah: Warehouse lighting	+575,000
Defense General Supply Center, Richmond, Va.: Warehouse lighting	+295,000
Various: Department of Defense emergency construction	+2,500,000
Reduction from unobligated balances	+1,750,000
Defense Atomic Support Agency: Sandia Base, N. Mex.: Install adequate fire protection, Building 2000	−46,000

Amendment No. 5, Family Housing, Defense: Appropriates $688,476,000 as proposed by the Senate instead of $689,801,000 as proposed by the House.

Amendment No. 6, Family Housing, Defense: Authorizes not to exceed $30,461,000 for the construction of Army family housing as proposed by the Senate instead of $31,061,000 as proposed by the House. The conferees are in agreement that 150 units of family housing contained in the House-passed bill should be deleted from Fort Leavenworth, Kansas and an additional 150 units included at Fort Carson, Colorado. This change was made in the Senate bill in order to reflect the authorization action taken by the Congress.

Amendment No. 7, Family Housing, Defense: Authorizes not to exceed $41,989,000 for construction of family housing for the Air Force as proposed by the Senate instead of $42,714,000 as proposed by the House.

DEPARTMENT OF TRANSPORTATION—CONFERENCE REPORT

Mr. BOLAND submitted the following conference report and statement on the bill (H.R. 14794) making appropriations for the Department of Transportation and related agencies for the fiscal year ending June 30, 1970, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 91–771)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 14794) "making appropriations for the Department of Transportation and related agencies for the fiscal year ending June 30, 1970, and for other purposes," having met after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 5, 6, 10, and 18.

That the House recede from its disagreement to the amendments of the Senate numbered 8, 11, 12, 22, 24, and 26, and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$11,600,000"; and the Senate agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$11,000,000"; and the Senate agree to the same.

Amendment numbered 4: That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$66,500,000"; and the Senate agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$9,650,000"; and the Senate agree to the same.

Amendment numbered 9: That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$85,000,000"; and the Senate agree to the same.

Amendment numbered 13: That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$59,121,000"; and the Senate agree to the same.

Amendment numbered 16: That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$29,550,000"; and the Senate agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$2,050,000"; and the Senate agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$2,050,000"; and the Senate agree to the same.

Amendment numbered 20: That the House recede from its disagreement to the amendment of the Senate numbered 20, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$25,000,000"; and the Senate agree to the same.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$13,050,000"; and the Senate agree to the same.

Amendment numbered 23: That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$11,000,000"; and the Senate agree to the same.

Amendment numbered 25: That the House recede from its disagreement to the amendment of the Senate numbered 25, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$214,000,000"; and the Senate agree to the same.

Amendment numbered 27: That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$11,600,000"; and the Senate agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$11,000,000"; and the Senate agree to the same.

Amendment numbered 4: That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$66,500,000"; and the Senate agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$9,650,000"; and the Senate agree to the same.

Amendment numbered 9: That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$85,000,000"; and the Senate agree to the same.

Amendment numbered 13: That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$59,121,000"; and the Senate agree to the same.

Amendment numbered 16: That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$29,550,000"; and the Senate agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$2,050,000"; and the Senate agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$2,050,000"; and the Senate agree to the same.

Amendment numbered 20: That the House recede from its disagreement to the amendment of the Senate numbered 20, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$25,000,000"; and the Senate agree to the same.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$13,050,000"; and the Senate agree to the same.

Amendment numbered 23: That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$11,000,000"; and the Senate agree to the same.

Amendment numbered 25: That the House recede from its disagreement to the amendment of the Senate numbered 25, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$214,000,000"; and the Senate agree to the same.

Amendment numbered 27: That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$5,050,000"; and the Senate agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$25,127,000"; and the Senate agree to the same.

Amendment numbered 29: That the House recede from its disagreement to the amendment of the Senate numbered 29, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$70,000,000"; and the Senate agree to the same.

Amendment numbered 30: That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$18,000,000"; and the Senate agree to the same.

Amendment numbered 31: That the House receded from its disagreement to the amendment of the Senate numbered 31, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$8,000,000"; and the Senate agree to the same.

Amendment numbered 32: That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following: for any further construction of the Miami jetport or of any other air facility in the State of Florida lying south of the Okeechobee Waterway and in the drainage basins contributing water to the Everglades National Park; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 2, 14, and 15.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 14794) making appropriations for the Department of Transportation and related agencies for the fiscal year ending June 30, 1970, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report as to each of such amendments, namely:

OFFICE OF THE SECRETARY

Amendment No. 1: Appropriates $11,600,000 for salaries and expenses instead of $11,500,000 as provided by the House and $11,750,000 as provided by the Senate. The increase is to provide ten positions for the Office of the Assistant Secretary for Environment and Urban Systems.

Amendment No. 2: Reported in disagreement.

Amendment No. 3: Appropriates $11,000,000 for Transportation Planning, Research, and Development instead of $8,000,000 as provided by the House and $14,000,000 as provided by the Senate.

COAST GUARD

Amendment No. 4: Appropriates $66,500,000 for Acquisition, Construction, and Improvements instead of $57,300,000 as provided by the House and $75,700,000 as provided by the Senate.

Amendment No. 5: Appropriates $25,900,000 for Reserve Training as proposed by the House.

Amendment No. 6: Provides limitation of 15,000 personnel for the Selected Reserve on June 30, 1970, as proposed by the House.

FEDERAL AVIATION ADMINISTRATION

Amendment No. 7: Appropriates $9,650,000 for Operation and Maintenance, National Capital Airports instead of $9,500,000 as provided by the House and $9,800,000 as provided by the Senate.

Amendment No. 8: Appropriates $50,000,000 for Grants-in-Aid for Airports as proposed by the Senate.

Amendment No. 9: Appropriates $85,000,000 for Civil Supersonic Aircraft Development instead of $95,958,000 as proposed by the House and $80,000,000 as proposed by the Senate.

FEDERAL HIGHWAY ADMINISTRATION

Amendment No. 10: Appropriates $1,650,000 for the Office of the Administrator, Salaries and Expenses, as proposed by the House instead of $1,687,000 as proposed by the Senate.

Amendment No. 11: Inserts language as proposed by the Senate.

Amendment No. 12: Provides transfer of $12,627,000 from the appropriation for "Federal-Aid Highways (Trust Fund)" as proposed by the Senate instead of $12,467,000 as proposed by the House.

Amendment No. 13: Provides $59,121,000 for the Bureau of Public Roads, Limitation on General Expenses, instead of $59,012,000 as proposed by the House and $59,230,000 as proposed by the Senate.

Amendments Nos. 14 and 15: Reported in disagreement.

Amendment No. 16: Appropriates $29,550,000 for Traffic and Highway Safety instead of $27,550,000 as proposed by the House and $37,550,000 as proposed by the Senate. The increase allowed over the House bill amount shall be allocated to the highest priority research projects.

Amendment No. 17: Provides transfer of $2,050,000 from the appropriation for "State and community highway safety (Liquidation of contract authorization)" instead of $2,000,000 as proposed by the House and $2,100,000 as proposed by the Senate. The increase allowed over the House bill amount includes provision for five additional positions.

Amendment No. 18: Deletes language inserted by the Senate.

Amendment No. 19: Provides for advance of $2,050,000 from State and Community Highway Safety (Liquidation of Contract Authorization) to the appropriation "traffic and highway safety" instead of $2,000,000 as proposed by the House and $2,100,000 as proposed by the Senate.

Amendments Nos. 20 and 21: Appropriate $25,000,000 for Forest Highways (Liquidation of Contract Authorization) instead of $18,000,000 as proposed by the House and $30,000,000 as proposed by the Senate.

FEDERAL RAILROAD ADMINISTRATION

Amendment No. 22: Appropriates $1,050,000 as proposed by the Senate instead of $1,000,000 as proposed by the House.

Amendment No. 23: Appropriates $11,000,000 for High-Speed Ground Transportation Research and Development instead of $10,000,000 as proposed by the House and $12,000,000 as proposed by the Senate. The conference agreement includes six positions in addition to those provided by the House.

Amendment No. 24: Inserts language providing $150,000 for a feasibility study of extending a transit line to Dulles International Airport as proposed by the Senate.

URBAN MASS TRANSPORTATION ADMINISTRATION

Amendment No. 25: Appropriates $214,000,000 instead of $220,000,000 as proposed by the House and $200,000,000 as proposed by the Senate. The increase over the Senate amount is for Capital facilities grants. This provides the full budget request of $176,000,000.

Amendment No. 26: Limits funds available for research, development, and demonstration grants to $20,000,000 as proposed by the Senate instead of $25,000,000 as proposed by the House.

TITLE II—RELATED AGENCIES

NATIONAL TRANSPORTATION SAFETY BOARD

Amendment No. 27: Appropriates $5,050,000 for salaries and expenses instead of $5,000,000 as proposed by the House, and $5,100,000 as proposed by the Senate. The funds will provide for all 11 new positions requested in the budget.

INTERSTATE COMMERCE COMMISSION

Amendment No. 28: Appropriates $25,127,000 for salaries and expenses instead of $25,000,000 as proposed by the House, and $25,254,000 as proposed by the Senate.

TITLE III—GENERAL PROVISIONS

Amendment No. 29: Limits obligations for "State and community highway safety" to $70,000,000 instead of $65,000,000 as proposed by the House and $75,000,000 as proposed by the Senate.

The conferees are in agreement that the National Highway Safety Bureau should require that, in the matching process, both Federal and State funds be applied to the cost of additional safety efforts and that the Bureau's practice of using expenditures for existing State activities for matching purposes be discontinued.

Amendment No. 30: Limits obligations for "Forest highways" to $18,000,000 instead of $12,000,000 as proposed by the House and $29,000,000 as proposed by the Senate.

Amendment No. 31: Limits obligations for "Public lands highways" to $8,000,000 instead of $3,000,000 as proposed by the House and $13,000,000 as proposed by the Senate.

Amendment No. 32: Provides amended language prohibiting any further construction of the Miami jetport or of any other air facility in the State of Florida lying south of the Okeechobee Waterway and in the drainage basins contributing water to Everglades National Park until it has been shown by an appropriate study made jointly by the Department of the Interior and the Department of Transportation that such an airport will not have an adverse environmental effect on the ecology of the Everglades.

TO LOWER INTEREST RATES, FIGHT INFLATION, HELP SMALL BUSINESS, AND EXPAND THE MORTGAGE MARKET—CONFERENCE REPORT

Mr. PATMAN submitted the following conference report and statement on the bill (S. 2577) to provide additional mortgage credit, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 91-769)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2577) to provide additional mortgage credit, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the text of the bill and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the House amendment insert the following:

TITLE I—AMENDMENTS TO EXISTING ACTS

SECTION 1. Section 7 of the Act of September 21, 1966 (Public Law 89-587; 80 Stat. 823) is amended to read:

"SEC. 7. Effective March 22, 1971:

"(1) So much of section 19(j) of the Federal Reserve Act (12 U.S.C. 371(b)) as precedes the third sentence thereof is amended to read as it would without the amendment made by section 2(c) of this Act.

"(2) The second and third sentences of section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) are amended to read as they would without the amendment made by section 3 of this Act.

"(3) The last three sentences of section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) are repealed.

"(4) Section 5B of the Federal Home Loan Bank Act (12 U.S.C. 1425b) is repealed."

SEC. 2. (a) Section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) is amended by adding at the end thereof the following new sentences: "The authority conferred by this subsection shall also apply to noninsured banks in any State if (1) the total amount of time and savings deposits held in all such banks in the State, plus the total amount of deposits, shares, and withdrawable accounts held in all building and loan, savings and loan, and homestead associations (including cooperative banks) in the State which are not members of a Federal home loan bank, is more than 20 per centum of the total amount of such deposits, shares, and withdrawable accounts held in all banks, and building and loan, savings and loan, and homestead associations (including cooperative banks) in the State, and (2) there does not exist under the laws of such State a bank supervisory agency with authority comparable to that conferred by this subsection, including specifically the authority to regulate the rates of interest and dividends paid by such noninsured banks on time and savings deposits, or if such agency exists it has not issued regulations in the exercise of that authority. Such authority shall only be exercised by the Board of Directors with respect to such noninsured banks prior to July 31, 1970, to limit the rates of interest or dividends which such banks may pay on time and savings deposits to maximum rates not lower than 5½ per centum per annum. Whenever it shall appear to the Board of Directors that any noninsured bank or any affiliate thereof is engaged or has engaged or is about to engage in any acts or practices which constitute or will constitute a violation of the provisions of this subsection or of any regulations thereunder, the Board of Directors may, in its discretion, bring an action in the United States district court for the judicial district in which the principal office of the noninsured bank or affiliate thereof is located to enjoin such acts or practices, to enforce compliance with this subsection or any regulations thereunder, or for a combination of the foregoing, and such courts shall have jurisdiction of such actions, and, upon a proper showing, an injunction, restraining order, or other appropriate order may be granted without bond."

(b) Section 5B of the Federal Home Loan Bank Act (12 U.S.C. 1425b) is amended to read as follows:

"SEC. 5B. (a) The Board may from time to time, after consulting with the Board of Governors of the Federal Reserve System and the Board of Directors of the Federal Deposit Insurance Corporation, prescribe rules governing the payment and advertisement of interest or dividends on deposits, shares, or withdrawable accounts, including limitations on the rates of interest or dividends on deposits, shares, or withdrawable accounts that may be paid by members, other than those the deposits of which are insured in accordance with the provisions of the Federal Deposit Insurance Act, by institutions which are insured institutions as defined in section 401(a) of the National Housing Act, and by nonmember building and loan, savings and loan, and homestead associations, and cooperative banks. The Board may prescribe different rate limitations for different classes of deposits, shares, or withdrawable accounts, for deposits, shares, or withdrawable accounts of different amounts or with different maturities or subject to different conditions regarding withdrawal or repayment, according to the nature or location of such members, institutions, or nonmembers or their depositors, shareholders or withdrawable account holders, or according to such other reasonable bases as the Board may deem desirable in the public interest. The authority conferred by this subsection shall apply to nonmember building and loan, savings and loan, and homestead associations, and cooperative banks in any State if (1) the total amount of deposits, shares, and withdrawable accounts held in all such nonmember associations and banks in the State, plus the total amount of time and savings deposits held in all banks in the State which are not insured by the Federal Deposit Insurance Corporation, is more than 20 per centum of the total amount of such deposits, shares, and withdrawable accounts held in all banks, and building and loan, savings and loan, and homestead associations (including cooperative banks) in the State, and (2) there does not exist under the laws of such State a bank supervisory agency with authority comparable to that conferred by the first two sentences of this subsection, including specifically the authority to regulate the rates of interest and dividends paid by any such association or bank on deposits, shares, or withdrawable accounts, or if such agency exists it has not issued regulations in the exercise of that authority. Such authority shall only be exercised by the Board with respect to such nonmember associations and banks prior to July 31, 1970, to limit the rates of interest or dividends which such associations or banks may pay on deposits, shares, or withdrawable accounts to maximum rates not lower than 5½ per centum per annum.

"(b) In addition to any other penalty provided by this or any other law, any institution subject to this section which violates a rule promulgated pursuant to this section shall be subject to such civil penalties, which shall not exceed $100 for each violation, as may be prescribed by said Board by rule and such rule may provide with respect to any or all such violations that each day on which the violation continues shall constitute a separate violation. The Board may recover any such civil penalty for its own use, through action or otherwise, including recovery thereof in any other action or proceeding under this section. The Board may, at any time before collection of any such penalty, whether before or after the bringing of an action or other legal proceeding, the obtaining of any judgment or other recovery, or the issuance or levy of any execution or other legal process therefor, and with or without consideration, compromise, remit, or mitigate in whole or in part any such penalty or any such recovery.

"(c) Whenever it shall appear to the Board that any nonmember institution is engaged or has engaged or is about to engage in any acts or practices which constitute or will constitute a violation of the provisions of this section or of any regulations thereunder, the Board may, in its discretion, bring an action in the United States district court for the judicial district in which the principal office of the institution is located to enjoin such acts or practices, to enforce compliance with this section or any regulations thereunder, or for a combination of the foregoing, and such courts shall have jurisdiction of such actions, and, upon a proper showing, an injunction, restraining order, or other appropriate order may be granted without bond.

"(d) All expenses of the Board under this section shall be considered as nonadministrative expenses."

SEC. 3. Section 11(i) of the Federal Home Loan Bank Act (12 U.S.C. 1431(i)) is amended—

(1) by striking out "$1,000,000,000" and inserting in lieu there of "$4,000,000,000";

(2) by striking out the last sentence thereof and inserting in lieu thereof the following: "Each purchase of obligations by the Secretary of the Treasury under this subsection shall be upon terms and conditions as shall be determined by the Secretary of the Treasury and shall bear such rate of interest as may be determined by the Secretary of the Treasury taking into consideration the current average market yield for the month preceding the month of such purchase on outstanding marketable obligations of the United States."; and

(3) by adding at the end thereof a new paragraph as follows:

"The authority provided in this subsection shall be used by the Secretary of the Treasury, when alternative means cannot effectively be employed, to permit members of the Home Loan Bank System to continue to supply reasonable amounts of funds to the mortgage market whenever the ability to supply such funds is substantially impaired during periods of monetary stringency and rapidly rising interest rates and that funds so borrowed shall be repaid by the Home Loan Bank Board at the earliest practicable date."

SEC. 4. (a) Section 19(a) of the Federal Reserve Act (12 U.S.C. 461) is amended by inserting after the word "interest," the following: "to determine what types of obligations, whether issued directly by a member bank or indirectly by an affiliate of a member bank or by other means, shall be deemed a deposit,".

(b)(1) The fourth sentence of section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) is amended to read as follows: "The Board of Directors is authorized for the purposes of this subsection to define the terms 'time deposits' and 'savings deposits', to determine what shall be deemed a payment of interest, and to prescribe such regulations as it may deem necessary to effectuate the purposes of this subsection and to prevent evasions thereof."

(2) Section 18(g) of such Act is further amended by inserting after the fifth sentence the following: "The provisions of this subsection and of regulations issued thereunder shall also apply, in the discretion of the Board of Directors, to obligations other than deposits that are undertaken by insured nonmember banks or their affiliates for the purpose of obtaining funds to be used in the banking business. As used in this subsection, the term 'affiliate' has the same meaning as when used in section 2(b) of the Banking Act of 1933, as amended (12 U.S.C. 221a(b)), except that the term 'member bank', as used in such section 2(b), shall be deemed to refer to an insured nonmember bank."

(c) The first sentence of section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) is amended by inserting "or dividends" after "interest".

SEC. 5. Section 19(b) of the Federal Reserve Act (12 U.S.C. 461) is amended by adding at the end thereof a new sentence as follows: "The Board may, however, prescribe any reserve ratio, not more than 22 per centum, with respect to any indebtedness of a member bank that arises out of a transaction in the ordinary course of its banking business with respect to either funds received or credit extended by such bank to a bank organized under the law of a foreign country or a dependency or insular possession of the United States."

SEC. 6. (a) Effective as of the close of December 31, 1969, section 404 of the National Housing Act is amended

(1) by striking out "plus any creditor obligations of such institution" in subsection (b)(1), and the amendment made by this subdivision (1) shall be applicable also to any then unexpired portion of any then current premium year under subsection (b)(1).

(2) by striking out "and creditor obligations" in subsection (b)(2).

(3) by striking out "and its creditor obligations" in subsection (c).

(4) by striking out "and creditor obligations" each place it appears in subsection (g). The condition in the first sentence of that subsection shall be deemed to be met as of the close of December 31, 1969. The words "such year" in that sentence shall be deemed to include also the year beginning January 1, 1970.

(b) The Federal Savings and Loan Insurance Corporation is authorized by regulation or otherwise

(1) to make such provisions as it may deem advisable with respect to the order in which and the extent to which the components of a pro rata share of its secondary reserve shall be applied or be deemed to have been applied in the case of a reduction of such share through a use under the second sentence of section 404(e) of the National Housing Act or the first sentence of section 404(g), a transfer of part of such share under the third sentence of section 404(e), or otherwise.

(2) to take such action, including without limitation such adjustments and refunds and such deferrals of premium payments and other payments, as it may determine to be necessary or appropriate for or in connection with the implementation of this section or other legislation amending or supplementing said section 404.

SEC. 7. (a) The following provisions of the Federal Deposit Insurance Act are amended by changing "$15,000", each place it appears therein, to read "$20,000":

(1) The first sentence of section 3(m) (12 U.S.C. 1813(m)).

(2) The first sentence of section 7(i) (12 U.S.C. 1817(i)).

(3) The last sentence of section 11(a) (12 U.S.C. 1821(a)).

(4) The fifth sentence of section 11(i) (12 U.S.C. 1821(i)).

(b) The amendments made by this section are not applicable to any claim arising out of the closing of a bank prior to the date of enactment of this Act.

SEC. 8. (a) The following provisions of title IV of the National Housing Act are amended by changing "$15,000", each place it appears therein, to read "$20,000":

(1) Section 401(b) (12 U.S.C. 1724(b)).

(2) Section 405(a) (12 U.S.C. 1728(a)).

(b) The amendments made by this section are not applicable to any claim arising out of a default, as defined in section 401(d) of the National Housing Act, where the appointment of a conservator, receiver, or other legal custodian as set forth in that section becomes effective prior to the date of enactment of this Act.

SEC. 9. (a) Section 708(b) of the Defense Production Act of 1950 (50 U.S.C. 2158(b)) is amended by striking out everything after "United States", the first time it appears, and inserting a period in lieu thereof.

(b) Section 708(f) of that Act (50 U.S.C. 2158(f)) is repealed.

TITLE II—AUTHORITY FOR CREDIT CONTROL

Sec. 201. Short title

This title may be cited as the Credit Control Act.

Sec. 202. Definitions and rules of construction

(a) The definitions and rules of construction set forth in this section apply to the provisions of this title.

(b) The term "Board" refers to the Board of Governors of the Federal Reserve System.

(c) The term "organization" means a corporation, government or governmental subdivision or agency, trust, estate, partnership, cooperative, or association.

(d) The term "person" means a natural person or an organization.

(e) The term "credit" means the right granted by a creditor to a debtor to defer payment of debt or to incur debt and defer its payment.

(f) The term "creditor" refers to any person who extends, or arranges for the extension of, credit, whether in connection with a loan, a sale of property or services, or otherwise.

(g) The term "credit sale" refers to any sale with respect to which credit is extended or arranged by the seller. The term includes any rental-purchase contract and any contract or arrangement for the bailing or leasing of property when used as a financing device.

(h) The terms "extension of credit" and "credit transaction" include loans, credit sales, the supplying of funds through the underwriting, distribution, or acquisition of securities, the making or assisting in the making of a direct placement, or otherwise participating in the offering, distribution, or acquisition of securities.

(i) The term "borrower" includes any person to whom credit is extended.

(j) The term "loan" includes any type of credit, including credit extended in connection with a credit sale.

(k) The term "State" refers to any State, the Commonwealth of Puerto Rico, the District of Columbia, and any territory or possession of the United States.

(l) Any reference to any requirement imposed under this title of any provision thereof includes reference to the regulations of the Board under this title or the provision thereof in question.

Sec. 203. Regulations

The Board shall prescribe regulations to carry out the purposes of this title. These regulations may contain such classifications, differentiations, or other provisions, and may provide for such adjustments and exceptions for any class of transactions, as in the judgment of the Board are necessary or proper to effectuate the purposes of this title, to prevent circumvention or revision thereof, or to facilitate compliance therewith.

Sec. 204. Determination of interest charge

Except as otherwise provided by the Board, the amount of the interest charge in connection with any credit transaction shall be determined under the regulations of the Board as the sum of all charges payable directly or indirectly to the person by whom the credit is extended in consideration of the extension of credit.

Sec. 205. Authority for institution of credit controls

(a) Whenever the President determines that such action is necessary or appropriate for the purpose of preventing or controlling inflation generated by the extension of credit in an excessive volume, the President may authorize the Board to regulate and control any or all extensions of credit.

(b) The Board may, in administering this Act, utilize the services of the Federal Reserve banks and any other agencies, Federal or State, which are available and appropriate.

Sec. 206. Extent of control

The Board, upon being authorized by the President under section 205 and for such period of time as he may determine, may by regulation

(1) require transactions or persons or classes of either to be registered or licensed.

(2) prescribe appropriate limitations, terms, and conditions for any such registration or license.

(3) provide for suspension of any such registration or license for violation of any provision thereof or of any regulation, rule, or order prescribed under this Act.

(4) prescribe appropriate requirements as to the keeping of records and as to the form, contents, or substantive provisions of contracts, liens, or any relevant documents.

(5) prohibit solicitations by creditors which would encourage evasion or avoidance of the requirements of any regulation, license, or registration under this Act.

(6) prescribe the maximum amount of credit which may be extended on, or in connection with, any loan, purchase, or other extension of credit.

(7) prescribe the maximum rate of interest, maximum maturity, minimum periodic payment, maximum period between payments, and any other specification or limitation of the terms and conditions of any extension of credit.

(8) prescribe the methods of determining purchase prices or market values or other bases for computing permissible extensions of credit or required downpayment.

(9) prescribe special or different terms, conditions, or exemptions with respect to new or used goods, minimum original cash payments, temporary credits which are merely incidental to cash purchases, payment or deposits usable to liquidate credits, and other adjustments or special situations.

(10) prescribe maximum ratios, applicable to any class of either creditors or borrowers or both, of loans of one or more types or of all types

(A) to deposits of one or more types or of all types.

(B) to assets of one or more types or of all types.

(11) prohibit or limit any extensions of credit under any circumstances the Board deems appropriate.

Reports concerning the kinds, amounts, and characteristics of any extensions of credit subject to this title, or concerning circumstances related to such extensions of credit, shall be filed on such forms, under oath or otherwise, at such times and from time to time, and by such persons, as the Board may prescribe by regulation or order as necessary or appropriate for enabling the Board to perform its functions under this title. The Board may require any person to furnish, under oath or otherwise, complete information relative to any transaction within the scope of this title including the production of any books of account, contracts, letters, or other papers, in connection therewith in the custody or control of such person.

Sec. 208. Injunctions

Whenever it appears to the Board that any person has engaged, is engaged, or is about to engage in any acts or practices constituting a violation of any regulation under this title, it may in its discretion bring an action, in the proper district court of the United States or the proper United States court of any territory or other place subject to the jurisdiction of the United States, to enjoin such acts or practices, and upon a proper showing a permanent or temporary injunction or restraining order shall be granted without bond. Upon application of the Board, any such court may also issue mandatory injunctions commanding any person to comply with any regulation of the Board under this title.

Sec. 209. Civil penalties

(a) For each willful violation of any regulation under this title, the Board may assess upon any person to which the regulation applies, and upon any partner, director, officer, or employee thereof who willfully participates in the violation, a civil penalty not exceeding $1,000.

(b) In the event of the failure of any person to pay any penalty assessed under this section, a civil action for the recovery thereof may, in the discretion of the Board, be brought in the name of the United States.

Sec. 210. Criminal penalty

Whoever willfully violates any regulation under this title shall be fined not more than $1,000 or imprisoned not more than one year, or both.

TITLE III—SMALL BUSINESS ADMINISTRATION ACTIVITY

SEC. 301. The Small Business Administration shall promptly increase the level of its financing functions utilizing the business loan and investment fund established under section 4(c)(1)(B) of the Small Business Act (15 U.S.C. 633(c)(1)(B)) by $70,000,000 above the level prevailing at the time of enactment of this Act. The Small Business Administration shall submit to Congress a monthly report of its implementation of this section.

And the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House to the title of the bill, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the amendment of the House to the title of the bill, insert the following: "An Act to lower interest rates and fight inflation; to help housing, small business, and employment; to increase the availability of mortgage credit; and for other purposes."

And House agree to the same.

WRIGHT PATMAN,
WILLIAM A. BARRETT,
LEONOR K. SULLIVAN,
H. S. REUSS,
Managers on the Part of the House.
JOHN SPARKMAN,
WILLIAM PROXMIRE,
HARRISON A. WILLIAMS,
EDWARD W. BROOKE,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2577) to provide additional mortgage credit, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The Senate-passed bill proposed to extend Regulation Q authority to September 22, 1970, and provided for legislative authority for regulation of commercial paper borrowings by banks and bank holding companies. Further, the Senate-passed bill would have provided necessary authority to limit Eurodollar borrowing; would have reinstated Korean War-type voluntary credit restraint programs; and would have provided authority for the Secretary of the Treasury to make available to the Home Loan Bank Board an amount of up to $4 billion.

The House struck out all of the Senate bill after the enacting clause and substituted a new text and an amendment to the title. The committee of conference agreed to a substitute for the House amendment, and to a substitute for the amendment to the title.

Except for technical, clarifying, and con-

forming language, the analysis which follows explains the difference between the House amendment and the conference substitute.

EXTENSION OF REGULATION Q AUTHORITY

The managers on the part of the House insisted upon and prevailed in their position that Regulation Q authority should be extended to March 22, 1971, in place of the Senate provision which would have provided an extension of this authority to September 22, 1970.

EXTENSION OF FEDERAL DEPOSIT RATE CONTROL AUTHORITY TO NONFEDERALLY INSURED FINANCIAL INSTITUTIONS

The language contained in both the Senate and House bills was almost identical. The language provided for extension of Federal Deposit rate control authority to non-federally insured financial institutions where State officials lack comparable authority and non-insured savings deposits in the State exceed 20 percent of total savings deposits. This authority is temporary in nature, giving State Governments an opportunity to adopt comparable deposit rate control authority for state banking institutions not insured by a Federal agency. The provisions of the House and Senate bills were adopted without objection in both Houses on the recommendation of Members of both bodies from the State of Massachusetts. This provision has effect only in the State of Massachusetts. None of the provisions of this section apply to credit unions. The House accepted the Senate language.

SECONDARY MARKET AUTHORITY FOR THE FEDERAL HOME LOAN BANK SYSTEM

The managers on the part of the Senate insisted upon and prevailed in their position that while in concept this authority may be worthwhile, there are so many unknowns as to how the program would operate that this provision should not be enacted at this time and should be reserved for further study.

CHANGING INSURANCE PREMIUM ACCOUNTING FOR THE FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

The managers on the part of the House insisted upon and prevailed in their position that this section contained in the House amendment would simplify the premium structure of the FSLIC and, more importantly, make additional funds available for housing without in any way jeopardizing the soundness of the FSLIC insurance fund.

LEGISLATIVE AUTHORITY FOR REGULATION OF COMMERCIAL PAPER BORROWING BY BANKS AND BANK HOLDING COMPANIES

The language regarding this authority was similar in both Senate and House bills, except that the House language provided not only authority for the Federal Reserve Board, under Regulation Q, to regulate the amount of interest which could be paid on the issuance of commercial paper by banks and bank holding companies, but also granted power for the Federal Reserve Board to apply reserve requirements on the issuance of such paper. The House language prevailed in conference.

LEGISLATIVE AUTHORITY TO LIMIT EURODOLLAR BORROWING

The Senate and House language in this instance was identical. This language would allow the Federal Reserve Board to establish reserve requirements on Eurodollar borrowing by commercial banks.

NATIONAL BANK MORTGAGE LOAN LIMITS

The House language provided that over the next fifteen months national banks would have the authority to make mortgage loans up to 90 percent of the appraised value of the property and to permit maturities of up to 30 years instead of the present limits of 80 percent for 25 years. There was no similar language in the Senate bill. The Senate prevailed in its position, due to the fact that there had been no indication whatsoever that national banks wanted, or would take advantage of this liberalized authority to provide funds for residential home mortgages.

INCREASE IN FDIC AND FSLIC INSURANCE

The House amendment provided for an increase in the maximum insurance protection under FDIC and FSLIC deposit insurance programs from the existing $15,000 to $25,000. The Senate had no comparable provision. The House prevailed in its desire to increase this insurance for both programs but accepted a Senate amendment limiting the increase to $20,000 rather than $25,000.

STANDBY AUTHORITY FOR SELECTIVE CREDIT CONTROL

The House amendment provided for Presidential standby authority to request the Federal Reserve to institute selective credit controls when necessary to curb inflation. The comparable Senate provision provided for the suspension of the antitrust laws to permit reinstatement of the Korean War-type of voluntary credit control agreements. The conferees decided that both provisions should be included in the legislation, based on the rationale that the President should have all necessary powers and discretion to fight inflation, including standby credit control authority and the right to encourage voluntary agreements to restrain credit. By providing both of the different types of authority found in the Senate and House versions of the legislation, it was felt that the President would be afforded the broadest possible spectrum of alternatives in fighting inflation, curbing unnecessary extensions of credit, and channeling credit into housing and other essential purposes.

SMALL BUSINESS ADMINISTRATION LENDING AUTHORITY

The House amendment provided authority for the use of $70 million of direct lending by the Small Business Administration in its small business investment company loan program and further directed that these monies be released from funds now available and appropriated for this purpose in the SBA business loan and investment revolving fund. The Senate bill contained no comparable language. The Senate conferees agreed to accept the House language with an amendment to eliminate any possible constitutional question that might be raised concerning the procedure for clearing appropriations within the Executive Branch. The conferees were insistent upon the principle contained in Title III of the House bill that $70 million of funds be made available immediately for the SBIC program out of the existing business loan and investment fund.

FEDERAL HOME LOAN BANK BOARD BORROWING AUTHORITY

The Senate bill substantially amended section 11(i) of the Federal Home Loan Bank Act. That section contains authority for purchase by the Secretary of the Treasury of obligations of the Federal Home Loan Banks. The Senate amendment increased the amount of this borrowing authority to $4 billion. Under existing law, the limit is $1 billion. The Senate also amended the provision of this section relating to the terms and conditions of such purchases. Existing law provides—

Each purchase of obligations by the Secretary of the Treasury under this subsection shall be upon such terms and conditions as to yield a return at a rate determined by the Secretary of the Treasury, taking into consideration the current average rate on outstanding marketable obligations of the United States as of the last day of the month preceding the making of such purchase.

The conference substitute, like the Senate amendment, provides—

Each purchase of obligations by the Secretary of the Treasury under this subsection shall be upon terms and conditions as shall be determined by the Secretary of the Treasury and shall bear such rate of interest as may be determined by the Secretary of the Treasury taking into consideration the current average market yield for the month preceding the month of such purchase on outstanding marketable obligations of the United States.

The House insisted upon the addition of a further amendment to section 11(i) to make sure that additional borrowing authority will be of some practical assistance to the housing industry. This amendment is in the form of a new paragraph, added at the end of section 11(i), which requires the Secretary of the Treasury to use the authority—when alternative means cannot effectively be employed, to permit members of the Home Loan Bank System to continue to supply reasonable amounts of funds to the mortgage market whenever the ability to supply such funds is substantially impaired during periods of monetary stringency and rapidly rising interest rates. . . .

The Senate amendment had contained a provision expressing the sense of Congress as the use of the new authority, but the managers on the part of the House prevailed in their insistence that the new authority not be granted unless it was modified by an express direction as to the circumstances of its utilization. The determination of whether and when these circumstances arise obviously involves the exercise of judgment, and the responsibility for this decision rests ultimately with the Secretary.

WRIGHT PATMAN,
WILLIAM A. BARRETT,
LEONOR K. SULLIVAN,
HENRY S. REUSS,
Managers on the Part of the House.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. POLLOCK (at the request of Mr. ARENDS), for today on account of official business as a member of the House Committee on Merchant Marine and Fisheries.

To Mr. PEPPER (at the request of Mr. SIKES), for today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. LUJAN) and to revise and extend their remarks and include extraneous matter:)

Mr. FISH for 20 minutes, today.

Mr. PRICE of Texas, for 5 minutes, today.

Mr. MILLER of Ohio, for 5 minutes, today.

Mr. WILLIAMS, for 10 minutes, today.

Mr. HOGAN, for 1 hour, today.

Mr. MILLER of California in five instances.
Mr. HAGAN in two instances.

ENROLLED BILLS SIGNED

Mr. FRIEDEL, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 8449. An act to amend the act entitled "An act to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon," approved March 4, 1907.

ADJOURNMENT

Mr. BURLISON of Missouri. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 57 minutes p.m.), the House adjourned until tomorrow, Friday, December 19, 1969, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

1423. Under clause 2 of rule XXIV, a letter from the Comptroller General of the United States, transmitting a report on management of the logistics airlift system contracted for by the Air Force, was taken from the Speaker's table, referred to the Committee on Government Operations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MORGAN: Committee of conference. Conference report on H.R. 14580 (Rept. No. 91–767). Ordered to be printed.

Mr. HENDERSON: Committee on Post Office and Civil Service S. 2325. An act to amend title 5, United States Code, to provide for additional positions in grades GS–16, GS–17, and GS–18; with an amendment (Rept. No. 91–768). Referred to the Committee of the Whole House on the State of the Union.

Mr. PATMAN: Committee of Conference. Conference report on S. 2577 (Rept. No. 91–769). Ordered to be printed.

Mr. SIKES: Committee of conference. Conference report on H.R. 14751 (Rept. No. 91–770). Ordered to be printed.

Mr. BOLAND: Committee of conference. Conference report on H.R. 14794 (Rept. No. 91–771). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ARENDS (for himself, Mr. SPRINGER, Mr. COLLIER, Mr. MICHEL, Mr. DERWINSKI, Mr. ANDERSON of Illinois, Mr. FINDLEY, Mr. MCCLORY, Mrs. REID of Illinois, Mr. ERLENBORN, Mr. RAILSBACK, and Mr. CRANE):

H.R. 15317. A bill to provide that the Federal office building and U.S. courthouse in Chicago, Ill., shall be named the "Everett McKinley Dirksen Building East" and that the Federal office building to be constructed in Chicago, Ill., shall be named the "Everett McKinley Dirksen Building West" in memory of the late Everett McKinley Dirksen, a Member of Congress of the United States from the State of Illinois from 1933 to 1969; to the Committee on Public Works.

By Mr. BRAY:

H.R. 15318. A bill to amend the Tariff Schedules of the United States with respect to the rate of duty on whole skins of mink; to the Committee on Ways and Means.

By Mr. COHELAN (for himself, Mr. KOCH, Mr. ADAMS, Mr. LEGGETT, Mr. WALDIE, Mr. MCCARTHY, Mr. BOLAND, Mr. DADDARIO, Mr. MOSS, Mr. CLAY, Mrs. MINK, Mr. FRASER, Mr. STOKES, Mr. KASTENMEIER, Mr. REES, Mr. HAWKINS, Mr. DIGGS, Mr. HOWARD, Mr. LOWENSTEIN, Mrs. CHISHOLM, Mr. BURTON of California, Mr. MIKVA, Mr. FARBSTEIN, Mr. RYAN, and Mr. BROWN of California):

H.R. 15319. A bill to establish a Commission to study and investigate incidents of alleged mistreatment or other misconduct directed against citizens of South Vietnam by U.S. troops operating in Mylai 4 hamlet, Quang Nai Province on or about March 1968; to the Committee on Armed Services.

By Mr. COHELAN (for himself, Mr. ROYBAL, Mr. ROSENTHAL, Mr. SCHEUER, Mr. ST. ONGE, Mr. HELSTOSKI, Mr. OTTINGER, Mr. MEEDS, and Mr. KYROS):

H.R. 15320. A bill to establish a commission to study and investigate incidents of alleged mistreatment or other misconduct directed against citizens of South Vietnam by U.S. troops operating in Mylai 4 Hamlet, Quang Nai Province on or about March 1968; to the Committee on Armed Services.

By Mr. CORMAN:

H.R. 15321. A bill to improve education by increasing the freedom of the Nation's teachers to change employment across State lines without substantial loss of retirement benefits through establishment of a Federal-State program; to the Committee on Education and Labor.

By Mr. FRASER:

H.R. 15322. A bill to provide for the exchange of governmental officials between the United States and the Union of Soviet Socialist Republics; to the Committee on Rules.

By Mr. HORTON (for himself, Mr. FULTON of Pennsylvania, Mr. HELSTOSKI, Mr. KYROS, Mr. OTTINGER, Mr. ROBISON, Mr. RODINO, Mr. WIDNALL, and Mr. WOLFF):

H.R. 15323. A bill to extend the fourth-class mail rate for books and educational materials to photographic prints mailed to and from amateur photographers and nonprofit photographic exhibitions, photographic societies, and photographic print study groups; to the Committee on Post Office and Civil Service.

By Mr. MCFALL:

H.R. 15324. A bill to authorize and foster joint rates for international transportation of property, to facilitate the transportation of such property, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. MATSUNAGA:

H.R. 15325. A bill to exclude from gross income the first $750 of interest received on deposits in thrift institutions; to the Committee on Ways and Means.

By Mr. OBEY:

H.R. 15326. A bill to improve farm income and insure adequate supplies for agricultural commodities by extending and improving certain commodity programs; to the Committee on Agriculture.

By Mr. RUPPE:

H.R. 15327. A bill to amend the Internal Revenue Code of 1954 to provide a tax credit for investments in certain economically lagging regions; to the Committee on Ways and Means.

By Mr. ST. ONGE:

H.R. 15328. A bill to authorize the payment to local governments of sums in lieu of taxes and special assessments with respect to certain Federal real property, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. SCHEUER:

H.R. 15329. A bill to assist State and local criminal justice systems in the rehabilitation of criminal and youth offenders, and the prevention of juvenile delinquency and criminal recidivism by providing for the development of specialized curriculums, the

training of educational personnel, and research and demonstration projects; to the Committee on Education and Labor.

By Mr. SEBELIUS:

H.R. 15330. A bill to provide additional benefits for optometry officers of the uniformed services; to the Committee on Armed Services.

By Mr. SPRINGER:

H.R. 15331. A bill to promote the advancement of biological research in aging through a comprehensive and intensive 5-year program for the systematic study of the basic origins of the aging process in human beings; to the Committee on Education and Labor.

By Mr. STAFFORD (for himself, Messrs. CONTE, HARVEY, MORSE, MOSHER, ROBISON, and RIEGLE):

H.R. 15332. A bill to establish a Commission to study and investigate incidents of alleged mistreatment or other misconduct directed against citizens of South Vietnam by U.S. troops operating in Mylai, Quang Nai Province on or about March 1968; to the Committee on Armed Services.

By Mr. ULLMAN:

H.R. 15333. A bill to amend the Interstate Commerce Act in order to give the Interstate Commerce Commission additional authority to alleviate freight car shortages, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ADDABBO:

H.R. 15334. A bill to amend title XVIII of the Social Security Act to provide payment for chiropractors' services under the program of supplementary medical insurance benefits for the aged; to the Committee on Ways and Means.

By Mr. BOGGS:

H.R. 15335. A bill to amend section 105 of the Clean Air Act to authorize increased grants to be made to certain air pollution control agencies not now eligible therefor; to the Committee on Interstate and Foreign Commerce.

By Mr. BENNETT (for himself, Mr. ADAIR, Mr. BARING, Mr. BEVILL, Mr. BROCK, Mr. BUCHANAN, Mr. BYRNE of Pennsylvania, Mr. CARTER, Mr. CORBETT, Mr. DANIEL of Virginia, Mr. DENT, Mr. DUNCAN, Mr. FISHER, Mr. FULTON of Pennsylvania, Mrs. GREEN of Oregon, Mr. KING, Mr. KUYKENDALL, Mr. LEGGETT, Mr. LUKENS, Mr. MADDEN, Mr. MATSUNAGA, Mr. RARICK, Mr. WHITEHURST, and Mr. YATRON):

H.R. 15336. A bill to provide Federal grants to assist elementary and secondary schools to carry on programs to teach moral and ethical principles; to the Committee on Education and Labor.

By Mr. CLARK:

H.R. 15337. A bill to declare and determine the policy of the Congress with respect to the primary authority of the several States to control, regulate, and manage fish and wildlife within their territorial boundaries; to confirm to the several States such primary authority and responsibility with respect to the management, regulation, and control of fish and wildlife on lands owned by the United States; and to specify the exceptions applicable thereto; and to provide procedure under which Federal agencies may otherwise regulate the taking of fish and game on such lands; to the Committee on Merchant Marine and Fisheries.

By Mr. GALIFIANAKIS:

H.R. 15338. A bill to encourage the growth of international trade on a fair and equitable basis; to the Committee on Ways and Means.

By Mr. HOGAN:

H.R. 15339. A bill to amend certain provisions of criminal law applicable in the District of Columbia with respect to added punishment for committing a crime when armed; to the Committee on the District of Columbia.

H.R. 15340. A bill to amend title 14 of the District of Columbia Code with respect to competency of witnesses; to the Committee on the District of Columbia.

H.R. 15341. A bill to amend certain provisions of criminal law applicable in the District of Columbia with respect to rape; to the Committee on the District of Columbia.

H.R. 15342. A bill to amend certain provisions of criminal law applicable in the District of Columbia with respect to resisting arrest; to the Committee on the District of Columbia.

H.R. 15343. A bill to amend certain provisions of criminal law applicable in the District of Columbia with respect to burglary in the second degree; to the Committee on the District of Columbia.

By Mr. LONG of Louisiana:

H.R. 15344. A bill to amend the Federal Food, Drug, and Cosmetic Act to include a definition of food supplements, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. MOORHEAD:

H.R. 15345. A bill to create a Federal Insurance Guarantee Corporation to protect the American public against certain insurance company insolvencies; to the Committee on Banking and Currency.

By Mr. MURPHY of Illinois:

H.R. 15346. A bill to repeal the Emergency Detention Act of 1950 (title II of the Internal Security Act of 1950); to the Committee on Internal Security.

By Mr. O'KONSKI:

H.R. 15347. A bill to authorize the payment of legal fees for accused persons in connection with the events alleged to have occurred at Mylai 4, Republic of Vietnam, during March 1968; to the Committee on Armed Services.

By Mr. SCHEUER (for himself, Mr. BINGHAM, Mr. BOLAND, Mr. BROWN of Michigan, Mr. BURTON of California, Mr. BUTTON, Mrs. CHISHOLM, Mr. CLAY, Mr. EDWARDS of California, Mr. ESCH, Mr. HOWARD, Mr. KOCH, Mr. MATSUNAGA, Mr. MIKVA, Mr. OTTINGER, Mr. POWELL, Mr. THOMPSON of New Jersey, and Mr. TUNNEY):

H.R. 15348. A bill to amend the Education Professions Development Act to permit training of school board members; to the Committee on Education and Labor.

By Mr. STAGGERS:

H.R. 15349. A bill to amend the Railway Labor Act in order to change the number of carrier representatives and labor organization representatives on the National Railroad Adjustment Board, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. HOGAN:

H.R. 15350. A bill to provide that certain sentences imposed for the conviction of crimes in the District of Columbia shall be deemed to be imposed to run consecutively; to the Committee on the District of Columbia.

By Mr. THOMPSON of New Jersey:

H.R. 15351. A bill to authorize additional funds for the operation of the Franklin Delano Roosevelt Memorial Commission; to the Committee on House Administration.

By Mr. WHITTEN:

H.J. Res. 1036. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. PRICE of Texas:

H. Res. 760. Resolution relating to the maintenance of United States sovereignty and jurisdiction over Panama Canal; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BYRNE of Pennsylvania:

H.R. 15352. A bill for the relief of Leopold Morse Tailoring Co.; to the Committee on the Judiciary.

By Mr. DELANEY:

H.R. 15353. A bill for the relief of Ottorino Ferrini; to the Committee on the Judiciary.

By Mr. DONOHUE:

H.R. 15354. A bill for the relief of Anthony P. Miller, Inc.; to the Committee on the Judiciary.

SENATE—*Thursday, December 18, 1969*

(Legislative day of Tuesday, December 16, 1969)

(Legislative day of Tuesday, December 16, 1969)

The Senate met at 9 o'clock a.m., on the expiration of the recess, and was called to order by the Acting President pro tempore (Mr. METCALF).

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

O Thou creator and restorer of life, we thank Thee for Thy mercies which are new every morning. We thank Thee for work to do and that it may be done for others in this place. Enable Thy servants here, upon whose judgment rest solemn responsibilities of public welfare, to keep ever before them the vision of Thy higher kingdom. Renew them in weariness, reinvigorate them in fatigue, and give them inner compensation for long, strenuous, and confining hours. Help them to bear the fret of care, the sting of criticism, and unapplauded toil. May the highest truth of Christmas illuminate every duty, and may they be given strength to follow the One who came to set men free.

In His name we pray. Amen.

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Arizona is recognized for not to exceed 20 minutes.

Mr. MANSFIELD. Mr. President, will the Senator yield to me for 1 minute, without losing any time or his right to the floor?

Mr. GOLDWATER. I yield.

Mr. MANSFIELD. I thank the distinguished Senator from Arizona, and I assure him that if he needs a few more minutes, the time will be available.

Mr. GOLDWATER. I thank the Senator.

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Journal of

the proceedings of Wednesday, December 17, 1969, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

HORSE PROTECTION ACT OF 1969

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 606, S. 2543.

The ACTING PRESIDENT pro tempore. The bill will be stated by title.

The BILL CLERK. A bill (S. 2543) to protect interstate and foreign commerce by prohibiting the movement in such commerce of horses which are "sored," and for other purposes.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Commerce with amendments, on page 1, after the enacting clause, strike out:

SEC. 2. (a) A horse shall be considered to be sored if, for the purpose of affecting its gait, a blistering agent has been applied internally or externally to any of the legs, ankles, feet, or other parts of the horse, or if burns, cuts, or lacerations have been inflicted on the horse, or if a chemical agent, or tacks, nails, or wedges have been used on the horse, or if any other method or device has been used on the horse, including, but not limited to chains or boots, which may reasonably be expected currently (1) to result in physical pain to the horse when walking, trotting, or otherwise moving, or (2) to cause extreme fear or distress to the horse.

And, in lieu thereof, insert:

SEC. 2. (a) A horse shall be considered to be sored if, for the purpose of affecting its gait—

(1) a blistering agent has been applied internally or externally to any of the legs, ankles, feet, or other parts of the horse;

(2) burns, cuts, or lacerations have been inflicted on the horse;

(3) a chemical agent, or tacks, nails, or wedges have been used on the horse; or

(4) any other method or device has been used on the horse, including, but not limited to chains or boots;

which may reasonably be expected (A) to result in physical pain to the horse when walking, trotting, or otherwise moving, (B) to cause extreme fear or distress to the horse, or (C) to cause inflammation.

On page 3, line 14, after the word "burdens", insert "such"; in the same line, after the word "commerce;", insert "and"; on page 4, line 4, after the word "in", strike out "commerce." and insert "commerce, unless such person can establish that he took all reasonable precautions to prevent the showing or exhibiting of such sored horse"; in line 18, after the word "States," insert "or such other person or persons as the Secretary of Agriculture (hereinafter referred to in this act as the 'Secretary') may by regulation designate"; in line 21, after the word "Secretary", strike out "of Agriculture may by regulation prescribe. in order to enable the representatives of said Secretary to determine whether any horses were moved to or from such show or exhibition in commerce, the identity of the owner or exhibitor of any horse at the show or exhibition, and other facts necessary for the effective enforcement of this Act, and the"; on page 5 line 2, after the amendment just stated, insert "The"; in line 3, after the word "exhibition", insert "or such other person or persons as the Secretary may by regulation designate"; in line 5, after the word "Secretary", strike out "of Agriculture"; after line 7, strike out:

SEC. 6. Any person who violates any provision of this Act shall be fined not more than $500 or imprisoned not more than six months, or both.

And, in lieu thereof, insert:

SEC. 6. (a) Any person who violates any provision of this Act or any regulation issued thereunder, other than a violation the penalty for which is prescribed by subsection (b) of this section, shall be assessed a civil penalty by the Secretary of not more than $1,000 for each such violation. No penalty shall be assessed unless such person is given notice and opportunity for a hearing with respect to such violation. Each violation shall be a separate offense. Any such civil penalty may be compromised by the Secretary. Upon any failure to pay the penalty assessed under this subsection, the Secretary shall request the Attorney General to institute a civil action in a district court of the United States for any district in which such person is found or resides or transacts business to collect the penalty and such court shall have jurisdiction to hear and decide any such action.

(b) Any person who willfully violates any provision of this Act or any regulation issued thereunder shall be fined not more than $2,000 or imprisoned not more than six months, or both.

On page 6, line 5, after the word "Secretary", strike out "of Agriculture"; in line 6, after the word "a", insert "willful"; in line 11, after the word "Secretary", strike out "of Agriculture shall"; in line 12, after the word "Act," insert "shall utilize"; in line 13, after the word "practicable", strike out "utilize"; in line 14, after the word "Secretary", strike out "of Agriculture"; in line 16, after the word "consent", insert "and with or without reimbursement"; in line 18, after the word "Secretary", strike out "of Agriculture"; after line 20, insert a new section, as follows:

SEC. 10. No provision of this Act shall be construed as indicating an intent on the part of the Congress to occupy the field in which such provision operates to the exclusion of the law of any State on the same subject matter, unless there is a direct and positive conflict between such provision and the law of the State so that the two cannot be reconciled or consistently stand together. Nor shall any provision of this Act be construed to exclude the Federal Government from enforcing the provisions of this Act within any State, whether or not such State has enacted legislation on the asme subject, it being the intent of the Congress to establish concurrent jurisdiction with the States over such subject matter. In no case shall any such State take any action pursuant to this section involving a violation of any such law of that State which would preclude the United States from enforcing the provisions of this Act against any person.

On page 7, after line 11, insert a new section, as follows:

SEC. 11. On or before the expiration of thirty calendar months following the date of enactment of this Act, and every twenty-four-calendar-month period thereafter, the Secretary shall submit to the Congress a report upon the matters covered by this Act, including enforcement and other actions taken thereunder, together with such recommendations for legislative and other action as he deems appropriate.

At the beginning of line 19, change the section number from "10," to "12"; and in line 20, after the word "sums" insert "not to exceed $100,000 annually,"; so as to make the bill read:

S. 2543

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Horse Protection Act of 1969".

SEC. 2. (a) A horse shall be considered to be sored, for the purpose of affecting its gait—

(1) a blistering agent has been applied internally or externally to any of the legs, ankles, feet, or other parts of the horse;

(2) burns, cuts, or lacerations have been inflicted on the horse;

(3) a chemical agent, or tacks, nails, or wedges have been used on the horse; or

(4) any other method or device has been used on the horse, including, but not limited to, chains or boots;

which may reasonably be expected (A) to result in physical pain to the horse when walking, trotting, or otherwise moving, (B) to cause extreme fear or distress to the horse, or (C) to cause inflammation.

(b) As used in this Act, the term "commerce" means commerce between a point in any State or possession of the United States (including the District of Columbia and the Commonwealth of Puerto Rico) and any point outside thereof, or between points within the same State or possession of the United States (including the District of Columbia and the Commonwealth of Puerto Rico) but through any place outside thereof, or within the District of Columbia, or from any foreign country to any point within the United States.

SEC. 3. The Congress hereby finds (1) that the practice of soring horses for the purposes of affecting their natural gait is cruel and inhumane treatment of such animals; (2) that the movement of sored horses in commerce adversely affects and burdens such commerce; and (3) that horses which are sored compete unfairly with horses moved in commerce which are not sored.

SEC. 4. (a) It shall be unlawful for any person to ship, transport, or otherwise move, or deliver or receive for movement, in commerce, for the purpose of showing or exhibition, any horse which such person has reason to believe is sored.

(b) It shall be unlawful for any person to show or exhibit, or enter for the purpose of showing or exhibiting, in any horse show or exhibition, any horse which is sored if that horse or any other horse was moved to such show or exhibition in commerce.

(c) It shall be unlawful for any person to conduct any horse show or exhibition in which there is shown or exhibited a horse which is sored, if any horse was moved to such show or exhibition in commerce, unless such person can establish that he took all reasonable precautions to prevent the showing or exhibiting of such sored horse.

SEC. 5. (a) Any representative of the Secretary of Agriculture is authorized to make such inspections of any horses which are being moved, or have been moved, in commerce and to make such inspections of any horses at any horse show or exhibition within the United States to which any horse was moved in commerce, as he deems necessary for the effective enforcement of this Act, and the owner or other person having custody of any

such horse shall afford such representative access to and opportunity to so inspect such horse.

(b) The person or persons in charge of any horse show or exhibition within the United States, or such other person or persons as the Secretary of Agriculture (hereinafter referred to in this Act as the "Secretary") may by regulation designate, shall keep such records as the Secretary may by regulation prescribe. *The* person or persons in charge of any horse show or exhibition, *or such other person or persons as the Secretary may by regulation designate,* shall afford the representatives of the Secretary access to and opportunity to inspect and copy such records at all reasonable times.

SEC. 6. (a) Any person who violates any provision of this Act or any regulation issued thereunder, other than a violation the penalty for which is prescribed by subsection (b) of the section, shall be assessed a civil penalty by the Secretary of not more than $1,000 for each such violation. No penalty shall be assessed unless such person is given notice and opportunity for a hearing with respect to such violation. Each violation shall be a separate offense. Any such civil penalty may be compromised by the Secretary. Upon any failure to pay the penalty assessed under this subsection, the Secretary shall request the Attorney General to institute a civil action in a district court of the United States for any district in which such person is found or resides or transacts business to collect the penalty and such court shall have jurisdiction to hear and decide any such action.

(b) Any person who willfully violates any provision of this Act or any regulation issued thereunder shall be fined not more than $2,000 or imprisoned not more than six months, or both.

SEC. 7. Whenever the Secretary believes that a willful violation of this Act has occurred and that prosecution is needed to obtain compliance with the Act, he shall inform the Attorney General and the Attorney General shall take such action with respect to such matter as he deems appropriate.

SEC. 8. The Secretary in carrying out the provisions of this Act, shall utilize, to the maximum extent practicable, the existing personnel and facilities of the Department of Agriculture. The Secretary is further authorized to utilize the officers and employees of any State, with its consent, and with or without reimbursement, to assist him in carrying out the provisions of this Act.

SEC. 9. The Secretary is authorized to issue such rules and regulations as he deems necessary to carry out the provisions of this Act.
